GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 31st December, 1896.

NOTIFICATIONS.

No. 3624 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 26th December 1896:—

No. 443 of 1896.—James Alexander Main, engineer, of Clydesdale iron works, Possilpark, Glasgow, for improvements in apparatus for withering and drying tea leaf.

No. 444 of 1896.—Edward Lennon Cantwell, civil engineer, and patent agent, of 5, Old Post Office street, Calcutta, for improvements in portable sugarcane crushing mills, and for improved appliances connected therewith.

No. 445 of 1896.—Charles Henry Parker, late an engine driver of the Bengal-Nagpore Railway, at present of No. 28, Waterloo street, Calcutta, for improvements in rail joints and fish-plates.

No. 3625 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 185 of 1896.—M. B. Mahadev, proprietor of Messrs. Mahadev and Narayan, printers, 25, Popham's Broadway, Madras, for a water lift. (Specification filed 14th December 1896.)

No. 238 of 1896.—George John Altham, gentleman, of Swansea, in the county of Bristol and state of Massachussets, United States of America, for oil engines. (Specification filed 21st December 1896.)

No. 340 of 1896.—John George Gough and William Edward Harding, both of Young, in the colony of New South Wales, for improvements in driving gear for cycles, and for other purposes. (Specification filed 18th December 1896.)

No. 350 of 1896.—Romeo Grilli, cycle manufacturer, of 15, Sumskaia, Charkov, Russia, for improvements in or relating to bicyles. (Specification filed 21st December 1896.)

No. 352 of 1896.—John Melrose Arnot, F.C.S., of Bally, Uttarpara, Bengal, for improvements in or connected with the closing of boxes, jars, canisters, and the like. (Specification filed 21st December 1896.)

No. 361 of 1896.—Daniel Mayer, pianoforte maker, of 18, Great Marlborough street, London, for improvements in or relating to resonators for stringed instruments, particularly pianofortes. (Specification filed 17th December 1896.)

No. 3626 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 52 of 1888.—William Jackson, engineer, Thorn Grove, Mannofield, Aberdeen, for improvements in machinery or apparatus for reducing or breaking tea. (From 4th January 1897 to 4th January 1898.)

No. 50 of 1890.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, for improvements in apparatus for drying tea leaves, coffee, grain, or other produce. (From 26th May 1897 to 26th May 1898.)

No. 31 of 1890.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, for improvements in apparatus for subjecting substances to the action of air, more especially intended for use in withering or wilting tea leaves, but applicable also to drying coffee, grain, and other produce. (From 4th June 1897 to 4th June 1898.)

No. 124 of 1890.—James Frederick Hodgetts, late professor of Nautics, London, for improvements in the construction of hulls of iron clads or other vessels. (From 23rd December 1896 to 23rd December 1897.)

No. 222 of 1891.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, for improvements in machinery or apparatus for rolling tea leaf. (From 4th January 1897 to 4th January 1898.)

No. 325 of 1891.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, for improvements in application of air blast or exhaust apparatus for keeping tea leaf cool, whilst being operated on in tea rolling machines. (From 16th September 1897 to 16th September 1898.)

No. 100 of 1892.—Samuel Cleland Davidson, merchant, of Sirocco works, Belfast, for improvements in apparatus for drying tea or other substances. (From 7th January 1897 to 7th January 1898.)

No. 193 of 1892.—Edward Waller Stoney, civil engineer, of Madras, for an invention to be called "E. W. Stoney's patent safety T. switch handle." (From 19th December 1896 to 19th December 1897.)

No. 304 of 1892.—John Harper, manager, Marshall Sons & Co., Ld., 99, Clive street, Calcutta, for improvements in clamps for holding together material compressed by hydraulic or other pressure. (From 7th February 1897 to 7th February 1898.)

No. 76 of 1893.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, for improvements in air heating stoves, more especially intended for use with machinery or apparatus for drying tea. (From 22nd June 1897 to 22nd June 1898.)

No. 346 of 1893.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, for improvements in tubular heating stoves, more especially intended for heating air for use in drying tea or other produce. (From 22nd December 1897 to 22nd December 1898.)

No. 347 of 1893.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, for improvements in apparatus for subjecting materials to the action of hot air or for analogous operations, more especially intended for use in drying tea leaves, coffee, and other produce. (From 22nd December 1897 to 22nd December 1898.)

No. 3627 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorizing others so to do has ceased :—

No. 46 of 1892.—Eva Jennie Hall's invention for improvements in and relating to needles for use in sewing machines. (Specification filed 23rd September 1892.)

No. 141 of 1892.—Maneklall Motilall Parikh's invention for improvements in yarn warping machinery or apparatus (Specification filed 24th September 1892.)

No. 194 of 1892.—Uriah Cummings' invention for pulverizing machines. (Specification filed on the 23rd September 1892.)

No. 223 of 1892.—Carl Thomas Blanch Brain's invention for improvements in power conduits for tramways or railways, and in electrical connections therefor. (Specification filed 26th September 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th 1896) lie in the visitors' room of the Patents Office for ten days from the date o the *Gazette of India* in which their filing may have been notified; or, if the the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.

½ " R 9, " R9-8.

¼ " R4-8, " R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০

½ আধ " " ৯৲ " ৯৲০

¼ সিকি " " ৪৲৮ " ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

METEOROLOGICAL PUBLICATIONS FOR SALE.

At the Meteorological Office, No. 5, Russell Street, Calcutta, at the prices specified below:—

Hand-book of Cyclonic Storms in the Bay of Bengal for the use of Sailors, describing the phenomena of Cyclonic Storms and Cyclones in the Bay of Bengal, and giving a brief account of six typical Bay of Bengal Cyclonic Storms. It also gives practical hints to sailors respecting Cyclonic Storms in the Bay. Demy, 212 pages, 29 plates (shewing diurnal oscillation of barometer at different Latitudes and Longitudes, mean monthly barometric height, tracks of different Cyclonic Storms, etc., etc.) R5.

Rainfall Map of India in two sheets, scale 64 miles to one inch, showing the annual distribution of rainfall in India (in colours). R3.

Instructions to Observers of the India Meteorological Department, in which are described in detail the various Meteorological instruments in use at the Meteorological observatories, with full instructions how to read them, etc. Demy, 103 pages. R3.

Tables for the Reduction of Meteorological Observations in India. This book contains tables for reducing barometric observations taken at different heights, and for calculating humidity and vapour tension, etc., etc. R2.

Barometer, Wind and Current Charts of the Bay of Bengal and adjacent sea, north of the equator. R5.

Charts of the Bay of Bengal and adjacent sea north of the equator, showing the specific gravity, temperature, and currents of the sea surface. R1-8.

Barometer, Wind and Current Charts of the Arabian Sea and the adjacent portion of the North Indian Ocean. R5.

Monthly Weather Review of India, giving a summary of the chief features of the weather in India and containing discussions on atmospheric pressure, barometric depressions, temperature of the air, winds, rainfall, etc. It also contains all available information about snowfall in the mountain districts to the north and north-west of India, and an abstract of observations taken at about 200 observatories in India. Published *monthly*. R1 per month or R12 per annum. Postage 1*a*. 6*p*. for each copy outside Calcutta.

India Daily Weather Report and Chart, containing observations recorded at 8 A M. at 147 observatories, with a Chart shewing the distribution of atmospheric pressure and rainfall all over India, and a brief summary of the chief features of the weather of the day. Issued *daily* from the Simla Meteorological Office. Monthly subscription R2, and postage annas 8.

JOHN ELIOT,

Meteorological Reporter to the Govt. of India.

List of Books for sale at the Library of the Asiatic Society of Bengal, No. 57, Park Street, Calcutta, and obtainable from the Society's Agents, Messrs. Luzac & Co., 46, Great Russell Street, London, W. C., and Mr. Otto Harrassowitz, Bookseller, Leipzig, Germany.

Complete copies of those works marked with an asterisk cannot be supplied—some of the Fasciculi being out of stock.*

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials	(1895),	R2-0.
,,	II.	Masonry	(1891),	R1-4.
,,	III.	Carpentry	(1889),	R1-4.
,,	IV.	Earthwork	(1892),	R1-4.
,,	V.	Tools and Plant	(never published).	

VOLUME II.*

Section VI.	Buildings	(1891),	R1-4.
,, VII.	Bridges	(in the Press).	
,, VIII.	Roads	(in the Press).	
,, IX.	Railways	(1891),	R1-4.
,, X.	Irrigation Works	(1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8.

,, II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition). with Curve Table (in the Press).

XIII. Drawing (by Lieut. R. Pulford, R.E.).† R8.

XIIIa. Drawing, First Principles of Geometrical by do.) (4th edition). R1-4.

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

... books are out of stock, and complete copies cannot be supplied.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4a.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth and bound (in the Press). R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. R1-4.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs. By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12a.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E. R2-4.

Graphic Hydraulic Diagram for Channels in earth, etc. By R. G. Kennedy, Esq., Executive Engineer, R7-8.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Bolleau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Bolleau's Tables of 'Log sin² ½ P (for computing time) 4a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (in the Press).

Cape's Geometry. R1-4.

,, Mechanics. R1.

Military Topography. 8a.

HINDUSTANI.

Elements of Hindustani Grammar (in the Press).

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II, each part 4a.

Short Account of Ganges Canal (English and Urdu). 8a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small. Each R1-4.
Surveying Field-Books (ruled). R1.
Levelling Field-Books (English Pattern). R1-8.
,, ,, (Canal ,,). R1-8.
,, ,, (College ,,). R2-0.
P. W. D. Note-Book. R1-4.
,, **Measurement Book.** R1-4.
Circular Card-board Protractors, 12 inches (exclusive of packing). R1-8.

MISCELLANEOUS.

Distributary Velocity and Discharge Table. By Capt. Allan Cunningham. 8a.
Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1-8.
Ditto, ditto, in Urdu. R1-4.
Perspective (fully explained). By Col. A. M. Brandreth, R.E. R1-12.
Map of Roorkee. R1.
Thomason College Calendar for 1891, 1892, 1894,* and 1895,* each R2.
Ditto ditto, for 1896.* R4-12.
Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English (very old). 8a.
Memo. of Instructions for Road Project. R1.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
,, each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
,, a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
,, each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
,, the Calcutta Series. For the year .	7 2 6	8 6 3
,, each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
,, three issues . . .	,, 55	,, 36	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Catte Disease in India. Manual of the more deadly forms of. Hindi version. Royal 8vo., stiff boards. 6*a.*

Ditto. Urdu version. Royal 8vo., stiff boards. 6*a.*

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history, properties and uses (both chemical and industrial); trade-statistics; markets etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages; Volume II embraces the letter C in 689 pages, Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 Plates with Text. R1-8 a set (4*a.*)
1888-89, 18 Plates with Text. R4-8 a set (8*a.*)

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, JANUARY 2, 1897.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

PROMISSORY NOTES.

Destroyed.

The Government Promissory Note No. 038896 of the 3½ per cent. loan of 1865, for Rupees five hundred, originally standing in the name of Bindrabun, the proprietor, by whom it was never endorsed to any other person. Payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest, and for the issue of duplicates in favour of the proprietor after two years from the date of last advertisement.

BINDRABUN,

Chauk, Basasa, Cawnpur.

UNCOVENANTED SERVICE FAMILY PENSION FUND.

NOTICE.

The Fifty-ninth Annual General Meeting of Subscribers of the above Institution will be held on Saturday, the 30th January, 1897, at 3 P M. to receive the Report of the Directors, to elect Directors and Auditors under Rules 5 and 8, and to consider such matters as may then be submitted.

The place of meeting will be notified hereafter.

By order of the Directors,

F. W. DEMONTE,
Offg. Secretary.

Calcutta, the 31st December, 1896.

SUPPLEMENT TO

The Gazette of India.

No. 1.} CALCUTTA, SATURDAY, JANUARY 2, 1897.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 19th, 1896.

Pressure was remarkably unsteady during the week over India, Baluchistan and Burma, changing considerably and rapidly from day to day. Notwithstanding these unusual barometric movements weather was steadily fine and dry with almost cloudless skies over by far the greater part of the country. In the southern half of the Peninsula and Ceylon, on the other hand, weather although fine with much cloud during the first three days was disturbed with moderate to heavy rain during the last four days due to a disturbance or storm of a very unusual character. The storm originated in the extreme south of the Bay to the east of Ceylon on the 16th and drifting westwards passed into the south-east of the Arabian Sea on the 17th and 18th. The disturbance was, it may be noted, of the same general character as that of the last three days of December 1895. It gave a moderate to heavy and general burst of rain to southern India during its existence from the 17th to the 19th. The precipitation was heaviest at Cuddalore which obtained a total of 7·91 inches during this period.

The variations of the temperature conditions of the week were much smaller than in the preceding week. Temperature was in defect in Northern and Central India and in excess in the Peninsula. The provincial variations were less than 2°, except in the case of Bombay, where the mean temperature of the week was 2° in excess.

A noteworthy feature of the temperature conditions was the inversion of the ordinary relation between the hills and plains of North-Western India. This was most marked on the night of the 14th, when it was about 8° warmer at Ranikhet and Simla than at Roorkee and Ludhiana, 7° warmer at Murree than at Rawalpindi and 10° warmer at Mount Abu than at Ajmere and Sambhar.

Daily Summary.—*Sunday, 13th December.*—Pressure had fallen slightly in Bengal and the very slight low-pressure area which covered the submontane districts of the North-Western Provinces on the 12th had been transferred to East Bengal. Pressure had given way also in Ceylon and the Madras Coast districts, and was in very slight defect at Colombo. It had increased generally over the remainder of India—briskly to rapidly in the Punjab and the neighbouring districts of the North-Western Provinces and slightly elsewhere. Pressure was normal in Malabar and in excess over the remainder of India. The excess was most marked in the Punjab where it was from a tenth to a seventh of an inch in amount. Unusually steep gradients prevailed between Malabar and the West Punjab and winds were stronger than usual at the West Coast stations. Westerly winds obtained down the Gangetic Plain, northerly winds over the Bay, easterly winds over the centre and west of the Peninsula, and variable winds and calms elsewhere. A strong northerly wind was blowing at Colombo. Fine weather prevailed generally and no rain had fallen during the previous 24 hours beyond a light shower at Trincomalee. Temperature was in moderate defect in Sind, Rajputana, Assam and Burma, in moderate excess in Bombay, Kathiawar and Berar, and practically normal over the remainder of India.

Monday, 14th December.—Pressure had changed very irregularly during the previous 24 hours. It had fallen briskly to rapidly in the Punjab, thus reducing the amount of excess in that area very considerably. A rapid rise of the barometer had occurred in Kashmir. Winds had increased and were blowing freshly at Diamond Island. Practically no rain had been received during the previous 24 hours and the distribution of temperature remained unaltered.

Tuesday, 15th December.—Pressure had given way slightly to briskly in Sind and Baluchistan, and rapidly in Kashmir. It was unchanged in the

Peninsula and the Central Provinces, but had risen briskly over the greater part of the North-Western Provinces, and slightly in Bengal and Burma. Pressure was in slight defect in Ceylon, normal in Southern India and the Indus Valley, and more or less in excess over the remainder of the country. The excess was greatest in the submontane districts of the North-Western Provinces where it slightly exceeded a tenth of an inch in amount. Pressure was approximately uniform over Northern and Central India, and light variable winds obtained in that area. Winds were strong around the Coasts of the Bay. Skies were partially clouded in the Peninsula and Ceylon, and a few drops of rain had fallen at Negapatam and Colombo and a light shower averaging 0·82 inch at Trincomalee. Temperature had decreased briskly in Berar, the Central Provinces, Sind and Rajputana, and was in moderate defect in these areas.

Wednesday, 16th December.—Pressure had fallen briskly to rapidly in the South Carnatic, Ceylon and the adjacent part of the Bay, and was in considerable defect. Winds had risen rapidly in force around the Bay and were blowing with the force of a gale at Diamond Island, Colombo and Negapatam. Weather was apparently very disturbed in the belt of deficient pressure. Skies were heavily clouded in the Peninsula and Ceylon and heavy rain had fallen at Trincomalee, Colombo and Negapatam, and a few drops at Madras and Tinnevelley. The influence of the disturbance was extending rapidly northwards and skies were clouding over in the Central Provinces and Lower Bengal.

Pressure had risen slightly to briskly in Baluchistan and Upper India and was in moderate to considerable excess in that area. It had given way slightly to briskly in the North-Western Provinces, Bengal and the Central Provinces, and the amount of excess in these areas had hence diminished and was now only slight. The temperature conditions were fairly normal, the provincial variations being less than 1½° except in the case of the Central Provinces where the mean temperature of the previous 24 hours averaged 1°·6 in defect.

Thursday, 17th December.—The barometer had decreased briskly to rapidly over nearly the whole of India and was unchanged in Ceylon. Pressure was normal in Sind and Rajputana and in defect elsewhere. The deficiency was considerable in the south of the Peninsula, large in Ceylon, and slight to moderate in other parts. The disturbed conditions in the south of the Bay on the preceding day had passed westwards into the Arabian Sea and the winds had shifted to south-east at Colombo, to east on the Madras coast and at Trivandrum, and to east-south-east at Calicut, Mangalore and Karwar. Winds had fallen off in force around the Bay and at Colombo. Moderate to heavy rain had been received over the southern half of the Peninsula and Ceylon, the more important falls being 2·19 inches at Cuddalore and 1·55 inches at Colombo Fine weather held steadily over the remainder of India. Temperature was practically unchanged.

Friday, 18th December.—Pressure had risen slightly to briskly in Ceylon and had fallen briskly to rapidly in North-Western India and Kashmir. Elsewhere the barometer was either stationary or had changed only slightly. Pressure continued in defect all over India, but the deficiency was greatest in the West Punjab where it amounted to about ·15″. Pressure was in large defect in Malabar due to the continued existence of the disturbed conditions over the south-east of the Arabian Sea. The wind circulation was similar to that on the previous day. Moderate to heavy rain had again fallen over the southern half of the Peninsula. The largest amount reported was 4·46 inches at Cuddalore. Temperature had risen in the Peninsula and Burma and was stationary or had fallen slightly in other parts. The provincial variations were generally less than 2° except in the North-Western Provinces and Punjab (each —2°) and Bombay (+2°·4).

Saturday, 19th December.—Pressure had increased with great rapidity in the Punjab and Kashmir and slightly to briskly in the remainder of India. Pressure was now highest in the West Punjab and lowest off the Malabar coast and the intervening gradients were steep. Northerly winds had set in over the Punjab, but elsewhere there had been but little change in the wind system. Rain had been received over practically the same area as on the preceding day

but in smaller amounts. The heaviest fall was 1·64 inches at Wellington. Temperature had continued to rise in the Peninsula and the Central Provinces and was 4½° in excess in Bombay and 3° in Madras. Very low night temperatures had been recorded at Rawalpindi and Peshawar (32°·9), Murree (31°), Srinagar (24°·6), and Minimarg (3°).

Temperature.—The temperature conditions of the week under review were opposite in character to those of the preceding five or six weeks. The day temperature was more or less in excess throughout the week in Northern and Central India and the night temperature, on the other hand, considerably below it due to rapid nocturnal radiation in a dry and clear atmosphere. The mean temperature in that area was hence in slight defect. In the Peninsula temperature (both by day and night) was more or less in excess, more especially in Bombay where the mean temperature was steadily in slight to moderate excess. The excess in the Peninsula was most marked on the 19th when it averaged 3° for Madras and 4½° for Bombay and was probably due to the humid conditions of the period. The mean temperature of India for the week was 0·4 below the average.

A remarkable feature of the temperature conditions of the week was the inversion of the normal relation between the hills and plains of North-Western India. It was most strikingly shown on the night of the 14th when the hill stations were from 7° to 10° warmer than the neighbouring plains stations.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:—

Province.	December, 1896.							Mean variation of week.

Rain.—Weather was even finer than during the preceding week over the whole of Northern and Central India, the Central Provinces, Berar and Burma, and the rainfall of the period was hence more or less in defect over that area. The deficiency was, however, small in amount as the anticipated rainfall of the week over the greater part of that area does not exceed two or three-tenths of an inch.

The disturbed weather of the last three days of the week on the other hand, gave a moderate to heavy general burst of rain to south and south-central Madras and the Coromandel coast districts and the rainfall of the week was hence in considerable to large excess in these divisions. The rainfall due to the disturbance was very light in the Circars and even less than the small average of the week (about 30 per cent. in defect). Some showers were received in Malabar which gave it a total of 0·35 inch or 0·23 inch above the normal. Central Madras, Mysore and the Bombay Deccan obtained only a few drops.

The chief effect of the rainfall of the week has hence been to increase the amount of excess in South Madras and the Coromandel coast districts. The absence of rainfall during the week under review over the whole of Northern and Central India and the Central Provinces has, on the other hand, emphasized the drought already prevailing over a large part of that area.

HEM RAJ,

Offg. Asstt. Meteorological Reporter to the Government of India.

SIMLA, *the 24th December 1896.*

DENZIL IBBETSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 26th December.*—Good rain has fallen in the Southern districts, and showers in the greater part of the Central and Carnatic districts and portions of Cuddapah. The water-supply is ample in the Southern half of the Presidency, moderate under the larger irrigation works elsewhere, but otherwise poor or bad. In the Northern half of the Presidency sowings are still proceeding briskly, where rain has recently fallen. The standing crops are good in the Southern half, but there is no improvement in the remainder of the Presidency. Harvesting is going on in many places, but the yield is poor or bad in the Deccan and the Circars and fair elsewhere. Pasturage is generally available, but fodder is scarce in many districts. Cattle are generally in fair condition. Prices are again generally slightly easier, but are dearer in Ganjam. *Cholam* (*Sorghum vulgare*) in Kurnool 15⅛, in Bellary and Anantapur 14½, and in Cuddapah 14 seers per rupee; the scarcity-rate being 15 seers. The numbers relieved were:—relief workers 20,264, weavers 4,962, and inmates of kitchens 972. The decrease in workers, chiefly in Bellary, is due to improved organization.

Bombay.—*For week ending 30th December.*—Rain fell in 16 districts during the week. The rain-affected districts were:—Khandesh 1 inch 28 cents, Kolaba 15 cents, Ratnagiri 28 cents, Poona 27 cents, Ahmednagar 70 cents, Sholapur 6 cents, Bijapur 48 cents, Belgaum 1 inch 57 cents, and Dharwar 1 inch 99 cents. The rainfall has been beneficial to the spring crops in the two latter districts, but more is urgently wanted for the crops recently sown in the Deccan and Karnatak districts. The standing crops have been damaged by insects in two talukas of Karachi, are withering for want of rain in Bijapur, are poor in Thana and are reported to be thriving elsewhere. The sowing of late crops has been completed except in the Upper Sind Frontier, Khandesh, Ratnagiri, Ahmednagar and Kanara. The harvesting of the autumn crops is nearly finished except in Khandesh and Dharwar. Fodder is sufficient except in the Deccan, Karnatak, Shikarpur and Baroda; it is dear in Kaira. The grain supply is generally sufficient in the affected districts. Cotton-picking continues in Ahmedabad, Broach, Khandesh and Kathiawar. The condition of the agricultural stock is deteriorating in Poona, Sholapur, Bijapur and Dharwar, but is healthy elsewhere except in parts of Sikarpur, Hyderabad, Upper Sind Frontier, Thar and Parkar, Khandesh, Nasik and Ratnagiri. Prices are rising in parts of Surat, Ratnagiri and Bijapur, falling in parts of Broach, Surat, Sholapur and Bijapur, and stationary in Hyderabad, the Upper Sind Frontier, Ahmedabad, Kaira, Kolaba, Poona, Kathiawar and parts of Broach and Surat. Prices of the cheapest staple grain in the affected districts are:—Dharwar 12¼, Belgaum 11½, Sholapur 11, Bijapur 10½, Poona 10¼, Ahmednagar 9¾, Nasik and Satara 9½, and Khandesh and Kolaba 9 seers per rupee. The numbers on relief works were:—Khandesh 5,017, Nasik 12,136, Ahmednagar 29,578, including non-working children. The number on gratuitous relief were:—Khandesh 2,369, Ahmednagar 4 and Belgaum 196. The numbers in Poona, Satara, Sholapur and Bijapur have not been reported.

Bengal.—*For week ending 28th December.*—There was slight rain in North Bihar, Patna, Purnea and Palamau on the 25th instant. The rainfall was ·30 in Champaran, ·26 in Muzaffarpur, ·13 in Darbhanga (Somastipur), and ·17 in Palamau. In these districts the spring crops are reported to have derived some benefit from it. The spring crops in the rest of the Patna Division and also in parts of the Rajshahi Division are doing well. Elsewhere, throughout the Province, the prospects of the spring crops continue poor. The

harvesting of winter rice is generally approaching completion, and in some districts the pressing of sugarcane is in progress. *Boro* or spring rice is being transplanted. In Bihar the prospects of poppy are satisfactory. Prices of food-grains were generally stationary, but have risen in some districts, notably in Cuttack and Saran. In Cuttack the price of rice rose from 12 seers 8 chittacks per rupee to 11 seers 13 chittacks, and in Saran the price of Indian corn rose from 11 seers 10 chittacks to 10 seers 11 chittacks. In the distressed districts the prices are—Nadia (common rice) 9 and 10 seers, Khulna (common rice) 9½ seers, Patna (common rice) 10¼ seers, Shahabad (common rice) 9½ seers, Saran (Indian corn) 10 seers 11 chittacks, Champaran (Indian corn) 10 seers 13 chittacks, Muzaffarpur (Indian corn) 11 seers, Darbhanga (common rice) 9 seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 26th December, were.—On relief works—Nadia (25 December) 1,336, Khulna (19th December) 103, Shahabad 913, (men 360, women 377, and children 176), Saran 3,081, (men 720, women 1,179, and children 1,182), Champaran 34,713, (men 15,263, women 11,232, and children 8,218), Muzaffarpur (Sitamarhi sub-division) 877 (men 448, women 177, and children 252), Darbhanga 3,877, also over 7,000 on other relief works for which accurate figures have not been received in time. Patna 235 (men 134, women 49, children 52), total for the whole province 51,901 ; and on gratuitous relief—Saran 1,260 (men 230, women 711, and children 319), Champaran 1,867 (men 474, women 913, and children 480), Darbhanga 4,312 (men 1,100, women 2,040, and children 1,172), total for the whole Province 7,439.

North-Western Provinces and Oudh.—*For week ending 30th December.*—There has been general rain. In some districts good showers fell while in others the showers were light. Over one inch of rain was recorded in parts of Lucknow and Unao, but more is needed. The spring sowings are practically complete and the crops have been greatly benefited by the recent rain. A portion of the *arhar* (*Cajanus indicus*) crop in certain districts has been slightly damaged by frost. The numbers in receipt of relief on Saturday, the 26th December, in twelve districts officially recognised as distressed were as follows :—Banda 86,805 ; Cawnpore 14,002 ; Hamirpur 25,379 ; Allahabad 40,480 ; Jhansi 13,567 ; Jalaun 22,114 ; Jaunpur 14,713 ; Lucknow 19,056 ; Unao 7,400 ; Rae Bareili 24,682 ; Sitapur 9,329 ; Hardoi 27,032 ; total 304,559. This total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation :—Employed on relief works 200,979 ; relieved as dependents 53,907 ; relieved in poor-houses 26,771 ; relieved under other provisions of the Famine Code 22,902. The numbers relieved in 22 districts which are under observation, but which have not yet been officially recognised as distressed were on the same date as follows :—relieved on test-works 26,879 ; relieved in poor-houses 15,283 ; relieved under other provisions of the Famine Code 1,105 ; total 43,267. The grand total in receipt of relief on the last day of the week was therefore 347,826. Supplies are generally sufficient but fodder is somewhat scarce in places. Prices remain high. The prices of staple food-grains on which the famine wages are based are as follows in the districts officially recognised as distressed :—Cawnpore 10¼, Hamirpur 9⅞, Allahabad and Jhansi 9¾, Jalaun 9⅜, Jaunpur, Lucknow and Unao 10, Banda and Rae Bareili 10½, Sitapur 12 and Hardoi 9¼.

Punjab.—*For week ending 30th December.*—The South-Eastern districts have been benefited by rain averaging from ¼ to ⅜rds of an inch. Slight rain has also fallen in the Sialkot, Lahore and Gujranwala districts. Harvesting of the autumn crops is nearly completed and sesamum is being harvested in Mooltan and Dera Ismail Khan. Sugarcane-pressing and cotton-picking are going on. Sowings of the spring crops on irrigated lands are still in progress. In certain districts the sown crops are being irrigated. The condition and prospects of irrigated crops are generally reported to be good to average and of unirrigated crops poor, but prospects are expected to improve. In Karnal the crops are suffering generally from want of rain, which is badly wanted in all districts. The stock of food-grains is insufficient in Hissar, Amritsar, and Rawalpindi. A supply has been imported from Karachi into Hissar. The cotton and sugarcane crops have been slightly injured by frost in Amritsar. Cattle are generally in

poor condition. Their condition is good to fair in Delhi, Amritsar, Lahore and Rohtak. Pasturage and fodder are scarce in all districts, except Rohtak. The number of persons employed on famine relief works were:—2,748 in Hissar, 1,306 in Umballa, 3,208 in Ferozepore, 133 in Mooltan and 2,710 in Karnal; and on test-works Delhi 142, Rohtak 141, Gujranwala 455, and Ludhiana 134. Test-works have also been commenced in five tahsils of Rawalpindi, but only 50 men attended the works in Gujarkhan tahsil. Prices are falling slightly in Gurgaon, but are still high elsewhere. Wheat is selling from 7⅛ to 9⅛ seers, bulrush millet from 8¼ to 10 5/16, great millet 9½ to 11, gram 8¼ to 10 and maize 9 to 11½ seers per rupee. The prices of staple grains on which famine wages are based are:—in Delhi (bulrush millet) 8⅛ seers, Umballa (maize) 10 seers, Mooltan (wheat second quality) 9 seers, Rohtak (great millet) 10⅛ seers, and Karnal (maize and gram) 9½ seers per rupee.

Central Provinces.—*For week ending 30th December.*—The weather is cloudy with slight showers or drizzles in the Northern districts and Nimar. Narsinghpur has had half an inch of rain, but the rainfall is generally too light to materially improve the prospects of the spring crops. The cloudy weather is inducing insects in some districts and causing damage to crops in flower, and the appearance of rust is reported from Nimar. Cattle are generally in good condition and fodder is sufficient, except in one or two districts. There have been large imports of grain into Jubbulpore and Nimar. The numbers on relief works and in receipt of gratuitous relief in eleven districts for which complete returns have been received were:—Saugor 16,366, Jubbulpore 14,480, Mandla 8,180, Seoni 3,804, Narsinghpur 4,366, Nimar 681, Nagpur 5,181, Bhandara 5,113, Balaghat 13,057, Bilaspur 230, Wardha 252; total 71,712, of whom 9,157 were gratuitously relieved. 20,442 persons were also employed on railway works in Saugor and Jubbulpore. The prices of food-grains upon which famine wages are based are:—Saugor 8½, Jubbulpore 10, Seoni 9½, Narsinghpur 10, Nimar 11¼, Nagpur 13¾, Mandla 9¼, Bhandara 10, and Balaghat 9 seers per rupee.

Burma.—*For week ending 26th December.*—In Lower Burma reaping and threshing are progressing and prospects continue good. In Upper Burma reaping of the wet-weather crops and cultivation of the dry-weather crops continue. No rain has fallen during the week and prospects are unchanged. The wet-weather crops in the Kindat Sub-division, Upper Chindwin district, are reported to have failed from want of rain and the island crops in Minbu are suffering from drought. The price of paddy has fallen largely in Akyab and slightly in Henzada and Thaton. Elsewhere prices are stationary. The numbers on relief works were:—Meiktila 15,952; Myingyan 9,726; and on gratuitous relief:—Meiktila 2,930 and Myingyan 3,112. The price of rice in Meiktila is 7⅛ seers and in Myingyan 9¾ seers per rupee.

Assam.—*For week ending 29th December.*—The weather is seasonable. The prospects of crops in Kamrup are not favourable. The harvesting of late rice continues. The price of food-grains is high in Silchar, Sylhet and Nowgong. Fodder is insufficient except in the Khasi hills and parts of Cachar. The water-supply is sufficient.

Mysore and Coorg.—*For week ending 30th December.*—MYSORE: Very slight rain fell during the week in parts of the State. *Ragi* (*Eleusine coracana*) and paddy are being harvested in places. Prices have fallen in Kolar, Tumkur, Mysore and Chitaldrug; and have risen in Kadur.

COORG: The harvesting of rice and coffee-picking continue. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 30th December.*—BERAR: The weather is cool and cloudy. Cotton-picking and cutting of *Jowar* (*Sorghum vulgare*) are nearing completion. Of the winter crops, wheat, gram and linseed are reported to be in poor condition. The breaking up of land has stopped in two districts. Fodder and water are generally insufficient. High prices for food-

grains prevail, and the opening of relief works appears likely to be necessary early in February next owing to the anticipated failure of the winter crops.

HYDERABAD: Very little rainfall during week ended 26th December. Agricultural prospects fairly good, but rain badly wanted in Aurangabad and Gulburga Divisions, scarcity of fodder and pasture exists. Prices are:—wheat 7¼, coarse rice 7, white *juar* 10½, yellow *juar* 12, gram 9½, and *tur* 10¾ seers per current sicca rupee.

Central India.—Report not received.

Rajputana.—*For week ending 30th December.*—Rainfall: Abu 45 cents, Jhallawar 35, Jeypore 61; slight rain in Serohi, but none elsewhere. Agricultural operations satisfactory in Jhallawar, Kotah, Ajmere, Jeypur, fair in Kherwara, and poor in Dholepur. The sowing of the spring crops is in progress in Serohi, Meywar, Bhurtpur, and 3 tehsils of Ulwar, and has been completed in Jaisulmere. The spring crops are being irrigated in Kerowli. The standing crops are fair in Meywar, Haraoti, and Ajmere; poor in Dholepur and good elsewhere. Agricultural stock are fair in Meywar, Dholepur, Bikanir, Jaisulmere, and good elsewhere. Pasturage and fodder are sufficient, except in some parts of Meywar, Tonk, some tehsils of Jeypur, Ulwar, and are failing in Dholepur and Bhurtpur. Prices are rising slightly in Jaisulmere, falling in Serohi, Meywar, Jhallawar, Ajmere, Jeypur, Dholepur, and Bikanir; high in Haraoti and steady elsewhere. The number of persons employed on relief works were:—Marwar 1,945; Kotah 864; Dholepur 4,451; Bhurtpur 10,622; Bikanir 15,614, and Jaisulmere 171: and on gratuitous relief—Marwar 803, Bhurtpur 86, and Bikanir 2,155. The prices of staple grains, on which famine wages are based, were:—Marwar 8 1/16, Kotah 14½, Dholepur 11¼, Bhurtpur 10, Bikanir 7¾ to 8⅛, and Jaisulmere 8½.

Kashmir.—KASHMIR VALLEY.—*For week ending 29th December.*—The spring sowings are finished. Snow has commenced falling in the Kashmir Valley since the 28th instant. Prices are still below normal.

JAMMU PROVINCE.—*For week ending 30th December.*—Slight rain fell during the week. Prices are stationary. Fodder is scanty in the hilly tracts. Relief works are in progress. Prices 10 seers per rupee.

Nepal.—*For week ending 26th December.*—A slight shower of rain fell during the week. The weather is cold and frosty. The price of common rice is 8 seers and of a better quality 7 seers per rupee.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture, No. (Famine) $\frac{108\text{-}F.}{45\text{-}17}$, dated the 4th January 1897.

READ the following—

1. Paragraphs 152 to 159 of the Report of the Indian Famine Commission, Part I.
2. Letter to the Government of Bengal, No. 104-F., dated the 4th January 1897.

RESOLUTION.

The Governor General in Council is pleased to direct that the letter and paragraph 159 of the report above referred to be published for general information as an extra Supplement to the *Gazette of India*.

[True extract.]

DENZIL IBBETSON,

Secretary to the Government of India.

NON-INTERVENTION OF GOVERNMENT IN THE OPERATIONS OF PRIVATE TRADE.

Letter from the Government of Bengal, to the Government of India, No. 104-F., dated the 4th January 1897.

I AM directed to address you in continuation of my letter No. 8 F., dated the 22nd December 1896, and with reference to the proposals contained in paragraph 4 of your letter No. 5183, dated 12th December 1896.

2. That paragraph runs as follows:—

In paragraph 13 of the Resolution submitted to the Government of India it is pointed out that many gentlemen of position and local knowledge in Bihar consider that stocks, especially in the less accessible places, are likely to be depleted before private trade can supply the local deficit; and the Lieutenant-Governor desires me to submit, for the favourable consideration of the Government of India, the suggestion of the Conference that advances of money might be made by Government at a reasonable rate of interest (say, 6 per cent.) for the purchase in Calcutta of grain from over seas, and for the distribution of this grain in remote areas, it being understood that the persons to whom these loans are made will be allowed to dispose of the grain at their own risk and at their own discretion. It would be necessary to stipulate that the supplies be drawn from other countries than India, and that Government officers should be allowed to satisfy themselves by the occasional inspection of invoices that grain is really being imported into the inaccessible tracts. The Lieutenant-Governor is disposed to think that to make advances on these conditions would not constitute an interference with private trade, and would not be inconsistent with the principles approved by the Famine Commissioners in paragraph 159 of their report. One or more of the persons to whom such advances may be made in inaccessible tracts might be constituted contractors for the supply of grain on relief works, etc., under section 35 of the Code, and I am directed to request that the Government of India may be moved to sanction this proposal.

Paragraph 13 of the Bengal Government Resolution No. 5133 of the 10th December 1896, to which reference is made in the above paragraph, is also quoted below for convenience:—

It was brought to the notice of the Conference that many gentlemen of position, local knowledge and experience in Bihar, are of opinion that stocks, especially in the more inaccessible places, are likely to become depleted before private trade could supply the local deficit, and it was suggested for consideration whether, without in any way interfering with private trade, Government might unobjectionably advance money, at moderate interest, for the purchase of grain imported from Burma or elsewhere, which might be sold or distributed locally without any interference on the part of Government. The Commissioner recommends that the suggestion be accepted "as the last bulwark against depletion of stocks in out-of-the-way places," on the condition that grain for which loans are made is in the first instance imported from beyond the seas and purchased in Calcutta or other distant markets, and that full and adequate security is forthcoming for the repayment of the loans. The Commissioner is also of opinion that such advances should only be made to well-known men who may be trusted not to compete with local bunniahs. In 1873-74 Government sanctioned arrangements whereby, in places likely to be in want, and in which there were not thought to be traders to import food, advances might be made—

(*a*) to zamindars, planters or others, on the condition that they would import grain from a distance and sell it as near as possible at cost price, all expenses included;

(*b*) to traders and others of safe and responsible character at a moderate interest of 6 per cent., who were to import grain from a distance without any conditions as to the rate or manner of selling it.

Proposals such as were sanctioned under head (*a*) in 1873-74 clearly involve interference with private trade, and cannot now be entertained; but there appears to the Lieutenant-Governor to be no strong objection to advances of money by Government at reasonable interest (say 6 per cent.) and on adequate security, for purchase in Calcutta of grain, imported or to be imported from beyond seas, and sale or distribution of it in remote areas, provided the persons to whom such loans are given are allowed to sell or otherwise dispose of it at their discretion and at their own risk. The only conditions which it would be necessary to stipulate for would be (1) that supplies are drawn from districts beyond those in which scarcity exists or is apprehended (in the present instance all India), and (2) for occasional inspection of grain invoices (chalans), in order to verify that the persons to whom advances are made do really import grain into the inaccessible tracts, and that it was obtained originally outside Bengal or other provinces threatened with scarcity. No maximum or minimum limit need be put on the amounts of such loans, nor

Page 50 of Correspondence on Famine in Bengal and Bihar of 1873, Vol. I.

need any distinction be made as to the class of persons to whom such loans may be made as long as they can give sufficient security for repayment with interest, at any time up to the end of 1897 that Government may demand repayment. If the conditions of the loan should be violated, the amounts advanced might be realised at once, but otherwise they would not be recovered before the end of 1897.

The question appears to be more one of finance than of interference with trade. It will be submitted for the orders of the Government of India, but meanwhile if, pending receipt of the orders of the Supreme Government, the Commissioner or District Officers receive any definite applications for loans for the purpose indicated, they should submit them for the orders of Government.

These proposals practically amount to a scheme for the importation of food-grains from abroad into India with funds to be supplied by Government.

3. The question of the importation by Government of food into a distressed tract is fully discussed in paragraphs 152 to 159 (pages 49—52) of Part I of the Famine Commission Report. The conclusion at which the Commissioners arrived was that, save under very special circumstances which will be considered presently, the only wise course was for Government to rigorously abstain from any attempt to intervene directly in, or in any way to supersede the operations of private trade. As has been frequently remarked, Government may be able to do more than any one trader; but it cannot do as much as all the traders of the country taken together; while the fact that it can do so much more than any one trader, must render every trader unwilling to compete with so wealthy and so powerful a rival. The inevitable effect therefore of any attempt on the part of Government to enter the market as a purchaser or an importer on its own account, is to gravely discourage, even if it does not wholly paralyse, mercantile activity; and the evil thus done is great out of all proportion to the actual magnitude of the Government operations, since the uncertainty as to their possible nature and extent creates an apprehension which is fatal to enterprise and initiative in these matters.

4. It is true that in paragraph 155 of their report the Commissioners go on to say, "a resolution to rely entirely on the ordinary operations of trade to meet the wants of the country in time of famine must unquestionably rest, not only on the expected activity of the traders, but also on the probability of the requisite supply of food being forthcoming at the critical time." And they proceed to discuss the improbability, based upon past experience, of distress ever being so wide-spread in India that the unaffected tracts should be unable to supply the surplus required by those that are affected. Unfortunately, the scarcity that now threatens, covers a larger proportion of the whole country than has ever been simultaneously affected in any previous famine of which the Government have particulars; and it is conceivable that under certain circumstances the food supply of the country taken as a whole may prove insufficient, and that it may be necessary to supplement it from abroad. And the difficulty of so supplementing it is one, not of sources of supply, but of time; since it will take several weeks to obtain grain from any source which can be relied upon to meet large demands.

5. But while fully recognising the importance of the question and the gravity of the situation, the Government of India are of the deliberate and decided opinion that they will best serve the end that all have in view by rigidly abstaining from interference. The mercantile community has at its disposal sources of information regarding stocks and demand that is more complete and more reliable than anything which Government can command; and it controls the only machinery by which the needs of the country can be supplied. The Governor General in Council believes that the intervention of Government as a purchaser or importer would do infinitely more harm than good, as it would cripple and discourage the agency which is best able to gauge the need, which is impelled by self interest to anticipate it, and which alone is able to supply it effectively.

6. The functions of Government in the matter should therefore be confined to three directions. It should in the first instance place freely, fully and promptly at the disposal of the public all the information of which it is in possession, so as to assist the mercantile community as far as possible in verifying the facts upon which their action must depend. Secondly, it must

guarantee that the demand for food in the distressed tracts shall be an effective demand. The fact that there are hungry men in a district is not in itself sufficient to induce a flow of food towards that district in the ordinary course of trade: there must also be money available with which the hungry may pay for it. And this guarantee Government provides by undertaking (as it does) to find work for all who are in danger of starvation, and to pay them at rates which will suffice to buy them a subsistence-ration at whatever prices may from time to time be locally current. In the third place, it should, to use the words of the Famine Commissioners, "take care that every possible facility is given for the free action of private trade in the business of the supply and distribution of food, and that all obstacles, material or fiscal, are, as far as practicable, removed." The inward rates for the carriage of grain have already been reduced on all railways, in many cases by the railway administrations themselves, in others by order of Government; and any other facility of the nature indicated that may suggest itself or be suggested to Government will as far as may be found possible be immediately afforded.

7. In paragraph 159 of their report the Commissioners discuss the cases in which departure from the general principle of non-interference is admissible. They practically fall under two classes, the supply of Government relief-works, and the case of remote agricultural tracts where the local machinery of trade is insufficient or inactive. To these may be added, as a third class, inaccessible tracts in which, owing to the conformation or nature of the country, the carriage of supplies on a large scale presents difficulties with which local appliances are unable to cope.

8. In the first case Government is clearly bound to arrange for the supply of its own labour. Sections 106 and 107 of the Bengal Famine Code give the necessary discretion; and the following extract from instructions that have been issued in another province are suggestive as to the best mode of action:—

The food trade on a full sized famine relief charge is greater than that in any ordinary small Indian town, and if special facilities are given to respectable local traders, they will be careful not to lose them by selling unsound food, or worrying the people with needlessly frequent changes in their prices. Following the principles of the Famine Code the under-mentioned advantages can be offered, among others, in exchange for fair trading:—a small grass hut for a shop situated near a drinking place and within the range of the treasure or other guards; free carriage of grain from the nearest mart, if the trader is willing to sell at the current rates of that mart; prompt and free exchange of all his copper into silver paid into the local treasury to his credit. It is usually quite easy to find several respectable men who can understand the value of such advantages to their trade, and are willing to give honest goods and reasonably steady prices in exchange for them, so long as they are pretty closely looked after.

But it may occasionally occur that a relief work is situated in such a remote locality that private traders are unwilling to go there without other inducements than those noted above. In that case, or in similar exceptional cases requiring exceptional treatment, the Collector of the district would be justified in contracting with a grain dealer for the supply of grain on the works for a stated period and on terms to be mutually agreed upon.

9. In the second and third cases it may under certain circumstances become necessary to intervene, as Government was forced to do in the Kumaon Hills in 1889; and the best modes of intervention are sufficiently indicated in paragraph 159 of the Famine Commission Report. But (except in the improbable case of local combination) the action taken should always be by way of help to local traders, rather than by way of rivalry with them. As the Commissioners remark, "much caution will be required in every case lest interference should aggravate the evil which it is designed to avert, and have the effect of preventing traders from entering the market while it is being operated upon by the Government"; and the caution against the effect of such fitful intervention is repeated in paragraph 107 of the Bengal Famine Code.

10. In the tract to which your letter refers, the Government of India find no sufficient reason to believe that any part of it falls under the above description. Portions are mentioned as "remote" and "inaccessible." But no part of the tracts affected would seem to have its centre at a greater distance than 25 miles from a railway station, while it is understood that the roads in North Bihar are no worse than the ordinary roads of the level regions of the country. Should the circumstances detailed in paragraph 159 of

the Famine Commission Report as justifying intervention be found to exist in these or any other localities, His Honour the Lieutenant-Governor has full discretion to take such measures as may be necessary to ensure that the local supply of food shall not run short. But such action should be strictly confined to definite localities, in which enquiry into local facts has convinced the Bengal Government that the danger is present and the necessity for some action in assistance of the local machinery established. When intervention is thus localised, its possible extent is at once defined, and that uncertainty is avoided which is the most fertile source of apprehension in the minds of traders.

11. In the present application the Governor General in Council finds no such limitations. The proposal is rather in the nature of a blank cheque presented for his signature. The object appears to be, not only to throw supplies into certain tracts, but also to secure importation of food-grains from outside India. It is true that the proposal is not that Government should import direct, but only that it should finance a scheme for importation; and that certain precautions, such as the charging of interest, and (in another reference) restriction upon underselling, are taken against interference with private trade. His Excellency in Council doubts whether these conditions would not either be evaded in practice or be found so vexatious as to defeat their own objects. But he is clearly of opinion that the scheme could not be carried into effect without involving such interference, or at any rate, without bearing the appearance and creating the apprehension of such interference. And the appearance in such a case would be almost worse than the reality, since while producing all its evils, it would carry with it none of its advantages.

12. It is of cardinal importance that no action of a general nature should be taken which might in any way tend to throw doubt upon the steadfastness with which the Government of India adhere to the policy of non-intervention, or to inspire mistrust and uncertainty in the minds of the mercantile community. For these reasons the Governor General in Council finds himself unable to accede to the proposals of the Bengal Government. He differs from its opinion with reluctance, for he heartily recognizes the admirable promptitude and thoroughness with which His Honour the Lieutenant-Governor has examined and met the situation in Bengal. But His Excellency in Council is satisfied that the need for interference in the particular localities to which the proposals refer is not established; that, should it be established, it can be met in a very much simpler manner; and that the adoption of the principle of these proposals in this limited area might, by unsettling the operations of trade, imperil the food-supply of the entire province, if not, indeed, of every affected region of India.

(*Paragraph 159 of the Report of the Indian Famine Commission.*)

At the same time that we recommend the general principle of abstention from interference with private trade in the supply of food to any tract suffering from scarcity, we admit that there are exceptional cases in which the Government may find it necessary to intervene. The success of relief measures essentially depends on there always being grain to be bought by those who receive money wages, and grain to be distributed to those who receive food; and it is an important duty of the Government officials who superintend the relief to see that this assumption is verified, to make all necessary arrangements with local or with distant merchants for the supply of grain, or in the last resort to lay in a stock to be drawn upon in the event of failure. This is particularly necessary in the case of relief-works, which must often be situated in localities where no arrangements for the sale of food exist. By settling down a large population of labourers in such places an abnormal demand is created which, unless local trade is very active, the Government is bound to meet by providing a special machinery for the purpose of supplying food. In districts in which communications or the means of transport are defective, or to which access by railways or by water cannot be secured at all seasons, or generally in the event of well-ascertained slackness on the part of the local traders to prepare for an emergency, Government might give assistance in improving the transport or in the supply of fodder for cattle, and might

encourage and stimulate trade, by guaranteeing a price for grain laid down at the more distant and inaccessible towns, or by advancing money to merchants to lay out in the trade. In purely agricultural tracts, where wages are paid in grain and not in money, and the local demand of the small towns is supplied not by imports from distant marts, but by small purchases from the stores of the agriculturists, it may happen that the agriculturists refuse to sell for fear of not having enough for their own consumption, and the local traders may be afraid to import through inexperience and the want of correspondents in the large marts. In such a case the Government would rightly intervene, and its action in importing grain from a distance might have a beneficial effect, both by proving to the local traders that such an undertaking is practicable and profitable, and by removing the panic which has led the landowners to close their grain pits. It might even become necessary for Government to import grain for sale to the public in such an event as a combination of local dealers to refuse to sell, or only to sell at prices unduly raised above the rates of neighbouring markets. In all cases in which Government intervention in the supply of food becomes necessary, the purchase, under suitable arrangements, of surplus stocks in parts of the country where they are available would secure those objects which it has been supposed could be attained by the prohibition of export. But much caution will be required in every case lest interference should aggravate the evil which it is designed to avert, and have the effect of preventing traders from entering the market while it is being operated upon by the Government.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Calcutta, the 8th January, 1897

No. 1.—His Excellency the Governor General, under the authority vested in him by section 10 of the Indian Councils Act, 1861 (24 and 25 Vict., c. 67) and section 1 of the Indian Councils Act, 1892 (55 and 56 Vict., c. 14), has been pleased to re-nominate the Hon'ble Charles Cecil Stevens, C.S.I, to be an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations, with effect from the 12th instant.

J. M. MACPHERSON,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Calcutta, the 6th January, 1897.

No. 13.—The services of Mr L. E. Buckley, of the Indian Civil Service, Madras Establishment, are replaced at the disposal of the Government of Madras, with effect from the 30th November 1896.

MEDICAL.

The 4th January, 1897.

No. 3.—Surgeon-Captain J. Murray, M.B., I.M.S. (Bengal), Professor of Materia Medica

and Pathology in the Lahore Medical College, is granted furlough on medical certificate for four months, with effect from the 14th December 1896.

No. 4.—Surgeon-Captain D. G. Marshall, M.B., C.M., I.M.S. (Bengal), is appointed to officiate as Professor of Materia Medica and Pathology in the Lahore Medical College, during the absence, on furlough, of Surgeon-Captain J. Murray, M.B., or until further orders.

SANITARY.

The 6th January, 1897.

No. 7.—The following rules for quarantine against plague, which have been made by the Government of Bombay in exercise of the power conferred by Section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 30th December, 1896, as a temporary measure, in the Ports of Aden, Perim, and the Somáli Coast :—

I.—The Commander of every vessel, including buggalows or other native craft, arriving at Aden, Perim and the Somáli Coast from Karáchi, shall before entering the harbour, hoist a yellow flag (or if entering a port at night time, show whatever quarantine light signals are customary in the port) and indicate by signal the port from which such vessel has come, and shall keep such flag and signals flying until permitted to take them down as hereinafter provided. The pilot, on going alongside a vessel from Karáchi, shall direct the flag prescribed above to be hoisted, if it has not already been done.

II.—Such Commander shall not, without first having obtained permission as hereinafter provided, allow any communication, except orally, with the shore or any other vessel or boat, excepting with the boat supplying pilots, and in that case communication shall be limited to receiving on board the pilot, his servant and baggage.

III.—On any such arrival being signalled, the Health Officer of the Port shall, as soon as possible, go alongside the vessel and ascertain by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague, and if the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, and if the ship carries a qualified Medical Officer, quarantine shall be dispensed with and pratique granted.

If the vessel does not carry a qualified Medical Officer, he shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified by the Resident, and there to remain for a period of eight clear days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IV.—If the Health Officer, as the result of the enquiry made under paragraph III above, shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of termination of the last case either by death, recovery or removal from the vessel and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of eight days, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Aden, Perim and the Somáli Coast, which may have communicated with vessels coming from Karáchi, shall be subjected to the same rules as vessels arriving at Aden, Perim and the Somáli Coast from Karáchi.

ECCLESIASTICAL.

The 6th January, 1897.

No. 5.—Her Majesty's Secretary of State for India has permitted the Reverend W. F. Armstrong, a Senior Chaplain on the Bengal (Lahore) Ecclesiastical Establishment, to retire from the service, with effect from the 23rd February 1897.

EDUCATION.

The 7th January, 1897.

No. 2.—The Governor General in Council is pleased to appoint the following gentlemen to be Fellows of the University of Calcutta:—

The Hon'ble Mr. Justice R. F. Rampini M.A.

The Hon'ble Mr. Justice L. H. Jenkins.

The Hon'ble J. G. H. Glass, C.I.E., Secretary to the Government of Bengal, Public Works Department, and Chief Engineer.

The Hon'ble Guru Prosad Sen, M.A, B.L.

Surgeon Lieutenant-Colonel E. G. Russell, M. B., Professor of Materia Medica and Clinical Medicine in the Calcutta Medical College.

Maulavi Ahmed, Khan Bahadur, Presidency Magistrate, Calcutta.

Babu Nilkanta Mazumdar, M.A, Lecturer in the Presidency College, Calcutta.

Babu Adhar Chandra Mukerjee, M.A., B.L.

The 8th January, 1897.

No. 4.—Under section 12 of Act II of 1857, the Governor General in Council is pleased to authorise the affiliation of the Central College, Jaffna Ceylon, to the Calcutta University in Arts up to the F.A. Standard.

J. P. HEWETT,
Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATIONS.

LAND SURVEYS.

Calcutta, the 4th January, 1897.

No. 11—169-2.—The services of Colonel M. W. Rogers, R.E., Superintendent, 1st grade, Survey of India Department, are replaced at the disposal of the Military Department, with effect from the 4th February, 1897.

The 8th January, 1897.

No. 40—137-17.—Colonel T. H. Holdich, C.B., C.I.E., R.E., Superintendent, 1st grade, Survey of India Department, is granted three months' privilege leave, with effect from the 21st December, 1896.

FORESTS.

The 7th January, 1897.

No. 14—124-25-*F.*—The undermentioned officers, who have been appointed by Her Majesty's Secretary of State to the Forest Department of India, are appointed to be Assistant Conservators of the 2nd grade, with effect from the dates specified opposite their names, and are posted to the provinces noted below:—

Mr. R. S. Hole, Central Provinces, 16th November, 1896.

Mr. D. O. Witt, Central Provinces, 16th November, 1896.

Mr. F. F. R. Channer, North-Western Provinces and Oudh, 16th November, 1896.

Mr. W. A. R. Doxat, North-Western Provinces and Oudh, 16th November, 1896.

Mr. G. E. S. Cubitt, Burma, 4th December, 1896.

Mr. G. K. Parker, Burma, 4th December, 1896.

Mr. T. H. Monteath, Bengal, 10th December, 1896.

Mr. J. C. Carroll, Assam, 26th November, 1896.

INVENTIONS AND DESIGNS.

The 7th January, 1897.

No. 38-*P.*—In exercise of the powers conferred by section 49 of the Inventions and Designs Act (V of 1888), the Governor General in Council is pleased to make the following rule with effect from the 1st April, 1897, namely:—

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

GEOLOGY AND MINERALS.

The 7th January, 1897.

No. 41—43 15.—Mr. T. H. Holland, Deputy Superintendent, Geological Survey of India, is appointed to officiate as a Superintendent, with effect from the 12th October, 1896, in the vacancy caused by the promotion of Mr. R. D. Oldham to officiate as Director.

DENZIL IBBETSON,
Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 5th January, 1897.

No. 20-G.—The services of Lieutenant W. J. P. Preston, 2nd Battalion, the Duke of Cambridge's Own (Middlesex Regiment), are replaced at the disposal of the Military Department, with effect from the date on which he relinquishes charge of his duties as officiating Wing Officer of the Mewar Bhil Corps.

No. 22-G.—The following promotion is made in the 2nd Regiment, Central India Horse, with effect from the 1st December, 1896:—

Dafadar Jawahir Singh to be Jemadar, *vice* Tulja Ram, transferred to the pension establishment.

The 7th January, 1897.

No. 35-G.—With reference to notification No. 820-G., dated the 15th May 1896, Mr. G. A. Schmidt, Consul at Rangoon for the Austro-Hungarian Empire, has resumed charge of his office.

No. 70-I. B.—Captain H. D. Watson, Indian Staff Corps, 1st Battalion, 2nd Gurkha (Rifle) Regiment, is appointed to be Assistant Inspecting Officer, Rajputana Imperial Service Infantry, with effect from the date of assuming charge.

The 8th January, 1897.

No. 46-G.—Captain W. H. M. Stewart, Indian Staff Corps, Political Assistant of the 1st class, is appointed, on return from furlough, to officiate as a Political Agent of the 3rd class, and is posted as Assistant to the Resident in Kashmir, with effect from the 24th December, 1896.

No. 48-G.—The services of Colonel C. T. Lane, C.I.E., Indian Staff Corps, Deputy Commissioner of the 1st class, and Inspector General of Police, Jails, Registration, Stamps, and Excise, in the Hyderabad Assigned Districts are replaced at the disposal of the Military Department, with effect from the 11th December, 1896, the date on which he succeeded to the Colonel's allowance.

No. 90-I. B.—In exercise of the powers conferred by the notification of the Government of India in the Foreign Department, No. 3631-I, dated the 21st September 1892, the Governor-General in Council is pleased to direct the transfer of the following civil appeals and applications pending before the Resident at Hyderabad, by virtue of his jurisdiction over the cantonment of Secunderabad, to the Court of the Judicial Commissioner of the Hyderabad Assigned Districts:—

(1) Second Appeal No. 27 of 1896.	Fattey Ahmed of Secunderabad . . .	Appellant.
	versus	
	(1) Sayanna, pensioned Subadar and (2) Sivannah, pensioned Sepoy, both of Secunderabad	Respondents.
(2) Miscellaneous Appeal from Order No. 5 of 1896.	(1) Loomchand, (2) Poonamchand, (3) Shivruthmall, (4) Hajarimall and (5) Multhanmall, all of Secunderabad	Appellants.
	versus	
	(1) Agurchand, (2) Dowluthram, (3) Ahamchand and (4) Fouzmull, all of Secunderabad	Respondents.
(3) Application No. 12 of 1896 under Section 622 of the Civil Procedure Code.	(1) Rajbee, (2) Abdul Rahiman Khan (minor), *per* guardian mother Rajbee, (3) Goolam Mahomed Khan, (4) Jeeabee, (5) Badabee, all heirs and legal representatives of late Munwer Khan, of Kacheegooda, Hyderabad	Appellants.
	versus	
	(1) Hajee Habeeb, (2) Framji Dorabji, (3) Daday Ahmed, (4) Doondgal Kristannah, (5) Hajee Ebrahim, members of the firm of H. Faks & Co., Secunderabad	Respondents.

No. 91-I. B.—In exercise of the powers conferred by the Notification of the Government of India in the Foreign Department, No. 3633-I., dated the 21st September, 1892, the Governor-General in Council is pleased to direct the transfer of the following civil appeals and applications pending before the Resident at Hyderabad, by virtue of his jurisdiction over the Hyderabad Residency Bazaars, to the Court of the Judicial Commissioner of the Hyderabad Assigned Districts:—

(1) 2nd Appeal No. 21 of 1896.	The firm of Bansilal Abirchand represented by owner Rai Bahadur Kasturchand, now residing at Bikanir, the business whereof is conducted in the Residency Bazaars by his Munim Roopchand	Appellants.
	versus	
	Nawab Alam Ali Khan Dilawar Nawaz Jung Bahadur of Hyderabad City . . .	Respondent.

(2) 2nd Appeal No. 22 of 1896.

The firm of Bansilal Abirchand represented by owner Rai Bahadur Kasturchand, now residing at Bikanir, the business whereof is conducted by his Munim Roopchand, in the Residency Bazaars, Hyderabad . . . } Appellants.

versus

Nawab Alam Ali Khan Dilawar Nawaz Jung Bahadur of Hyderabad City . . . } Respondent.

NOTIFICATION.

SEPARATE REVENUE.
COTTON DUTIES.

Calcutta, the 8th January, 1897.

No. 126-S.R.—In exercise of the power conferred by section 36 of the Cotton Duties Act, II of 1896, the Governor General in Council is pleased to direct that the following addition shall be made to Rule 7 (1) of the rules published with the Notification of the Government of India in the Finance and Commerce Department, No. 864-S.R., dated the 21st February, 1896, namely:—

"He shall also furnish a return in Form D with respect to such goods, at the same time and to the same authority as is required by Rule 6 in the case of goods exported by him direct."

J. F. FINLAY,
Secretary to the Government of India.

MILITARY DEPARTMENT.

Fort William, the 8th January, 1897.

FIELD OPERATIONS.

SUAKIN.

No. 20.—The Right Honourable the Governor General in Council is pleased to direct the publication, for general information, of the following extract from a despatch from the Right Honourable the Secretary of State for India:—

INDIA OFFICE,
London, 10th December, 1896.

MILITARY.

No. 103.

To His Excellency the Right Honourable the Governor General in Council.

* * * * * *

From Foreign Office to Lord Cromer, 30th October, 1896.

Para. 3. I forward herewith, for the information of your Government, copy of a telegram expressing Her Majesty's satisfaction at the conduct of the Indian Force at Suakin.

Telegram.

I am directed by the Queen-Empress to express Her satisfaction at the steady and soldier-like conduct of Her Indian troops while employed on the unattractive but important duty of holding Suakin and the surrounding country during the recent operations in the Sudan. This service has been performed with an alacrity and cheerfulness which has added to the reputation of Her Indian Army, and, though remote from the scene of active operations in the Valley of the Nile, have sensibly contributed to their remarkable success.

This order to be read previous to re-embarkation.

GEORGE HAMILTON.

30th October, 1896.

APPOINTMENTS.

ARMY STAFF.

No. 21.—The Commander-in-Chief in India is pleased to make the following appointment in the Intelligence Branch of the Quartermaster General's Department:—

Captain F. G. Cardew, 10th Regiment of Bengal (The Duke of Cambridge's Own) Lancers, to be Staff Captain, *vice* Captain W. R Robertson, D.S.O., who has vacated. Dated 30th November, 1896.

No. 22.—In G G. O. No. 373 of 1892 *for* "28th March, 1892" *read* "29th March, 1892."

MEDICAL DEPARTMENT.

No. 23.—With reference to G. G. O. No. 11 of 1897, it is notified that the tenure of the appointment of Surgeon-Colonel G. Bainbridge, M.D., in the administrative grade of the Indian Medical Service, Bombay Establishment, will reckon from the 4th October, 1896.

STAFF CORPS.

No. 24.—Lieutenant Hugh Harrison, Yorkshire Light Infantry, officiating squadron officer, 3rd Regiment of Lancers, Hyderabad Contingent, is admitted to the Indian Staff Corps from the 21st November, 1895, subject to confirmation by the Secretary of State for India.

No. 25.—With reference to paragraph 6 of the regulations published with clause 92, India Army Circulars, 1891, the undermentioned officers of the Unattached List are admitted to the Indian Staff Corps, with effect from the dates specified, subject to confirmation by the Secretary of State for India:—

Second-Lieutenants—

Spencer Maxwell Tahourdin, attached 8th Regiment of Bengal Infantry,—14th December, 1896.

Vere Gordon Menzies, officiating wing officer, 8th Regiment of Bombay Infantry,—10th December, 1896.

Basil Rice Nicholl, officiating wing officer, 13th Regiment of Bombay Infantry,—11th December, 1896.

CANTONMENTS.

REGULATIONS.

No. 26.—In exercise of the powers conferred by section 26, clause (14), and section 27 of the Cantonments Act (XIII of 1889), the Governor General in Council is pleased to make

the following rules and to direct that they shall apply to the Cantonment of Poona :—

Removal of overcrowded buildings.

1. (*1*) Whenever it appears to the Cantonment Authority that any block of buildings is, by reason of the manner in which the buildings are crowded together, in an unhealthy condition, the Cantonment Authority may cause the block to be inspected by a Committee consisting of—

(*a*) the Sanitary Officer,

(*b*) the Civil Surgeon of the district, or, if his services are not available, some other medical officer of the Government, and

(*c*) the Executive Engineer, or some person deputed by him.

(*2*) Such Committee shall make a report in writing on the sanitary condition of the block; and, if they consider that its overcrowded condition is likely to cause risk of disease to the inhabitants of the buildings or of the neighbourhood, or to endanger the public health, they shall clearly indicate on a plan verified by the Executive Engineer or by the person deputed by him to serve on the Committee, the buildings which should, wholly or in part, be removed in order to abate the unhealthy condition of the block.

(*3*) If, upon receipt of such report, the Cantonment Authority is of opinion that all or any of the buildings indicated should be removed, it may, by notice in writing require the owners thereof to remove them :

Provided that the Cantonment Authority—

(*i*) shall make compensation to such owners for any buildings which may have been erected under proper authority; and

(*ii*) may, if it appears to it to be equitable under the circumstances to do so, pay to such owners such sum as it may think fit as compensation for any buildings which may not have been erected under proper authority.

(*4*) The sum payable as compensation under sub-clause (*i*) of this rule may be settled by mutual agreement between the Cantonment Authority and such owners as aforesaid, or, in default of agreement, by a Committee of Arbitration constituted as provided in the Appendix to these rules.

EXPLANATION.—In this rule "buildings" include enclosure walls or fences connected with buildings.

Reduction of number of inmates of overcrowded dwelling.

2 If it appears to the Cantonment Authority that any building used as a dwelling is so overcrowded as to endanger the health of the inmates thereof, it may, after such enquiry as it may think fit to make, by notice in writing, require the owner or occupier, within a reasonable time, to be specified in the notice, to abate the overcrowding of the building by reducing the number of lodgers, tenants or other inmates thereof.

Penalties.

3. Whoever fails to comply with any notice issued under rule 1 or rule 2 shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing failure, with an additional fine which may extend to five rupees for every day after the date of first conviction on which the failure is proved to have been persisted in.

APPENDIX.

Obligation of Commanding Officer of Cantonment to convene a Committee of Arbitration to determine amount of compensation payable.

I. If the Cantonment Authority and the person or persons concerned are unable to agree as to the amount of any compensation payable under rule I, sub-clause (*i*), the Commanding Officer of the cantonment shall proceed to convene a Committee of Arbitration to determine the amount payable.

Procedure for convening Committee of Arbitration.

II. (*1*) Whenever a Committee of Arbitration is to be convened, the Commanding Officer of the cantonment shall cause an order to be published in Station Orders, stating the matter to be determined.

(*2*) The Cantonment Magistrate shall send a copy of such order to the District Magistrate and to the parties concerned and shall, by notice in writing, require such parties to nominate members of the Committee in accordance with rule III and rule IV.

Composition of Committee of Arbitration convened in pursuance of rule I

III. (*1*) Every Committee of Arbitration convened in pursuance of rule I shall consist of—

(*a*) the District Magistrate or, if it is inconvenient for him to act on the Committee, some Magistrate, being a Justice of the Peace, appointed by him to act in his stead ;

(*b*) a member to be nominated by the person or persons concerned ; and

(*c*) a member to be nominated by the Cantonment Authority :

(*2*) Provided that—

(*i*) if the person or persons referred to in clause (*b*) of this rule shall fail to nominate a member within seven days from the date on which he or they may be called upon to do so, or

(*ii*) if any member nominated by such person or persons neglects or refuses to act, and such person or persons shall fail to nominate another member in his place within seven days from the date on which he or they may be called upon to do so,

the Commanding Officer of the cantonment shall forthwith appoint a member in the place of a nominee of such person or persons.

IV. No person shall be nominated or appointed a member of a Committee of Arbitration who is personally interested in the matter under reference, and whose services are not immediately available for the purposes of the Committee; and the nomination of any person who is so interested, or whose services are not so available, shall be deemed to constitute a failure to make a nomination.

Members of Committee of Arbitration to be persons who are not personally interested, and whose services are immediately available.

V. When a Committee of Arbitration has been duly constituted, the Cantonment Magistrate shall, by notice in writing, inform each of the members of the fact, and the Committee shall assemble within seven days from the service of such notice.

Assembly of Committee of Arbitration.

VI. The District Magistrate or the Magistrate appointed by him to act in his stead shall be the chairman of every Committee of Arbitration.

President of Committee of Arbitration.

VII. (*1*) The decision of every Committee of Arbitration shall be determined by the majority of the votes of the members present at a meeting at which the chairman attends and of which notice specifying the time and place therefor has been served on each of the other members of the Committee.

Decision of Committee of Arbitration to be by vote.

(*2*) In case of an equality of votes, the chairman shall have a second or casting vote.

(*3*) The decision of every Committee of Arbitration shall be final.

No. 3.—The following is published for general information :—

No. 991 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 31st December 1896.

General Rules for railways under construction.

READ—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act (IX) of 1890.

Government of India, Public Works Department, notification No. 480½, dated the 30th October 1890, publishing in the *Gazette of India* of the 8th November 1890, the Government of India resolution No. 736 R. T., dated the 17th October 1890, and the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 4952, dated the 21st December 1896, forwarding letter from the Agent of the East Indian Railway Company, No. 1411 G., dated the 15th December 1896.

OBSERVATIONS.—The Agent of the East Indian Railway Company has applied for leave to adopt, on the Moghal Sarai-Gya railway, the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of 8th November 1890, under Public Works Department notification No. 480½, dated the 30th October 1890.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules referred to in the foregoing observations to the Moghal Sarai-Gya railway, which has been sanctioned for construction.

ORDER.—Ordered that the General Rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the engineer in charge of the construction of the railway.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India*.

The 6th January, 1897.

No. 6.—The following is published for general information :—

No. 989 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 31st December 1896.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government, therewith promulgated.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Resident at Hyderabad, No. $\frac{215}{R.}$, dated the 19th December 1896, forwarding letter from the Agent and Manager of His Highness the Nizam's Guaranteed State Railways Company, No. 2559 W., dated the 18th December 1896.

OBSERVATIONS.—The Agent and Manager of His Highness the Nizam's Guaranteed State Railways Company has applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Bezwada extension of the East Coast (State) railway.

RESOLUTION.—The Governor General in Council is pleased to sanction, with effect from the 15th January 1897, the application to the Bezwada extension of the East Coast (State) railway, of the General Rules, cited in the foregoing observations, for working open lines of railway in British India administered by the Government, in supersession of the rules now in force.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Resident at Hyderabad, for information and guidance.

W. S. S. BISSET, *Colonel, R.E.*,
Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 7th January, 1897.

NOTIFICATIONS.

No. 35 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888 in the office of the Secretary appointed under that Act during the week ending 2nd January 1897:—

No 446 of 1896.—Lincoln Gordon, district traffic superintendent, Oudh and Rohilkand State railway, Lucknow, for locking the doors of railway wagons and similar vehicles from the inside, the locking gear being interlocked from the buffer plate, thereby preventing theft of the contents during transit.

No. 447 of 1896.—Paluru Sankaranarayana, M.A., retired educational officer, of 69, Swami Pillai street, Chulai, Madras, for improved liquid measures.

No. 448 of 1896.—William Robert Harrison, consulting engineer, and Edwin Stephenson, oil refiner, both of Hull, for improvements in the method of, and apparatus for, extracting oil from seeds or other oleaginous substances.

No. 449 of 1896.—Miles Staples Cody, draughtsman, of No. 233, North California street, Stockton, San Joaquin county, California, for mail bag fasteners.

No. 450 of 1896.—Frederick Andrews, commercial traveller, of 157, Barry road, East Dulwich, and William Yardley Andrews, estate agent, of 31, Camberwell green, London, for improvements in stoppering bottles, jars, or other vessels.

No. 451 of 1896.—Walter Darby, Ion Darby and John Henry Punchard, manufacturers, all of Weston works, Weston street, and 249, Pentonville road, London, for improvements in or relating to burning liquid hydro-carbons in conjunction with an incandescent hood or mantle to produce an incandescent oil-burner.

No. 452 of 1896.—Pompeo Garuti, professor, and Riccardo Pompili, proprietor, trading as Garuti and Pompili, 11, via Foggia, Naples, for new and useful improvements in the apparatus for the production of oxygen and hydrogen by electrolysis (System Garuti).

No. 453 of 1896.—Frederick Billing, manufacturer, of Livery street, Birmingham, and William Edward Partridge, traveller, of 74, Grange road, Small Heath, aforesaid, for improvements in the mode and means for joining tubing to sockets, or to other lengths of tubing, with special application to the junction of cycle and motor frames.

No. 454 of 1896.—Alfred Blechynden, engineer, of "Roxburgh," Vanbrugh Park road west, Blackheath, for improvements in self-propelled vehicles.

No. 455 of 1896.—Charles Pickring, locomotive foreman, of 100, Main street, in the village of Richmond station, in the county of Richmond and province of Quebec, Canada, for improvements in smoke stacks.

No. 456 of 1896.—Bernhard Baron, manufacturer, of 51, St. Mary Axe, London, for improvements in cigarettes, and in method of, and apparatus for, manufacturing the same.

No. 457 of 1896.—August Graemiger, chemist, of Cheetham, Manchester, for improvements in apparatus for dyeing, scouring, bleaching, and otherwise treating yarn in cop or other compact form.

No. 458 of 1896.—William Brown, merchant, 16, Woodlands terrace, Swansea, for a protector or guard for the chest and lungs and (or) head.

No. 459 of 1896.—Charles Halford Thompson, F. R. H. S., Colonel in Her Majesty's Regiment of Royal Artillery, Eastcliff, Teignmouth, for fertilized and fertilizing materials for promoting the growth of plants.

No. 460 of 1896.—Francis Rowley Hill, assistant accountant, Bank of Bombay, Bombay, for an improved box for packing silver coin, etc.

No. 1 of 1897.—Rudolf Langhams, electrical engineer, of 12 B, Elisabeth Strasse, Berlin, for improvements in the manufacture or production electrolytically of coatings composed of earthy oxides.

No. 2 of 1897.—Charles Kingston Welch, engineer, of Park house, Coventry, for improvements in or relating to air-valves for pneumatic tyres.

No. 3 of 1897.—John Vaughan-Sherrin, electrical engineer, of 3, Codrington villas, Ramsgate, for improvements in and connected with dynamos, and the driving thereof, and electric motors for the driving of vehicles and machinery.

No. 4 of 1897.—Mark Worsnop Marsden, engineer, of 432, Chestnut street, city and county of Philadelphia in the State of Pennsylvania, for an improved corn product, and process of and apparatus for making the same.

No. 36 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 240 of 1896.—Charles FitzRoy Alexander Hallifax Bagot, of 59, Cadogan square, London, for improvements in and connected with pneumatic tyres for velocipedes and other vehicles. (Specification filed 22nd December 1896.)

No. 241 of 1896.—Charles FitzRoy Alexander Hallifax Bagot, of 59, Cadogan square, London, for improvements in pneumatic tyres for velocipedes and other vehicles. (Specification filed 22nd December 1896.)

No. 341 of 1896.—John Milton Brown, gentleman, of Mosman's, near Sydney, in the colony of New South Wales, and Numa Augustus,

Joubert, steam boat proprietor, of Hunter's hill, near Sydney, aforesaid, for improvements in apparatus for producing ice cream and the like. (Specification filed 18th December 1896.)

No. 37 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 97 of 1888.—Stephen Alley and John Alexander MacLellan, engineers, of Sentinel works, Polmadie, in the county of Renfrew, for improvements in and connected with apparatus for making moulds for casting. (From 2nd January 1897 to 2nd January 1898.)

No. 98 of 1888.—Thomas Witter, fire engineer, of 190, Blackburn road, Bolton, in the county of Lancaster, for improvements in automatic fire-extinguishing sprinklers. (From 2nd January 1897 to 2nd January 1898.)

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

ORDERS BY THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

*Australasian Colonies . .	15th ,,	*Vid* Tuticorin and Colombo.*
Straits Settlements, China, and Japan.	19th ,,	Per Steamer *Chelydra.*
Rangoon and Moulmein . .	14th ,,	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	11th ,,	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	9th ,,	Ditto.
Ditto ditto (Supplemental)	10th ,,	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	13th ,,	Ditto.
Madras, Colombo, Straits Settlements, China, and Japan.	13th ,,	Per A. Lloyd's Str. *Aglaja.*
Mauritius, Réunion, Mayotte, and Nossi Be.	16th ,,	*Vid* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,
Presidency Postmaster, Calcutta.

POSTAL NOTICE.

Inland official rates applicable to official correspondence for Ceylon.

Official correspondence for transmission from India to Ceylon by the land post (*viâ* Point Calimere) or *viâ* Tuticorin can in future be prepaid at the rates of postage which are applicable to inland official correspondence.

H. M. KISCH,
Offg. Dir.-Genl. of the Post Office of India.

CALCUTTA,
The 21st December, 1896.

MEDICAL STORE DEPARTMENT.

NOTICE.

Sealed Tenders, in duplicate, will be received by the Medical Store-keeper to Government, Punjab Command, Mian Mir, up to the 10th February, 1897, for the supply of Bazar Medical Stores, Surgical Instruments, Appliances and Sundries, and also for the repair of Surgical Instruments, etc., to the Medical Store Department, Punjab Command, from April 1st, 1897, to March 31st, 1898.

2. Tenders will only be received on printed forms, which can be obtained free of cost from this office, and must be signed with the name and address of the tenderer in full in English.

3. Lists of the Stores can be obtained free of cost on application to this office, and tenders may be for the whole or any part of the requirement; the Medical Store-keeper to Government reserving the right, under the orders of the Director General, Indian Medical Service, to accept the whole or any part of any tender, or to reject the whole without assigning any reasons.

4. Tenders must be accompanied by a Bank receipt for 5 per cent of their total value as earnest-money, which will be returned if the tender should be rejected; but in case of the Medical Store-keeper to Government accepting, under the orders of the Director General, Indian Medical Service, part of any tender only, and the tenderer failing to take up the contract, the whole earnest-deposit will be confiscated.

5. Tenders not complying with these conditions will be rejected.

6. Rates are required for delivery at the Medical Store Department, Mian Mir, but in the cases of tenderers from a distance sending their supplies by rail, and having no local agents, the Medical Store-keeper to Government will take delivery at the Railway Station, Mian Mir, West.

C. W. CARR-CALTHROP, *Brig.-Surgn.-Lt.-Col.*,
Medical Store-keeper to Government, Punjab Command.

MIAN MIR:
The 5th January, 1897.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ „ R 9, „ R9-3.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

H B S

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এক কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল সহিত ১৯৲
৪ আধ ,, ,, ৯৲ ,, ৯৷৹
৪ সিকি ,, ,, ৪৷৹৲ ,, ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিনকোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার সার্টিফিকেট দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R12-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
" each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 6 9
" the Calcutta Series. For the year .	7 2 6	8 6 3
" each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance :—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	₹ 20	₹ 14	₹ 9
,, three issues . . .	,, 55	,, 30	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates :—

	Without postage. ₹ a. p.	With postage. ₹ a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies ₹2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, ₹22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Criminal Tribes Act, 1871, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 7th January, 1897 :—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the Criminal Tribes Act, 1871, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

Memorandum by Mr. P. R. Desai, Pleader, District Court, Ratnagiri, dated 17th January, 1896 [Paper No. 1].
From Government, North-Western Provinces and Oudh, No. 172, dated 27th February, 1896, and enclosures [Papers No. 2].
From Government, Bengal, No. 1298 J, dated 29th February, 1896, and enclosures [Papers No. 3].
From Government, Punjab, No. 541, dated 23rd April, 1895, and enclosures [Papers No. 4].
From High Court, Calcutta, No. 1587, dated 5th May, 1895 [Papers No. 5].

2. In clause 2 of the Bill we have added in what will become section 1A of the Criminal Tribes Act the words "or members" so as to leave no room for doubt as to the intention of the law as it will stand when amended.

3. In clause 3 of the Bill we have restricted the scope of proposed section 17A (*1*) by limiting its provisions to the children of "registered" members of any tribe, gang or class which has been declared to be criminal. Section 12 of the existing Act gives an opportunity of complaint by any person deeming himself aggrieved by any entry made, or proposed to be made, in the prescribed register, and the application of the proposed new section will be restricted to the children of those who have had the opportunity of making such complaint and whose names have, notwithstanding, been retained on the register.

4. We have also added an explanation defining the term "children," which was necessary.

5. Clause 4 of the Bill had maintained in the first line of each sub-clause the wording of the old Act, which was liable to an obvious misinterpretation The possibility of such misinterpretation has been avoided by the interpolation of the words "registered under this Act" and "being a member of a proclaimed tribe" after the words "any person" in sub clauses (1) and (2), respectively. We have also, while making the law as proposed in the Bill distinctly more rigorous than the existing Act, somewhat abated the severity at first proposed. It appeared to the Committee that the Bill had been framed with too exclusive reference to the worst criminal tribe of all, the Sansiahs ; and that a less degree of stringency, while strengthening the hands of Government with respect to that tribe, would at the same time be more suitable in the case of other criminal tribes which are less reckless of life in the commission of crime.

6. In clause 5 of the Bill we have made some important changes. Section 19A, as drawn in the Bill as introduced, had followed generally in its wording, section 75 of the Indian Penal Code, and had made second offences under Chapters XII and XVII punishable with special severity. But the criminal tribes, at whom this legislation is aimed, are not addicted to offences relating to coin and Government stamps, with which alone Chapter XII deals, and all mention of this chapter has accordingly been left out. And with respect to Chapter XVII we have restricted our legislation to those sections which deal with those classes of violent crime which members of criminal tribes are in the habit of committing, leaving offences without violence to be dealt with under the Indian Penal Code. And we have further included such sections of Chapter XVI as appeared to us to be necessary, with a view to the repression of crimes of violence by members of criminal tribes. In restricting this section to crimes of violence, we have the support of the Government of the North-Western Provinces, at whose request this legislation has been undertaken.

We have further made an addition to this section with a view to making it clear that the legislation proposed does not affect the liability of a member of a criminal tribe to any other punishment to which he may be liable under the law.

7. Notwithstanding the objections which have been made to proposed section 19B, we have thought right to retain it, as likely to furnish useful help in coercing criminal tribes. As has been pointed out by the Government of the Punjab, the operative portion of the section has been taken word for word from the English Prevention of Crimes Act, and its application to persons who have not been already convicted is, in the opinion of the Committee, justified by the character of those who alone can come under its provisions. Under section 2 of Act XXVII of 1871, it is only where "a tribe, gang or class of persons is addicted to the systematic commission of non-bailable offences" that it can be declared "a criminal tribe," and persons against whom this can be proved, and who are hereditary criminals, are, in the opinion of the Committee, no less dangerous to the community than persons in England who have been twice convicted.

At the same time we have confined the operation of the section to registered members of a criminal tribe, and have reduced the punishment from seven to three years, and have in this respect amended the Bill in the direction suggested by the Punjab Government.

8. The publication ordered by the Council has been made as follows :—

No. II.

A Bill to amend the Criminal Tribes Act, 1871.

WHEREAS it is expedient to amend the Criminal Tribes Act, 1871; It is hereby enacted as follows:—

Title and commencement.

1. (*1*) This Act may be called the Criminal Tribes Act Amendment Act, 1897; and

(*2*) It shall come into force at once.

Addition to section 1, Act XXVII, 1871.

2. After section 1 of the Criminal Tribes Act, 1871, the following section shall be inserted, namely:—

Definition of tribe, gang and class.

"1A. In this Act the words 'tribe,' 'gang' and 'class' shall be deemed to include any portion *or members* of a tribe, gang or class."

Addition of new section after section 17, Act XXVII, 1871.

3. After section 17 of the said Act the following section shall be added, namely:—

Power to place children in reformatory settlements established for children and to apprentice them.

"17A. (*1*) The Local Government may establish *and maintain* reformatory settlements for children and may separate and remove from their parents and place in such a reformatory settlement the children of the *registered* members of any tribe, gang or class which has been declared to be criminal.

(*2*) For every reformatory settlement for children established under sub-section (*1*) a Superintendent shall be appointed by the Local Government.

(*3*) The Superintendent of a reformatory settlement for children shall be deemed to be the guardian, within the meaning of Act No. XIX of 1850 (*concerning the binding of apprentices*), of every child detained in such settlement; and such Superintendent may, if he shall think fit, and subject to any rules which the Local Government may make in this behalf, apprentice such child under the provisions of the aforesaid Act.

"*EXPLANATION.—The term 'children' in this section includes all persons under the age of 18 and above the age of four years.*"

Substitution of new section for section 19, Act XXVII, 1871.

4. For section 19 of the said Act the following section shall be substituted, namely:—

Penalties for breach of rules.

"19. (*1*) Any person *registered under this Act* violating a rule made under clause (*4*), clause (*5*) or clause (*6*) of section 18 shall be punishable with rigorous imprisonment for a term which may extend, on a first conviction, to one year, on a second conviction, to *two* years, and, on any subsequent conviction, to *three* years, and shall also, whether on the first or any subsequent conviction, be liable to whipping.

(*2*) Any person *being a member of a proclaimed tribe* violating a rule made under any other clause of section 18 shall be punishable with rigorous imprisonment for a term which may extend to six months, or with fine, or with whipping, or with all or any two of those punishments; and, on any subsequent conviction for a breach of any such rule, with rigorous imprisonment for a term which may extend to one year, or with fine, or with whipping or with all or any two of those punishments."

Addition of two new sections after section 19, Act XXVII, 1871.

5. After section 19 of the said Act the following sections shall be added, namely:—

Enhanced punishment for certain offences by members of criminal tribe after previous conviction.

"19A. Whoever, being a member of any tribe, gang or class which has been declared criminal, and having been convicted of *any of the offences under the Indian Penal Code specified in the schedule to this Act, shall thereafter be convicted of the same or any other offence specified in the said schedule, then he* shall, in the absence of special reasons to the contrary to be *mentioned* in the judgment of the Court, be punished, *on such second conviction*, with rigorous imprisonment for a term of not less than seven years, and on *a third* conviction with transportation for life. [*Cf* section 75 of Act XLV of 1860, and section 348 of Act X of 1882.] XLV of 1860.

Nothing in this section shall affect the liability of such person to any further or other punishment to which he may be liable under the Indian Penal Code or any other law.

Punishment for members of criminal tribe, found under suspicious circumstances.

"19B. Whoever, being a *registered* member of any tribe, gang or class which has been declared criminal, is found in any place under such circumstances as to satisfy the Court that he was about to commit, or aid in the commission of, theft or robbery, or that he was waiting for an opportunity to commit theft or robbery, shall be punishable with rigorous imprisonment for a term which may extend to *three* years, and shall also be liable to fine."

Addition of schedule to Act XXVII of 1871.

6. *To the said Act the schedule in the schedule to this Act shall be added.*

THE SCHEDULE.

(See section 6.)

THE SCHEDULE.

(See section 19A.)

Certain Offences punishable under Chapters XVI and XVII of the Indian Penal Code.

CHAPTER XVI.

SECTIONS.

299. Culpable homicide.
307. Attempt to murder.
308. Attempt to commit culpable homicide.

322. Voluntarily causing grievous hurt.
324. Voluntarily causing hurt by dangerous weapons or
326. Voluntarily causing grievous hurt by dangerous weapons or means.
327. Voluntarily causing hurt to extort property or to constrain to an illegal act.
328. Causing hurt by means of poison with intent to commit murder.
329. Voluntarily causing grievous hurt to extort property or to constrain to an illegal act.
332. Voluntarily causing hurt to deter public servant from his duty.
333. Voluntarily causing grievous hurt to deter public servant from his duty.

CHAPTER XVII.

382. Theft after preparation made for causing death, hurt or restraint, in order to the committing of the theft.
383. Extortion.
385. Putting person in fear of injury in order to commit extortion.
386. Extortion by putting a person in fear of death or grievous hurt.
387. Putting person in fear of death or of grievous hurt in order to commit extortion.
390. Robbery.
391. Dacoity.
393. Attempt to commit robbery.
394 Voluntarily causing hurt in committing robbery.
397. Robbery or dacoity, with attempt to cause death or grievous hurt
398. Attempt to commit robbery or dacoity when armed with deadly weapon.
399. Making preparation to commit dacoity.
402. Assembling for purpose of committing dacoity.
458 Lurking house-trespass or house-breaking by night after preparation for hurt, assault or wrongful restraint.
459. Grievous hurt caused whilst committing lurking house-trespass or house-breaking.
460 All persons jointly concerned in lurking house-trespass or house breaking by night punishable where death or grievous hurt caused by one of them.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend Act XXXVII of 1850 (*for regulating Inquiries into the behaviour of Public Servants*) was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 7th Jannuary, 1897 :—

WE, the undersigned Members of the Select Committee to which the Bill to amend Act XXXVII of 1850 (*for regulating Inquiries into the behaviour of Public Servants*) was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

Correspondence with Government, Madras, from 19th September to 7th November, 1896 [Papers No. 1].

2. The Madras Government took exception to the Bill as originally drafted on the ground that it might be held to alter the existing law in the two following respects : *First*, as depriving the Local Government of the power it now possesses of putting the Act of 1850 into operation in the case of Indian Civil Servants and others who can be dismissed from the service by order of the Secretary of State alone, and *secondly*, as implying an intention that all public and formal inquiries into the misconduct of public servants of all grades should, as a rule, be made under the same Act. As it was not the intention of the Bill to change the existing law and practice in either of these respects, we have proposed the following amendments in the Bill : (*a*) the insertion in the preamble of the Act of 1870 of the words "from their appointments" after the word "removable", (*b*) the insertion of the words "not removable from his appointment without the sanction of the Government" after the word "Government" in section 2 of the same Act as proposed to be amended by section 3 of the Bill, and (*c*) the insertion of the words "from his appointment" after the word "removed" in the new section 23 proposed by section 4 of the Bill.

3. The publication ordered by the Council has been made as follows :—

The 31st December, 1896.

No. II.

A Bill to amend Act XXXVII of 1850 (for regulating Inquiries into the behaviour of Public Servants).

WHEREAS it is expedient to amend Act XXXVII of 1850 (*for regulating Inquiries into the behaviour of Public Servants*); it is hereby enacted as follows:—

Title of Act XXXVII, 1850.

1. The said Act XXXVII of 1850 may be called the Public Servants (Inquiries) Act, 1850.

Amendment of preamble to Act XXXVII, 1850.

2. In the preamble to the said Act, *after the word "removable" the words "from their appointments" shall be inserted, and* for the words "the East India Company" the word "India" shall be substituted.

Amendment of section 2, Act XXXVII, 1850.

3. In section 2 of the said Act, for the words "the East India Company, not removable from his office without the sanction of the same Government," the words "the Government, *not removable from his appointment without the sanction of the Government,*" shall be substituted.

Substitution of new section for section 23, Act XXXVII, 1850.

4. For section 23 of the said Act the following section shall be substituted, namely:—

Powers of Government under this Act by whom exercisable.

"23. The powers of the Government under this Act may in all cases be exercised by the Governor General in Council, and when the person accused can be removed *from his appointment* by the Local Government, those powers may also be exercised by the Local Government."

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the amendment of the rules for the conduct of the Legislative business was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 7th January, 1897 :—

We, the Select Committee, appointed to consider certain amendments in the rules for the conduct of the legislative business of the Council of the Governor General, have the honour to submit this our Report with a draft of the rules as they will stand with the amendments we have suggested appended, the amendments being shown in italics.

2. The reasons for the amendments we have proposed in the rules are noted briefly below against the number of each of the rules in question.

Rule 2.—In the definition of Secretary we have proposed the inclusion of the Deputy Secretary as it is desirable to provide for cases in which the Secretary may be unable temporarily to attend to the duties of his office.

Rule 5.—We have suggested the substitution of a new rule for rule 5 regarding the position of members at the Council table, in order to bring the rule into accord with actual practice.

Rule 9.—The proposed amendment is intended to remove an inconvenience which has been experienced in practice. It is desirable that the Law Member should have an opportunity, when necessary, of speaking according to his position in the Council and not be required, as at present, to do so according to the seat he may occupy at the Council table.

Rule 14.—It is considered desirable that communications on matters connected with Bills before the Council when submitted by private individuals should, as in the case of such communications from Courts (except the High Court at Fort William), officials and public bodies, be forwarded ordinarily through the Local Government.

Rule 17.—We have limited the duty of the Secretary to cause Bills to be translated into Hindustani for the use of Members unacquainted with English to cases in which he may be requested so to do. This is in accordance with the amendments suggested in rules 25 and 28 (26 and 29 in draft) below.

Rule 21 (22 in draft).—The alterations proposed are intended to bring rules 17-A and 21 into harmony, and have been suggested by the present practice of moving for the publication of Bills when they are introduced in Council.

Rule 25 (26 in draft).—Reports of Select Committees are as a rule published in the Gazette of India immediately after they have been presented to the Council, and provision for a direction by the Committee or the President for publication is unnecessary and opposed to present practice.

Reports are not translated unless Members who are unacquainted with English ask for translations, and as the necessity for translations of reports has almost, if not entirely, disappeared, it is proposed to amend paragraph 2 of this rule in the manner indicated.

Rule 28 (29 in draft).—A similar amendment to that proposed in rule 25 is suggested in paragraph 3 of this rule in the case of notices of amendments of Bills. We have also amended this rule so as to make it clear that it is the duty of the Secretary, if time permits, to cause every notice of amendment, whenever the same may be received by him, to be printed and sent to Members.

Rule 32 (34 in draft).—The publication of Acts in the vernacular is ordinarily left to the Local Governments, and it is proposed to bring the rule into accord with existing practice, provision being made for cases in which the Council may deem it necessary to order such publication.

Rule 33 (35 in draft).—We have added a second clause to this rule prohibiting the Secretary from entering in the list any business of which three days' notice has not been given, without the special orders of the President. The object of this addition is to make

it possible for the Secretary to conform with the first clause of the rule, which requires him to send each Member a list of business at least two days before each meeting of the Council. It will be observed that we have saved notices of amendments of Bills which are specially provided for by rule 29 of the draft.

Rule 35 (37 in draft).—The alterations suggested are necessitated by the procedure which has now to be observed in connection with the preparation and publication of reports of the proceedings of the Council.

Rule 37 (39 in draft).—As there has ceased to be an Assistant Secretary in the Legislative Department, an alteration in this rule has become necessary.

M. D. CHALMERS.
J. WESTLAND.
H. E. M. JAMES.
A. CADELL.
G. H. P. EVANS.

The 4th January, 1897.

Rules for the Conduct of the Legislative Business of the Council of the Governor General.

I.—Preliminary.

1. These Rules supersede the Rules for the Conduct of Business at the meetings of the Council *made on the 11th day of February, 1873, and the 16th day of February, 1883.*

2. In these Rules—

"Council" means the Council of the Governor General of India assembled for the purpose of making Laws and Regulations:

"President" means the Governor General or (during the time of his visit to any part of India unaccompanied by his Council) the President nominated by the Governor General in Council, under the Indian Councils Act, 1861 section 6; or, in the absence of both the Governor General and the President so nominated, the senior Ordinary Member of Council present and presiding:

"Member" means a Member of the Council, whether ordinary, extraordinary or additional:

"Secretary" means the Secretary to the Government of India in the Legislative Department, and includes *the Deputy Secretary and* every person for the time being exercising the functions of *the Secretary:* and

"Local Government" includes a Chief Commissioner.

II.—Meetings of the Council.

3. The Council shall ordinarily meet at 11 A.M., and shall not prolong its sitting after 4 P.M., unless the President otherwise directs.

4. The quorum shall be seven, including the President.

5. *The Governor or Lieutenant Governor and the Law Member shall sit where the President may direct.*

Subject to any such direction, the Members shall sit in the following order, beginning from the right of the President:—

(1) *The Commander-in-Chief.*

(2) *The Ordinary Members according to seniority.*

(3) *The Additional Members according to seniority.*

6. The President may adjourn, without any discussion or vote, any meeting or business, whether there be a quorum present or not, to any future day, or to any *hour* of the same day.

7. The President shall preserve order, and all points of order shall be decided by him, no discussion thereupon being allowed

8. A Member desiring to make any observations on any subject before the Council shall address the President without rising from his chair.

9. On all matters brought before the Council after the Member who makes a motion has spoken, each Member consecutively, beginning with the Member on the left of the President, may make such observations as he thinks proper *The Law Member, however, may speak according to the position of the seat he would occupy if he sat in order of seniority and not according to the seat he may occupy at the Council table under rule 5.*

After all the Members in turn have had an opportunity of speaking, the Mover may speak once by way of reply, and any other Member may, with the permission of the President, speak once by way of explanation:

Provided that, if the matter be an amendment of a Bill, the Member in charge of the Bill shall be entitled to speak next after the Mover of the amendment.

10. When, for the purpose of explanation during discussion, or for any other sufficient reason, any Member has occasion to ask a question of another Member on any measure then under the consideration of the Council, he shall ask the question through the President.

11. Any Member may speak at the request and on behalf of another Member who is unable to express himself in English.

12. On every motion before the Council, the question shall be put by the President, and shall be decided by a majority of votes.

In case of a division, the votes shall be taken by the Secretary in consecutive order, beginning with the Member on the left of the President.

After the question is put no further discussion upon it shall be allowed.

13. Any Member may ask for any papers or returns connected with any Bill before the Council. The President shall determine, either at the time or at the Meeting of the Council next following, whether the papers or returns asked for can be given.

14. Communications on matters connected with any Bill before the Council may be addressed, either in the form of a petition to the Governor General in Council, or in a letter to the Secretary, and must in either case be sent to the Secretary. Ordinarily, such communications will not be answered.

Except in the case of the High Court at Fort William, such communications * shall ordinarily be sent through the Local Government.

15. The Secretary shall either cause such communications to be printed and send a copy to each Member, or circulate them for the perusal of each Member.

III.—Introduction and publication of Bills.

16. Any Member desiring to move for leave to introduce a Bill in accordance with the provisions of section 19 of the Indian Councils Act, *1892*, shall give the Secretary at least three days' previous notice of the title and object of the Bill.

If such motion be carried, the Bill with a full Statement of Objects and Reasons shall, if not already prepared, be prepared by the Member or (if he so desire) by the Secretary in consultation with the Member.

17. The Secretary shall then cause the Bill together with the Statement of Objects and Reasons, to be printed, and shall send a copy to each Member

If any of the Members are unacquainted with English, he shall also, *if requested*, cause the Bill and the Statement of Objects and Reasons to be translated into Hindustani for their use.

18. The Council may, at any time after leave to introduce a Bill has been granted, direct that the Bill be published in such manner as the Council thinks fit.

19. When a Bill is introduced, or on some subsequent occasion, the Member in charge of it shall make one or more of the following motions.—

(*a*) that it be referred to a Select Committee, or

(*b*) that it be taken into consideration by the Council, either at once or at some future day to be then mentioned, or

(*c*) that it be circulated for the purpose of eliciting opinion thereon.

20. No such motion shall be made until after a copy of the Bill and a copy of the Statement of Objects and Reasons have been furnished to each Member. Any Member may object to the motion unless such copies have been furnished to him at least seven days previously and such objection shall prevail unless the President, in exercise of his power to suspend any of these Rules, allows the motion to be made.

21. On the day on which such motion is made, or on any subsequent day to which the discussion is postponed, the principle of the Bill and its general provisions may be discussed.

22. When any motion mentioned in rule 19 is carried, the Bill shall, together with a Statement of its Objects and Reasons, *if not already published on a motion under rule 18*, be published in English in the Gazette of India

The Bill and Statement shall also, *if publication has not already been directed*, be published in such official Gazettes and in such vernacular languages (if any) as the Council in each case decides to be necessary for the purpose of giving notice to the communities affected by the Bill.

For this purpose, the Council shall make an order at the Meeting at which such motion is carried, and may from time to time, on the motion of any Member, vary or cancel such order.

* "from Courts, officials, or public bodies" omitted.

23. The Governor General, if he see fit, may order the publication of a Bill, together with the Statement of Objects and Reasons which accompanies it, in such Gazettes and languages as he thinks necessary, although no motion has been made for leave to introduce the Bill.

In that case it shall not be necessary to move for leave to introduce the Bill; and if the Bill be afterwards introduced, it shall not be necessary to publish it again.

IV.—Select Committees.

24. The Law Member shall be a Member of every Select Committee.

The other Members of every Committee shall be named by the Council when the Bill is referred, or at any subsequent Meeting.

The Law Member and, in his absence, the Member in charge of the Bill, shall be chairman of the Committee, and, in the case of an equality of votes, the chairman shall have a second or casting vote.

25. After publication of a Bill in the Gazette of India, the Select Committee to which the Bill may have been referred shall make a report thereon.

Such report shall be made not sooner than three months from the date of the first publication in the Gazette of India, unless the Council orders the report to be made sooner.

Reports may be either preliminary or final.

The Select Committee shall in their report state whether or not in their judgment, the Bill has been so altered as to require re-publication, whether the publication ordered by these Rules or by the Council has taken place, and the date on which the publication has taken place, or, where publication in more than one Gazette or in more than one language is ordered, the date on which the publication in each such Gazette and each such language has taken place.

If, in the judgment of the Committee, the Bill has been so altered as to require re-publication, the Secretary shall send a copy of the altered Bill to the Secretary of the Department to which it pertains.

When the Committee recommend the re-publication of a Bill which was originally ordered by these Rules or by the Council to be published in more than one Gazette or in more than one language, they shall, in the absence of anything to the contrary in their report, be taken to recommend that the Bill be re-published in every such Gazette and every such language.

If the Committee are of opinion that it is unnecessary to re-publish the Bill in any such Gazette or in any such language, they shall, in their report, state the grounds of their opinion.

26. The Secretary shall cause every report of a Select Committee to be printed, and shall send a copy of such report to each Member, and * shall cause the report, with the amended Bill, to be published in the Gazette of India.

If any Member present is unacquainted with English, *the Secretary* shall also, *if requested*, cause the report to be translated into Hindustani for *his* use.

27. The report of the Select Committee on a Bill shall be presented to the Council by the Member in charge of the Bill, and shall be taken into consideration by the Council as soon as conveniently may be; but any Member may object to its being so taken into consideration when he has not been furnished for a week with a copy of the report; and such objection shall prevail, unless the President, in exercise of his power to suspend any of these Rules, allows the report to be taken into consideration.

V.—Consideration and Amendments of Bills.

28. When a Bill is taken into consideration by the Council, any Member may propose an amendment of such Bill.

29. If notice of such amendment has not been sent to the Secretary at least three days before the meeting of the Council at which the Bill is to be considered, any Member may object to the moving of the amendment, and such objection shall prevail, unless the President, in exercise of his power to suspend any of these Rules, allows the amendment to be moved.

The Secretary shall, *if time permits*, cause every notice *of amendment* to be printed, and send a copy for the information of each Member.

* "if the Committee or the President so direct" omitted.

If any Member present *is* unacquainted with English, *the Secretary* shall also, *if requested*, cause every such notice to be translated into Hindustani for *his* use.

30. Amendments shall ordinarily be considered in the order of the clauses to which they respectively relate.

31. Notwithstanding anything in the foregoing Rules, it shall be in the discretion of the President, when a motion that a Bill be taken into consideration has been carried, to submit the Bill or any part of the Bill to the Council section by section. When this procedure is adopted, the President shall call each section separately, and when the amendments relating to it have been dealt with, shall put the question "that this section, or (as the case may be) this section as amended, stand part of the Bill."

32. Any Member may move that a Bill which has been amended by the Council or by a Select Committee be re published or re-committed, and, if the Council so decide, the President may order the Bill to be re-published or re-committed, as the case may be.

33. If no amendment be made when a Bill is taken into consideration by the Council, the Bill may at once be passed.

If any amendment be made, any Member may object to the passing of the Bill at the same Meeting; and such objection shall prevail, unless the President, in exercise of his power to suspend any of these Rules, allows the Bill to pass.

Where the objection prevails, the Bill shall be brought forward again at a future Meeting, and may then be passed with or without further amendment.

34. When a Bill is passed by the Council, a copy thereof shall be signed by the President, and, when the Governor General has declared his assent thereto, such copy shall be signed by the Governor General, and the Bill shall be published as soon as possible in the official Gazettes, under the signature of the Secretary, as an Act of the Governor General in Council.

Such publication shall be made in the Gazette of India in English and in the official Gazettes of the Local Governments in English and in *such* vernacular languages spoken in the territories subject to such Governments respectively *as may be ordered by the Council or directed by the Local Government:*

Provided that, when the Act does not apply to the whole of British India, it shall be published only in the Gazette of India and in the Gazettes of the Local Governments to whose territories it applies.

VII.—Duties of Secretary.

35. At least two days before each meeting of the Council, the Secretary shall send to each Member a list of the business to be brought forward at such meeting.

Subject to the provisions of rule 20, no business shall be entered by the Secretary in a list, unless notice thereof has been given to him at least three days before the Meeting of the Council to which the list relates:

Provided that business may be added to the list at any time before a Meeting under the special orders of the President.

36. The Secretary shall keep a journal, in which all the proceedings of the Council shall be fairly entered.

The journal shall be submitted after each Meeting to the President for his confirmation and signature, and, when so signed, shall be the record of the proceedings of the Council.

37. The Secretary shall also *cause to be* prepared a *full* report of the proceedings of the Council at each of its Meetings,* and publish it in the Gazette of India as soon as *practicable*. He shall send a copy of such report to each Member and also to the Permanent Under-Secretary of State for India.

38. In addition to the other duties specially required by these Rules, it shall be the duty of the Secretary—

1st, to draft all Bills originated by the Government of India, the Statements of their Objects and Reasons, and the Reports of the Select Committee to which such Bills are referred;

2nd, to take charge of the copies of the Bills signed by the Governor General and of all the other records of the Council;

3rd, to keep the books of the Council;

4th, to keep a list of the business for the time being before the Council;

5th, to superintend the printing of all papers printed in pursuance of these rules;

6th, to assist the Council and all Committees in such manner as they may direct;

* "including an abstract of the observations of the Members" omitted.

7th, to send to the Secretary of the Department to which the Bill pertains, any Bill which an Additional Member has obtained leave to introduce under rule 16;

8th, to examine all Bills deposited by Additional Members, and report to the President on those which contain clauses trenching on subjects coming within section 19 or section 22 of the Indian Councils Act, 1861;

9th, to write all letters which the Council or the President, or any Select Committee, or the Law Member, directs to be written.

39. It shall be the duty of the *Secretary* to *cause to be* translated into Hindustani Bills, Statements of Objects and Reasons, Reports of Select Committees and Amendments of Bills, to *cause* papers *to be explained* to Members unacquainted with English, and otherwise to assist them in such manner as they may require.

VIII.—Miscellaneous.

40. Strangers may be admitted into the Council Chamber during the sittings of the Council on the order of the President.

Application for orders of admission is to be made to the Secretary.

41. The President, on the motion of any Member, may direct at any time during a sitting of the Council that strangers withdraw.

42. Any paper relating to any measure before the Council may be published by order of the President.

Copies of papers so published shall be sold at such rates as may be fixed by the Secretary.

43. Any Bill respecting which no motion has been made in the Council for two years may, by order of the President, be removed from the List of Business.

44. The President, for sufficient reason, may suspend any of the foregoing Rules.]

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 7th January, 1897.

PRESENT:

His Excellency the Earl of Elgin, Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Honour Sir Alexander Mackenzie, K.C.S.I., Lieutenant-Governor of Bengal.
His Excellency Sir G. S. White, G.C.I.E., K.C.B., V.C., Commander-in-Chief in India.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble Sir J. Woodburn, K.C.S.I.
The Hon'ble M. D. Chalmers.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E.
The Hon'ble A. C. Trevor, C.S.I.
The Hon'ble C. C. Stevens, C.S.I.
The Hon'ble H. E. M. James.
The Hon'ble Sir A. S. Lethbridge, K.C.S.I., M.D.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahadur.
The Hon'ble Alan Cadell, C.S.I.
The Hon'ble J. D. Rees, C.I.E.
The Hon'ble G. P. Glendinning.
The Hon'ble P. Playfair, C.I.E.
The Hon'ble Rahimtula Muhammad Sayani, M.A., LL.B.
The Hon'ble Pandit Bishambar Nath.
The Hon'ble Joy Gobind Law.

NEW MEMBER.

The Hon'ble JOY GOBIND LAW took his seat as an Additional Member of Council.

FISHERIES BILL.

The Hon'ble SIR JOHN WOODBURN moved that the Hon'ble Pandit Bishambar Nath be added to the Select Committee on the Bill to provide for certain matters relating to Fisheries in British India.

The motion was put and agreed to.

CRIMINAL TRIBES ACT, 1871, AMENDMENT BILL.

The Hon'ble MR. CADELL presented the Report of the Select Committee on the Bill to amend the Criminal Tribes Act, 1871. He said:—"With Your Excellency's permission I desire to make a few remarks not so much with reference to the changes in the Bill, which are sufficiently explained in the Report of the Select Committee, as with respect to some of the opinions which have from time to time been received and circulated. Hon'ble Members will see from these papers that the Governments consulted are generally in favour of the legislation proposed, and that it has been concurred in by most of the officers consulted by the Local Governments. At the same time there are a good many officers who have been consulted who are strongly opposed to certain of the provisions. This marked divergence of opinion may to some extent be accounted for by the varying experience of the different officers consulted, but it may also be due in some measure to the failure to recognise the very limited scope of the legislation on this subject, and it is with reference to this point that I am anxious to detain the Council for a few minutes.

"Before a criminal tribe can be dealt with under the Criminal Tribes Act, 1871, it is necessary that the Local Government should show, to the satisfaction of the Governor General, that such tribe is addicted to the systematic commission of non-bailable offences. In this way, before the provisions of this Act can be applied to any tribe, it is necessary not only to assume but to prove that its members have been in the habit of preying upon the community. Further, the Bill now before the Council has been modified by the Select Committee to an extent which largely restricts its application. We have changed it so that the severer clauses are restricted to persons registered under this Act and to their children. Now, section 12 of the Criminal Tribes Act lays down that 'Any person deeming himself aggrieved by any entry made, or proposed to be made, in such register, either when the register is first made or subsequently, may complain to the said Magistrate against such entry,' and if he is dissatisfied with the order passed he can appeal to the Commissioner. This provison constitutes a very important protection to those members of the larger tribes who have given up a criminal life, and it may become an equally powerful protection in the case of members of any criminal tribe if they abandon their hereditary career of crime. The provisions which it is now proposed to enact are admittedly severe, but they are directed only against members of tribes who for generations have been addicted to criminal practices, and they do not affect the more orderly members of those tribes, still less any other classes of the community."

ACT XXXVII OF 1850 AMENDMENT BILL.

The Hon'ble MR. CHALMERS presented the Report of the Select Committee on the Bill to amend Act XXXVII of 1850 (*for regulating Inquiries into the behaviour of Public Servants*). He said he thought it was unnecessary to say anything about the Report. The amendment simply made it clear that all Local Governments possessed the same powers as to ordering inquiries as were possessed by the Local Governments which existed in 1850.

PROVIDENT FUNDS BILL.

The Hon'ble MR. CHALMERS moved that the Bill to amend the law relating to Government and other Provident Funds be referred to a Select Committee consisting of the Hon'ble Sir James Westland, the Hon'ble Mr. Trevor, the Hon'ble Mr. Rees, the Hon'ble Mr. Sayani, the Hon'ble Joy Gobind Law and the mover.

The motion was put and agreed to.

RULES FOR THE CONDUCT OF BUSINESS.

The Hon'ble MR. CHALMERS presented the Report of the Select Committee appointed to consider certain amendments in the Rules for the Conduct of the Business of the Legislative Council of the Governor General of India. He explained that the amendments were all matters of small detail and he thought the Report would furnish the explanations for them. If, when the Report had been in the hands of Hon'ble Members, they desired any further explanation at the next meeting, he would be happy to give that explanation on behalf of the Committee.

AGRICULTURAL PROSPECTS.

The Hon'ble SIR JOHN WOODBURN said :—" I have to ask Your Excellency's permission to make a brief statement of the present position of the crop prospects in India and of the measures that have been taken for famine relief.

" When the statement of the 15th of October last was made, the information before the Government of India was that there had been a very severe failure of harvest in a large area of the North-Western Provinces and Oudh and a considerable portion of the Punjab, and that severe scarcity was apprehended in considerable areas of the Central Provinces, and two districts of Upper Burma, whilst the Bombay Government were uneasy about the Dekkhan districts.

" The situation during the next month developed very rapidly and seriously, owing to the continued absence of rain for the October and November sowings, and the prospects became of the very gravest character, when a rain current in the end of November from the south passed up the west of India through Rajputana into the North-Western Provinces as far as Behar. The rain throughout this great area was general, though varying much in amount; it revived the crops that had germinated, and it enabled a considerable additional area to be sown in winter crops. These late sowings are for the most part entirely dependent on winter rains.

" These winter rains have come last week; again general, but again of very varying amounts. They have, however, done a great deal of good, particularly in the North-Western Provinces and Punjab, and in large tracts of the country have made practically secure the crops now in the ground.

" More precise intelligence will be received from the provinces within the next few days, and will be published, as all information at the disposal of the Government has been continuously published, for the information of the public and the assistance of the mercantile community.

" It may interest the Council if I give a very brief summary of the present position in each province.

" By far the most serious crop failure was in the North-West Provinces. The outturn of the autumn harvest for the provinces as a whole was not more than half the normal. In 8 of the 45 plains districts which are protected by canals the outturn was practically a full one. In the five southern districts the outturn was not more than four to five annas, and this grave failure followed upon failures in the two preceding harvests, which had necessitated the maintenance on relief works of no less than 300,000 people. About seventy per cent. of the normal area under winter crops in the Province has been sown, and the seed everywhere has germinated well. The estimate made by the Lieutenant-Governor in the end of November was that, if winter rains did not fall, Government would have to face the provision of relief for a daily average of $2\frac{1}{2}$ millions of people for three months. If the winter rains fell, his opinion was that the numbers on his famine works would not exceed an average for that period of one million, a difference which sufficiently indicates the enormous importance of the winter rains to the prospects of the year. The rainfall of last week is reported to have been sufficient except in the districts of Bundelkhand; and, unless some unforeseen calamity occurs, the harvest, it is anticipated, will suffice for the population till the next autumn crop is reaped. A very anxious period for the rabi harvest in the most gravely affected of the provinces

has ended, for the most part auspiciously. The numbers on the relief works and in the poor-houses connected with them amounted at the end of last week to 348,000. These numbers may be expected to increase largely and rapidly in the current month in the interval when there is little employment in the fields for the agricultural labourer. Twelve districts have been formally recognised as affected by famine; and in 22 others that are not protected by canals, test works and poor-houses are open.

"In the Punjab there was also a very short autumn crop; and on the unirrigated lands, which constitute three-fifths of the rabi area, the sowings have been largely restricted. The rains of the end of December, though nowhere so heavy as might be desired, have been fortunately heaviest in the portion of the province which needed them most. Relief works are in progress in five districts, employing upwards of 25,000 labourers, and test-works have been opened in four others. The produce of two-fifths of the rabi area is secure, the portion which is in any event the most productive; the prospects of the harvest in the unirrigated balance have been greatly improved.

"In Rajputana there are only six States in which famine works have been necessary. The numbers employed at the last return were upwards of 36,000, of whom, however, 28,000 are in Bikanir and Bhurtpur alone.

"The condition of affairs in the States of Central India, at any rate in Bundelkhand and Baghelkhand, is very much more serious than in Rajputana, especially in the former, the state of which corresponds more closely with that of the Bundelkhand districts of the North-Western Provinces. It has, however, just received nearly an inch of rain. The numbers on relief were reported to be 7,500 on the 23rd December, but the reports were not complete.

"In the Central Provinces the outturn of the autumn crops did not average more than five annas, and followed upon a succession of three years of bad seasons in some parts of the provinces, one of which amounted in three districts to famine. The rain of November did much good in the Southern and Plateau districts; but almost everywhere the area sown has been largely below the normal. The rain of December has, however, much benefited the standing crops, especially in the north and east of the provinces, and the condition of the spring crops is now reported as generally favourable. Acute distress is present in four districts; less acute in parts of nine others. Nearly 72,000 are already on relief works or in receipt of gratuitous relief; and, as in other parts of the country, these numbers must certainly increase largely, while no diminution can be expected until at least the crops rabi have been harvested, and, in districts where the rabi area is small, until the reaping of the next autumn crop.

"In the Berars an eight-anna autumn crop was reaped, which has sold well. The anticipations are of an eight-anna winter crop, and rain has recently fallen in the part which needed it most. It is anticipated that some help will be necessary in the districts of East Berar, but West Berar will probably escape any severe failure.

"In Bombay the situation in the middle of November was in some respects more serious than it was in 1877. Thirteen districts were affected instead of nine; the kharif failure, except in Sholapur and Bijapur, had not been so complete; but the prospects of the rabi sowings were as bad as they were in that year, and the prices at the commencement of the season were very greatly higher; in other words, the sources of help from other parts of India were fewer. The rain of November, however irregular as it was, enabled large parts of the drought-stricken area to be sown. Except in Sholapur and Bijapur, about two-thirds of the winter area has been sown; and the rains of last week, if again irregular, have done something to strengthen the standing crops, although more is urgently wanted. Relief works have been opened in nine districts, with a daily average attendance of 139,000 persons. In the remainder of the Presidency the agricultural prospects are favourable.

"In Hyderabad and Mysore the crops and the outlook are on the whole fair.

"In Madras the prolonged failure of the north-east monsoon led by the middle of November to great alarm. Abundant rain, however, then began. Good harvests were reaped throughout the south, but distress has already de-

cleared itself in the four Dekkhan districts, where 26,000 people are in receipt of relief, and is anticipated in Ganjam and perhaps Vizagapatam.

"Bengal has also had a very bad season. The early rice yielded a 9½ anna harvest; the winter rice, the other great harvest of the province, is not expected to yield more than 7½ annas. In North Behar the rice-failure was more severe than in the rest of Bengal, and in the three districts of Champaran, Muzafferpore and Darbhanga, in which the winter rice is the principal crop of the year, the outturn was so low as three to five annas. In these districts of Bengal there is a small area of cereals, about a quarter of the cultivation, a good harvest of which would give some relief; the sowings have not been far short of the normal, and the crops are up to the present doing fairly well, having been greatly benefited by the rain of last week. Nearly 60,000 people are now on relief, and, as in other provinces, the numbers are likely to rapidly increase and to remain at a considerable figure till the next harvest. In several of the rice dis ricts, distress is showing itself, and test-works are being opened.

"In Burma there has been an abundant rice crop in the Lower Province. There is, however, a dry zone in the Upper Province, in three districts of which relief works have been opened employing 32,000 people. The details have not yet been received from the Chief Commissioner as to the extent to which relief may be necessary and the period for which it will be needed.

"Timely rains in November and December have saved India from what threatened in the middle of November to be the greatest calamity of the present century, so widespread and severe was the drought with which the country was afflicted. From a calamity of that extent the country was preserved. Considerable areas were sown with the assistance of the November rain, and the crops then sown have, in the greater portion of the affected area, been greatly benefited by the further rains of last week. Substantial addition to the food stocks may now be confidently expected in April, and the worst of the possible contingencies has been avoided. But, even with this saving help, the situation is very grave. Nearly three-quarters of a million of people are already in receipt of relief, and it is certain that the numbers must very largely increase before any diminution whatever can take place. The task of providing relief for these enormous numbers is gigantic, and will demand the utmost energy and circumspection on the part of the local authorities to make it efficient.

"The Government of India have given and will continue to give to the Local Governments unstinted help in money or men. They grudge no expenditure that is necessary to meet it. On the local officers, however, fall all the real stress and strain of the management of the operations. They have given in the past year gallant response to the call of this great duty, and the Government of India know that they can rely on their civil officers of all ranks throughout India to fulfil that duty to the very utmost limit of human endeavour."

His Excellency THE PRESIDENT said:—"I desire to supplement the statement of the Hon'ble Member on one point only. When I spoke on this subject in this Council at Simla, I ventured to say that the private charity for which the people of India have ever been distinguished would no doubt be forthcoming to reach distress which Government methods could not deal with so satisfactorily. My expectations have been fulfilled; I have heard of Relief Committees in all parts of the affected provinces, and I know that the Local Governments and their officials have readily co-operated and assisted them in their work.

"A good deal has been said recently of the organization of private charity on a larger scale and of appeals for assistance from a wider field. I do not know if Hon'ble Members are fully aware of the position of Government in this matter. After the Madras Famine of 1877, a correspondence took place between the Government of India and the Secretary of State on this subject, and the Secretary of State (Lord Salisbury) gave his decision in May, 1878, in the following words:—

'You are of opinion that, in cases of future famine, no appeal should be made by a Local Government to the charity of an English public, excepting with the approval of the

Governor General in Council; that the Governor General in Council should, in the firs instance, define the objects to which (as distinct from the obligation devolving on th Government) such charity will be devoted; and that, to inspire confidence in the publi as well as to secure the efficient administration of the funds, local Committees shoul conduct their operations under the control of Government, and with the co-operation c its officers.

'I entirely concur in the soundness of these principles.'

"This declaration of principles still stands, and, so soon as my attentio was directed to them, I put myself into communication with the Heads of Loca Governments, and as I was on tour I had the advantage of conferring personall with many of them. I was thus enabled to bring the matter before my col leagues immediately the Government re-assembled in Calcutta, and at our firs Council we, in obedience to the orders of 1878, drew up the definition of th objects to which private charity might be usefully devoted. These paper accordingly are now in the hands of Local Governments; they have also beer forwarded to the Secretary of State. The Despatch will reach him on Monday but, with Lord George Hamilton's permission, we shall publish it and its enclo sures in the Gazette on Saturday. I venture to think that Hon'ble Members wil agree that in these proceedings we have wasted no time, and that we may hope to have attained the object which no doubt underlies the orders, *i.e.*, that, as a consequence of what we have done, this movement can be prosecuted here, in England, or elsewhere, for a common purpose which all can understand, as a common cause in which all can co-operate.

"I have said enough, I think, to prove that the duty we have had to perform was one that called for care and caution and some knowledge of the circumstances. And yet there has been some criticism of the advice which before Christmas we offered to the Secretary of State to abstain from any encouragement of subscriptions at that particular moment. I am not going to argue the point now for two reasons—(1) that Hon'ble Members will on Saturday have before them a full statement, and not merely a telegraphic summary of our case; and (2) that, if I desire to add anything, I shall have another opportunity in the near future. But I will merely say that the event has justified our action. The statement which has just been made by the Hon'ble Member is exactly that for which we were waiting. He has been able to make it somewhat earlier than we had expected, because the rain has come earlier. But his statement enables us to give to our proposals the clearness and definition which we desired to give them. We know now that, over a large part of the country where a rabi crop is of primary importance, we can look forward with a fair amount of confidence. That means (as the Hon'ble Member has said) that we have reason to believe that we have escaped what has been described as likely to be the greatest calamity of the century. But, on the other hand, the statement of the Hon'ble Member has also shown that there must be over wide districts, in several provinces, a distress affecting thousands, perhaps millions, of persons for a period that must be measured by months, and a statement of that kind justifies us in saying that private charity can usefully intervene in the manner and for the purposes which we have ourselves defined.

"I have accordingly to inform the Council that having received an invitation from the citizens of Calcutta, headed by the Bengal Chamber of Commerce, to attend a public meeting on the question, I propose with the utmost readiness to do so. I have reason to believe that this meeting in India will be closely followed by a meeting in London, and I can only say that as we have paved the way, so we shall do all in our power to make these meetings and the movements they initiate in every way a success.

"There is, however, one word of caution which I must not omit. I desire to say most emphatically that as a Government, and for the purposes of Government, the Government of India has had, and will have, nothing whatever to do with an appeal to private subscriptions. As a Government we have undertaken certain obligations: those obligations we are perfectly able to perform, and we shall accept no help. There are objects to which the money of the charitable may be devoted. We have endeavoured to set them forth; but, in the words of Lord Salisbury, they must be 'distinct from the

obligation devolving upon Government.' Our means are ample; our determination to use them is absolute. I speak in this matter for the whole of my colleagues, and for none of them more than for my hon'ble friend in charge of the Finance Department. I can say from personal knowledge that Local Governments gratefully recognise that in this connection they are being met with the utmost consideration and liberality, and I feel the most complete confidence that, whatever the criticism of our action in this emergency may be, in one respect, at all events, we shall not fail to secure the verdict of the historian, *i.e.*, in our making available for the saving of life the full resources of the Empire."

The Council adjourned to Thursday, the 14th January, 1897.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 8th January, 1897.

SUPPLEMENT TO

The Gazette of India.

No. 2.] CALCUTTA, SATURDAY, JANUARY 9, 1897.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

APPEAL TO AND ORGANIZATION OF PRIVATE CHARITY FOR THE RELIEF OF DISTRESS DUE TO FAMINE IN INDIA.

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture, No. $\frac{147}{00-0}$*-F., dated 8th January, 1897.*

READ the following:—

1. Despatch from the Government of India to the Secretary of State, No. 33 dated the 5th September, 1877.
2. Despatch from the Secretary of State to the Government of India, No. 82 dated the 8th November, 1877.
3. Despatch from the Government of India to the Secretary of State, No. 42 dated the 21st December, 1877.
4. Despatch from the Secretary of State to the Government of India, No. 46 dated the 16th May 1878.
5. Government of India (Public Works Department) endorsement to Local Governments and Administrations, No. 1323-1332 dated the 28th June 1878.
6. Despatch from the Government of India to the Secretary of State, No. 64 dated the 23rd December 1896 and enclosures.

RESOLUTION.

The Governor General in Council is pleased that the Despatch to Her Majesty's Secretary of State No. 64, dated the 23rd December, 1896, and its enclosures be published in the *Gazette of India* for general information.

[True extract.]

DENZIL IBBETSON,

Secretary to the Government of India.

Despatch from the Government of India to the Secretary of State for India, No. 64, dated Calcutta, the 23rd December, 1896.

We understand that the Lord Mayor of London, the Blackburn Chamber of Commerce, and others have been in communication with Your Lordship on the subject of opening subscription lists in England in connection with the distress which is now threatening India. We feel assured that the suffering which, in spite of all that the Government may do to relieve it, must necessarily be in store during the next few months for many millions of Her Majesty's subjects, will deeply move the sympathies of the British public; and we are convinced that it needs but an indication on Your Lordship's part that money will be gratefully received and can be usefully applied to ensure a generous response from that liberality of which India has already had experience, and of which she still preserves a grateful recollection. We therefore deem it right to place Your Lordship in possession of our views on the subject without further delay.

2. On a former occasion, when Southern India was suffering from famine in 1877, a sum of something like £700,000 sterling was collected in England to be applied in India to the alleviation of distress. The application of this money led to a correspondence between Lord Lytton's Government and the Secretary of State of that time, which terminated with Lord Cranbrook's despatch No. 46, dated 16th May 1878, and which the Famine Commissioners had before them when they discussed the subject in paragraphs 187 and 188 of their report. In the course of that correspondence it was laid down "that the Government is responsible, as far as may be practicable, for the saving of life by all the available means in its power," and that "it is not proper or expedient that the Government should ask for private subscriptions to supplement its own expenditure on famine, especially as it is clear that such subscriptions can make no appreciable difference" in the amount of an expenditure which must be reckoned by millions. To these principles we steadfastly adhere. To invite subscriptions which are to be spent in the performance of a task for which we have undertaken the responsibility, would be to invite them for the relief of the Indian exchequer—an end towards which we could neither ask nor receive contributions with propriety. For this reason we think that anything that might bear the appearance of an appeal for assistance on the part of the Government of India to the people of England, should be scrupulously avoided as being liable to serious misconception

3. To ask, however, is one thing; and to receive with gratitude and apply to the best possible advantage money which may be spontaneously offered is another. As Lord Lytton wrote in 1877: "while it is not desirable, in the circumstances above mentioned, for the Government itself to take any part in the collection or distribution of subscriptions, every encouragement should be given to the spontaneous flow of private charity" There is, as we shall presently show, ample scope for the operation of private charity outside the definite task of saving people from starvation which the Government has taken upon its own shoulders. And should the English people at any time think fit to send of their benevolence aid to those who are in distress, not only will it be most welcome, and most useful in the mitigation of very real suffering, but the fact will be of the greatest political value, as tending to draw together in the bond of sympathy the peoples of the two countries. We would prefer, however, that anything that may be in contemplation in the shape of public organisation for the collection and receipt of subscriptions should be deferred till the situation has more definitely declared itself; and we have already suggested this to Your Lordship in our telegram of the 17th December.

If the winter rains wholly fail us, India will be involved in a calamity which will, we believe, equal if not transcend in magnitude any similar calamity that has befallen her during the present century. If, on the other hand, they are timely and plentiful, the area in which serious famine may be anticipated, though still large in itself, will be by comparison small; while a large part of the tracts which are still in danger will probably escape anything worse

than that distress, in itself sufficiently serious and wide-spread, which high prices must occasion among the poorer classes of labourers and artisans, and others with incomes fixed in cash. At the present moment, save in parts of the North-Western and Central Provinces, we have present with us nothing more serious than distress, which is, however, slowly deepening into famine; while whatever relief may come to us in the shape of rain must come within the next few weeks. Thus, we shall shortly know with some certainty whether the calamity is to be of the gravest magnitude, or of limited, if still very serious gravity. In either case contributions will be welcome. But if anything in the shape of an invitation is to be addressed to public charity, it would, we think, be well to postpone it until the case for assistance can be stated more definitely, and (should the worst befall us) more powerfully than is at present possible.

4. In the correspondence to which we have already alluded, it was laid down that before an appeal was made to the charity of an English public "the Governor General in Council should in the first instance define the objects to which (as distinct from the obligation devolving on the Government) such charity will be devoted". We enclose a concise statement of those objects as we understand them, which may be of use should any public action be taken in the matter. As we have said, we accept as our own the responsibility for saving life. But life once secured, our responsibility to the afflicted ceases and our responsibility to the tax-paying public begins. In order to ensure that the public revenues are not devoted to any less emergent purpose than the saving of life, we exact from those who apply for relief (with due regard for sex, age, infirmity, and the customs of the country) tests of the reality of their need of such a nature that only those who are genuinely impelled by want will submit to them. And we rigorously limit the assistance given to what is really necessary for the preservation of life. It is evident that there is the widest possible margin of suffering and distress outside these limitations, in the relief of which private charity will find an ample field.

Enclosure A.

5. It was pointed out in the correspondence of 1877-78 that, the Government being responsible for the saving of life by all available means in its power, and an official agency having been organised for this purpose, "it is not desirable that another agency, or the same agency under another name, should be employed on the same lines in the distribution of private charity;" and that "the Government and the Government alone should in the last resort have the direction of whatever volunteer agency may be organised, and should exercise some control over the expenditure of such sums as the liberality of the nation may contribute." The Secretary of State therefore ruled that "to inspire confidence in the public, as well as to secure the efficient administration of the funds, local committees should conduct their operations under the control of Government, and with the co-operation of its officers." These principles are, we think, indisputable. The necessary control should, however, be exercised without giving it undue prominence; and we enclose a sketch of the organization which we propose to recommend for the administration of any funds which we may receive from England. We enclose also, for Your Lordship's information, copies of a letter which we have caused to be addressed to Local Governments on the subject of the organization and control of private charity in India.

Enclosure B.

6 Meanwhile we will keep Your Lordship duly informed of the progress of events Should private purses open spontaneously, India will gratefully receive the aid thus proffered But we should prefer that anything like a public call for subscriptions should, if possible, be deferred until we are able to furnish Your Lordship with a somewhat more definite estimate of the gravity of the situation. And we are strongly of opinion that, should such a call be decided upon, it should be made perfectly clear that the appeal is for money to be spent in the alleviation of that distress which cannot properly be relieved at the cost of the State, and is in no sense an appeal by the Government of India for assistance in its struggle with starvation.

List of enclosures.

1. Enclosure A. Statement of the objects to which private subscriptions may legitimately be devoted.
2. Enclosure B. Sketch of organisation for collection and administration of private subscriptions.
3. Circular to Local Governments, No. 1-F.—66-2, dated 22nd December 1896.

Enclosure A.

Statement of the objects to which private subscriptions may legitimately be devoted

Government fully accepts general responsibility for saving the lives of the people in acts in which famine prevails; and it is essential that private charity, while working de by side with, should not interfere with or overlap the operations which are organised for this purpose. There is, however, ample scope for its exercise in supplementing these operations, in mitigating suffering, and in relieving distress which falls just short of absolute destitution. Especially, private contributions might usefully be expended on the following objects :—

Firstly: *in supplementing the subsistence ration which alone is provided from public funds, by the addition of small comforts, whether of food or of clothing, for the aged or infirm, for the patients in hospitals, for children, and the like.*

As guardian of the public purse, and in view of the magnitude of the calamity, Government is obliged to limit its assistance to what is absolutely necessary for the preservation of life.

Secondly: *in providing for the maintenance of orphans.*

Every famine leaves behind it a number of waifs who have lost or become separated from those who should be responsible for them, and for whose maintenance it is necessary to provide till they are of an age to support themselves.

Thirdly: *in relieving the numerous poor but respectable persons who will endure almost any privation rather than apply for Government relief, accompanied as it must be by official enquiry into, and by some kind of test of the reality of the destitution which is to be relieved.*

The feeling of the sacredness of the "purdah" or domestic privacy is intensely strong in India; and it is most difficult for any official organisation to reach, or even to ascertain with certainty the existence of, distress of this nature.

Fourthly: *in restoring to their original position, when acute distress is subsiding those who have lost their all in the struggle, and in giving them a fresh start in life.*

The peasant cultivator may often thus be saved from losing his holding through sheer inability to cultivate it, and from sinking to the position of a day-labourer.

Enclosure B.

Sketch of the organisation which is suggested for the collection and administration of private subscriptions.

(1) A Central Committee, to be termed the Indian Committee for the provision and administration of Charitable Relief, to be established in India. The General Committee to be unlimited in numbers, and nominations of representatives from each Province likely to be affected by famine to be invited.

The General Committee to nominate an Executive Committee consisting of not more than Members to undertake the actual administration of the business of the Committee.

The head-quarters of the the Committee to be at Calcutta. The functions of the Central Committee will be—

(*a*) To receive moneys transmitted from England or other countries, and also moneys that may be subscribed in India for the general purposes of the Committee. The fund so created to be termed "The Indian Famine Charitable Relief Fund, 1897."

(*b*) To apportion these moneys between the different Provinces.
(*c*) To arrange, in concert with the Government, the system upon which Charitable Relief is to be applied.

(2) A Committee to be formed in each Province, which will receive the moneys apportioned to that Province by the Central Committee and also any moneys subscribed specially to meet the needs of the Province, will distribute these moneys to Local Committees, and will generally direct the action of the Local Committees. The Provincial Committee will act in concert with the Local Government, and will be responsible for seeing that the money allotted by the Central Committee is spent on the declared objects of the Fund and with the approval of the Local Government.

(3) Local Committees to be formed as the Provincial Committees may determine. The detailed administration of the Relief Funds will be in the hands of these Local Committees acting in concert with the local authorities.

(4) The collection of money in England to be in the hands of a Committee or other agency which will be set on foot in such manner as the Secretary of State may deem advisable.

Letter from the Secretary to the Government of India (R. & A. Dept.), to all Local Governments and Administrations, Circular No. 1-F.—66-2, dated the 22nd December 1896.

With endorsement No. 1323—1332, dated 28th June 1878, in the Public Works Department (Famine) of the Government of India, was forwarded certain correspondence with the Secretary of State on the subject of the collection and administration of the contributions of private charity for the relief of distress in time of famine. I am now to forward, in continuation of that correspondence, and for the information of
a copy of a despatch which is being addressed to the Secretary of State on the same subject.

2 The Governor General in Council is of opinion that the same general principles should, so far as they are applicable, be applied in the case of the charity of the Indian public as have been laid down in the case of contributions from England. Individual and purely local benevolence will of course follow its own course. The evils which may arise from its faulty administration, if it should assume any considerable magnitude, are discussed in paragraph 187 of Part I of the Famine Commission's Report, but there will seldom be any difficulty in dealing locally with such cases.

3. When, however, any general public appeal is made for money to be expended throughout the province or throughout India, the same considerations apply in the main as in the case of English charity. Government officials may very properly associate themselves with such an appeal; but it must be made clear that they do so merely as sympathising with and sharing in the feelings of benevolence that have suggested the appeal, and that they are in no sense its author; that it is spontaneous, and not officially prompted or promoted. As regards the question whether the time for such an appeal has arrived in any province, the point must be determined in each case in view of local conditions. Should it at any time be decided to make such an appeal, the objects to which private charity is to be devoted should be clearly defined so as not to trench upon the field of Government operations; and it should be made clear that Government reserves to itself such power of control as may be necessary to ensure the fulfilment of this condition.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE).

NOTE ON THE SUPPLY OF FOOD-GRAINS AVAILABLE FOR IMPORTATION INTO INDIA FROM FOREIGN COUNTRIES.

The following Note by the Director General of Statistics is published for general information :—

THE food-grains consumed by the population of the affected districts are, speaking generally, rice, wheat, barley, maize, jawar, bajra, ragi, gram (both kulti and chana). There are also some millets other than the three just mentioned, but they are of minor importance.

The millets (jawar, bajra, ragi, kangni) are not to be obtained in any quantity outside India. Egypt produces jawar (durra), but only in quantity sufficient for local requirements, as may be inferred from the facts that the grain is not an article of export and that India ships a quantity of jawar and bajra every year to the Abyssinian coast. I think some is grown in the countries bordering the Persian Gulf, but the quantity is trifling, and we cannot expect to obtain these grains from any foreign source. There is in fact no consumption of them by human beings except in India and in a limited region in Egypt and Eastern Africa. In Europe they are imported to feed birds and poultry and the consumption is of course relatively quite insignificant.

Gram also we cannot get from anywhere. An allied product (beans) is a staple of production and consumption in China and Japan, but there is no external demand for beans, and the supply is not more than sufficient to meet local demands.

There remain rice, wheat, barley, and maize.

In present circumstances there will probably be no need to import rice from foreign countries. The rice crop in Burma now being reaped is very abundant, and though an abnormally large quantity is being sent, and has for some months been sent, to Upper Burma, there is little doubt that Burma will be able to supply all demands from Bengal and Madras by diverting to those provinces the quantity of rice which would, in the absence of an Indian demand, be shipped to foreign countries. Burma has on an average a surplus of about a million tons annually for export to foreign countries, and it is estimated that the surplus from the present crop will be about one and a half million tons. If, however, Burma should not be able entirely to meet the Indian demand, we have sources of supply in Siam, Cochin-China, and Japan. The exports of rice from Japan exceed 100,000 tons annually, and from Siam and Cochin-China the exports average about a million tons yearly.

The sources of supply of wheat, barley, and maize are the same in each case, or almost the same: I mean that we can get barley and maize only from the countries from which we can get wheat in quantity. These countries are few in number, and when we name the United States, the Argentine Republic, Russia, and the regions lying between Russia and Turkey, we have practically exhausted the list, though we can no doubt get some wheat from Canada also. It is possible too that a very limited quantity might be obtained from Egypt; and in ordinary seasons we might reckon upon Australia to some extent, though the exportable surplus at best is not now large, but Australia has not had an ordinary season and there is no wheat left of the crop which will be reaped there next month to spare for the supply of external demands. It is stated indeed that the Australian colonies will be importers instead of exporters. The Continent of Europe (excepting the regions above mentioned) does not produce more than is required for local consumption, and not enough even for that, both Germany and France frequently requiring to draw supplies from Russia, the United States, and India.

The average export of wheat from Russia is about 2,680,000 tons, excluding wheat-flour. It is reported that the present harvest is not up to the average, and that the exportable surplus will be less than the figure mentioned. Perhaps it may be safely assumed that from one and a half to two million tons at least will be available for export.

The average exports from Hungary, Bulgaria, and Roumania, are in excess of 1,300,000 tons, and a supply of from one to one and a quarter million tons may be expected from this region.

Exports from the United States have averaged 2¼ million tons, not reckoning exports of wheat-meal and wheat-flour which are also very large. The harvests in the United States are said to be slightly short, but there will certainly be an exportable surplus available of about 2 million tons. The Canadian supply will bring the quantity available from North America to from 2¼ million tons to 2½ million tons, and another half million tons at least may be added for South America. [Since this was written it has been telegraphed by Reuter that the exportable supply in the Argentine Republic will be 700,000 tons.]

Altogether there is a supply available to be divided amongst all consuming countries of from 5 to 6 or, taking smaller countries into account, 6½ million tons of wheat on which India can draw. I have not taken into account the meal and flour, whether of wheat or of maize, which are a large export from Russia and the United States, because such meal and flour will not be required by India, and our demand for grain will not affect the course of the trade, the supply or the demand, in meal and flour.

Of barley the annual exports from Russia and from south-eastern Europe (including Hungary) are about 2 million tons, to which may be added another 100,000 tons from the American Continent.

Maize is produced in enormously larger quantity than wheat in the United States, but the production is in the main locally consumed, the export trade being relatively small, amounting to about 1,000,000 tons only, not including corn-meal. It is probable that twice or three times this quantity would at once be forthcoming if there were a foreign demand. At any rate one million tons may be regarded as a minimum supply. From the Argentine Republic there would be available about half a million tons, and at least 100,000 tons from Canada. Russia exports on an average about 400,000 tons of maize, and altogether Russia, south-eastern Europe, and Egypt can supply at least a million tons of maize.

In sum there is an exportable supply available from various countries of about—

1,100,000 tons of rice;
5 to 6 or 6½ million tons of wheat;
2,000,000 tons of barley; and
2½ to 3 million tons (or more) of maize.

Since the foregoing paragraphs were written an estimate of the exportable supply of wheat has been published in the *Statist*, and is reproduced below, the equivalent of quarters being stated in tons in round numbers. This estimate, which includes meal and flour, must be taken for what it is worth :—

	Quarters.	Tons.
America and Canada	13,500,000	= 2,893,000
Russia	15,000,000	= 3,214,000
Roumania, Turkey, &c.	8,000,000	= 1,714,000
India and Persia	250,000	= 53,000
Chilé and Uruguay	500,000	= 107,000
Argentina	2,500,000	= 536,000
Sundries	1,500,000	= 321,000
TOTAL	41,250,000	= 8,838,000

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EXECUTION BY CONTROLLERS OF MILITARY ACCOUNTS OF DEEDS, CONTRACTS AND OTHER INSTRUMENTS ON BEHALF OF THE SECRETARY OF STATE.

No. $\frac{\text{1-Judicial}}{14-30}$.

Extract from the Proceedings of the Government of India, in the Home Department (Judicial),—under date Calcutta, the 8th January 1897.

READ again—

Resolution of the Government of India in the Home Department, No. $\frac{\text{3-Judicial}}{485-501}$, dated the 28th March 1895, on the subject of the execution of deeds, contracts and other instruments on behalf of Her Majesty's Secretary of State for India in Council.

READ also—

Office Memorandum from the Military Department, No. 3610-F., dated the 11th December 1896, and enclosures, requesting that the abovementioned Resolution may be amended so as to provide therein for the execution by Controllers of Military Accounts of certain classes of deeds and contracts.

RESOLUTION.

IN exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, Chapter fifty-nine, Section two, and of all other powers enabling him in this behalf, the Governor General in Council is pleased to declare that the classes of deeds, contracts and other instruments mentioned in the statement below and referred to in the twenty-second and twenty-third of Victoria, Chapter forty-one, Section two, may be executed by the Controllers of Military Accounts; and to direct that the statement be inserted in the Resolution of the Government of India in the Home Department, No. $\frac{\text{3-Judicial}}{485-501}$, cited in the preamble, as heading B.-VIII. of that Resolution.

B.-VIII.—In the Military Accounts Department.

1. Deeds of reconveyance of dwelling and mess-houses, and of Volunteer Corps buildings, which have been mortgaged to Government as security for the repayment of building advances, or loans. 2. Agreements for the supply of school and religious books, in the Madras and Bombay Commands.	By the Controllers of Military Accounts.

ORDER.—Ordered that this Resolution be communicated to Local* Governments and Administrations and the Departments of the Government of India for information, and that it be also published in the Supplement to the *Gazette of India*.

REVIEWING THE POST OFFICE ADMINISTRATION REPORT FOR 1895-96.

No. 94 S. R., dated Calcutta, the 7th January 1897.

RESOLUTION.—By the Government of India, Finance and Commerce Department.

READ—

Report on the Post Office of India for the year 1895-96.

RESOLUTION.—The steady progress which has characterised the operations of the Post Office in past years has been fully maintained in the year under review. The estimated number of postal articles of all kinds issued for delivery, exclusive of money orders, amounted to nearly 414 millions, or about 20 millions in excess of the number during the preceding year. Several important administrative reforms also were carried out during the year.

2. The numbers of Post Offices and Letter-boxes and the transactions of the Imperial Post during the year are contrasted below with those of the previous year:—

	1894-95.	1895-96.	Percentage of increase or decrease.
Number of Post Offices	9,242	9,588	+3·74
,, Letter-boxes	15,002	15,927	+6·16
,, Letters and post-cards issued for delivery	347,149,859	364,168,006	+4·90
,, Newspapers issued for delivery	28,144,707	28,928,622	+2·78
,, Parcels issued for delivery	2,561,572	2,577,083	+0·60
,, Packets ,, ,,	16,247,659	18,196,529	+11·99
,, Letters and parcels insured	290,276	294,983	+1·62
,, Inland money orders issued	9,422,105	10,055,036	+6·71
Value of inland money orders issued	R19,43,09,308	20,62,03 368	+6·12
Commission realised on inland money orders issued	R24,46,683	26,00,589	+6·29
Number of telegraphic money orders issued	122,030	128,206	+5·06
Value of telegraphic money orders issued	R1,36,02,153	1,48,57,721	+9·23
Commission realised on telegraphic money orders issued	R1,13,931	2,86,544	+99·68
Number of Foreign money orders issued by India	49,580	54,999	+10·93
Value of Foreign money orders issued by India	£163,058	£177,739	+9·0
Number of Foreign money orders paid in India	24,958	28,334	+13·53
Value of Foreign money orders paid in India	£129,685	£152,288	+17·43
Mileage of mail lines.			
Railways	18,463	18,871	+2·21
Mail carts	5,214	4,959	—4·89
Runners and boats	46,177	47,509	+2·88
Steamers	13,743	13,984	+1·75

3. There was an increase under all heads, the increase being remarkable in the number of packets sent out for delivery, and in the transactions connected with money orders generally. The value of telegraphic money orders issued increased by 9·23 per cent, while the commission realised thereon increased by more than 99 per cent. The reason for this abnormal increase is not explained in the Report. The decrease, above shown, of 4·89 per cent in the mileage under "Mail carts" is nominal, as the figures are those of Imperial Postal lines only and do not include the mileage of political and military lines. With the addition of this mileage the decrease is converted into an increase of 3·32 per cent as shown in the margin, the increase being due mainly to the establishment of mail cart services on the Chitral communications, in Waziristan, and on one or two lines in Bengal.

Mileage of mail cart lines (including political and military lines).

	Miles.
In 1894-95 . . .	5,988
In 1895-96 . . .	6,187
Increase in 1895-96 .	199
	or 3·32 per cent.

The increase of about 20 millions in the number of postal articles (excluding money orders) issued for delivery during the year was made up by increases of 10½ millions under post-cards, of 6 millions under paid letters, 2 millions under packets, and of 1½ millions under newspapers, unpaid and registered letters, and parcels. The popularity of the post-card continues to increase; and in Bengal, Bombay and the Punjab, the number of post-cards exceeded the number of paid letters. The total number of unpaid letters was upwards of 28 millions, being about half a million more than the number in the previous year. The number of postal articles issued (excluding money orders) was 1·44 per head of the general and 34·31 per head of the literate population, against 1·38 and 32·68 per head, respectively, in 1894-95. The number of postal articles per head of the literate population continues to be higher in Sind and Baluchistan than in any other part of India.

4. The more important changes introduced in the working of the "Inland Post" were:—

(1) The introduction of an arrangement for the local review, at the beginning of each official year, of the money transactions of all Post Offices.

(2) The extension of the local money order audit system, experimentally introduced in 1894-95, to all Post Offices in the North-Western Provinces and Oudh and Eastern Bengal, and to a few offices in Bombay and the Punjab.

(3) The general adoption in twenty-one out of the thirty-one districts of the Punjab of the scheme, which was tried in the previous year in four districts of the province, under which the value-payable post is made available for obtaining copies of judicial records. The scheme is popular with the public as it saves the trouble and expense caused by attending Court personally for the purpose of obtaining such copies.

(4) The issue from the 1st September 1895 of new postage stamps of the values of R2, R3 and R5.

(5) The introduction from the 1st August 1895 of a system of receiving unregistered parcels for transmission through the Inland post.

(6) The opening of a number of Post Offices in Meywar, Marwar, Bhurtpore, and some other minor Native States, in which, in pursuance of the policy of postal unity, the management of the posts has been transferred to the Imperial Postal Department.

(7) The experimental introduction in a few districts of the North-Western Provinces and Oudh of the Bertillon system of thumb impressions in the case of money orders paid to illiterate persons, with a view to secure evidence, if required, for the identification of the actual payee.

(8) The acceleration of the postal service to Sylhet from Calcutta and elsewhere by 12 hours.

5. The principal changes and improvements effected in the "Foreign Post" arrangements were—

(1) The provision of additional facilities for the despatch of correspondence to Australasia and the Far East by way of Tuticorin and Colombo.

(2) The extension to Ceylon of the parcel insurance system; and the conclusion of arrangements for the exchange of fully insured parcels with the Straits Settlements, Hongkong, Egypt and France.

(3) The extension of the foreign parcel post to certain French Possessions in America and to the Italian Colony of Erithrea on the Red Sea.

(4) The adoption of a more direct mode of transmission by way of Egypt, instead of through the United Kingdom as heretofore, of parcels for Greece, Turkey, Tunis and Tripoli.

(5) The establishment of a direct money order exchange with Cape Colony.

(6) The closure of the Indian Post Office at Zanzibar; the assumption by the Postal Administration of British East Africa of the management of the posts of the island, and the conclusion of formal agreements with that Administration for the continuance of the parcel and money order exchanges between India and Zanzibar.

6. The transmission by the inland post of unregistered parcels not exceeding 440 tolas in weight was sanctioned by the Government of India in June 1895. The system came into force on the 1st August 1895, and during the eight months ending March 1896 the number of unregistered parcels posted was nearly 49,000. The number of registered parcels sent does not appear to have been affected, but it is too early as yet to form any definite opinion in regard to the financial result of the measure.

7. The steady progress of the Value-payable system was noticed in paragraph 5 of the Resolution on the Report for 1894-95, and it was there stated that the number of value-payable articles and the declared value during that year (namely, 1,735,998 and R1,90,34,271, respectively) were the largest on record. In the year under review, the transactions show further progress, the number and declared value having risen to 1,877,693 and R2,16,57,029, while the commission realised amounted to R3,84,196 against R3,60,333 in the preceding year. The transactions in the Bengal Circle form nearly two-fifths of the entire business, and about 79 lakhs, out of 83 lakhs of rupees recovered from the addressees of value-payable articles posted in the circle, were paid to tradesmen in Calcutta as the price of goods sent by them by post to various parts of the country.

8. The total number of postal articles (including money orders) received for delivery was 415,885,137, of which 412,081,573 were delivered in ordinary course, the percentage of the number delivered on the number received for delivery being 99·08 against 99·12 in the previous year. A large proportion of the articles found undeliverable was disposed of by the Dead Letter Offices either by redirection to addressees or by return to senders, the number eventually found undisposable being 938,855 or ·22 per cent only of the total number received for delivery. It is curious to note that letters and other articles containing valuable property, such as cheques, bills of exchange, currency notes and jewellery, are not unfrequently posted with incorrect or incomplete addresses or with no address at all. At the same time it is satisfactory to learn that the Post Office succeeds in delivering to the owners a large portion of such property.

9. An abstract of the money order business done during the year is given

in the table in paragraph 30 of the Report. The results for the last two years are contrasted below :—

	1894-95.	1895-96.	Percentage of increase.
Number of orders issued	9,519,044	10,161,107	6·74
Value of ditto	R19,89,56,073	21,10,19,824	6·06
Commission realised on orders issued	R24,87,494	26,43,553	6·27
Number of orders paid	9,572,628	10,223,137	6·79
Value of ditto	R20,09,42,873	21,38,48,394	6·42

The above figures include both inland and foreign money orders, the former comprising inland, telegraphic and Native State money orders, and the latter consisting of money orders in sterling converted at the prevailing rates of exchange, and foreign money orders in Indian currency. The aggregate numbers and values of inland and foreign money orders, shown in paragraph 2 of this Resolution, do not include the transactions with Native States, which are separately shown below :—

	1894-95.	1895-96.	Increase or decrease.
Number of orders issued in Native States	68,149	72,948	+ 4,799
Value of orders issued in Native States	R18,04,797	18,31,399	+ 26,602
Number of orders paid in Native States	33,436	36,357	+ 2,921
Value of orders paid in Native States	R11,44,729	11,22,216	— 22,513

Compared with 1894-95, the transactions of the year show an increase under each head except in the value of orders paid in the Native States which decreased by R22,513. The value of the orders issued in Native States considerably exceeds the value of the orders paid.

In the inland money order transactions of the year, there was a small increase in the number and value of revenue money orders, this method of revenue payment being especially popular in the North-Western Provinces. The system of remitting miscellaneous Government dues through the post continued to make progress in Bengal, and in the North-Western Provinces also the number of these money orders was larger than in the preceding year though there was a slight falling-off in the total value, but in the Punjab there was a falling-off both in the number and value as compared with 1894-95. The number and value of rent money orders increased in Bengal but fell off in the North-Western Provinces and Central Provinces. The average value of an inland money order was R20-8-0, against R20-10-0 in 1894-95. In the foreign money order business, a striking feature was the large increase in the drawings of Western Australia upon India, the number of orders advised for payment in this country being nearly four times and the value more than seven times as great as in the previous year. The average value of a foreign money order issued by India was £3 4*s*. 7*d*. against £3 5*s*. 9*d*. in the previous year, while that of a foreign money order paid in India was £5 7*s*. 5*d*. against £5 4*s*. 0*d*. in 1894-95.

10. The transactions of the Post Office Savings Banks during the last two years are compared below :—

	1894-95.	1895-96.	Increase or decrease.
Number of Banks	6,384	6,343	—41
,, accounts opened during the year	173,267	182,168	+ 8,901
Number of accounts closed during the year	135,370	140,223	+ 4,853
Number of accounts at the close of the year	611,947	653,892	+ 41,945
Amount of deposits during the year	R4,31,16,984	4,74,62,417	+ 43,45,433
Amount of withdrawals during the year	R4,40,31,914	4,36,11,148	— 4,20,766
Amount of balance at the close of the year	R8,40,17,923	9,04,23,072	+ 64,05,149
Average balance of each account	R137·29	138·28	+ 0·99

The results are satisfactory; the number of accounts opened during the year as well as the total amount of deposits increased largely, while the total amount of withdrawals diminished by about 4⅕ lakhs of rupees. The decrease in the number of Banks is attributed to the withdrawal of Savings Bank powers from certain small Post Offices in the Bombay Circle which had no transactions. The 653,892 accounts at the close of the year included 30,770 security deposit accounts, 5,399 public accounts, and 139 regimental or other conjoint accounts, with an aggregate balance of 109½ lakhs. The remaining 617,584 were private accounts with an aggregate balance of over 794½ lakhs, of which more than 164½ lakhs were held on behalf of minors by their parents, relatives and guardians. The number of private accounts and the balances at their credit thus formed 94·44 and 87·89 per cent, respectively, of the total number of accounts and the aggregate balance at the close of the year in the Post Office Savings Banks.

11. The total number of letters and parcels insured during the year was 294,983 and the total insured value about 872⅓ lakhs, showing increases of 1·62 and 5·52 per cent, respectively, over the number and value in the previous year. The insurance fees amounted to R2,31,277 against R2,18,436 in 1894-95, showing an increase of 5·87 per cent. The average value for which each letter was insured was R262, and that for which each parcel was insured was R311. The corresponding average values in the previous year were R254 and R299, respectively. Out of 18 claims to compensation for the loss of insured articles or the abstraction of contents, 16 were admitted, the amount paid to the claimants being R5,045 or 2·18 per cent of the total amount of insurance fees realised.

12. The number of recorded complaints made by the public was 15,428 against 9,710 in 1894-95, but this large increase in number is due mainly to a change in the system of record. Hitherto the practice has been to only record complaints made direct or reported specially to heads of postal circles, but during the year under review complaints made to any postal official have been included in the record. The number of complaints that would have been recorded during the year under the old system was 10,367. The proportion of complaints held to be groundless was as large as 40·1 per cent, while that of cases in which the complaints were well-founded was 24·49 per cent only. The remaining cases were either pending at the close of the year or were cases in which no definite conclusion could be arrived at.

13. The transactions connected with the receipt of salt revenue at Post Offices in Northern India during the year were insignificant, the amount of revenue realised on this account having been R2,27,128 only on 83,851 maunds of salt indented for through the agency of the Post Office. The corresponding figures in the previous year were R2,43,104 and 88,575 maunds, respectively.

14. The following statement shows the financial results of the working of the Post Office during the year, as compared with those of the previous two years:—

	1893-94.	1894-95.	1895-96.
	R	*R*	*R*
Revenue . .	1,55,75,971	1,63,17,460	1,71,29,619
Expenditure . . .	1,55,82,814	1,60,60,336	1,64,33,167
Surplus or deficit .	—6,843	+2,57,124	+6,96,452

This statement of surplus, however, has to be corrected by excluding from the expenditure the District Post charges (except Baluchistan) which are provided for by local cesses (R11,97,134, R12,19,926 and R12,04,904 in the respective years), and adding to it the indirect charges alluded to in Section XI of the Report (R6,72,311, R7,26,217 and R8,11,615 in the respective years). With these corrections the resulting surpluses are R5,17,980, R7,50,833 and R10,89,741.

15. The acknowledgments of the Government are due to Mr. Fanshawe for his successful administration of the Department. The names of the officers

c

mentioned in paragraph 60 of the Report as having done good work during the year have also been noticed with satisfaction by the Government of India.

ORDER.—Ordered, that a copy of the Resolution be forwarded to the Director General of the Post Office of India, and that the Report and the Resolution be published in the *Gazette of India*.

J. F. FINLAY,

Secretary to the Government of India.

ANNUAL REPORT

ON

THE POST OFFICE OF INDIA

FOR THE YEAR

1895-96.

No. 6099, dated the 20th November 1896.

From—A. U. FANSHAWE, Esq., C.S.I., *Director General of the Post Office of India,*
To—*The Secretary to the Government of India, Department of Finance and Commerce.*

I have the honour to submit the Annual Report on the Post Office of India for the official year 1895-96.

Charge of the Post Office.

2. The administration of the Department was in charge of Mr. Kisch, as officiating Director General, from the 1st to the 25th April 1895, and in my hands during the remainder of the year.

Principal Events—Inland Post.

3. In the year under review several important administrative measures were undertaken and others which had been introduced in previous years were carried through to completion. For some years past the pecuniary responsibilities of the Post Office, which have been constantly increasing, chiefly on account of the expansion of the money order business, have claimed very careful consideration, and it has been my object to secure that no servant of the Post Office who is not in receipt of a fairly substantial rate of pay should be required to accept any serious money responsibility. Special steps were taken during the year to give practical effect to this policy. Standard rates of pay varying according to work and responsibility have been prescribed for the different postal circles, and certain minimum standards of pay of general application have been adopted for the whole of India. It has also been arranged that the money transactions of all post offices should be locally reviewed at the beginning of each official year. The reports received from Heads of Circles show that these measures which were carried out in the latter part of 1895-96 have already begun to attract a better class of men to the service of the Post Office, which was one of the express objects in view. A new and simplified system of accounts was introduced, which was worked out on the recommendations of the Special Committee which sat in 1893 under the presidency of Mr. Kisch, and the Local Money Order Audit System, which was commented on in my report for 1894-95, was extended to all post offices in the North-Western Provinces and Oudh and Eastern Bengal Circles, and to a few offices in Bombay and the Punjab. Further measures are under consideration for the purpose of carrying out more fully the decentralizing of the money order audit.

In the Punjab the money order system was adapted in the year under report for paying the salaries of village schoolmasters who are also, in most cases, the postmasters of our village post offices, so that these officials are now relieved of the necessity of undertaking a journey to the nearest tahsil which is frequently situated at some distance. Another instance of the adaptation of postal systems to the requirements of other departments was the general adoption, in 21 out of the 31 districts of the Punjab, of the scheme under which the value-payable post is utilised for obtaining copies of judicial records. It was originally tried in

1894-95 in 4 districts of the Province and the result of this experiment warranted the general introduction of the scheme. A significant fact in connection with this scheme deserves to be recorded here. It was reported by the Deputy Commissioner of Ludhiana that even at the head-quarters of the district people living in the town itself preferred to receive copies of judicial documents through the value-payable post to going to the court for the purpose of obtaining them.

For the convenience of the public new postage stamps of the values of R2, R3 and R5 were introduced on the 1st September 1895. Since the 1st August 1895 unregistered parcels have been accepted at all post offices for transmission through the inland post and revised rules for depositors in Post Office Savings Banks were also introduced. The scheme for the sale of quinine through the agency of the Post Office was extended to some number of post offices in the North-Western Provinces and Oudh, and an interesting experiment was tried in a few districts of the same provinces, by bringing into use the Bertillon system of thumb impressions in the case of money orders paid to illiterate persons, with a view to secure evidence for the purpose of identifying the actual payee should this be required. There has been as yet no opportunity of putting this measure to a practical test and the plan is still under trial. The occupation of Chitral and of the Swat territory rendered necessary the establishment of a regular postal service the efficiency of which, notwithstanding many and serious difficulties, has been fully recognised by the Military authorities. The principle of Postal Unity was given effect to in opening some number of post offices in the Native States of Meywar, Marwara, Bhurtpore and some other minor States. The postal service to Sylhet was reorganised—a measure which accelerated the delivery of mails from Calcutta and elsewhere by 12 hours.

There were very serious and protracted breaches of railway lines during September 1895, on the Great Indian Peninsula Railway, the Nizam's State Railway and the East Coast Railway, which at first dislocated the mail service and required special attention and arrangements.

Principal events—Foreign Post.

4. The following were the principal events of the Foreign Post. Additional facilities were provided for the despatch of correspondence to the Far East and Australasia by way of Tuticorin and Colombo. The conveniences of the parcel exchange with Ceylon, which already included those of the value-payable post, were further supplemented by the extension to that colony of the parcel insurance system; and arrangements were also made for exchanging fully insured parcels with the Straits Settlements, Hongkong, Egypt and France. The foreign parcel post was extended to the French possessions of St. Pierre and Miquelon in America and also to the Italian colony of Erithrea on the Red Sea; while for parcels for Greece, Turkey, Tunis, and Tripoli, which were previously sent through the United Kingdom, a more direct mode of transmission was adopted by way of Egypt. A direct money order exchange was established with the Cape Colony, in place of the exchange which had previously been carried on through the agency of the British Post Office; and the public in India were given the privilege of using cards of private manufacture for the purpose of sending post-cards to countries of the Postal Union. The Indian post office at Zanzibar was closed after an existence of just twenty years; and the British Protectorates of Zanzibar and British East Africa entered the Postal Union. After the withdrawal of the Indian post office from Zanzibar, the management of the posts of the island was taken over by the Postal Administration of British East Africa: and formal agreements had then to be concluded with that Administration for the continuance of the parcel and money order exchanges between India and Zanzibar.

Working of the P. and O. contract.

5. According to the P. and O. Company's time table, as approved by Her Majesty's Postmaster General, the steamers with the European mails are due in Bombay at 8 A. M. on Monday of each week, and during the year under review they arrived on all occasions in advance of the contract time—in five instances on the previous Thursday, in two instances on the previous Friday, in twenty instances on the previous Saturday, and in twenty-two instances on the previous Sunday, while on three occasions there was an early Monday arrival. The shortest time occupied in transit by the mail from London to Bombay was 12 days, 11 hours and 35 minutes, while the average time for the year was 14 days, 20 hours and 5 minutes. In the opposite direction (from Bombay to London) the quickest transit was made in 12 days and 20 minutes, the average time for the year being 15 days, 3 hours and 30 minutes. Once during the year advantage was taken of the despatch of an extra passenger steamer from Bombay to Marseilles, to send additional mails to Europe. Only articles specially marked for transmission by this steamer were forwarded. The number of these articles was 2,115.

Section I.—Post Offices, Letter-boxes and Village Postmen.

Post offices, letter-boxes, and rural delivery.

6. In Appendix I, are compared the numbers of post offices, of letter-boxes, and of village postmen of the Imperial Post in each circle on the 31st March 1896 with the numbers at the close of the previous year; and in the marginal abstract are shown the figures of the past two years for the whole of India for both the Imperial and District Post, separately and together. The total number of post offices has increased by 348, the increase both as regards post offices and letter-boxes being greatest in the Punjab. The total number of post offices in the charge of schoolmasters and other persons not regular servants of the Department was 5,956 at the end of the year.

	Imperial Post.		District Post.		Total.		Increase.
	Number at close of 1894-95.	Number at close of 1895-96.	Number at close of 1894-95.	Number at close of 1895-96.	Number at close of 1894-95.	Number at close of 1895-96.	
Post Offices	9,242*	9,588	1,471	1,473	10,713	11,061	348
Letter-boxes (in addition to those at post offices).	15,002	15,927	3,100	3,463	18,102	19,390	1,288
Village Postmen	4,144†	4,262	3,109	3,029	7,253	7,291	38

* One more shown in the Annual Report for 1894-95.
† One less shown in the Annual Report for 1894-95.

The following table shows for each circle and for the whole of India the number of post offices and letter-boxes, compared with the area, total population and literate population according to the last census:—

Circle.	Area in square miles.	Population.	Literate population.	Post offices.	Letter-boxes (including those at post offices).	1 Post office serves			1 Letter-box serves		
						Square miles.	Population.	Literate population.	Square miles.	Population.	Literate population.
Bengal	119,719	40,879,787	1,093,584	1,535	6,119	78	26,631	1,298	19	6,680	325

* Enumeration not taken under this head.

It will be seen that there is only one post office in India for every 136 square miles, and only a single letter-box for every 49 square miles. Eastern Bengal continues to be the most favoured circle in respect of post offices and letter-boxes, whereas the least favoured circles in this respect are, as in previous years, Burma and Rajputana.

Section II.—Postal Lines.

Postal communications.

7. Appendix II contains statistics according to postal circles regarding the distances over which mails are conveyed by the various agencies used by the Post Office on Imperial postal lines. An abstract of that appendix is given on the margin with additional columns for District Post lines, political lines and military lines managed by the Post Office. The mileage under each class of mail lines was larger in 1895-96 than in 1894-95, the increase being greatest under runner and country boat lines. The increase of 545 miles under the head of mail cart lines was chiefly due to the establishment of mail cart services on the Chitral communications, in Waziristan, and on one or two lines in Bengal. The increase in the railway mileage is mainly accounted for by the opening of the Oodeypore-Chitor and Wazirabad-Lyallpore Railways, and the extension of the East Coast Railway from Parlakimedi road to Rambha and the extension of the Madras-Ennore section of that railway.

Nature of Lines.	1895-96.					Total mileage in 1894-95.	1895-96.

Section III.—Correspondence and Parcels.

Postal traffic.

8. The estimated number of postal articles of all kinds, exclusive of money orders, issued for delivery during the year, amounted to nearly 414 millions, or about 20 millions in excess of the number during the preceding year. The increase has been 44·16 per cent. in the past seven years, and 53·92 per cent. in the past eight years. Statistics showing the different classes of articles delivered in the various postal circles during 1895-96 will be found in Appendix III, and a summary of the general results is given in the following statement :—

Year.	Post-cards.	Letters paid.	Letters unpaid.	Letters registered.	Total of letters and post-cards.	Newspapers	Book and pattern packets.	Parcels.	Grand Total (all postal articles except money orders).
	No.	No.	No.	No.	No.	No.	No.	No.	No.
1894-95	143,106,777	168,702,740	27,523,789	7,816,553	347,149,859	28,144,707	16,247,659	2,561,572	394,103,797
1895-96	153,567,883	174,557,002	28,051,656	7,991,465	364,168,006	28,928,622	18,196,529	2,577,083	413,870,240
Increase	10,461,106	5,854,262	527,867	174,912	17,018,147	783,915	1,948,870	15,511	19,766,443
Percentage of Increase	7·31	3·47	1·91	2·23	4·90	2·78	11·9	·60	5·01

There was thus an increase in the total number of articles under each head throughout India. The percentage of increase in all articles taken together was highest in the Eastern Bengal Circle where it was 10·78 per cent. The Punjab Circle comes next, with an increase of 9·87 per cent., and the Assam Circle follows with an increase of 9·67 per cent. and then Bengal, Bihar, Bombay,

Madras and the Central Provinces and Berar. In the year under report, as in previous years, the increase in the number of post-cards (10½ millions) far exceeded the increase in any other class of postal articles.

In my last annual report I stated that there was every reason to anticipate that in a few years the total number of post-cards would exceed the total number of paid letters, and this was actually the case, during the year under report, in Bengal, Bombay, the Punjab and Eastern Bengal. The total number of unpaid letters was a little more than 28 millions, the proportion of these letters being highest in Burma and Bihar, while the total number of unpaid letters delivered in the North-Western Provinces and Oudh was larger than in any other Circle. The total number of letters registered during the year was rather more than 7½ millions as compared with 13 millions registered during the same year in the United Kingdom. Registration continues to be more popular in Madras than in any other part of India, the total number of letters registered in that Presidency having now reached nearly two millions. It has already been stated that the system under which unregistered parcels not exceeding 440 tolas in weight can be forwarded through the inland post came into force on the 1st August 1895, and during the period of eight months, ending with the 31st March 1896, 48,831 unregistered parcels were posted. It is too early to form a definite conclusion about the financial result of the system but there seems reason for thinking that the new system has not interfered with the growth in the number of registered parcels.

Average number of postal articles per head of population.

9. The following table prepared from the last census returns shows for each circle the number of letters and other postal articles per head of the total population and per head of the literate portion of the population. Bombay, Sind and Baluchistan, the Punjab and Burma rank highest as regards the number of articles per head of the population and Sind and Baluchistan, the Punjab and Bombay rank highest as regards the number of articles per head of the literate population :—

Circle.	Total population.	Number who can read and write.	Total number of postal articles (excluding money orders).	Number of postal articles per head of population.	Number of postal articles per head of those who can read and write.
Bengal	40,870,787	1,993,584	62,001,540	1·51	31·13
Bombay	26,372,106	1,410,474	78,430,954	2·97	55·37

* Enumeration not taken under this head.

Foreign correspondence

10. The figures in Appendix III include the foreign correspondence received in India for delivery; but a special table is given at the end of this paragraph showing separately the quantity of correspondence passing in each direction between India and the United Kingdom and between India and all other parts of the world. The results of the year as compared with those of the previous year present several unusual features. As regards the mails exchanged with the United Kingdom, there was an increase in the number of newspapers and packets sent home, but in all other respects the traffic decreased. The reduction in the number of homeward letters and post-cards was due to a considerable falling off in the number of soldiers' and seamen's privileged letters posted for despatch to the United Kingdom. In point of fact the total number of these letters was about 170,000 less than the number posted in the previous year. This result, which is believed to have been due to the equivalent of the

statutory penny rate being raised from 9 pies to one anna in April 1895 and also perhaps in some measure to the Chitral Campaign, more than neutralised the increase that took place in the number of letters subject to the ordinary rates of postage. It is more difficult to account for the decrease in the mails sent out from home. The falling off in the number of letters and postcards received from the United Kingdom was not very noticeable; but the number of newspapers and packets was nearly three quarters of a million less than in the preceding year. It has to be remembered, however, that these figures are founded on an actual record of weight taken only twice a year and the packet mail particularly is liable to great fluctuations owing to the inclusion or non-inclusion of large quantities of pamphlets or circulars for distribution in this country. As regards correspondence exchanged between the Indian Post Office and foreign and colonial Administrations, statistics are taken, according to the rules of the Postal Union, only once in every three years, alternately in May and November; and the percentages of increase shown in the table below represent the progress from November 1893 to May 1896, a period of 2½ years. The rates of increase are of a striking character in the case of the mails despatched from India and of the letters and post-cards received in this country. This is due mainly to the large development of correspondence between India and the British colonies of Ceylon, Australasia, China, and the Straits Settlements, to which the establishment in 1894 of a steamer service six times a week between Tuticorin and Colombo has, no-doubt, contributed. It has been stated in another part of this report that additional facilities were placed at the disposal of the public during the year under review for the transmission of correspondence to Australasia and the Far East by way of Tuticorin and Colombo: and it would appear that the public have not been slow to take advantage of these facilities. More than half of the total increase in the number of letters and post-cards and about eight-ninths of the total increase in the number of newspapers and packets despatched from India to foreign countries other than the United Kingdom, was made up of the increase in the number sent to the group of British colonies mentioned above; while the additional number of letters and post-cards received from the same group of colonies accounted for 560,000 out of the total increase of 680,000 in these classes of articles.

	Class.	Estimated aggregate number.		Percentage of		Remarks.
		1894-95.	1895-96.	Increase.	Decrease.	
Despatched from India to the United Kingdom.	Letters and post-cards	3,030,941	2,983,379	...	1·56	The figures relating to correspondence despatched from India to the United Kingdom are based on statistics taken for each mail, and those relating to correspondence received from the United Kingdom are based on special statistics taken during the year.
	Newspapers, book-packets and samples	912,209	975,246	6·91	...	
Received in India from the United Kingdom.	Letters and post-cards	2,208,899	3,123,485	...	2·66

11. The following statement gives details of the foreign parcel traffic both to and from India during the last two years. In the year under review there was an increase of 5,177 or 2·4 per cent. in the total number of foreign parcels and of ₹6,800 in the Indian share of the revenue from the foreign parcel post :— Foreign parcels.

Parcel Exchanges.	Total number of parcels.		Average weight of each parcel.		Net revenue of the Indian Post Office.*

GRAND TOTAL	215,201	220,378	2 13·23	2 4·94	1,84,543	1,91,343

* Net revenue is calculated after deduction of customs duty and sums due to the Peninsular and Oriental Steam Navigation Company, the British Post Office, and other Administrations.

12. More than 74 per cent. of the whole foreign parcel traffic was with the United Kingdom. As regards the exchange with the British Post Office, there was a slight increase during the year under report in the number of parcels received from the United Kingdom, while in the opposite direction there was a falling-off of 622 in the number sent home from India. In the case of the exchange through the agency of the Peninsular and Oriental Steam Parcel exchange with the United Kingm.

Navigation Company, there was a further decrease of 1896 in the number of parcels brought out from home, while the number made over to the Company by the Indian Post Office was practically the same as in the previous year. If the figures relating to both exchanges, *i.e.*, with the British Post Office and through the agency of the Peninsular and Oriental Steam Navigation Company, be taken together, the results show a falling-off of 2,301 in the number of parcels as compared with the figures for the preceding year. This decrease in number was, however, accompanied by an increase of ₹505 in the net revenue derived by the Indian Post Office from these exchanges.

Parcel exchange with foreign countries other than the United Kingdom.

13. In the exchange with Continental Europe, there was a small increase of 195 in the number of parcels despatched from India, and a small decrease of 115 in the number received, the net revenue derived by the Indian Post Office being ₹242 more than in the previous year. In the exchanges with other countries, there was a satisfactory development of the traffic in both directions, an addition of 7,398, at the rate of 18·4 per cent., having been made to the number and of ₹6,053 to the net Indian revenue. The large increase in the number of parcels sent from India to non European countries is due mainly to the continued growth of the parcel post to Ceylon. The parcel exchange with this Colony now includes both the value-payable and insurance systems, and the business is likely to assume considerable dimensions within the next few years.

Progress in foreign parcel traffic in 20 years.

Year.	Number of parcels.	Year.	Number of parcels.
1875-76	35,819	1887-88	158,792
1876-77	45,357	1888-89	163,989
1877-78	59,183	1889-90	177,210
1878-79	69,763	1890-91	191,713
1879-80	77,211	1891-92	211,162
1880-81	80,257	1892-93	185,460
1881-82	88,840	1893-94	204,270
1882-83	88,684	1894-95	215,201
1883-84	98,206	1895-96	220,378
1884-85	110,590		
1885-86	133,054		
1886-87	141,453		

14. The progress of the foreign parcel traffic as a whole since 1875-76 will be seen from the table in the margin.

Delivery work of the year.

15. The figures given in paragraph 8 of this report show that 413,870,240 letters, post-cards, newspapers, packets, and parcels were issued for delivery during the year. These figures are calculated from actual enumerations made for a week at a time twice during the year, and approximately represent the delivery of mail articles properly so called. In order, however, to ascertain the entire delivery work of the year, it is necessary to add the number of money orders which are delivered and paid by postmen and village postmen. The entire delivery work of the year is shown by the following figures :—

Sent out for delivery (including 10,236,284 money orders)	424,106,524
Received back undelivered (deducted as representing articles either again sent out and delivered, or sent to the Dead Letter Office)	12,024,951
Balance actually delivered	412,081,573
Sent to Dead Letter Offices	3,803,864
Total number received for delivery (counting each article only once)	415,885,437

These figures show that the percentage of articles delivered on the whole number received for delivery was 99·08, practically the same as in the previous year.

Dead Letter Offices.

16. The total number of letters, post-cards and other articles, excluding money orders, that reached one or other of the ten Dead Letter Offices was 5,109,378 as compared with 4,592,585 received in the previous year. The distribution of these articles among the different Dead Letter Offices and the

ways in which the articles were disposed of are shown in detail in Appendix IV of which a summary is given below :—

		Number.		Percentage.	
		1894-95.	1895-96.	1894-95.	1895-96.
Total number of articles received in Dead Letter Offices		4,592,585	5,109,378	...	...
	1894-95. 1895-96.				
DEDUCT—					
Articles issued by Dead Letter Offices for delivery to the addressees or senders and received back again as undeliverable	227,111 223,968				
Articles transferred to other Dead Letter Offices	1,192,287 1,346,633	1,419,398	1,570,601		
Net receipts to be disposed of by the Dead Letter Offices		3,173,187	3,538,777	100	100
Articles disposed of by the Dead Letter Offices excluding articles returned as undeliverable.	Disposed of by redirection to addressees	528,403	636,872	16·65	18·00
	Disposed of by return to senders	1,802,916	1,963,050	56·82	55·47
Articles undisposable		841,868	938,855	26·53	26·53

Of the total number of articles 636,872 were successfully disposed of by being redirected and then delivered to the persons to whom they were addressed, while 1,963,050 were returned to the senders and 938,855 were found to be unreturnable. This last figure is only ·2 per cent. of the total number of articles given out for delivery in the year, and a large proportion of the 938,855 articles were from their nature not capable of delivery. Special statistics were kept at all Dead Letter Offices for the month of March 1896, and from these it would appear that about 800 letters, 1,800 post-cards, 1,000 newspapers and 350 packets reach our Dead Letter Offices every month without any addresses at all, and 2,660 newspapers and 1,200 packets without covers. As usual, a large amount of valuable property was found in letters and other articles posted without address or with addresses so incorrect or incomplete that the covers had to be opened in order that the senders might be traced. In articles opened in the five more important Dead Letter Offices were found cheques, bills of exchange, currency notes, jewellery, and other property amountnig in value to ₹2,79,411, £1,768-17-6, 37 Francs, 31 Centimes, and 236 Dollars, and the whole of this property, with the exception of money and other articles of the total value of ₹36,385, £128-8-3, and 31 Dollars, was successfully delivered to the owners. It may be added that experience in the Rajputana Dead Letter Office shows that the curious practice on the part of Marwari traders in the Bombay Presidency, which was mentioned in the annual report several years ago, still continues in force. The practice consists of their sending to members of their firms who have gone back to Rajputana on visits heavy packets, containing pieces of iron or wood or waste paper, on which no postage is paid, with the object, it is supposed, of suggesting to them the necessity of their return to work. These packets are almost invariably refused and finally reach the Dead Letter Office, where the name of the sender cannot be ascertained.

Sale of postage stamps, etc.

17. Particulars regarding the issues from treasuries of post-cards, postage stamps, and embossed envelopes for sale will be found in Appendix V, and similar information regarding service post-cards and service postage stamps in Appendix VI. A statement compiled from these appendices, showing the issues of each kind of post-card, postage stamp, and embossed envelope, is given at page 11. The total value of the issues of ordinary stamps was R1,13,07,793 and of service stamps R23,41,113, there being an increase over the preceding year of R5,20,679 in the value of ordinary stamps, and of R10,382 in the value of service stamps.

The largest sales of ordinary stamps were in the Bombay Circle, where they amounted to over 24 lakhs of rupees. Madras comes next with sales of over 21 lakhs of rupees, and Bengal follows with sales of over 18 lakhs of rupees. The inland single post-cards commanded the highest sales, the total sales being over 103 millions. The small ½-anna envelope had the next largest sales, over 70 millions being sold during the year; of the ½-anna adhesive stamps over 48 millions were sold; of the ½-anna reply post-cards over 12 millions; of the 1-anna adhesive stamps over 9 millions; and of the 2-anna adhesive stamps over 5 millions. There was an improvement in the sales of the special square envelopes and of the 2-anna large registration envelopes. There was also an improvement in the sales of the 2-anna small registration envelopes.

As stated in my last report, newspaper wrappers of the value of ½-anna and 1-anna each were brought into use from 1st May 1895. Over 325 thousand of the ½-anna wrappers and over 93 thousand of the 1-anna wrappers were sold to the public during the eleven months of the year under report.

For the purpose of bringing to account sums collected as Customs duty on articles received by the foreign post and delivered-ad insula, ordinary adhesive postage stamps over-printed with the words "Postal Service" were introduced from the 1st April 1895. The stamps are not sold to the public, postmasters only being authorized to purchase them from the Treasury. No allowance is given to postmasters on account of discount on the value of these stamps.

Apart from the sale of postage stamps, 1-anna revenue or receipt stamps to the value of R3,49,820 were sold during the year through the agency of the Post Office. Non-judicial and Court-fee stamps are also sold at a large number of post offices, but, except in Burma, the postmaster acts, as regards these stamps, as a private vendor, and the stamps do not form part of the post office balance. In Burma, where general stamps are kept by the postmaster in the same way as other stamps, the sales on this account amounted to R45,762.

Section IV.—District Post.

Scope and mangement of the District Post.

18. There has been no change of any importance in the management of the District Post during the year under report. It was administered as usual by the heads of postal circles subject to the control of the several Local Governments and Administrations.

General results of the year.

19. The comparative statement given in the following page shows the establishments, income, expenditure and operations of the District Post for the years 1894-95 and 1895-96. The total income of the year under report was R11,20,304. There was an increase of 2 in the number of post offices, but a decrease of 64 in the number of postmen and village postmen. There was also an increase of 363 in the number of letter-boxes, but a decrease of 69 miles in the District Post mail lines. There was an increase of 2,067,000 or 14·43 per cent. in the number of articles including money orders delivered by the District Post agency, of 1,098,395 or 11·05 per cent. in the number of articles posted in District Post offices and letter-boxes, and 1,57,755 or 22·28 per cent. in the number of articles returned as undeliverable. Appendix VII gives details according to circles of letters and other postal articles sent to, and received from the District Post.

(a) Includes contributions from Tributary States.
(b) These are dry season distances: during the rains these lines are increased in length.
(c) Includes contributions from Frontier Police Fund, ₹3,146, and the State of Hill Tipperah, ₹309.
(d) Includes lines paid from the revenues of Feudatory States.
(e) Grant made available from Bombay District Post Funds.
(f) Includes contributions from Feudatory States, ₹14,351.
* Revised figures.

Section V.—Money Orders.

Inland money orders—General results.

20. The total number of money order offices at the end of the year under review was 10,926 as compared with 10,709 at the close of the previous year. The number of inland money orders issued, including telegraphic money orders, but excluding all transactions with Native States, was a little over 10 millions of the aggregate value of 20⅘ crores of rupees, and the commission realised amounted to rather more than 26 lakhs of rupees. The table in the margin shows the yearly progress made in this branch of business since it was undertaken by the Post Office in 1880. During the year under report there was an increase of 6·71 per cent. in the number of inland money orders issued, of 6·12 per cent. in their value and of 6·29 per cent. in the amount of the commission realised. The average value of an inland money order was R20-8-0 against R20-10-0 in the previous year.

Total for 1895-96	10,055,036	20,62,03,368	10,041,889	20,60,36,354	100	100
Total for 1894-95	9,422,105	19,43,09,308	9,414,735	19,40,87,972	...	...
Increase	632,931	1,18,94,060	627,154	1,19,48,382	...	...

As in former years the money order business of the Bengal Circle was on a larger scale than that of any other Postal Circle. As in previous years also the payments were largely in excess of the issues in the North-Western Provinces and Oudh, Bombay, and Bihar, whereas in Assam, Burma, Central Provinces, Rajputana and Sind and Baluchistan the issues were in excess of the payments.

Revenue money orders.

22. The characteristic progress in the working of the revenue money order system was maintained in the North-Western Provinces and Oudh and in the Central Provinces. In the North-Western Provinces and Oudh the total number of revenue money orders issued rose from 149, 803 in 1894-95 to 165,829 during 1895-96, the amount of revenue remitted being R37,60,918 as compared with R33,13,875 in the preceding year. In the Lower Provinces of Bengal, including Eastern Bengal and Bihar, there was a falling-off in the number of revenue money orders, but a slight increase in the value as compared with the figures for the previous year. The number of orders fell from 188,195 in 1894-95 to 186,175 during 1895-96, while the amount rose from R16,24,602 to R17,19,018. In the Punjab the power of issuing revenue money orders was withdrawn, at the instance of the District authorities, from certain post offices where it was not thought safe to receive large sums of money, and there was, in consequence, some falling-off both in the number and value of revenue money orders as compared with the figures for 1894-95. The number of orders and their amount fell from 10,180 and R6,89,136 in 1894-95 to 9,697 and R6,01,244 respectively during the year under report.

Remittances of miscellaneous Government dues by money orders.

23. The system of remitting miscellaneous Government dues through the agency of the Post Office continued to make progress in the Lower Provinces of Bengal during the year under report, 91,368 official money orders of the aggregate value of R20,22,900 having been issued as compared with 91,231 money orders of the aggregate value of R18,57,627 issued in the previous year. In the North-Western Provinces and Oudh also, it may be said that the progress reported last year was sustained, as, notwithstanding a slight falling-off in the value of the orders issued, there was an increase in the actual number. The value of these orders fell from R3,98,481 in 1894-95 to R3,74,605 during the year under report, while the number of the orders rose from 20,603 to 21,154. In the Punjab there was a falling-off both in the number and value of orders as compared with the transactions of the previous year. The number of orders issued and their amount were 4,000 and R92,849 in 1894-95 in comparison with 3,820 and R82,494 respectively during 1895-96. The system was newly introduced in Madras at the beginning of the year under report, and 3,651 money orders of the aggregate value of R57,535 were issued during the year.

Rent money orders.

24. There was a further falling-off in the number and value of rent money orders issued during the year in the North-Western Provinces and Oudh, the number of orders having fallen from 64,346 in 1894-95 to 61,826 during 1895-96, and the amount from R8,59,018 to R8,34,518. In the Central Provinces also, the progress reported last year in the working of the system was not sustained. The number of orders fell from 1,952 in 1894-95 to 1,849 during the year under report, and the amount from R32,625 to R26,913. In the Lower Provinces of Bengal, however, there was an advance both in the number and value of rent money orders as compared with the figures for the previous year. The total number of orders issued rose from 46,968 in 1894-95 to 47,919 during 1895-96, the amount of rent remitted being R6,76,452 in 1895-96, as compared with R6,69,378 in the preceding year.

Money Order transactions with Native States.

25. The following statement shows the money order transactions with Native States:—

	Issues in the State.		Payments in the State.	
	Number.	Value.	Number.	Value.
		₹		₹
Gwalior	47,128	11,63,276	15,463	4,26,914
Patiala	15,804	3,77,835	13,835	4,63,112
Nábha	3,711	1,19,825	2,909	1,00,840
Jhind	3,497	93,099	3,297	1,03,633
Chamba	1,339	46,525	420	12,602
Faridkot	1,469	30,839	433	15,115
TOTAL	72,948	18,31,399	36,357	11,22,216
Total for 1894-95	68,149	18,04,797	33,436	11,44,729

There was an increase of more than 26 thousand rupees in the value of the issues in the Native States, but a decrease of more than 22 thousand rupees in the value of the payments in the States. It will be noticed that the payments made by the Imperial Post Office on account of money orders issued by Native States have been very much larger than the issues by the Imperial Post Office on those States. This result is largely due to the issues of the Gwalior State.

Telegraphic money orders.

26. The transactions in telegraphic money orders are given in the following table according to postal circles :—

Name of Circle.	Issues.			Payments.	
	Number of money orders.	Value of money orders.	Commission.	Number of money orders.	Value of money orders.

Rajputana	1,892	2,86,962	4,886	1,951	2,63,579
Sind and Baluchistan	2,927	3,61,905	6,745	1,667	2,16,830
TOTAL	128,206	1,48,57,721	2,86,544	135,619	1,51,33,610
Total for 1894-95	122,030	1,36,02,153	1,43,931	125,458	1,35,95,835
Increase	6,176	12,55,568	1,42,613	10,061	15,37,775

The number of telegraphic money orders issued in the year under report was 128,206 for the aggregate value of 148½ lakhs of rupees as compared with 122,030 orders for 136 lakhs of rupees in the previous year. The postal commission on these orders amounted to R2,86,544 in addition to R1,28,206 the cost of the telegrams which is paid by the remitters along with the postal commission but credited to the Telegraph Department. The average value of a telegraphic money order was R115-14-2 against R111-7-5 in 1894-95.

As in previous years telegraphic money orders were far more freely issued from Burma than elsewhere, the orders issued from that province in the year under report being 41·67 per cent. of the total number for the whole of India. The payments, also, in Burma continued to be larger in amount than in any other province.

27. The foreign money orders for and from the United Kingdom, most of the British colonies and possessions, foreign European countries and most of their colonies and possessions, and Egypt, are issued in sterling, payments being made by the remitters and to the payees in India at the rates of exchange fixed by the Post Office from time to time for this purpose. Details of the sterling money order exchanges of the year are given in the table below :— Foreign money orders in sterling.

Countries of Exchange. (Only countries of exchange are entered here. The list of countries for which sterling orders are issued is given in the *Postal Guide*.)	1894-95.				1895-96.

The number of money orders issued on foreign countries rose from 49,580 in 1894-95 to 54,999 in the year under review, and the value from £163,059 to £177,739, while there was also a considerable increase in the drawings of foreign countries upon India, which were greater by 3,376 in number and by £22,603 in value than during the previous year. The increase both in the issues and in the payments was principally due to the growth of the money order business with the United Kingdom, although owing to the establishment of a direct money order exchange with the Cape Colony from the 1st January 1896, a number of orders, which used formerly to be advised through the United Kingdom, have no longer since that date been included in the transactions with the mother country. Another striking feature of the foreign money order business of the year is the proportion in which the drawings of Western Australia upon India have increased. The number of orders advised for payment in this country was nearly four times as great as in the previous year, while the value was more than seven times as great. It would seem that the mining camps of Coolgardie have attracted some number of natives of India and that they have been prospering. The average value of a money order issued by India in 1895-96 was £3-4-7 as compared with £3-5-9 in 1894-95, and that of a money order paid in India was £5-7-5 as compared

with £5-4-0 in the preceding year. The average of the rates of exchange in force in 1895-96 was 13$\frac{1}{8}$*d.* per rupee as against 13*d.* in the previous year.

Foreign money orders in Indian currency.

28. The following table shows the money order transactions with foreign countries to and from which the amounts are advised in Indian currency :—

* Includes Ceylon telegraphic money orders.

The money order business with Ceylon and the Straits Settlements continues to show a steady growth. The transactions with these two colonies mainly consist of drawings upon India; and these increased by over 10,000 in number and by more than three lakhs of Rupees in value, in the case of Ceylon, while in the case of the Straits Settlements the number rose from 12,644 to 15,088 and the value from R6,86,554 to R8,10,168. There was a small decrease in the number and value of the orders issued for payment in the Portuguese Settlements in India, as well as in the drawings on the German Protectorate in East Africa. In almost all the other cases there was a marked development of the transactions. The average value of a foreign rupee money order issued by India in 1895-96 was R38-2-4, as compared with R36-0-5 in 1894-95, and that of an order paid in India was R41-10-1, as compared with R41-9-3 in the preceding year.

Forfeited or void money orders.

29. The usual statement of forfeited and void money orders is given below :—

Balance on the 31st March 1895.		Void money orders for 1895-96.		Total.		Void orders paid, repaid to remitters in foreign countries, renewed and forfeited to the State during 1895-96.								Balance on the 31st March 1896.	
						Paid and repaid.		Renewed.		Forfeited to the State.		Total.			
No.	Value.	No.	Value.	No.	Value.	No.	Value.	No.	Value.	No.	Value.	No.	Value.	No.	Value.
	R a.		R a.		R a.		R a.		R a.		R a.		R a.		R a.
2,565*	75,023 2	7,762	2,64,823 11	10,327	3,39,846 13	4,964	1,61,518 5	2,010	1,00,541 1	645	6,798 14	7,619	2,68,858 4	2,708	71,589 9

* The balance shown last year was No. 2,504, value R75,018-4 0. The difference is due to subsequent adjustments in the accounts for 1894-95.

The total balance standing on the register of forfeited money orders at the end of the year was R71,588, against R75,018 at the close of the previous year.

30. The following statement gives an abstract of the entire money order business of the Post Office in the year including inland and foreign money orders both ordinary and telegraphic, the foreign sterling money orders being shown in Indian currency at the rates in force when the transactions took place :— Aggregate money order transactions inland and foreign.

Money Orders – Inland, Native State, and foreign for the year 1895-96.	Issues.				Payments.

31. The statement on the margin shows the sales of British postal orders during the year. The total number of orders sold in 1895-96 was 49,566 as compared with 37,406 in the preceding year, and the total value (including poundage) £31,915 as compared with £23,811 in 1894-95. There was an increase in the sales in the case of all denominations, but again the demand was mainly for the 5s., 10s., and 20s. orders. During the year 37,205 of these orders were sold, while the total sales of orders of other denominations only amounted to 12,361. The increase was most marked in the Punjab, and this is to be attributed to the special measures that were taken to advertise this means of making small home remittances at all the large stations of the province. The commission realised by the Indian Post Office on the entire sales of the year was R1,491. British postal orders.

Denomination of British postal orders.	Number sold during 1894 95.	Number sold during 1895-96	Increase.	Decrease

Total	37,406	49,566	12,160	...

Section VI.—Savings Banks.

32. The usual statement is appended showing in detail, according to postal circles, the savings bank transactions of the year as compared with those of the previous year. At the close of the year there were 291 head banks and 6,052 sub-banks, or a total of 6,343 offices performing savings bank business against 6,384 in the preceding year, thus showing a decrease of 41 offices during the year. This was chiefly due to a decrease of 119 sub-banks in the Bombay Circle, owing to the withdrawal of savings bank powers from small post offices which had no transactions. In Madras there was an actual increase of 47 sub-banks, while in other Circles there were increases or decreases to a smaller extent. The number of accounts however on the books of the Post Office Savings Bank continued to increase, there being at the close of the year under report 653,892 accounts as compared with 611,947 at the end of the year General results of the year.

1894-95, showing an increase of 41,945 or 6·85 per cent. Excluding transfers from one post office to another, the amount deposited in the year was a little over 367 lakhs of rupees as compared with 326 lakhs of rupees in 1894-95; the amount withdrawn was over 328⅓ lakhs as compared with 335 lakhs in 1894-95, and the interest paid was over 25½ lakhs as compared with 22¾ lakhs in 1894-95. The total amount standing at the credit of depositors at the close of the year was nearly 904¼ lakhs, showing an increase of more than 64 lakhs over the balance at the close of the preceding year.

The average balance of each account was R138·28 as compared with R137·29 in the previous year. Of the 653,892 active accounts at the end of the year, 30,770 were security deposit accounts with a balance in favour of depositors of above 41¼ lakhs, giving an average of R134 for each account. The maximum limit for a security deposit account is R500. The number of public accounts was 5,399 with a balance of 58 lakhs, giving an average of R1,075 for each account. There were 139 regimental and other conjoint accounts with a balance of nearly 10¼ lakhs, giving an average of R7,366 for each account. There is at present no limit of deposit in the case of public and regimental and other conjoint accounts. Of the remaining 617,584 active accounts with a balance of over 794½ lakhs, 82,821 with a balance of over 164½ lakhs were held on behalf of minors by their parents, relatives, and guardians, and the rest were accounts opened and held by depositors on their own behalf. It will be seen therefore that 94·44 per cent. of all the accounts in the Post Office savings banks, and 87·88 per cent. of the total balance of 904¼ lakhs, were the savings of private persons, deposited either for their own benefit or for the benefit of their children, minor relatives, and wards.

Statement showing the Post Office Savings Bank transactions during 1895-96 compared with 1894-95.

[Arranged in the order of aggregate balances as shown in column 13.]

Depositors, Europeans and natives of India.

33. The statement below shows the number and value of accounts held by Europeans and Eurasians as compared with the number and value of accounts held by natives of India. The proportion of accounts held by Europeans and Eurasians was, as in the preceding year, highest in Madras, the North-Western Provinces and Oudh and Bombay circles, but nearly 90·77 per cent. of the total number of accounts at the close of the year were held by natives of the country, showing a slight increase over the percentage for the preceding year:—

Depositors according to occupation.

34. In the following statement the depositors are classified according to their occupation. As in the preceding year, the largest number of accounts were held by the undermentioned classes of depositors in the following order, (1) persons of no occupation or whose incomes are derived from others or from their own property, (2) the professional class, and (3) the domestic class; the percentage of accounts falling under each of these classes being the same as in 1894-95. The highest percentage of increase, however, was in the agricultural class, the number of whose accounts increased 16·69 per cent. during the year, whereas in the preceding year the industrial class showed the highest percentage of increase:—

Postal Circles.	Class I, Professional. A. Having fixed income.	Class I, Professional. B. Having variable income.	Class II, Domestic.	Class III, Commercial.	Class IV, Agricultural.	Class V, Industrial.	Class VI, Indefinite.	Total.

Investment in Government securities.

35. There were 257 investments in Government securities through the Post Office during the year, the aggregate amount of the investments being R1,46,500 as compared with 353 purchases for R2,46,500 in the preceding year. The sales of securities through the Post Office were 40 against 37 in 1894-95. The value of the securities held in the custody of the Comptroller General at the close of the year on account of depositors in the Post Office savings banks, was R4,69,000 as compared with R4,72,200 on the 31st March 1895. The decrease in the number and amount of investments was owing apparently to the prevailing high rates of premium during the year under review, which may have induced depositors to invest their savings in other ways rather than incur the cost, which the purchase of Government securities would have entailed. It may be noted that out of the balance of R4,69,000 held by the Comptoller General on behalf of Post Office Savings Bank depositors at the end of the year, securities of the nominal value of R4,68,500 were in the 3½ per cent. loan while the remainder (R500) represented the value of securities of the 4 per cent. loan bearing no interest. This has been disposed of since the close of the year by closure of the depositor's account and sale of the security.

Section VII.—Insurance.

Insurance business.

36. The progress of the insurance business of the Post Office since it was first undertaken is given in the following statement:—

Year.	Letters.		Parcels.		Total		Insurance fees.
	No.	Value.	No.	Value.	No.	Value.	
		R		R		R	R

1893-94	89,332	2,31,75,043	195,706	5,69,14,339	285,038	8,00,89,402	2,10,714
1894-95	92 019	2,34,06,681	198,257	5,92 55,919	290,276	8,26,62,600	2,18,436
1895-96	**93,764**	**2,45,58,478**	**201,219**	**6,26,73,095**	**294,983**	**8,72,31,573**	**2,31,277**
Percentage of increase	1·89	4 92	1·49	5·76	1·62	5·52	5 87

It will be seen that there was an increase in the total business of the year as regards both the number and value of the articles insured and also an increase of R12,841 in the amount of insurance fees. The total number of parcels insured exceeded the number in the preceding year by 2,962, their total value being 62¢¾ lakhs of rupees as compared with 592⅛ lakhs in 1894-95. The largest increase in insurance business occurred in Bombay, where the number of parcels insured in the year under report exceeded that in the previous year by 7,590.

The average value for which each letter was insured during the year 1895-96 was R262 as compared with R254 in the previous year, and the average value for which each parcel was insured was R311 against R299 in 1894-95.

Claims for compensation.

37. There were 18 claims for compensation on account of the loss of insured articles or the abstraction of contents during the year under review as compared with 19 claims in the previous year. Out of the 18 claims 16 were admitted. In 14 out of these 16 cases the loss was caused by fraud or negligence on the part of servants of the Post Office, and in two cases was due to accident. The usual statement, showing the cases in which compensation was actually paid or in which the claims were admitted during the last two years, is given on the margin, and it will be seen that the claims admitted by the Post Office in the year under report amounted to R5,045-7-5, or 2·18 per cent. of the total amount realised from insurance fees, as compared with a percentage of 1·54 in the previous year. Of the two cases in which claims were not admitted only one was actually rejected, the other being pending at the close of the year. In the case in which compensation was refused the Post Office declined to accept responsibility as the insured parcel had been delivered in good condition, under a clear receipt, and there was reason to believe that the declared contents had not really been put into the parcel, the packing and posting of which had been entrusted to a servant.

Cases in which compensation was paid or the claims admitted.	1894-95.			1895-96.

Section VIII.—Value-Payable System.

Value-payable post.

38. The marginal table shows the rapid and uninterrupted progress of the value-payable business since 1877-78 when the scheme was first introduced. The total number of articles of all kinds sent through the post under the value-payable system was 1,877,693 in the year under review as compared with 1,735,998 in the previous year; the total amount specified for recovery from the addressees was 216⅛ lakhs of rupees against 199⅛ lakhs, and the commission realised was over three lakhs eighty thousand rupees against over three lakhs sixty thousand rupees in the previous year. There was thus an increase of 8·16 per cent. in the number of articles, of 8·64 per cent. in the value specified for recovery and 6·62 per cent. in the commission realised. As in previous

Year.	Articles sent under the value-payable system.	Value declared for realization.	Commission.
	No.	R	R

Increase per cent. in 1895-96	8·16	8·64	6·62

years nearly two-fifths of the entire business of the year was transacted in the Bengal Circle, and practically in Calcutta. Out of a total of 713,862 articles sent by the value-payable post in the whole of the Bengal Circle, 683,462 were posted at the Calcutta central post office and its town sub-offices; and of the sum of nearly 83 lakhs of rupees recovered from the addressees of value-payable articles posted in the Bengal Circle, nearly 79 lakhs were paid to tradesmen in Calcutta as the price of goods sent by post to various parts of the country. This amount was nearly 6½ lakhs of rupees in excess of the corresponding figure of the preceding year. There has been a sustained progress in the value-payable business with Ceylon, introduced in 1891. During the year under report 18,464 value-payable articles of the aggregate value of R1,76,718 were despatched from India to Ceylon as compared with 14,455 articles of the aggregate value of R1,41,055 in the preceding year. The value-payable system has not yet been introduced between India and any other foreign country.

Classification of value-payable articles.

39. In the statement on the margin details are given of the different classes of articles sent through the post under the value-payable system. As compared with the figures of the previous year, the result is an increase of 4·38 per cent. in the number of value-payable parcels, of 12·95 per cent. in the number of value-payable railway receipts, of 6·01 per cent. in the number of value-payable registered letters and packets and of 10·78 per cent. in that of value-payable unregistered packets. The average value of each article taking all classes of articles together, was R11-8-6 as compared with R11-7-8 in the preceding year. The average commission on each article was the same as in the preceding year.

	No.	Value.	Commission.	Average value of each article.			Average commission on each article.

Section IX.—Miscellaneous.

Post Office Guarantee Fund.

40. The usual statement showing the transactions of the Post Office Guarantee Fund during the year under report is given below. The balance at the credit of the Fund, including the value of Government Securities purchased on behalf of the Fund, rose from R5,79,121 on the 31st March 1895 to R6,11,378 on the 31st March 1896. The subscriptions realised from postal servants amounted to R24,167, while only R13,574 was decreed against the Fund in connection with frauds committed by officials of the Department. The latter sum was considerably below the average which stands at R19,560 for the last ten years.

The balance of R6,11,378 at the credit of the Fund at the close of the year 1895-96 includes Government Securities of the nominal value of R2,94,000. The interest realised during the year on these investments amounted to R10,028, to which must be added the sum of R12,000 received from Govern-

ment as interest on the first three lakhs belonging to the Fund, making a total of over R22,000 on account of interest credited to the Fund during the year.

Receipts.	Amount.	Charges.	Amount.
	₹		₹
Balance of 1894-95*	5,79,121	Refund on account of excess realisations	366

* Inclusive of Government Securities of the nominal value of ₹2,69,000.
† Ditto ditto ditto ₹2,94,000.

Complaints by the public.

41. The number of complaints made by the public during the year under report was 15,428. In the previous year's report, the number of complaints was shown as 9,710. The difference between these figures, however, is due not to any abnormal increase in the number of complaints, but to the introduction of a revised system of recording them. Hitherto only complaints made direct to heads of postal circles, or specially reported to them, have been included in the figures given in the Annual Administration Report of the Department. In order, however, to make the information on this subject as complete as possible, it has been decided to include complaints made to any postal official. If only the complaints that would have been shown under the former practice had been taken into account, the number would be 10,367, representing an increase of only 6·76 per cent. The proportion of cases in which the complaints were well-grounded was 34·49 per cent., while the percentage of entirely groundless complaints was 40·1. The remaining cases were either pending at the close of the year, or were cases in which no definite conclusion could be arrived at. As to the high percentage of groundless complaints, it has always to be remembered that the Post Office deals with persons of all classes of life, and that the necessity of verifying facts before complaining is not yet widely recognized even among the well-educated. One case perhaps which has been brought to notice by the Postmaster General of Madras may be specially mentioned as illustrating a not uncommon tendency to view the action of postal officials with unnecessary suspicion :—

"A lady complained with great warmth that some manuscript which had been returned to her by the Editor of an English newspaper, enclosed in a thick envelope in order to secure privacy of the contents, had apparently been perused by some official of the Post Office who, she thought, had added insult to injury by writing the words "Take it to your heart" in red ink on the cover. When, however, the cover was called for and examined, it was evident at a glance that it not only bore no indication of having been tampered with, but also that the red ink remark on which the accusation against the Post Office was based was "No. 25—Take it to your beat"—(a note intended for the guidance of postmen), and not "Take it to your heart" as supposed."

It may be added that one instance occurred during the year in which a false complaint of destroying a registered letter was maliciously made against a branch postmaster, which led to the prosecution and punishment of the complainant.

42. Complaints received during the year regarding registered letters, ordinary parcels, insured articles, and value-payable articles are included in the number of complaints shown in paragraph 41 of this report, and the remarks there made explaining the increase in the number of complaints apply also to the figures entered in the statement given below:— Complaints regarding special classes of articles.

	1895-96.				Total.	
	Registered letters.	Ordinary parcels.	Insured letters and insured parcels.	Value-payable parcels and value-payable registered articles.	1895-96.	1894-95.
I.—Cases in which enquiry showed either that no loss occurred or that the loss had not occurred through the fault of postal officials . .	230	136	31	70	467	288
II.—Cases in which the postal establishment was proved to be in fault, or in which there was strong ground for believing it to be so . .	116	69	18	40	243	149
III.—Cases in which no definite conclusion was arrived at, or which were pending at the close of the year . .	55	59	7	22	143	85
Total .	401	264	56	132	853	522

It will be seen that, out of a total of 853 complaints regarding these special classes of postal articles, 467 or 54·75 per cent. were groundless, and that the proportion of cases in which postal officials were in fault was only 28·49 per cent. The percentage of cases in which no definite conclusion was arrived at, or which were pending at the close of the year, was 16·76. As compared with the number of complaints it may be noted that there was an increase of nearly 175,000 registered letters, over 15,511 parcels, nearly 141,700 value-payable articles, and over 4,700 insured articles. Complaints which proved to be well-grounded were made by the public in respect of only 116 out of nearly 8 million registered letters, 69 out of 2,577,083 parcels, 18 out of 294,983 insured articles, and 40 out of 1,877,693 value-payable articles.

43. The number of cases in each postal circle in which servants of the Post Office were found guilty of offences punishable by law is shown in Appendix VIII, and a summary of the figures is given on the margin. The total includes 60 cases of misappropriation of office cash, 121 money order frauds, 11 savings bank frauds and 44 cases of theft from mails and post offices. Most of the remaining offences relate as usual to letters, parcels, and other mail matter properly so called, and include comparatively minor cases of negligence punishable under the Post Office Act. Among the offenders convicted, or departmentally punished, were 64 departmental postmasters and 36 clerks, including 3 postal signallers and 3 railway mail service sorters, 37 extraneous agents in charge of post offices, 123 postmen and village postmen, including a telegraph messenger, 2 overseers, 3 packers, 6 mail peons, and 24 runners. The amount of defalcations and losses was R34,646-12-5 compared with R47,395-9-4 in the previous year, and R30,118-14-4 in 1893-94. R16,218-14-7 was recovered from the offenders or their sureties, R2,865-8-10 was decreed against the Guarantee Fund, R15,512-5 Offences by servants of the Post Office.

	1894-95.	1895-96.
Number of legal convictions	186	151
Number of cases departmentally punished . .	127	148
	313	299

remained unadjusted at the close of the year, and only R50 was written off as a loss to Government. Two postal officials, one a local resident in charge of a branch post office and the other a departmental branch postmaster, committed suicide after misappropriating Government money.

Offences by persons not belonging to the Post Office.

44. Four cases of fraud in respect of money orders, and one case in which a small amount was fraudulently withdrawn from the savings bank, were committed by persons not belonging to the Post Office. There were 31 cases of housebreaking and theft of Government money from post office safes or from the mails, apart from the cases of highway robbery which are separately dealt with. The total amount stolen was R1,671-6-7, of which R617-7-2 was recovered, R72-12-0 was written off as finally lost, and R981-3-5 was unadjusted at the close of the year.

Highway robberies and attacks upon the mail.

45. The usual abstract is given in the margin showing the number of cases in which mails were plundered by highway robbers during the year under report and in the previous year, either in British territory or in the Native States comprised in the various postal circles into which India is divided. There were 30 highway robberies of the mail during 1895-96, as compared with 19 in 1894-95. Of these 30 cases; 20 occurred in British territory and 10 in Native States. It will be seen that the increase was principally in the number of mail robberies in Native States or foreign territory as there were only 2 such cases in 1894-95. The largest number of robberies occurred in the Punjab circle where the total rose from 4 in 1894-95 to 10 in the year under report, but 5 out of these 10 robberies were the work of Waziris, from whom, however, except in one case, the mails were subsequently recovered by the Political authorities. Bengal, Bombay and Madras also show an increase, chiefly as regards Native States. There was one case of mail robbery in Upper Burma and one in Sind, as compared with none in 1894-95. There were no cases in Assam, Bihar, the Central Provinces and Eastern Bengal.

Total	17	2	19	20	10	30

Character of mail robberies.

46. In 11 out of the 30 cases of highway robbery the mail carriers were wounded by the robbers, and in 7 cases so severely as to necessitate their detention for some time in hospital. In one of the cases in the Punjab a mail cart was attacked by dacoits who were engaged in plundering a native wedding party. One of the two cases in Bengal was only technically a case of highway robbery as it appears that, though the mail peon was robbed of the mails which he had just taken down from the mail delivery apparatus at the Sitarampur railway station, the whole affair was intended as a practical joke by a gang of roughs, and the mails were found after a few days lying some distance from the spot where the mail peon was attacked. One of the cases that occurred in the North-Western Provinces was of the usual kind in which the object of the robbery is to bring one of two rival factions in a village into trouble. In the case that occurred in Burma the robbers did not plunder the mail, but contented themselves with robbing the runner of R100. There

were only 6 cases in which Government suffered any loss in cash, and the total amounted to ₹553-0-3. In 17 cases the entire mail was recovered, in 8 cases a portion was recovered, and in the remaining 5 cases the entire mail was lost. Prosecutions were instituted in 18 cases and convictions obtained in 12 cases. In addition to the cases of actual highway robbery mentioned above there were 3 cases of unsuccessful attempts to rob the mail, two of which took place in British territory and one in a Native State. One of these attempts was made by river dacoits in Bengal, and the following description of the case will be found of interest :—

The boat conveying mails from Gulisakhali to Patuakhali in the Backergunge district of Bengal was attacked by river dacoits at about 4 A.M. on the morning of the 9th February 1896 near the village of Matibhanga on the Beeghoye river. In addition to two boatmen there were on board the mail boat two passengers, one of whom was the postal overseer of the Fuljhuri line who was conveying at the time a remittance of ₹3,365. The dacoits who actually took part in the attack were six in number. They appear to have been aware of the presence of this sum of money on board the mail boat, and followed it up in their own boat. As the mail boat was crossing over to the Mirzaganj side of the river at the hour already stated they ran alongside of it and immediately attacked its occupants with spears and other weapons. The boatmen were greatly outnumbered as they received no assistance from the overseer or the other passenger on board both of whom acted throughout in the most cowardly manner, but they resisted the attack bravely and succeeded, though not before they had been seriously hurt by spear thrusts, in wresting the weapons from their assailants. They then in turn belaboured the dacoits with their own bamboo poles so severely that the latter were completely routed and glad to draw off their boat. When the mail boat reached the bank, the help of some villagers was obtained and the boat taken on to Mirzaganj and thence to Patuakhali. The injuries received by the boatmen at the hands of the dacoits were so serious that it was found necessary to send the men to the Patuakhali dispensary for treatment. One of them was not expected to live, and though his life was saved, he is permanently incapacitated for further service.

It should be added that a substantial reward was given to both of the boatmen for their courageous behaviour in saving the mails.

47. During the year under report there were, as usual, various cases of loss of life and mail property from storms and fire and other causes apart from the casualties in connection with mail robberies referred to in the preceding paragraph. The following cases may be specially mentioned : The winter of 1895-96 was marked by several fatal accidents to the mail runners employed on the mail lines to Gilgit and Leh in Kashmir territory. Eight of these men lost their lives owing to avalanches, or to missing their way in the snow or from exposure to the unusually severe weather that prevailed, especially in February 1896. The mails, however, were recovered in all cases except two. In April 1895 a mail boat was sunk in a collision on the Ayla river in the Backergunge district of Bengal : no lives were lost, but the entire mail on board disappeared. In September of the same year a postman was drowned while crossing a river in the Moradabad district of the North-Western Provinces, and in December 1895 a mail runner was killed by a tigress while carrying the mails in the Chhindwara district of the Central Provinces. He was attacked at 7 o'clock in the evening at no great distance from the small post office from which he had started and was found dead next morning. To these perils by snow, by flood, and by wild beasts a new peril has been added if the reports of the local officers in Mysore be believed. The case of an accident to a mail runner in that Province is described as follows by the Post Master General, Madras :— Casualties.

"A runner on the Alur-Saklaspur mail line in the Mysore Province was reported while carrying the mail on the night of the 26th May 1895 to have received a wound which was described by the Hospital Assistant as a fracture of the left thigh bone probably caused by violence. The first official who investigated the case was a Police Duffadar in the service of the Mysore State, and the only conclusion he could arrive

at was that the injury had been inflicted by 'some evil spirit or devil'. The next officer who took up the enquiry was the Amildar and 3rd class Magistrate of Alur; and he recorded the opinion that the injury had been caused either by a wild boar or an evil spirit. The matter was further investigated by the Assistant Superintendent of Police and the District Magistrate but the mystery remained unsolved. The Superintendent's theory was that the hurt was caused by an enemy of the runner's who had been lying in wait for him."

It may be added that serious fires occurred during the year at 19 post offices in different parts of the country. The most important of these cases was the total destruction by fire on the 8th April 1895 of the Mandalay Post Office, a wooden building which had been newly built in 1889 at a cost of some ₹16,000. Three small post offices were also wrecked by cyclones and another post office was seriously damaged by the fall of a tree.

Post Office Staff.

48. The establishment of the Imperial Post Office in the different grades is shown according to postal circles in Appendix IX and an abstract of this Appendix is given in the margin. The total numerical strength of the Post Office staff was 49,939 on the 31st March 1896 as compared with 48,805 on the same date of the previous year. The increase under the several heads was due to the general development of Post Office work, the largest increase being under the head of postmen and other servants. The staff of the Post Office included 170 pensioned soldiers of the native army of whom 31 were non-commissioned officers and 139 sepoys. These men were employed in various capacities such as sub and branch postmasters, clerks, postmen, or packers. Out of the total number of 170 pensioned soldiers there were 100 serving in the Punjab, and 39 in the Madras, circle. During the year 1895-96, 25 women were employed in the Post Office, of whom 24 were Europeans or Eurasians. One of these 25 women is postmistress of a head office, six are postmistresses of sub-offices, one of a branch office, fifteen are clerks, one a telegraph signaller and one is a postwoman.

Postal Officials.	1894-95.	1895-96.
Chief officers of the Directorate and Account office, and Heads of Circles	22	22
Superintendents, Probationary Superintendents, Assistant Superintendents and Inspectors of Post offices	411	429
Postmasters including Deputy, Assistant, Sub and Branch Post Masters	5,054	5,077

Village postmen	4,193	4,262
Signallers and other servants employed for telegraph work in combined offices	1,455	1,565
TOTAL	48,805	49,939

Cost of printing by private presses.

49. The charges incurred during the year on account of printing work done by private presses amounted to ₹7,805 as compared with ₹4,965 in 1894-95 and ₹13,328 in the previous year.

Section X.—Non-Postal Branches of the Post Office.

Postal Telegraph (Combined) Offices.

50. During the year under review 110 new combined post and telegraph offices were opened and 11 previously existing combined offices were closed. There was, therefore, an increase of 99 in the total number of combined offices as compared with an increase of 130 during the previous year. Of the new combined offices, 94 were at places which had previously been without a Government telegraph office and 70 at places where there had previously been no Government or Railway telegraph office. The Madras and Bengal Circles head the list with 18 new combined offices each, Eastern Bengal coming next with 15 new offices. The number of combined offices in each postal circle is shown in the statement given in the next paragraph. At the close of the year there were 1,460 Government telegraph offices, of which 252 were Departmental telegraph offices and 1,208 were combined post and telegraph offices.

51. The usual statement is given below showing the traffic statistics of combined offices arranged according to postal circles. There was an increase of 168,458 or 11·72 per cent. in the number of messages sent, and of 206,745 or 13·66 per cent. in the number of messages received, while the revenue showed an increase of R1,64,125 or 11·51 per cent. over the figures of the previous year. The total revenue from messages sent from combined offices amounted to R15,89,648, and exceeded the expenditure on the establishments of the offices by R11,88,273. Traffic Statistics of Combined Offices.

Percentage of increase	8·92	10·79 0 0	11·72	13·66	21·42	11·51 0 0	

* Excluding 90,351 free messages. In the Administration Report of the Telegraph Department for the year under review the number of paid messages sent by combined offices is shown as 16,08,550 and the revenue realised thereon as R15,93,048, but these figures include the transactions of certain Railway Telegraph Offices.

During the year 334 servants of the Post Office qualified as signallers, while 116 were under training when the year closed. The number of boys employed as telegraph messengers in combined offices on the 31st March 1896 was 252.

52. In addition to messages despatched and received by wire at the 1,208 combined offices, telegrams were received from the public at 1,611 post offices for despatch by post to the nearest telegraph office, as compared with 1,701 such offices during 1894-95. The number of telegrams booked at these receiving offices was 47,439, and the revenue realised was R37,081 as compared with 36,925 messages and R35,089 during the year 1894-95. Telegraph Receiving Offices.

The number of messages booked by post offices in the Persian Gulf on account of the Indo-European Telegraph Department was 240 against 195 in 1894-95, and fees to the amount of R2,811-1-0 were realised as compared with R2,940-3 0 in the previous year.

53. The financial results of the working of the Government passenger and goods services between Kalka and Simla during the year under report were very satisfactory. The gross expenditure on the combined service was R3,06,902 against R2,85,794 during the previous year; while the receipts amounted to R2,75,372 as compared with R2,44,310, in the previous year. There was therefore, an excess of R31,530 of charges over receipts as compared with an excess of R41,484 in 1894-95. The charges exceeded the receipts in 1893-94 Post Office passenger and bullock train services between Kalka and Simla.

by R46,828. The marked improvement in the working of the combined service which began in 1893-94 has been fully sustained in the year under report, and the satisfactory results were mainly due to the abolition by the East Indian Railway Company of their out-agency at Simla and the consequent transfer of the greater portion of the goods traffic between Simla and Kalka to the agency of the Post Office.

Twelve mail tongas on the average travelled daily in each direction up and down the hill at a cost of less than R4 for each vehicle.

Receipt of salt revenue at post offices.

54. The system of receiving salt revenue at post offices remained in force throughout the year in the North-Western Provinces and Oudh, the Punjab, the Central Provinces, and Rajputana, but the transactions, as in the previous two years, were merely nominal, although 565 indents altogether for 83,851 maunds of salt of the gross value of R2,27,128 were forwarded in the year under report to the salt depôts through the agency of the Post Office.

Sale of quinine at post offices.

55. The system of sale of quinine through the agency of the Post Office was in force throughout the year in the Lower Provinces of Bengal, the Central Provinces and Berar, Assam, the Punjab, Rajputana and Bombay.

In the Lower Provinces, more than 3½ million packets, each containing 5 grains of quinine, were sold to the public at post offices, and the total amount remitted by the post offices to the supplying depôts, by means of money orders rose from R27,618 in 1894-95 to R43,537 in the year under report. This result is due to the extension of the sale of quinine to all the post offices in the Lower Provinces (with the exception of those in the Presidency town) which had hitherto remained outside the scheme.

In the Central Provinces, the total amount remitted to the supplying depôt was R3,930. In Bombay, where the scheme was introduced in March 1895, the total amount remitted to the supplying depôts during 1895-96 was R1,012. In the remaining Postal Circles the sales were not considerable.

The system was extended in the year under report to Sind and Baluchistan, Madras and Burma. It was in force in these Circles for a short period only during the year, and the sales were nominal.

Postal Life Insurance and monthly allowances.

56. A separate report has been submitted, as usual, on the operations of the schemes under which the Post Office issues life insurance policies and contracts for monthly allowances in favour of servants of the postal and telegraph departments. The scheme for monthly allowances is practically inoperative, and there were only eight contracts in existence at the close of the year. On the other hand the popularity of the life insurance scheme continues, and 195 new policies for the aggregate amount of R2,52,550 were issued during the year. In the 12 years since the scheme was started on the 1st February 1884, 2,452 lives have been insured, and at the close of the year under report there were 2,073 active policies in existence, 1,646 of which were held by Post Office servants and 427 by servants of the Telegraph Department. Nineteen claims amounting in all to R42,400 were paid during the year on the deaths of insurants, and the aggregate sum insured at the end of the year was R29,16,550. In the year under report, as in the preceding one, no advantage was taken by the women employed by the postal and telegraph departments of the extension of the benefits of the schemes to them. No life annuities were purchased during the year under Article 867 of the Civil Service Regulations.

Payment of Military pensioners through the Post Office.

57. The system of paying the pensions of pensioners of the Native Army through the agency of the Post Office in the Punjab continued to work satisfactorily. The total number of pensioners paid during the year was 23,485 and the amount paid to them was R16,74,896-14-8. The commission on ordinary money orders falls at the rate of about R1 per cent., and for this special class of money orders the Post Office receives payment from the Military Department at the rate of 12 annas per cent.

Section XI.—Financial Results.

58. The receipts and charges of the year, as shown in the Post Office accounts, are given in detail in Appendix X under two main heads, Postal Service Proper and Non-Postal branches, and a summary will be found in the statement below :— Receipts and expenditure according to departmental accounts.

	Receipts.		Charges.	
	1894-95.	1895-96.	1894-95.	1895-96.
	₹	₹	₹	₹
1. Postal Service Proper . .	1,59,82,170	1,67,65,772	1,20,13,543	1,24,33,085
2. Non-Postal Branches—				
(*a*) Mail cart, Parcel van, Passenger and Goods Service . . .	2,45,223	2,75,990	2,45,223	2,75,990
(*b*) Mail Steamer subsidies	...	...	6,57,504	6,20,772
(*c*) Contributions from Native States . . .	6,000	6,000	...	...
TOTAL .	1,62,33,393	1,70,47,762	1,29,16,270	1,33,29,847

Under Postal Service Proper the net receipts after deducting the amounts due to the British, Colonial and other Post Offices were ₹7,83,602 in excess of those for 1894-95, while the charges rose by about 4½ lakhs. The improvement in the receipts was due to an increase of ₹5,62,169 from the sale of ordinary postage stamps, to an increase of ₹68,355 in the revenue derived from service postage stamps, and to an increase of ₹2,52,242 in the income obtained from money order commission and postage paid in cash. There was a decrease of ₹9,002 in the miscellaneous receipts of the Department, and an increase of ₹90,162 in the payments made to the British and other Post Offices. Under the head of "Non-Postal branches" the receipts were ₹30,767 more than in the preceding year. None of the items of postal expenditure call for any special notice. Altogether the receipts exceeded the charges by ₹37,17,915.

59. In Appendix XI is given a comparative abstract of the receipts and charges of the Post Office for the year including under a distinct head (III) certain receipts and charges which find a place in the Finance and Revenue accounts but not in the Post Office accounts. The entries under this head are quoted in the margin, and if these totals be added to the total given in the preceding paragraph the entire receipts of the year amount to ₹1,71,29,619 and the entire charges to ₹1,64,33,167. There was thus a surplus of ₹6,96,452 on the year's transactions, as shown in the Finance and Revenue accounts. The charge on account of District Post establishment has, however, to be excluded, as it is entirely met by grants from District Post Funds, which with the exception of the item of ₹81,857 shown in the marginal table, are not credited to the Post Office in the Finance and Revenue accounts. The actual accounts of the year, therefore, show a surplus of ₹18,40,845. In order, however, to bring out the Financial position of the Post Office.

Receipts 1895-96.	₹	Charges 1895-96.	₹
District Post collections, including zemindary dâk receipts in Bengal.	81,857	District Post establishment including zemindary dâk in Bengal .	12,86,250
		Stores from England . . .	4,60,660
		Payments under postal arrangements with Lords of the Treasury.	6,06,000
		Exchange on charges in England .	8,10,410
TOTAL .	81,857	TOTAL .	31,03,320

complete financial results of the year in the usual way, the net balance of the items shown in the margin must be deducted from the surplus just noted and the net financial result is a surplus of R10,29,230 as compared with R6,89,526 in 1894-95 and with R4,62,385 in 1893-94. In this estimate of the financial position of the Post Office no allowance has been claimed on account of the services rendered by the Department to Government in the management of the Post Office Savings Bank and in carrying official correspondence at exceptionally low postage rates. The financial position of the Post Office of India is steadily improving every year and this constitutes a further justification for improving the pay and position of the officers of the Department, whose work and responsibility have been materially increased of late. Some of the measures that have been taken in this direction have already been referred to in this report.

	Details.	Total.

Section XII.—Notice of Post Office Officials.

Mention of special services.

60. I have much pleasure in again bringing to the special notice of Government the excellent work of Mr. K. J. Badshah as Deputy Director General. I am mainly indebted to his energy, ability and grasp of detail, for the carrying out of the principal administrative measures of the year. In a separate report to Government on the postal arrangements for the Chitral Relief Force, I have stated that the chief credit for their acknowledged success was due to the admirable organization and control of the whole arrangements by Mr. Sheridan, the Post-Master General, Punjab, but in a review of the year's work, it is right that his name should again be prominently mentioned. Mr. A Franks Ryan was specially named in the final Despatch of the General Officer Commanding the Force, as the chief postal officer with the force, and the efficient manner in which the onerous duties of the Postal Department were performed, was expressly acknowledged in Government Notification No. 998, dated the 27th September 1895. In addition to his name, I now wish to place before Government in connection with the same operations, the names of Mr. C. C. Sheridan and Rai Bahadur Salig Ram who held superintendents' charges in the field, and of Mr. Appleby, the postmaster of the base office, all of whom rendered valuable service. I also wish to bring to notice the good work of Mr. Stowell who was left in sole charge of the postal arrangements for the troops retained for the garrison of Chitral and the occupation of the lines of communication. The services of the following officers, whose names have been brought to notice by the Heads of Circles, also deserve recognition:—Mr. L. C. Byrne, superintendent of the Railway Mail Service, for his efficient management of the Madras division, the extent of which was enlarged at the beginning of the year: Mr. J. P. Barker, superintendent in the North-Western Provinces and Oudh, for valuable work in connection with carrying out the local audit of money orders in the combined provinces; Rai Bahadur Anantha Charlu, superintendent attached to the office of the Post-Master General, Madras, and Mr. Sufder Husain, superintendent of the Coconada

division, the first for special work in connection with mail arrangements, and the second for the good judgment and energy with which he dealt with serious difficulties caused by breaches in the East Coast Railway: Mr. E. K. Karanjavala, superintendent of the Kathiawar division, for successful work in dealing with a heavy charge including the supervision of the local sections of the Railway Mail Service; Rai Bahadur Daulat Ram for his efficient arrangements for carrying out a revised system of through booking of goods and parcels, and the continued success of his management of the Simla line, and Mr. W. T. Van Someren, superintendent of the Rawal Pindi division, for exceptionally good administrative work. It may be added that during the year the Post Office lost the services, by retirement or death, of several officers among whom Rai Bahadur Muddun Mohun Bysack, who retired after 35 years' service, may be specially named. His zeal and ability in the discharge of his duties as manager of the Calcutta Dead Letter Office had been specially recognized by Government.

I have the honour to be,

SIR,

Your most obedient Servant,

A. U. FANSHAWE,

Director-General of the Post Office of India.

SCHEDULE OF PRINCIPAL STEAM SERVICES (1895-96).

By the British India Steam Navigation Company.

(1) Bi-weekly direct communication between Calcutta and Rangoon.	
(2) Weekly communication between Calcutta and Rangoon *viâ* Chittagong, Akyab, Kyauk-Phyu, and Sandoway.	
(3) Weekly direct communication between Madras and Rangoon.	
(4) Weekly communication between Madras and Rangoon *viâ* the N. E. Coast ports.	
(5) Tri-weekly communication between Rangoon and Moulmein.	
(6) Weekly communication between Rangoon, Tavoy and Mergui.	Under contract with the Post Office for ten years, from 1st May 1894, on an annual subsidy of ₹5,05,500.
(7) Bi-weekly direct communication between Bombay and Karachi.	
(8) Weekly communication between Bombay and Karachi *viâ* the Coast ports.	
(9) Weekly communication between Karachi and Basrah *viâ* the Persian Gulf ports.	
(10) Daily communication (Sundays excepted) between Tuticorin and Colombo.	
(11) Additional services between any of the ports served by the above-mentioned lines, and between Burma and the Straits.	
(12) Fortnightly service from Negapatam to the Straits.	Under contract with the Post Office so long as the service is actually used, on payment of a special additional subsidy at the rate of ₹6,000 per annum.

By the Asiatic Steam Navigation Company.

(13) Six-weekly communication between Calcutta and Port Blair, with extensions to Madras and Rangoon.	The consideration is not in the form of subsidy, but of guaranteed rates for the transport of Government stores: the contract is for five years, from 1st January 1895, and is terminable after the five years by a notice of six months.

By the Irrawaddy Flotilla Company.

(14) A daily service between Mandalay and Myingyan to and fro each way (except on Saturdays).	
(15) A daily service between Myingyan and Pokôkku to and fro each way (except on Sundays).	
(16) A daily service between Prome and Thayetmyo to and fro each way (except on Sundays).	Under contract with the Local Administration originally for five years from the 1st January 1891 to the 31st December 1895, but the contract has been extended up to 31st March 1896. The subsidy is ₹9,000 per mensem, towards which the Post Office contributes ₹3,500 per mensem.
(17) A bi-weekly service between Thayetmyo and Pokôkku to and fro each way.	
(18) A weekly service between Pokôkku and Kindat to and fro each way.	
(19) A weekly express service between Mandalay and Bhamo to and fro each way.	
(20) A tri-weekly service between Thayetmyo and Minbu to and fro each way.	Under contract with the Local Administration from 1st January 1890 to the 31st March 1899 but terminable at any time by 30 days' notice from either party. Monthly subsidy ₹1,000 per mensem.
(21) A tri-weekly service between Rangoon and Bassein.	Under contract with the Local Administration from 1st January 1896, and to continue in force until six months' notice is given by either party, the subsidy being ₹1,250 per mensem, towards which the Post Office contributes ₹250.
(22) A bi-weekly service between Bassein and Henzada.	
(23) A bi-weekly service between Rangoon and Pyapon.	Under contract with the Local Administration from 1st October 1882, and to continue in force until six months' notice is given by either party. The subsidy is ₹400 per mensem.
(24) A daily service between Rangoon and Kyauktan, and Thongwa and *vice versâ*.	The service is under contract with the Post Office from 1st September 1892; period not fixed, but terminable at any time by two months' notice. Monthly subsidy is ₹125.
(25) A weekly service between Sinbo and Myitkyina, and *vice versâ*.	Under contract with the Local Administration from 1st April 1894, and to continue in force until 1st April 1896, but terminable at any time by 30 days' notice from either party. Monthly subsidy is ₹1,000.
(26) A weekly service between Bhamo and Sinbo, and *vice versâ*.	

By the Euphrates and Tigris Steam Navigation Company.

(27) Weekly communication on the River Tigris between Basrah and Bagdad.	Under contract for ten years, from the 1st May 1894, with Her Majesty's Secretary of State for India. Subsidy R1,000 per annum: steamers to run in connection with line No. 9.

By Messrs. Apcar & Co., Calcutta, and Jardine, Matheson & Co., Hong-Kong.

(28) Communication at irregular intervals between Calcutta and the Straits and Hong-Kong, the dates of departure being regulated mainly with reference to the Calcutta opium sales	No subsidy.

By the Peninsular and Oriental Steam Navigation Company.

(29) Fortnightly communication between Calcutta and Colombo, touching occasionally at Madras. (30) Fortnightly communication between Bombay and Colombo.	Non-contract lines maintained by the Company in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.

By other Agencies.

(31) By River Steam Navigation Company.—Daily communication between Jatrapur and Dibrugarh on the Brahmaputra River.	Under contract with the Post Office from the 1st May 1893 to the 1st May 1898. Annual subsidy R75,000, towards which the Bengal Government and the Assam Administration contribute R40,000.
(32) By River Steam Navigation Company.—Daily communication between Goalundo and Pambari *viâ* Serajganj.	No contract was entered into with the company, but they have been carrying the mails since the 1st March 1890. Monthly postal subsidy is R150, of which the Bengal circle contributes R50 and the Eastern Bengal circle R100.
(33) By India General Steam Navigation Company.—Daily communication between Naraingani and Silchar. (These steamers, however, only run as far as Lenchugani from 1st November to 15th May and as far as Karimganj during the month of October.)	Under contract with the Post Office for five years from 1st January 1892 on an annual subsidy of R20,000, of which the Assam Administration pays half.
(34) By India General Steam Navigation Company.—Daily communication between Barisal and Kartikpur *viâ* Madaripur.	Under contract with the Post Office, terminable at any time by one month's notice. Monthly postal subsidy R200, of which the Imperial Post Office contributes R83.
(35) By India General Steam Navigation Company. Bi-weekly communication between Calcutta and Cuttack *viâ* Chandbali.	Under contract with the Post Office from the 14th September 1887; period not fixed but terminable at any time by one calendar month's notice. Monthly postal subsidy is R300.
(39) By Messrs. Shepherd & Co.'s Steamers.—Daily communication between Bombay and Goa.	Under contract with the Local Government, from 1st October 1895 to 31st May 1896. The monthly subsidy is R3,000, towards which the Post Office contributes R900 and the Portuguese Government R200.
(37) By Bengal Central Flotilla Company.—Daily communication between Khulna and Barisal.	Under contract with the Post Office from 1st July 1894 to 30th June 1897, but terminable at any time by six months' notice. Monthly postal subsidy R350, of which the Imperial Post Office contributes R183.
(38) By Bengal Central Flotilla Company.—Four times a week between Barisal and Taktakhah.	No contract has been entered into with the Company, but they have been carrying the mails since 1st April 1892 on a monthly subsidy of R100.
(39) By Messrs. Hoare, Miller & Co.—Daily communication between Calcutta and Midnapore.	No contract was entered into with the Company, but they have been carrying the mails since December 1882. Subsidy R60 a month.
(40) By Mr. G. E. L. Dawson of Mandalay.—A tri-weekly steamer service between Buthidaung and Akyab and *vice versâ* from 1st October to 30th April in each year and during the remaining months of each year a bi-weekly service.	Under contract with the Local Administration for five years from 5th May 1891, but terminable at any time by either party giving six months' notice. Subsidy R15,000 a year.
(41) By Mr. G. E. L. Dawson of Mandalay.—A bi-weekly steam launch service between Akyab and Paletwa and *vice versâ* throughout the year.	
(42) By Messrs. Dawson and Thompson of Moulmein.—A daily steam launch service (except on Sundays) from Moulmein to Duvinzeik and *vice versâ* and a tri-weekly service from Moulmein to Shwegon and *vice versâ*.	Under contract with the Local Administration, from 1st May 1891 to 1st May 1895, on a monthly subsidy of R500, and the service continued to be used on the terms of this contract until the 31st March 1890.
(43) By Russul Bux.—A tri-weekly steam launch service from Thanatpin to Winpadaw and back from Winpadaw to Kyaikto.	Under contract with the Local Administration, from 1st August 1894 to 31st July 1897, on a monthly subsidy of R105.

Statement showing the numbers of Post Offices and Letter-Boxes (excluding those at post offices) opened, and Village Postmen entertained during the year 1895-96 and the total numbers at the end of the official years 1894-95 and 1895-96.

Note.—The figures in this Appendix show the cases in which punishment was awarded during the year, as it is only when a case is closed that it can be entered with certainty as having been committed by a Post Office servant. Besides the 299 cases shown above, there were 66 cases in which offences were apparently established against postal servants, but in which no punishment was imposed owing to the cases not being concluded or to the death or escape of the offenders.

Appendix No. IX.

Statement showing the Staff of Officers, Clerks, and other servants of the Imperial Post Office in British India on the 31st March 1895 and 1896.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting discount to vendors.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter to 1865-66, at the same rates as ordinary correspondence (letters, packets, etc.,) from that year to 1872-73, and afterwards at a low privile d letter rate of one anna for (about 4 oz.).

Column 8.—The figures in this column show the revenue undisturbed by the changes of system in respect of official correspondence mentioned in the note regarding

e Post Office Department in India from 1853-54 to 1895-96.

ant of conveyance of passengers or of any of the non-postal branches of the administration.]

Column 12.—The figures in this column show the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3, and 4. The comparison comes with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

(a) Revised so as to include letters to Gibraltar, Malta, and places east of Suez.

(b) Revised so as to show the number of articles exchanged with the United Kingdom instead of the number of postage rates.

* Including post-cards from 1879-80.

† 2,712 miles of line under this head have in 1883-83 been included in column 10.

(c) Revised so as to show the number of letters conveyed by P. and O. contract steamers to and from Europe and Egypt only.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 26th, 1896.

At the commencement of the week gradients were very steep over North Bombay and a shallow low pressure area lay off the North Konkan coast. Weather was fine and cool over the whole of Northern and Central India, and cloudy with excessive heat over the Central Provinces and the Peninsula. The rainfall was confined to the extreme south of the Peninsula and was light in amount. The depression off the Konkan coast was transmitted eastwards during the next 24 hours to Khandesh and Gujarat, where it remained stationary until the 22nd, without, however, exercising any appreciable influence on the weather. Weather was hence fine throughout India during this period. The chart of the 23rd showed that the depression although unchanged in position was slightly deeper than on the preceding two days, and that it was beginning to influence the weather. It intensified considerably during the day, and marching eastwards passed on to the southern districts of the Central Provinces. Its advance eastwards was accompanied by the formation of a secondary depression over East Rajputana. Under the influence of the double disturbance skies became heavily clouded in the Central Provinces, Central India, Bihar, and the eastern districts of the North-Western Provinces, and light but favourable showers of rain occurred in these areas on the 24th and 25th. The largest amount reported on these days was 1·20 inches at Lucknow. The secondary or Rajputana depression drifted slowly east-south-eastwards across Bundelkhand on the 25th, at the same time filling up. Weather hence cleared up in Bihar, the North-Western Provinces and Central India, and the only rainfall reported in these districts on the 26th was a light shower at Purnea. The primary or Central Provinces depression occupied almost the same position as on the 24th, but was more diffused and filled up almost entirely during the day. It, however, occasioned light showers in Berar and the Bombay Deccan during the day, the heaviest of which was 0·30 inch at Belgaum.

During the whole of this period temperature was excessive over the Central Provinces and the Peninsula and, more or less in defect in Northern India—a contrast of frequent occurrence during the cold weather.

Daily Summary.—*Sunday, 20th December.*—Pressure had given way slightly to briskly in the Punjab and had increased over the remainder of India. Pressure was in slight defect in the west coast districts and the submontane districts of the North-Western Provinces, and normal elsewhere. Gradients were unusually steep over North Bombay, and a slight low pressure area existed off the North Konkan coast. The air movement was of the ordinary cold weather type. General rain had been received in Southern India and Ceylon, and local showers of little value in Mysore and the Bombay Deccan. The principal falls were 2·02 inches at Colombo and 1·16 inches at Wellington. Fine clear and much drier weather than usual prevailed over North-West and Central India, and very low humidities were recorded at the hill stations. The lowest reported 8 A.M. humidity was 19 per cent. at Mount Abu. Skies were partially clouded in the Central Provinces, but were almost clear over the Gangetic Plain, Bengal and Burma. Temperature was below the average over Northern and Central India, due to unusually low night temperature. It was, on the other hand, in moderate to large excess over the Peninsula, chiefly due to large excess in the night temperature. The lowest night temperature recorded in India was 29°·9 at Rawalpindi.

Monday, 21st December.—The low pressure area noticed off the Konkan coast on the previous day had been transferred to Khandesh and Gujarat, where pressure had fallen very slightly. A slight fall had also occurred in Sind and Baluchistan. Over the remainder of India and Burma the barometer had continued to rise slightly to briskly. Winds exhibited an irregular cyclonic circulation in the depression area. The westerly current down the Gangetic Plain was slightly less marked than on the preceding day, and several stations in that area reported calms. Skies were clearing in the south of the Peninsula and

no rain had fallen in that area beyond light showers at Trevandrum and Tinnevelley. Moderate to heavy rain had again occurred in Ceylon.

Tuesday, 22nd December.—Pressure was stationary over India except in the Central Provinces, where it had given way slightly. The depression over Gujarat and Khandesh was unchanged, both in position and character. Winds were practically unaltered. Weather was fine over the whole of India and Burma with much cloud in the Peninsula and the Central Provinces. Light rain had fallen in Ceylon, the heaviest amount being 0·80 inch at Trincomalee. The distribution of temperature with respect to the normal was unchanged, temperature remaining excessive over the Peninsula and below the average over Northern India. Very low night temperatures were recorded at several stations in the Punjab, the more noteworthy being 29°·9 at Rawalpindi, 31° at Khushab and Umballa, and 31°·4 at Peshawar. The night temperatures at the neighbouring hill stations, on the other hand, ranged between 36° and 45°.

Wednesday, 23rd December.—The pressure changes of the previous 24 hours were generally small in amount except in Kashmir, where the barometer had fallen rapidly. The distribution of pressure was unaltered, pressure remaining highest in the North-West Punjab and lowest over the south of the Bay and Ceylon. The slight depression over Khandesh and Gujarat was better defined than on the preceding two days, and had occasioned a few drops of rain at Indore, Gadhechi and Jhansi. Humidity was increasing generally, and there was much cloud in the south of the Peninsula, Kashmir, Gujarat and Central India, and moderate cloud in the Central Provinces and the North-Western Provinces. Showers had fallen in the south of the Peninsula and in Ceylon, the principal amounts being 2·15 inches at Trincomalee and 0·95 inch at Negapatam. Temperature was stationary in the Punjab and the Peninsula, but had risen generally elsewhere.

Thursday, 24th December.—The depression in Khandesh had advanced eastwards into the southern districts of the Central Provinces and had occasioned a brisk to rapid fall of the barometer over the Central Provinces and Berar. A brisk fall of the barometer had also occurred in Rajputana and the adjacent districts of the North-Western Provinces, and a secondary depression had formed over East Rajputana. Pressure was in slight to moderate defect in the areas of depression, and more or less in excess in other parts of the country. Winds were irregularly cyclonic around the depressions, but elsewhere they blew from about normal directions. Skies were heavily clouded in the Central Provinces and Central India, and light showers (less than a tenth of an inch in amount) had fallen in these areas. Skies were clear at the majority of stations in North-Western India, but were moderately clouded in the eastern districts of the North Western Provinces and Bihar. Showers had again fallen in the south of the Peninsula. Mangalore had obtained 1·72 inches, and Colombo 1·52 inches. Temperature had fallen rapidly in Baluchistan, and was, during the previous 24 hours, 7° below the average at Quetta. The high temperature conditions over Bombay had extended northwards into the Central Provinces, and the mean temperature of the previous 24 hours was about 6° above the average in these areas.

Friday, 25th December.—Pressure had increased briskly to rapidly in North-Western India, and was stationary or had fallen in Bundelkhand, Baghelkhand and the adjacent districts of the Central Provinces. The Rajputana depression had drifted slowly east-south-eastwards, and was probably central near Nowgong. Pressure was unchanged over the Peninsula and Burma, but had risen slightly in Bengal, the North-Western Provinces and the greater part of the Central Provinces, and the depression in the Central Provinces had filled up. Fairly normal winds prevailed except over the area covered by the secondary depression, where the directions were feebly cyclonic. Thundershowers had occurred in the North-Western Provinces, Bihar, and the adjacent districts of Central India and the Central Provinces. The falls were less than a tenth of an inch in amount at the majority of stations. The largest amount was 1·20 inches at Lucknow. Hardly any rain had fallen in the Peninsula.

Saturday, 26th December.—Pressure had increased over nearly the whole of India, rapidly over the area covered by the secondary depression on the previous day, and slightly to briskly elsewhere. The depression had probably filled up. Pressure was in considerable to large excess over Northern and Central India, and in slight excess on the west and south of the Peninsula. Very steep gradients prevailed over North Bombay. In this respect the conditions over North Bombay resembled those of the 20th, when a low pressure

area existed off the Konkan coast. North-westerly winds had set in over the Gangetic Plain. The air was considerably damper in Gujarat, Central India and the Central Provinces. Skies were clearing in Bihar but were heavily clouded in the Central Provinces and Bombay Deccan, and light showers had fallen at Purnea, Belgaum, Bijapur and Amraoti. The most noteworthy feature of the weather was the excessive and increasing heat over the Central Provinces and the Peninsula. The mean temperature of the previous 24 hours was 6° above the average in the former, 4½° in the latter area.

Temperature.—The temperature conditions of the week differed considerably from the normal over the greater part of the country. The mean temperature was steadily below the average in Northern India and persistently above it in the Peninsula—an illustration of the opposition between the conditions in Extra Tropical and Tropical India, of frequent occurrence in the cold weather. The decreased temperatare in the former area was due chiefly to low night temperature, and the increased temperature in the latter area to slightly higher day temperature and much higher night temperature than usual. The following gives mean temperature variation data for the week :—

Province.	December 1896.							Mean variation of week.
	20th.	21st.	22nd.	23rd.	24th.	25th.	26th.

MEAN FOR WHOLE OF INDIA	—0·2	—0·8	—0·7	+0·8	+1·3	+0·5	+0·6	+0·2

The statement shows that the mean temperature of the whole country did not depart to any extent from the normal except on the 24th, when it was over 1° in excess.

Rain.—As already stated the weather was fine and settled over the greater part of India during the first four days of the week. Local showers occurred almost daily in the extreme south of the Peninsula during this period, but they were in almost all cases light in amount and of little value. A very slight depression covered Gujarat and Kathiawar on the 21st and 22nd, but was exercising no influence on the weather beyond giving cloud to the surrounding districts. It developed on the 23rd, and advancing eastwards passed into the southern districts of the Central Provinces on the 24th. At the same time a secondary depression formed in East Rajputana. The double disturbance occasioned favourable rain in Oudh, and light local showers in Central India, the Central Provinces, Berar, the North-Western Provinces, Chota Nagpur and Bihar on the 24th and 25th. The largest fall in these areas was 1·20 inches at Lucknow on the 25th. Both depressions filled up on the 25th, but local showers continued in Berar and the Bombay Deccan during the next 24 hours.

The accompanying rainfall statement shows that rain was received in twenty-two of the rainfall divisions, and that in thirteen of these divisions the total fall of the week was less than a tenth of an inch in amount. The divisions which obtained effective rain, *i.e.*, average fall of over a tenth of an inch were South Oudh, North Oudh, the North-Western Provinces Hills, Malabar, the Bombay Deccan, Madras (South Central), Coorg and East Coast (South). The rainfall in these divisions ranged between 0·14" and 0·46", and was slightly heavier than usual in the first six divisions.

The seasonal rainfall up to date shows some improvement in the case of Bihar and Oudh.

The more noteworthy totals were 1·60 inches at Hansot (Broach), 1·32 inches at two stations in the Unao district, 1·20 inches at Lucknow, 1·12 inches at Tasgaon (Satara), and 1 inch at Tarabganj (Gonda).

HE .I RAJ,
Offg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 31st December 1896.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd January.*—No rain on the West Coast, Circars and Deccan, except a few small showers in the eastern part of Cuddapah. Showers fell in parts of the Carnatic, North Arcot and Trichinopoly, but there was no rain in the remainder of the Central Districts. There were considerable falls in the Southern Districts. Scarcely any rain has fallen during December in the Deccan Districts to supplement a late rainfall of November, and none in the affected portion of the Circars. Water-supply in the Southern Districts and Carnatic and in most parts of the Central Districts is ample and also under Godavari and Kistna works and Kurnool and Cuddapah canals; otherwise it is scanty or bad except in wells which are scarce in the affected tracts. Sowings still continue in the southern half of the Presidency and to a small extent under irrigation elsewhere. The standing crops are withering or lost in many parts of the Circars and Deccan, and in the latter tracts crops sown with November rainfall are unlikely to mature. Harvest of the early crops is progressing with poor outturn in the Circars and Deccan, but fair elsewhere. Pasturage is very scanty in the Deccan and Circars, but ample elsewhere. Fodder supplies are generally low and in parts of Deccan cattle are already suffering, though elsewhere their condition is good. The prices of rice are easier almost throughout the Presidency and the prices of staple dry grains on which people chiefly depend are slightly cheaper generally, except in the Deccan Districts, Vizagapatam and Ganjam. The price of cholam in seers per rupee is: Kurnool 15, Bellary and Anantapur 14½, and Cuddapah 14. The food supplies of the Presidency are believed to be adequate for requirements, and large stocks are held especially by ryots in the affected districts, but trade appears inactive owing chiefly to uncertainty of the outlook in other parts of India. The numbers employed on relief works are:—Kurnool five works employing 3,538; Bellary twelve works employing 13,462; Anantapur one work employing 334; Cuddapah three works employing 2,209; total relief workers 19,543. The decrease is due to employment being available on temporary field work and to the organization of weavers' relief. The number of kitchens open and the numbers fed are as follows:—Kurnool 3, inmates 88; Bellary 10, inmates 947; Anantapur 1, inmates 26; Cuddapah 3, inmates 109. No poor-houses have been opened and no other gratuitous relief is yet given; but 852 weavers in Bellary and 4,765 in Cuddapah, total 5,617, are relieved at their handicraft. Test works were open during December in Ganjam and one was opened on the 4th current in Vizagapatam but failed to attract workers.

Bombay.—*For week ending 6th January.*—Rain fell in Kaira, Panch Mahals, Kanara and in affected districts; Khandesh 35 cents, Kolaba 4 cents, Ahmednagar 45 cents, Sholapur 27 cents, and Belgaum 21 cents. The fall was beneficial to the spring crops in Khandesh and Ahmednagar; more rain is urgently wanted for crops recently sown in Nasik, Poona, Sholapur and Dharwar. The standing crops have been damaged by locusts in one taluka of Karachi; they are withering for want of rain in Poona, Sholapur and Bijapur; and are unsatisfactory in Thana. Spring crops in Sindh, Gujarat and Kolaba promise well, and are also fairly good in Dharwar; elsewhere they are indifferent. Sowings of late crops have been completed except in the Upper Sindh Frontier, Khandesh, Ratnagiri and Kanara. The autumn harvesting is nearly finished except in Khandesh and Dharwar. Fodder is sufficient except in the Deccan, Karnatak, Shikarpur and Baroda; it is dear in Kaira. The grain-supply is generally sufficient in the affected districts. Cotton-picking continues in Ahmedabad, Broach, Surat, Kathiawar and Wadhwan, and is almost completed in Khandesh. The condition of agricultural stock is deteriorating in Poona, Sholapur, Bijapur and Dharwar. Stock are healthy elsewhere except in parts of Shikarpur, Hyderabad, Thar and Parkar, Kaira, Khandesh, Ratnagiri and Kanara. Prices are rising in parts of Surat and Ratnagiri, falling in Upper Sindh Frontier, Belgaum and parts of Broach, Surat, Ratnagiri, Poona, Sholapur; stationary in Thar and Parkar, Panch Mahals, Nasik, Bijapur, Kathiawar, and parts of Broach, Surat and Poona. The prices in seers per rupee of the staple grain upon which famine wages are based are as follows:—Dharwar 12¼, Belgaum 12, Sholapur 11, Bijapur 10½, Poona, Ahmednagar 10, Nasik 9¾, Khandesh 9½, Satara 9¼, Kolaba 9. The number of relief works open in the

affected districts is: Sholapur 21, Ahmednagar 15, Bijapur 15, Nasik 10, Khandesh 9, Poona 5, Satara 5. The number of test works is:—Belgaum 8, Khandesh 8, Nasik 8, under Local Boards; Bijapur 4, under Local Boards and Municipalities. No poor-houses have yet been opened: one kitchen is open in Satara. The numbers employed on relief works are:—Sholapur 40,257, Ahmednagar 27,547, Bijapur 44,542, Nasik 14,553, Khandesh 6,827, Poona 13,064, Satara 9,042, Belgaum 1,999. Non-working children:—Sholapur 19,133, Ahmednagar 11,008, Bijapur 14,100, Nasik 7,318, Khandesh 2,933, Poona 6,865, Satara 2,574, Belgaum, 680. On gratuitous relief:—Sholapur 1,722, Bijapur 2,274, Poona, 2,811, Ahmednagar 4, Satara 1, Belgaum 103, Nasik 2. The test works opened in Dharwar have been closed again owing to absence of demand for employment.

Bengal.—*For week ending 4th January.*—There has been slight rain in the districts of the Patna, Bhagalpur, Chota Nagpur, and Rajshahi Divisions. There was no rainfall that could be registered in the other Divisions, except a slight shower (·15 inch) at Jangipur in Murshidabad. The rain has been of great benefit to the *rabi* and poppy crops in Bihar and Chota Nagpur, but in Bengal Proper (except in the north of the Rajshahi Division) and in Orissa the *rabi* crops (and also the sugarcane) are withering for the want of it. In spite of the rain, the prices of food-grains continue to rise in the distressed districts of North Bihar as well as in the Patna district. The winter rice harvest is still proceeding, and has been completed in some districts, but prices have only fallen in a very few districts, and there very slightly. Cattle-disease is reported from a few districts only. A scarcity of water is reported from Pabna, parts of Nadia and Bankura. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 10 seers, Khulna (common rice) 9½ seers, Patna (common rice) 10½ seers, Shahabad (not reported), Saran (maize) 10½ seers, Champaran (maize) 10½ seers, Muzaffarpur (maize) 10½ seers, Darbhanga (common rice) 8½ seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, 2nd January 1897, are shown in the following statement:—

Numbers on relief works and in receipt of gratuitous relief.	Number of relief works	Number of test works.	Number of poor-houses.	Number of kitchens.	Reported adequacy or inadequacy of food-stocks.
1	2	3	4	5	6
RELIEF WORKS					
Nadia (31st December) 2,385	2 open	1 open and 2 more are being opened.	...	...	Inadequate.
Khulna (ditto) 111	...	2 open (2 first opened and then closed).	...	...	Adequate.
Patna 311 (men 169, women 70, children 60).	...	4 open (2 first opened, then closed).	...	...	Adequate.
Shahabad 1,145 (men 453, women 482, children 210).	1 open (1 first opened, then closed).	...	...	...	Adequate for the present.
Saran 3,655 (men 979, women 1,473, children 1,203).	17 open	*Nil*	4	*Nil*	Sufficient.
Champaran 48,684 (men 19,896, women 16,746, children 12,042).	...	...	...	...	...
Muzaffarpur 2,358 (men 1,417, women 504, children 437).	7 open	...	1 sanctioned	No kitchens yet required.	Sufficient so far.
Darbhanga 19,168 (men 11,112, women 5,762, children 2,294).	23 open	*Nil*	1	*Nil*	Adequate to date.
Total for the whole province. 77,817, against 52,135 in the previous week.					
GRATUITOUS RELIEF—					
Saran 1,770 (men 420, women 1,104, children 246).					
Champaran 2,424 (men 521, women 1,172, children 731).					
Darbhanga 9,399 (men 2,212, women 4,775, children 2,412).					
Total for the whole province. 13,593 against 7,439 in the previous week.					

North-Western Provinces and Oudh.—*For week ending 2nd January.*—More rain has fallen throughout the Province, but few districts have recorded much more than half an inch. In portions of the Almora and Dehra Dun districts the rainfall exceeded two inches. The rain has greatly benefited the crops which are generally reported to be doing well. Cane-pressing is in active progress in most districts. The *arhar* crop has been somewhat damaged by frost in portions of a few districts. The numbers in receipt of relief on Saturday, the 2nd January 1897, in twelve districts officially recognized as distressed, were as follows:—Banda 98,112, Cawnpore 18,462, Hamirpur 24,888, Allahabad 94,914, Jhansi 16,520, Jalaun 26,731, Jaunpur 19,333, Lucknow 26,430, Unao 10,367, Rae Bareli 29,849, Sitapur 21,314, Hardoi 38,924, total 425,844. This total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—Employed on relief works 279,428, relieved as dependants 77,645, relieved in poor-houses 29,227, relieved under other provisions of the Code 39,544, total 425,844. The numbers relieved in 24 districts, which are under observation but are not yet officially recognised as distressed, were on the same date as follows:—Relieved on test works 53,165, relieved in poor-houses 15,121, relieved under other provisions of the Code 2,749, total 71,035. The grand total in receipt of relief on the last day of the week was therefore 496,879. Supplies are generally sufficient. Fodder is somewhat scarce in places. Prices are still high but show a tendency to fall in a few districts. The prices of staple food-grains in seers per rupee on which the famine wages are based are as follows in the districts officially recognised as distressed:—Hamirpur, Lucknow, Unao and Sitapur 10, Jhansi and Jalaun 9⅝, Cawnpore 10¼, Allahabad 9¾, Hardoi 9¼, and Rae Bareli 10¼.

Punjab.—*For week ending 5th January 1897.*—Rain has fallen in Jullundur and parts of Umballa, Ferozepore, Mooltan, Rawalpindi, Dera Ismail Khan, Gurgaon, Kurnal, and Gujranwala. The fall though beneficial has been scanty, in no case amounting to an inch, and in only two cases exceeding half an inch. Prices are rising in Shahpur, slightly falling in Rohtak, and high elsewhere but stationary. Prices are high in Hisssar; wheat 8, bulrush millet 9, gram 9½, great millet 10¼ seers per rupee. Pending the anticipated winter rains wheat is selling from 7½ to 9½ seers, bulrush millet 9 to 10, gram 8 to 10, maize 9½ to 1 ½ and great millet 10 to 11 seers per rupee. Harvesting of autumn crops is nearly completed; cotton-picking and sugarcane-pressing continue; sowings of spring crops on irrigated lands are still going on in some districts. The recent rains have been too slight to allow of any considerable spring sowings, and the sowing season has now practically passed away. The condition and prospects of the standing spring crops are generally fair to average on irrigated and poor on unirrigated lands. Recent rain has benefited the crops in Umballa and Ferozepore. In Hissar the spring crops have not been sown on dry land for want of rain; the sowing season has passed; the recent rain has benefited canal crops; the water-supply in canal is deficient; prospects not encouraging; grain and fodder stock are exhausted; the grain supply being imported from Sind. More rain is wanted throughout the Province. The stock of food-grain is insufficient in parts of Jullundur and with the cultivators of Amritsar and Gujranwala. The young wheat was in places injured by the severe night frost, but the effects of this have been removed by the slight showers. The sugarcane crop is also reported to have been injured by frost in Amritsar and Sialkot Cattle are generally in poor condition in all districts except Delhi, where they are in fair condition. The well cattle are feeling severely the strain of incessant work. Fodder is insufficient or scarce in all districts except Umballa, Peshawar and Rohtak, where it is reported to be sufficient for present needs. The average daily numbers employed on relief works are:—Umballa 1,167, Ferozepore 2,833, Mooltan 107, Karnal 2,950, and Gujrat 30,518, including 8,027 non-working children. Hissar reports 11,043 and 1,96 non-working children. The numbers on test works are:—Delhi 152, Sialkot 284, Lahore 600, Rawalpindi 226, Rohtak 819, Gujranwala 297, and Ludhiana 116. The number on test works is still very small and shows no tendency to increase appreciably. Prices of the staple grain on which famine wages is reckoned are:—Delhi (bulrush millet) 8¾ seers, Umballa (maize) 10 seers, Ferozepore (wheat and flour of maize) 9 seers,

Mooltan (wheat, second quality) 9 seers, Rohtak (gram) 10 seers, Karnal (maize and gram) 8½ to 9½ seers, Gujrat (wheat flour) 7½ seers, and Ludhiana (maize) 11 seers per rupee.

Central Provinces.—*For week ending 6th January.*—The weather was cloudy in the early part of the week with good rain in the Northern and Eastern districts and lighter showers in the Nagpur country Saugor and Narsinghpur report one inch, Hoshangabad, Damoh, Sambalpur and Raipur over an half inch. Hail storms have visited parts of Nagpur, Narsinghpur and Saugor, but the areas affected are small. The prospects of the spring crops especially those sown late have been improved by the rain. This condition is now generally favourable but some damage has been caused by the clouds to crops in flower such as linseed and tur (*Cajanus indicus*) Caterpillars and other insects have got into the gram and peas. Clear weather has now supervened and with cold nights the insects should die off. Rust has disappeared in Nimar The cattle are generally in good condition. Fodder is sufficient except in Hoshangabad and the Bargarh tahsil of Sambalpur. Hoshangabad now reports material benefit to spring crops from recent rain, and prices are falling. Much damage has been caused by hail in the Sehora Tahsil of Jubbulpore. Caterpillars are ravaging the pulse crops of Chhindwara. The numbers employed on relief works are:—Saugor, four works employing 24,509 persons; Damoh, eleven works employing 11,057; Jubbulpore, five works employing 30,300; Mandla, four works employing 12,512; Seoni, 6,107; Narsinghpore, 7,333; Hoshangabad, six works employing 21,256; Nimar, one work employing 558; Betul, two works employing 2,935; Chhindwara, five works employing 3,000; Nagpur, four works empolying 3,288; Bandara, five works employing 7 109; Balaghat, seven works employing 7,500; Raipur, three works employing 8,550; total fifty-six works, employing 146,881 relief workers. The numbers of test works are:—Hoshangabad 2; Nimar 1; Wardha 1, employing 227 persons; Chanda 1, employing 640 persons. When the number of persons on test works is not separately given, they are included in those shown as on relief works. No test works have been closed from absence of demand for employment. The number of poor-houses and their inmates is:—Saugor five with 3,110 inmates; Damoh four with 1,315; Jubbalpore three with 5,777; Mandla two with 221; Hoshangabad two with 2,558; Chhindwara two with 358; Wardha one with 23; Nagpore two with 920; Bhandara three with 524; Balaghat three with 500; Raipore five with 2,109; Bilaspur four with 700. The number of dependants fed gratuitously is:—Seoni 489, Nimar 295, Narsingpur 1,397. Total number of poor-houses 36, with 20,308 relieved. No kitchens have been opened. The following numbers have also been employed on railway and other ordinary works in four districts, namely:—Saugor 12,360, Damoh 9,167, Nimar 1,800, Jubbalpore 6,500, total 29,027. The number of relief centres open is:—Saugor 8, Jubbalpore 13, Mandla 17. The prices of the staple grain on which famine wages are based are:—Nagpur, Chanda, 15; Chhindwara 13½; Wardha 12½; Bilaspur 11½; Nimar 11; Hoshangabad 10½; Jubbalpore, Seoni, Narsingpore, Betul, Bhandara, Raipur 10; Saugor, Mandla 9; Damoh, Balaghat, 8½ seers per rupee. No complaint has as yet been received of the inadequacy of food supplies except in Balaghat and the remoter portions of the Chhindwara jagirs. Stocks appear generally sufficient for serveral months in most districts, but there is a considerable import into Saugor and Jubbalpore and thence to Damoh. Near Tumsar in the Bhandara district there are 4,000 persons on relief works, but local supplies have hitherto been sufficient without imports from outside. In Nagpur and Chanda the fall of the price of jowar from 11 seers on the 15th November to 15 seers per rupee since the new crops came in is a satisfactory sign. The cold weather jowar, which has been largely sown in Bhandara, Chanda and Nagpur, and is at present doing remarkably well, should afford cheap food to the poorer classes in the south of the provinces. In many other districts if present prospects are realized, the spring crops should adequately replenish the food-supply. Exports of rice are still fairly extensive, but wheat exports have contracted considerably since October.

Burma.—*For week ending 2nd Janaury.*—LOWER BURMA: The Akyab crop is now estimated at 13 annas. Reaping has been completed in Prome and

is progressing elsewhere. UPPER BURMA: Standing miscellaneous crops in Mandalay are withering for want of rain; island crops are generally in fair condition. Reaping of wet weather paddy and cultivation of dry weather crops continue. The price of paddy has decreased largely in Amherst and Mandalay; considerably in Bassein and Tavoy; slightly in Henzada and Pakokku; elsewhere stationary. The only relief work is the Meiktila-Myingyan railway, containing 4 sections, 2 in Myingyan and 2 in Meiktila. The daily average numbers on works are: Meiktila 14,691, Myingyan 10,036. The numbers on gratuitous relief are: Meiktila 2,447, Myingyan 2,643, Yamethin 317. No test works are now open in any district; there are no poor-houses or kitchens; there is no district in which works have been opened and closed again on account of absence of demand for employment. The arrangements for relief are adequate, and food supplies are ample. The price of rice has fallen owing to the new crop coming in. In the 3 southern townships of Myingyan foddera nd water for cattle are very scarce. Reports from Meiktila and Myingyan not received.

Assam.—*For week ending 5th January.*—The weather is seasonable. Reaping of late rice is nearly finished. Outturn of late rice is average in the Surma Valley, good in Upper and poor in Lower Brahmaputra Valley. Prices:—common rice—Silchar 8, Sylhet 10½, Gauhati 10, Tezpur 10, Sibsagar 8½ seers per rupee. Scarcity of fodder is reported from Cachar and the Khasi Hills. The water-supply is sufficient except in Cachar.

Mysore and Coorg.—*For week ending 6th January.*—MYSORE: The standing crops are in good condition. Harvesting of ragi (*Eleusine coracana*) and paddy continues. Prices have slightly risen in Tumkur and Chitaldroog, but have fallen in Kolar.

COORG: Harvesting of rice and picking of coffee continue. Prices of food-grains remain stationary. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 6th January.*—BERAR: Weather cool and cloudy. Rain has fallen during the week and is reported to have benefited the winter crops in the Buldana and Ellichpur districts. Cotton-picking and cutting of jowar (*Sorghum vulgare*) continue. The wheat crop in most places is in poor condition owing to insufficient moisture. Scarcity of fodder and water prevails in all districts except Basim and Ellichpur. There has been no material change in the high prices for food-grains. Relief works appear likely to be necessary by the end of the current month.

HYDERABAD.—Rainfall during the week ended 2nd January was ·46 cents. Agricultural prospects in the Aurangabad Division have improved slightly. The spring crop is in good condition, but more rain is required in the Gulburga Division. Scarcity of fodder exists. Water-supply is decreasing. Prices:—Wheat 7½, coarse rice 7, white jowari 8¼, yellow jowari 12½, gram 9, and tur 11 seers per current sicca rupee.

Central India.—*For week ending 6th January.*—36 cents of rain fell in Bundelkhand during the week. Agricultural operations have been completed in one district of Bundelkhand and are in progress in other agencies. The spring crops are good in Malwa, fair in Bhopal and in parts of Bundelkhand, below average in Gwalior, and indifferent in Baghelkhand. Agricultural stock and pasturage are good in Malwa and in parts of Gwalior, fair in Bhopal, but indifferent elsewhere. Prices are high in Bundelkhand, Baghelkhand and Malwa, rising in one and falling in four districts of Gwalior, steady elsewhere. Opium is in fairly good condition. The numbers employed on famine relief works were 14,055 in Gwalior, 3,978 in Bundelkhand, and 9,122 in Baghelkhand; on gratuitous relief 1,789 in Bundelkhand and 1,932 in Baghelkhand. The prices in seers per rupee of the staple food-grain on which famine wages are based are 10 to 10½ in Gwalior, 9¾ in Baghelkhand, not reported from Bundelkhand.

Rajputana.—*For week ending 6th January.*—Rainfall above 1 inch in Pertabgarh; above ½ inch in Deoli, Bundi, Tonk, Bhurtpore and Ulwar; slight in Marwar, Meywar, Kotah, Ajmere, Kishengarh, Kerowli, Dholepur. Sowing of

the spring crops is in progress in Meywar and has been completed in Jaisulmere. Agricultural operations are satisfactory, except in Dholepur. The standing crops are poor in Dholepur, good elsewhere. Prospects of harvest are below average in Haraoti, good in Jeypur, fair in Bhurtpur. Agricultural stock are generally in good condition. Pasturage or fodder is generally sufficient, but scarce in places in Meywar, Tonk, and in some districts of Jeypur, and failing in Dholepur and Bhurtpur. Prices are rising in Pertabgarh, falling in Meywar, Jhallawar, Kotah, Jeypur, Bikanir, are high in Haraoti, and steady elsewhere. The numbers on relief works are Marwar 5,446, Kotah 1,039, Dholepur5, 284, Bhurtpur 10,830, Bikanir 12,554, Jaisulmere 245 ; on gratuitous relief: Marwar 1,037, Bhurtpur 99, Bikanir 1,715, Jaisulmere 5. The prices in seers per rupee of the staple food-grain on which famine wages are based are: Marwar 8 to 7, Kotah 14½, Dholepur 11¼, Bhurtpur 9 to 5, Bikanir 8½ to 8¼, Jaisulmere 8¾ seers per rupee.

Kashmir.—KASHMIR VALLEY.—*For week ending 5th January.*—Snow during week. Prices continue below normal ; 24 seers per rupee.

JAMMU PROVINCE.—*For week ending 7th January.*—Sufficient rain has fallen in Udhampore and Bhimber; slight in Jammu and Jasrota. Prices stationary. Relief works are in progress, and 547 persons were employed. The price of the cheapest staple food-grain is 10 seers per rupee.

Nepal.—*For week ending 2nd January.*—Rain 0·54. Weather cold, cloudy, and showery. The prospects of the crops are good. Price of common rice 8 seers, better sort 7 seers per rupee.

SANITARY.

The 12th January, 1897.

No. 24.—The following rules for quarantine against plague which have been made by the Government of Bengal in exercise of the power conferred by section 1, Act I, of 1870, with in Council, are published for general information.

The rules have effect from the 6th January, 1897, as a temporary measure, at the Port of Calcutta:—

I.—The Commander of every vessel, including buggalows or other native craft arriving from Karachi, shall on arrival at the Sandheads hoist a yellow flag, and indicate by signal the port from which she has come, and shall keep such flag and signal flying until permitted to take it down as hereinafter provided. The pilot on going alongside a vessel from Karachi shall direct the flag prescribed above to be hoisted if it has not already been done.

II.—The Commander shall not, without first having obtained permission as hereinafter provided, allow any communication except orally with

boat, excepting only with the boat supplying the Pilots* from the Pilot Brig, and in that case communication shall be limited to receiving on board the Pilot, his Leadsman, servant and baggage.

* *N.B.*—Pilotage is compulsory for all vessels over 100 tons in the Port of Calcutta.

III.—If there is any case of sickness on board, and the Pilot has reason to believe that it is plague, he shall telegraph to the Port Officer from Saugor, and not proceed beyond Diamond Harbour without the permission of the Port Officer.

IV.—If the Pilot has no reason to believe that there is any one suffering from plague on board, he shall bring the vessel up the river to Mateeabrooj, and shall anchor it there till the Health Officer has visited it.

V.—The Health Officer, as soon as he has received information of the arrival of the vessel at Mateeabrooj, shall visit it, and ascertain by enquiry from the Commander or the Medical Officer on board, or other sources of information, whether any person on board is suffering or has suffered from plague.

VI.—If the Health Officer is satisfied that no one is suffering from plague, or has suffered from plague since the vessel left Karachi, and if the vessel has been allowed pratique at any intermediate port including Colombo, he shall allow the passengers to land, but shall detain the vessel at Mateeabrooj till such measures have been taken for the disinfection of the mails and cargo and hold as he may consider necessary.

VII.—When he is satisfied that the necessary measures have been taken for the disinfection of the mails, cargo and hold, he shall allow the mails and cargo to be landed and shall by writing under his hand, to be delivered to the Commander, permit such vessel to haul down the yellow flag, and to proceed upwards in the Port, and to hold free communication with the shore and with vessels and boats in Port.

VIII.—If the vessel has not been allowed pratique at Colombo or other intermediate ports, or if through her not carrying a qualified Medical Officer, or for other reasons, the Health Officer is not satisfied that no one on board has suffered during the voyage from plague, he shall direct the Commander to take the vessel to the quarantine anchorage at Mateeabrooj or elsewhere duly appointed by the Port Officer, there to remain for a period of eight days from the date of arrival in harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels or boats in the harbour.

IX.—If the Health Officer, as the result of the enquiry made under paragraph V above, shall have reason to believe, at the time when the vessel arrives in the harbour, that any person on board is suffering from plague, or if during the time the ship is in quarantine at Mateeabrooj under Rule VIII, any case of the disease breaks out, he shall direct the Commander to take the vessel to the quarantine anchorage at Diamond Harbour or elsewhere duly appointed by the Port Officer, there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days, intercourse between the vessel detained under this Rule, or Rule III, and the shore or other vessels or boats in the harbour, shall be prohibited as provided in Rule II.

X.—If during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule IX.

XI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Port Officer as places of quarantine, there to remain for a period of eight days if under Rule VIII, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

XII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

The 14th January, 1897.

No. 28.—The following rules for quarantine against plague which have been made by the Chief Commissioner of Burma in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 1st January, 1897, as a temporary measure, in the port of Rangoon :—

I.—The Commander of every vessel, including junks or other native craft arriving from Karachi, shall, on arrival at the pilot brig, hoist a yellow flag and indicate by signal the port from which she has come.

II.—Such Commander shall not, except as hereinafter provided, allow any communication either with the shore or with any other vessel or boat except with the boat supplying a pilot from the pilot brig, and in that case communication shall be limited to receiving on board the pilot, his servant, if any, and baggage.

III.—The Pilot shall not take such vessel higher than Elephant Point, but shall anchor it there until the Health Officer of the Port has visited it and ascertained by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague. If the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, the Health Officer *may*, by writing under his hand to be delivered to the Commander, permit such vessel to haul down the yellow flag and proceed upwards in the port and hold free communication with the shore and with vessels and boats in port. Provided that, if the vessel has undergone since leaving Karachi a quarantine, which is properly proved, for not less than eight days at Colombo, or some other British port, the Health Officer *shall* grant such permission as aforesaid.

If the vessel has not undergone eight days' quarantine at Colombo or some other British port since leaving Karachi, the Health Officer *may* direct the Commander to take the vessel to the quarantine anchorage and there to remain for a period of eight days from the date of arrival in the harbour. In such case the Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for between such vessel and the shore, or other vessels and boats in the harbour.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Chief Commissioner as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Conservator of the Port to facilitate the conveyance to all vessels in quarantine or such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Rangoon, which may have communicated with any vessel coming from Karachi, shall be subjected to the same quarantine as vessels arriving at Rangoon from Karachi unless the communication was held after the vessel from Karachi was released from quarantine.

No. 29.—The following telegram dated 8th January 1897, from the British Ambassador, Constantinople, is published for general information :—

"No. 1 Commercial. Fifteen days' quarantine with rigorous disinfection imposed on all pilgrim ships coming from India including Karachi. Should a case of plague occur on voyage or at Lazaret the ships either return or undergo twenty days' quarantine from the date of the last case. Property of persons dying of the plague and all suspected objects will be burnt."

The 15th January, 1897.

No. 33.—The following rules for quarantine against plague which have been made by the Government of Madras in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 6th January 1897, as a temporary measure, at the Port of Madras :—

I.—The Commander of every vessel arriving from Karachi shall, before entering the port, indicate his arrival by signal.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the port.

III.—Immediately on any such arrival being signalled, the Health (or other Medical) Officer of the port shall go alongside the vessel and ascertain by inquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague. If there is no case of plague on board pratique may be granted at the discretion of the Health Officer whether the vessel carries a qualified Medical Officer or not. Pratique granted at Colombo will be recognised.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the port that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage, and there to remain for a period of fifteen days from the day of arrival in the port; and shall further direct that, during such fifteen days, intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited.

V.—If, during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in rule IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected as places of quarantine, there to remain for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores or other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

IX.—All vessels arriving at the port which may have communicated with infected vessels coming from Karachi shall be subjected to the same quarantine as vessels arriving from Karachi with plague on board.

POLICE.

The 13th January, 1897.

No. 36.—The services of the undermentioned officers are placed at the disposal of the Chief Commissioner of Burma for employment in the Burma Military Police :—

No. 31 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

Calcutta, the 9th January, 1897.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules therewith promulgated, for all open lines of railway in British India administered by the Government.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Consulting Engineer to the Government of India for Railways Calcutta, No. 4956, dated the 22nd December 1896, forwarding letter from the Agent of the East Indian Railway Company, No. 67 S. B., dated the 16th December 1896.

OBSERVATIONS.—The Agent of the East Indian Railway Company has applied that the General Rules for working open lines of railway in British

India, which were published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the South Behar railway.

RESOLUTION.—The Governor General in Council is pleased to sanction the application to the South Behar railway, from such date as the said railway may be opened for the public carriage of passengers, animals, or goods, of the General Rules which may, for the time being, be in force on the East Indian railway.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 14th January 1897.

NOTIFICATIONS.

No. 152 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 9th January 1897:—

No. 5 of 1897.—Thomas Miller, assistant to Messrs. Geo. Henderson and Co., 100, Clive Street, Calcutta, for developing photographic negatives without the aid of a dark room.

No. 6 of 1897.—Gavin Sibbald Jones, civil engineer, of Cawnpore, North-Western Provinces, for an improved sugarcane crushing mill.

No. 7 of 1897.—The Anglo-French Motor Carriage Company, Limited, of Digbeth, Birmingham, for improvements in self-propelling vehicles.

No. 8 of 1897.—Henry W. Henneberg, mechanic, of 485, Wells Street, Chicago, state of Illinois, United States of America, for improvements in velocipedes.

No. 9 of 1897.—Edward Lennon Cantwell, consulting engineer and patent agent, of 5, Old Post Office Street, Calcutta, for improved sugar evaporating and concentrating pots and pans, and improved evaporating appliances.

No. 10 of 1897.—James Mark Barr and Charles Edmund Stanley Phillips, electrical engineers, both of Castle house, Shooters hill, in the county of Kent, for an improvement in telegraph cables and their connections.

No. 153 P.—An application for an extension of the term of exclusive privilege in respect of the undermentioned invention has been filed under the provisions of the Inventions and Designs Act of 1888 in the office of the Secretary appointed under that Act:—

No. 174 of 1883.—George Francis Horbury, engineer, A. M. I. C. E., Bombay, for an improved privy for the use of natives.

No. 154 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 363 of 1895.—Joseph Lindsay, engineer, of Blackness foundry, Dundee, for improvements in baling presses. (Specification filed 5th January 1897.)

No. 47 of 1896.—Hari Anandrao Kulkarni, Vatandor, Chandanpuri, Bombay presidency, for an improved warping mill. (Specification filed 16th November 1896.)

No. 125 of 1896.—Messrs. Shanks & Co., as assigns of John Shanks, sanitary engineer, of Tubal Works, Barrhead, in the county of Renfrew, for improvements in water closets and urinals. (Specification filed 5th January 1897.)

No. 158 of 1896.—Thomas Henry Bradbury, mechanical engineer, of Johannesberg, in the district of Heidelberg, in the South African Republic, for a new or improved method or process for sharpening rock drills, and apparatus employed therein. (Specification filed 5th January 1897.)

No. 194 of 1896.—John Fraser, miner, of Malua street, Brighton, in the colony of Victoria, for improvements in and connected with fuse lighters. (Specification filed 5th January 1897.)

No. 281 of 1896.—James Thompson, mechanical engineer, Morarji Goculdas mills, of Parel, Bombay, and Vishnu Vamana Sahoni, mechanical engineer, of Zaubas Wadi, Thakordwar, Girgaum, Bombay, for improvements in humidifiers. (Specification filed 31st December 1896.)

No. 319 of 1896.—Albert Tudor Rogers, at present an apprentice in the Seebpore Engineering College, Howrah, for automatically locking, protecting, and proclaiming the state of railway points to the station officers—the invention to be called "Rogers combined safety swivel points locker and protector." (Specification filed 31st December 1896.)

No. 155 P.—THE undermentioned design has been registered, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, and the Chief Commissioner of Burma. This and other designs are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 1D. of 1897.—Isaac Benjamin, proprietor, the Bombay Art Furnishing Establishment, Gowalia Tank road, Bombay, for a centrement consisting of an hexagonal cabinet having three seats and three jardinières.

No. 156 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 129 of 1888.—Sandford James Kilby, late Superintendent of the customs preventive service and salt department, Calcutta, for improved means for facilitating the hoisting, weighing and discharging of salt, coal, metals, grain or any other articles. (From 9th January 1897 to 9th January 1898.)

No. 114 of 1889.—Sydney Lawrence, ophthalmic optician, of 4, Hare street, Calcutta, for an optician's apparatus for testing defective vision with accuracy by day or by night. (From 29th November 1896 to 29th November 1897.)

No. 263 of 1892.—Levi Judson Odell, manufacturer, of Chicago, in the county of Cook and state of Illinois, United States of America, for improvements in type-writing machines. (From 6th January 1897 to 6th January 1898.)

No. 282 of 1892.—Felix Bernhard Fremercy, civil engineer, of Galveston, in the county of Galveston, and state of Texas, United States of America, for improvements in machinery for decorticating jute, ramie, and other fibrous plants. (From 17th January 1897 to 17th January 1898.)

No. 3 of 1893.—The Pneumatic Tyre and Booths Cycle Agency, Limited, of Dublin, for improvements in rubber tyres, and metal rims or felloes of wheels for cycles and other light vehicles. (From 21st February 1897 to 21st February 1898.)

No. 157 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorizing others so to do has ceased :—

No. 195 of 1892.—Thomas Toussaint Watson's invention for an improved method of arranging and suspending punkahs, whereby a rocking motion is imparted to punkahs in addition to the ordinary pendulum swing. (Specification filed 7th October 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for the said invention.

No. 140 of 1891.—Edward Seitz's invention for an improved centrifugal pump. (Specification filed 8th October 1891.)

Fee in respect of the continuance of an exclusive privilege—

(*b*) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of ₹50 for the said invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

N.B.—(1) All Sundays in the year 1897.

(2) For English and Vernacular Offices, where there are no arrears of work, the last Saturday in every month.

(3) The last day of every month will be observed as a holiday in the Treasury Office, Ajmere, instead of last Saturday.

(4) Muhammadan holidays depend on the moon being visible and fall on the day following such event.

(5) Local holidays may be granted for great festivals or fairs at the discretion of the Commissioner when there are no arrears of work.

(6) The Civil Court Vacation commences on 1st of August and ends on the 30th September, 1897. No fresh suits shall, during that time, be instituted unless they be of an urgent character, but the Courts will be open for the purposes of clearing up cases instituted before 15th July, and for disposal of any urgent work.

No. 8—65.—Under Section 25 of the Negotiable Instruments Act XXVI of 1881, the Chief Commissioner is pleased to declare the following days to be public holidays during the year 1897 :—

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ „ R 9, „ R9-8.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০
½ আধ „ „ ৯৲ „ ৯৲০
¼ সিকি „ „ ৪৲৮ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিনকোনী-ডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার সার্টিফিকেট দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.
Drawing Instruments (electrum) are available at the College Book Depôt at R62 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I*

Section	I.	Building Materials	(1895),	R2-0.
„	II.	Masonry	(1891),	R1-4.
„	III.	Carpentry	(1889),	R1-4.
„	IV.	Earthwork	(1892),	R1-4.
„	V.	Tools and Plant (never published).		

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-4.
„	VII.	Bridges	(in the Press).	
„	VIII.	Roads	(in the Press).	
„	IX.	Railways	(1891),	R1-4.
„	X.	Irrigation Works	(1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8.
„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII. Drawing (by Lieut. R. Pulford, R.E.).† R8.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4a.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth and bound (in the Press). R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. R1-4.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs. By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12a.

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E. R2-4.

Graphic Hydraulic Diagram for Channels in earth, etc. By R. G. Kennedy, Esq, Executive Engineer. R7-8

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time). 4a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (In the Press).

Cape's Geometry. R1-4.

,, **Mechanics.** R1.

Military Topography. 8a.

HINDUSTANI.

Elements of Hindustani Grammar (In the Press).

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnasak*), Hindi, Parts I and II, each part 4a.

Short Account of Ganges Canal (English and Urdu) 8a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small. Each R1-4.

Surveying Field-Books (ruled). R1.

Levelling Field-Books (English Pattern). R1-8.
,, ,, (Canal ,,). R1-8
,, ,, (College ,,). R2-0.

P. W. D. Note-Book. R1-4.
,, **Measurement Book.** R1-4.

Circular Card-board Protractors, 12 inches (exclusive of packing). R1-0.

MISCELLANEOUS.

Distributary Velocity and Discharge Table. By Capt. Alan Cunningham. 6a.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophoia of India.") R1-8.

Ditto ditto in Urdu. R1-4.

British Burma, 19 Plans,
Central Provinces,

each 8a.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly Nos. 1 to 5), bound R2, original price R15.

Quarterly Nos. 1, 2, 3, 4, and 5, at R1 each, original price R4 each.

Vol. II, Quarterly Nos. 6 and 7, at R1 each.
,, III, ,, No. 13, R1.
,, V, ,, Nos. 18, 19, 20, and 21, R1 each.
,, VI, ,, Nos. 22, 23, 24, and 25, R1 each.
,, VII, ,, Nos. 26, 27, 28, and 29, R1 each.

Extra No., April 1870, R1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each

Quarterly Number 41A of Vol. X, at R1 each

Cloth covers for Volumes 1st and 2nd Series, at As. 8 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each.

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a. each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

* These include Question Papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . ₹22-8

	Without postage.			With postage.		
	₹	a.	p.	₹	a.	p.
for the Calcutta Series	10	0	0	12	8	0
,, each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
,, a part of the Calcutta Series purchased separately, *inclusive of postage in India*	..			2	0	0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	₹	a.	p.	₹	a.	p.
for the Calcutta Series; per copy . .	0	8	9	0	10	3
,, each of the Madras, Bombay, and Allahabad Series; per copy . . .	0	5	3	0	5	9
,, the Calcutta Series. For the year .	7	2	6	8	6	3
,, each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Reports should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	₹ 20	₹ 14	₹ 9
,, three issues . . .	,, 55	,, 30	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,,120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.			With postage.		
	₹	a.	p.	₹	a.	p.
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies, ₹2 per copy.						
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, ₹22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 14th January, 1897, and is hereby promulgated for general information :—

ACT NO. I OF 1897.

An Act to amend Act XXXVII of 1850 (for regulating Inquiries into the behaviour of Public Servants).

WHEREAS it is expedient to amend Act XXXVII of 1850 (*for regulating Inquiries into the behaviour of Public Servants*); it is hereby enacted as follows :—

Title of Act XXXVII, 1850.

1. The said Act XXXVII of 1850 may be called the Public Servants (Inquiries) Act, 1850.

Amendment of preamble to Act XXXVII, 1850.

2. In the preamble to the said Act, after the word "removable" the words "from their appointments" shall be inserted, and for the words "the East India Company" the word "India" shall be substituted.

Amendment of section 2, Act XXXVII, 1850.

3. In section 2 of the said Act, for the words "the East India Company, not removable from his office without the sanction of the same Government," the words "the Government, not removable from his appointment without the sanction of the Government," shall be substituted.

Substitution of new section for section 23, Act XXXVII, 1850.

4. For section 23 of the said Act the following section shall be substituted, namely :—

Powers of Government under this Act by whom exercisable.

"23. The powers of the Government under this Act may in all cases be exercised by the Governor General in Council, and when the person accused can be removed from his appointment by the Local Government, those powers may also be exercised by the Local Government."

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 14th January, 1897.

PRESENT:

His Excellency the Earl of Elgin, Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Excellency Sir G. S. White, G.C.I.E., K.C.B., V.C., Commander-in-Chief in India.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble Sir J. Woodburn, K.C.S.I.
The Hon'ble M. D. Chalmers.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E.
The Hon'ble A. C. Trevor, C.S.I.
The Hon'ble H. E. M. James.
The Hon'ble Sir A. S. Lethbridge, K.C.S.I., M.D.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahadur.
The Hon'ble Alan Cadell, C.S.I.
The Hon'ble J. D. Rees, C.I.E.
The Hon'ble G. P. Glendinning.
The Hon'ble Sir Lakshmishwar Singh, K.C.I.E., Maharaja Bahadur of Durbhanga.
The Hon'ble P. Playfair, C.I.E.
The Hon'ble Rahimtula Muhammad Sayani, M.A., LL.B.
The Hon'ble Joy Gobind Law.
The Hon'ble C. C. Stevens, C.S.I.

NEW MEMBER.

The Hon'ble MR. STEVENS took his seat as an Additional Member of Council.

ACT XXXVII OF 1850 AMENDMENT BILL.

The Hon'ble MR. CHALMERS moved that the Report of the Select

Committee on the Bill to amend Act XXXVII of 1850 (*for regulating Inquiries into the behaviour of Public Servants*) be taken into consideration.

The motion was put and agreed to.

The Hon'ble MR. CHALMERS moved that the Bill, as amended, be passed.

The motion was put and agreed to.

PROVIDENT FUNDS BILL.

The Hon'ble MR. CHALMERS moved that the Hon'ble Sir Griffith Evans be added to the Select Committee on the Bill to amend the law relating to Government and other Provident Funds.

The motion was put and agreed to.

The Council adjourned to Thursday, the 28th January, 1897.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January, 2nd, 1897.

The most important feature of the meteorology of the week under review was the timely commencement of the winter rains in Northern and Central India and the consequent partial termination of the prolonged and severe drought prevailing in that area ever since the end of August.

A brisk to rapid fall of the barometer occurred over North-Western India and Baluchistan on the 27th and a very shallow ill-defined depression appeared in Kathiawar. It advanced slowly eastwards during the next 24 hours and gave rise to a moderately deep secondary depression in Rajputana. The secondary depression filled up as rapidly as it had formed during the next 24 hours, whilst the primary depression continued to drift very slowly eastwards. It passed through the western and central districts of the Central Provinces on the 29th and 30th and apparently filled up in the eastern districts of that province on the 31st. Rajputana obtained moderate rain on the 28th, the North-Western Provinces and the South and East Punjab from the 28th to the 31st, and the Central Provinces and the greater part of Central India from the 29th to the 31st. Light rain fell in Bihar and Chota Nagpur on the 31st and 1st, and showers in West and North Bengal and Upper Assam on the 1st. The disturbance gave moderate to heavy snow in the North-West and Kashmir Himalayas and the snow-line descended to about 6,000 feet.

It may be noted that the disturbance differed in one or two important respects from those of the cold-weather type. Not only was there no warm wave in front of the primary depression and a cool wave in its rear but it travelled along a much more southerly course than is usually taken by storms of the cold-weather months.

The temperature conditions of the week were even more abnormal than during the preceding week. Temperature was throughout the week in excess of the normal in Madras, Bombay, Bengal and Burma. In the Central Provinces, temperature, although very excessive during the first five days, was reduced below the normal on the last two days by the rainfall of the period. Temperature varied irregularly from the normal in Upper India and the Gangetic Plain until the 30th, after which it was in steady considerable to large defects.

Daily Summary.—*Sunday, 27th December.*—The changes of pressure were generally small in amount except in North-Western India and Baluchistan where pressure had given way briskly to rapidly. Pressure was in slight to moderate defect locally in Cutch and Kathiawar and more or less in excess of the normal over the remainder of India. The excess was small in the Peninsula but was considerable to large in Northern and Central India and Burma. Gradients were steep over North Bombay and South Rajputana and a feeble depression lay over Kathiawar. Pressure was very uniform in Northern India and light variable winds and calms prevailed in that area. Moderate to strong south-easterly winds obtained in the Deccan, easterly winds in Rajputana and southerly to easterly winds in Gujarat and Kathiawar. Skies were moderately clouded in North-Western and Central India, the Central Provinces and the Peninsula and cloud was extending eastwards into the North-Western Provinces and Bihar. Light to moderate rain had been received in the extreme south of the Peninsula and Ceylon. Trincomalee reported 2·45 inches and Negapatam 1·48 inches. Light local showers had also occurred at Ahmednagar and Indore and a few drops at Malegaon and Khandwa. Temperature was in considerable defect in Sind and Rajputana, in slight defect in the Punjab and North-Western Provinces, and above the average in the remaining districts. The excess was considerable over the whole of the Peninsula and was largest over the area defined by the stations of Poona, Malegaon, Khandwa and Akola, where it ranged from 8° to 11°.

Monday, 28th December.—Pressure had increased slightly to briskly in Cutch, Kathiawar and the Konkan and had decreased over the remainder of the country. The decrease was brisk to rapid over the greater part of Northern India and very rapid in Rajputana and Kashmir, where it ranged between two and three-tenths of an inch in amount. The depression passing through Kathiawar on the previous day was central midway between Ahmedabad and Indore. It was, however, obscured by the formation of a moderately deep secondary depression over Rajputana Pressure was about an eighth of an inch below the normal at Ajmere and Sambhar. Winds were cyclonic in direction over North-Western India. They were light in force at the level of the plains in the depression area. Mount Abu, on the other hand, reported strong winds. Skies were overcast over the whole of North-Western India (excepting Sind) and the North-Western Provinces and heavily clouded in the Central Provinces, Central India and the Peninsula. The double disturbance had occasioned light to moderate, and fairly general, rain in Rajputana, the East and South Punjab and the adjacent districts of the North-Western Provinces, and a few scattered showers in Central India and the Central Provinces. The heaviest falls were 0·64″ at Neemuch, 0·61″ at Jeypore, and 0·59″ at Bickaneer. Showers continued to be received in the Peninsula. Temperature had risen generally except in Bengal and Madras, and was higher than usual over the whole Indian area with the exception of Sind and Rajputana. The excess was due almost solely to the unusually high night temperature.

Tuesday, 29th December.—The secondary or Rajputana depression had filled up as rapidly as it had formed, and the barometer had hence risen slightly to rapidly over North-Western India. The primary depression was passing eastwards through the western districts of the Central Provinces. A slight to brisk decrease of pressure had occurred in North-Eastern India, Burma and the Peninsula, and pressure was normal over a large part of the country except in Berar and the Central Provinces where it was in slight defect. High pressure conditions were re-established over Upper India and calms and light breezes were reported from the greater part of Northern India. South-easterly winds continued over the Deccan and the eastern half of the Central Provinces.

Abnormal North-westerly winds prevailed over the western districts of the Central Provinces and northerly winds in Gujarat and North Bombay. Skies were clear in Burma and North Bombay, and more or less heavily clouded in the remainder of India. Fairly general rain had fallen in the North-Western Provinces, Bundelkhand, Baghelkhand and the South and East Punjab, and a few showers in the Central Provinces. The falls were in the majority of cases less than half an inch in amount. Heavy rain and snow had fallen in the North-West Himalayas and Kashmir, Minimarg reporting 2·32 inches and Simla 1·55 inches. Some showers had occurred in the extreme south of the Peninsula, but the rainfall in that area was steadily falling off both in amount and extent. The rainfall had caused a very rapid reduction in the day temperature in the North-Western Provinces and Punjab which was hence from 7° to 11° below the average in these areas. The night temperature, on the contrary, remained in large excess. The temperature conditions continued very abnormal in the Central Provinces (due to unusually high night temperature) where the mean temperature of the previous 24 hours was as much as 7½° above the average.

Wednesday, 30th December.—Pressure had given way briskly to rapidly in the Punjab and Kashmir, and slightly in the North-Western Provinces and the adjacent districts of the Central Provinces and Central India. Over the remainder of India the barometer had risen. The primary depression lay over the area defined by the stations of Sutna, Saugor, Hoshangabad and Khandwa. Pressure was in slight defect in the depression area and in slight to moderate defect in the Punjab. A feeble and irregular cyclonic movement existed around the depression. Exceedingly variable winds prevailed in Northern India and the interior of the Peninsula, northerly winds over the Bay and easterly winds in the West Coast districts. Skies were overcast in the North-West Himalayas and light snow had fallen in that area. Moderate rain had fallen over the Central Provinces and the eastern districts of Central India and a few drops in the North-Western Provinces. The principal falls were 1 inch at Saugor and 0·75 inch at Pachmarhi. The high temperature conditions had extended eastwards to Chota Nagpur and Orissa, and the mean temperature of the previous 24 hours was from 4° to 9° above the average over a large area including the Central Provinces, Bundelkhand, Baghelkhand, the North Deccan, Chota Nagpur and Orissa. Temperature was in considerable defect in Sind and Gujarat, and in large defect in the North-West Himalayas. The mean temperature of the previous 24 hours was 11½° below the average at Murree.

Thursday, 31st December.—The feeble depression had shifted slightly eastwards and at 8 A.M. covered the eastern districts of the Central Provinces where the barometer had fallen slightly. Pressure had increased over nearly the whole of the remainder of India—briskly to rapidly over the greater part of North-Western and Central India, and slightly elsewhere. Pressure was normal within the depression and above the average in other parts. The excess was small in the Peninsula, Bihar and Chota Nagpur and moderate over the greater part of Northern and Central India. Light showers had occurred over the North Western Provinces, the adjacent districts of the Central Provinces and Central India, Bihar and Chota Nagpur. The amounts were less than a tenth of an inch at the great majority of stations, but exceeded half an inch at Hazaribagh (0·56") and Bahraich (0·70"). Snow and sleet had fallen in the North-West Himalayas. The fall was heavy in the Kumaon and Garwhal Himalayas where Chakrata reported 1·44 inches (melted snow) and Ranikhet 1·06 inches. A very rapid reduction of temperature had occurred in the Punjab, North-Western Provinces, Central India and the greater part of the Central Provinces. The mean temperature of the previous 24 hours averaged 5° below the average in Sind and Rajputana, and 4° below in the Punjab. The day temperature in these areas was from 5° to 14° below the normal.

Friday, 1st January.—The barometer had continued to rise generally except in Burma, Assam, the greater part of Bengal and the south and west of the Peninsula, where it had fallen slightly. The depression in the eastern districts of the Central Provinces had probably filled up. Pressure was in considerable excess over nearly the whole of North-Western and Central India, and normal in the Peninsula and Ceylon and hence the pressure difference between the region of maximum pressure in the north and of minimum pressure in the south was

considerably greater than usual. Winds blew from the ordinary cold-weather directions. Light rain had fallen in Bihar, Chota Nagpur, North Bengal and Assam, and a few drops at Raipur and Rawalpindi. The heaviest amount reported was 0·40" at Ranchi. Heavy rain had occurred on the eastern flanks of Ceylon. The mean temperature remained very low for the time of year in Rajputana, Central India, Gujarat, the Punjab and the western half of the North-Western Provinces. It considerably exceeded the normal in Burma, Madras, the eastern districts of the Central Provinces, Orissa and West Bengal.

Saturday, 2nd January.—Pressure was unchanged in Burma and North-Eastern India, but had given way slightly to briskly in the remainder of India. A slight depression had appeared over the Western Desert, where winds were feebly cyclonic in direction. Light variable winds and calms obtained over the Punjab and North-Western Provinces, but elsewhere the wind directions were the same as on the preceding day. A few scattered showers of no importance had occurred in the Peninsula, and heavy rain had fallen locally at Nellore (3·28 inches) and Trincomalee. Light snow was reported from Kashmir. Temperature had increased briskly in the Punjab, but in other respects the temperature conditions were not much changed.

Temperature.—The temperature conditions of the week were very marked and unusual over the whole of India and Burma. As during the preceding week temperature was excessive throughout the week over the Peninsula as well as in Bengal and Burma, due chiefly to large excess in the night temperature.

The Central Provinces also shared in this abnormal excess of heat during the first five days after which temperature decreased rapidly in that area and fell slightly below the normal. Temperature was very unsteady in North-Western and Central India and the North-Western Provinces until the 30th, when the disturbed weather occasioned a very rapid reduction in the day temperature.

The mean temperature of the last three days of the week in that area was hence more or less considerably in defect.

The following table gives variation data for the week in illustration :—

Province.	December 1896.					January 1897.		Mean variation of week.
	27th.	28th.	29th.	30th.	31st.	1st.	2nd.

Rain.—The week under review was very interesting from a meteorological point of view, as it witnessed the commencement of the winter rains over Northern and Central India and the final withdrawal of the retreating south-west monsoon from the extreme south of the Peninsula and of the Bay of Bengal.

A feeble ill-defined depression appeared over Kathiawar on the 27th and, advancing slowly eastwards during the next three days, filled up in the eastern districts of the Central Provinces on the 31st. Whilst passing eastwards through Gujarat during the 27th it gave rise to a moderately deep secondary depression in Rajputana which however filled up with great rapidity during the 28th. The double disturbance occasioned a moderate burst of rain over the greater part of Northern and Central India during the period from the 28th

December to the 1st January. The rainfall occurred in Khandesh chiefly on the 27th, in Rajputana on the 28th, in the Punjab on the 28th and 29th, in the North-Western Provinces, Bihar, the Central Provinces and Central India on the 29th and 30th, in Chota Nagpur on the 31st and 1st, and in Berar on the 30th. The fall was most general and heaviest in the North-Western Provinces. The daily falls were, in the majority of cases, light, but exceeded 1 inch at Dhulia (1·28″) and Hoshiarpur (1·05″). Moderate to heavy snow fell in the Kashmir Himalayas on the 29th and in the North-West Himalayas on the 29th and 31st. The fall was heaviest at Minimarg, where it measured over two feet in depth on the 29th. In the Peninsula light rain was received in the extreme south on the 27th and 28th and one or two thundershowers on the 29th, after which no rain fell beyond a heavy local shower at Nellore on the 2nd. The retreating south west monsoon rains of 1896 in the Peninsula hence terminated on the 28th.

The concluding rainfall statement shows that effective rain, *i. e.*, over a tenth of an inch in amount, was received over the whole of Bihar, Chota Nagpur, North Bengal, the North-Western Provinces, the Punjab (excepting the western districts) Khandesh, Berar, the western and central divisions of the Central Provinces, Central India, Rajputana, South Madras and the Coromandel Coast districts. In other divisions there was either no rain throughout the week or there were only a few drops. The total fall of the week in the area of effective rainfall ranged between 0·15 inch and 2·74 inches, while the anticipated rainfall in the same area varies between 0·02 inch and 0·35 inch. There was hence a very large excess over the greater part of the area, some divisions obtaining over ten times the normal fall.

With the present week ends the period of the autumnal rains. The chief features of the rainfall distribution of the period with respect to space may be summed up as follows :—

(1) The rainfall was practically normal in Burma, the eastern districts of the North-Western Provinces, the Submontane, South and North Punjab, the Central and Eastern districts of the Central Provinces, Sind, Baluchistan and the central coast districts of Madras.

(2) It was in slight to moderate excess in South Oudh, South-Central Madras, Gujarat and the eastern districts of Central India.

(3) It was in considerable to large excess in North Oudh, the Central, Western, Submontane and Hill districts of the North-Western Provinces, the South-Eastern and Hill districts of the Punjab, Malabar, Kathiawar, East Rajputana, the Western districts of Central India, Hyderabad (South), South Madras and the southern coast districts of Madras.

(4) It was in slight to moderate defect in the Assam Valley, North Bengal, Bengal Hills, Chota Nagpur, Bihar, Mysore, the Bombay Deccan, Khandesh, the western districts of the Central Provinces and Central Madras.

(5) It was in considerable to large defect in Arakan, East Bengal, Cachar, Assam Hills, Deltaic and Central Bengal, Orissa, Central and West Punjab, Konkan, Berar, Ganjam and Circars.

It may be noted that the greater part of the rainfall of the period in Northern and Central India was received on two occasions, *viz*, from the 23rd to the 25th November and from the 24th December to the 1st January, and hence its distribution with regard to time was very abnormal and irregular.

HEM RAJ,
Offg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 7th January 1897.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th January.*—Showers have fallen generally in the Carnatic, in parts of the Southern districts and at a few stations in Vizagapatam. No rain elsewhere. Water-supply is sufficient in the Carnatic, and in the Central and Southern districts and under large works elsewhere, but is generally poor or bad in the Deccan and the Circars. The sowings continue in the southern half of presidency and under irrigation elsewhere. The standing crops over the former area are generally good but are indifferent or bad in the Deccan and the Circars except under irrigation. The harvest continues in the latter districts with poor or bad yield, except under large irrigation works, but in the southern half of the presidency and on the west coast, that of the early crops is yielding fairly. Pasture and fodder in the Circars and in the Deccan are scarce, elsewhere the former is sufficient, but of the latter supplies are at present short. The cattle are generally in good condition but are suffering in parts of the Deccan districts. Prices are slightly easier or stationary, except in Ganjam where they are rather dearer. *Cholam* (*Sorghum vulgare*) in Kurnool 16, in Anantapur 15, in Cuddapah 14½, and in Bellary 14 seers per rupee. The numbers relieved were:—Relief workers 19,937, inmates of kitchens 1,293, weavers 5,913; all in the Deccan districts. The increase in workers is chiefly in Bellary and of weavers in Cuddapah. Two test works were opened in Vizagapatam during the week, but they failed to attract workers.

Bombay.—*For week ending 13th January.*—Rain is urgently wanted for crops lately sown in the affected districts. The standing crops have been damaged by locusts in two talukas of Shikarpur and in one of Karachi, and the Upper Sind Frontier; they are withering for want of rain in Poona, Ahmednagar, Sholapur, Bijapur, and Dharwar; are unsatisfactory in Thana, thriving in Sind, Gujarat, and Kolaba, and are indifferent elsewhere. The sowing of the late crops has been completed, except in Khandesh and Ratnagiri The autumn harvesting is almost finished in Khandesh and Dharwar Fodder is sufficient except in the Deccan, Karnatak and Shikarpur. The grain-supply is generally sufficient in the affected districts. Cotton-picking is almost completed in Khandesh and continues in Ahmedabad, Broach, Surat, Kathiawar, Wadhwan and Baroda. The condition of the agricultural stock is deteriorating in Poona, Ahmednagar, Sholapur, Bijapur and Dharwar but is healthy elsewhere, except in parts of Shikarpur, Hyderabad, Thar and Parkar, Khandesh, Ratnagiri, Kanara and Kaira. Prices are rising in Panch Mahals, and in parts of Ratanagiri, Poona and Sholapur; are falling in the Upper Sind Frontier and in parts of Broach, Surat, Poona, Sholapur and Bijapur; are stationary in Hyderabad, Thar and Parkar, Ahmedabad, Nasik, Kaira and in parts of Broach, Surat and Poona. Prices of the cheapest staple grain in the affected districts are:—Dharwar 13, Belgaum 12½, Sholapur 10¾, Bijapur 10½, Poona 10¼, Ahmednagar 10, Nasik, Khandesh and Satara 9½, Kolaba 9 seers per rupee. The average daily numbers employed on relief works were:—Bijapur 46,499, Sholapur 33,521, Ahmednagar 23,462, Poona 14,254, Nasik 12,614, Satara 16,228, Khandesh 10,834, and Belgaum 1,969. The numbers on gratuitous relief were:—Bijapur 3,060, Sholapur 2,585, Ahmednagar 7, Poona 2,571, Nasik 2, Belgaum 80.

Bengal.—*For week ending 11th January.*—There was no rain during the week, with the exception of a few slight showers in the Burdwan and Presidency Divisions. The harvesting of the winter rice is still proceeding. In Bihar (except in the Madhubani Sub-division of Darbhanga) the spring crops are generally doing well; in parts of North and East Bengal these crops are fair; elsewhere they are reported to be very poor and in need of rain. In Bihar and Hazaribagh the prospects of the poppy crop are favourable. Transplantation

of spring rice is going on, but rain is required for it in some districts. No important change in the price of common rice is reported except from Darbhanga and Purnea, where it fell from 8½ and 9 seers to 9½ and 10 seers, respectively, and from Balasore, where it rose from 13 to 11 seers a rupee. The price of maize has risen in Champaran from 10½ to 10 seers per rupee, and in Saran from 10½ seers to 10 seers 3 chittaks. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 10 seers, Khulna (common rice) 10 seers, Patna (common rice) 10½ seers, Shahabad (maize) 10 seers, Saran (maize) 10 seers 3 chittaks, Champaran (maize) 10 seers, Muzaffarpur (maize) 10½ seers, Darbhanga (common rice) 9½ seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 9th January, were—Relief works—Nadia (8th January) 2,485 (men 1,471, women 292, children 722), Khulna (6th January) 282, Patna 609 (men 203, women 270, children 136), Shahabad 1,480 (men 560, women 626, children 294), Saran 4,496 (men 1,101, women 1,949, children 1,446), Champaran 79,054 (men 31,014, women 27,483, children 20,557), Muzaffarpur 2,441 (men 1,620, women 385, children 436), Darbhanga 46,132 (men 21,187, women 17,659, children 7,286); total for the whole Province 136,979 against 86,898 in the previous week. Gratuitous relief—Saran 3,769 (men 782, women 2,259, children 728), Champaran 3,407 (men 744, women 1,460, children 1,203), Muzaffarpur 275 (men 50, women 137, children 88), Darbhanga 17,163 (men 3,650, women 8,740, children 4,773), Nadia 54 (men 9, women 40, children 5); total for the whole Province 24,668 against 13,593 in the previous week.

North-Western Provinces and Oudh.—*For week ending the 9th January.*—Save for some light showers in the districts of Garhwal, Almora and Dehra Dun, there was no rain during the week. The crops are generally reported to be doing well. Cane-pressing continues and irrigation is being carried on in some districts. The numbers in receipt of relief on Saturday, the 9th January 1897, in sixteen districts officially recognised as distressed were as follows:—Agra 5,623, Etawah 7,730, Banda 109,633, Cawnpore 39,031, Hamirpur 33,972, Allahabad 1,40,622, Jhansi 20,865, Jalaun 35,316, Jaunpur 25,911, Gorakhpur 6,805, Lucknow 38 140, Unao 17,632, Rae Bareli 35,750, Sitapur 25,816, Hardoi 48,680, Bara Banki 13,192; total 605,548. This total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—employed in relief works 384,944, relieved as dependants 128,996, relieved in poor-houses 37,568, relieved under other provisions of the Code 54,040. The numbers relieved in twenty districts which are under observation, but not yet officially recognised as distressed were, on the same date, as follows:—relieved on test-works 30,087, relieved in poor-houses 12,466, relieved under other provisions of the Code 14,591; total 57,144. The grand total in receipt of relief on the last day of the week was therefore 662,692. Supplies are generally sufficient. Fodder is somewhat scarce in places. Prices remain high, but show a tendency to fall in some districts and to rise in others. The prices of staple food-grains on which the famine wages are based are as follows in the districts officially recognised as distressed:—Cawnpore, Jhansi, Jaunpur, Lucknow, Bara Banki, and Unao 10 seers; Allahabad, Hamirpur, Sitapur and Jalaun 9¾; Hardoi 9¼; Banda 10½ and Rae Bareli 10¾ seers per rupee.

Punjab.—*For week ending 13th January.*—Rain has fallen in Sialkot, Rawalpindi, Peshawar and parts of the Umballa, Ferozepore, Lahore, Dera Ismail Khan, Karnal, and Gujranwala districts, but the fall has been very slight exceeding one-tenth of an inch only in Rawalpindi and Peshawar where it was over half an inch. In Hazara, Kohat, Kangra and other districts not specially reported on, the rainfall has been more abundant, but the Central and Southern districts have as yet received no general rain. Cotton-picking and sugarcane-pressing are still going on in some districts. The sowing of the spring crops has been nearly completed, except in the northern districts where it is believed the recent rains have enabled the people to continue their sowings. The condition and prospects of the standing crops are generally reported fair to average, but poor in parts of Rawalpindi and in the dry tracts of Amritsar and Gujranwala. The recent rain has benefited the standing crops in most districts, but they are still suffering from drought in Mooltan. The unirrigated crops have dried up in Lahore. More rain is wanted throughout the province. Much of the dry land is lying unsown owing to the failure of timely

rains. The stock of food-grain is insufficient in Hissar and parts of Jullunder, and with the cultivators of Amritsar, Lahore and Gujranwala. Grain is being imported from Sindh into Hissar. The sugarcane crop has been injured by frost in Amritsar which has also lessened the outturn of this crop in Sialkot. The cattle are generally in poor condition owing to overwork and scarcity of fodder; their condition is said to be good to fair in Delhi, Umballa, Peshawar and parts of Amritsar. Pasturage and fodder are insufficient or scarce in all districts except Umballa, Peshawar and Rohtak; in Gujranwalla they are reported to be unprocurable. The average number of persons employed on famine relief works is:—1,033 in Delhi, 1,789 in Ferozepore, 31,924 in Gujrat, 3,397 in Karnal (including 151,282, 9,521 and 92, respectively, gratuitously relieved), 926 in Umballa and 152 in Mooltan, 17,529, including 2,750 non-working children in Hissar, and that on test works:—is 871 in Lahore, 722 in Rawalpindi, 1,178 in Rohtak, 400 in Gurgaon, 223 in Gujranwalla, 102 in Ludhiana and 298 in Sialkot. 1,100 men are also employed on ordinary works from the District Fund in Gurgaon. The total number on relief and test works is about 60,534 against 39,000, last week. Prices are slightly falling in all districts except Amritsar, Shahpur and Dera Ismail Khan, as a result of the partial rainfall, but they are still high everywhere. Wheat is selling from $7\frac{1}{2}$ to $9\frac{1}{2}$ seers per rupee; gram 9 to 11, great millet 11 to $11\frac{1}{2}$, bulrush millet $9\frac{1}{2}$ to 10, and maize $9\frac{3}{8}$ to $11\frac{1}{2}$ seers per rupee. Prices of the staple food-grains on which famine wage is reckoned are:—Delhi (bulrush millet) 9 seers, Umballa (maize) 10 seers, Ferozepore (maize) 11 seers, Mooltan (wheat) 9 seers, Rohtak (gram) 10 seers, Gurgaon (bulrush millet) 10 seers, Ludhiana (maize) 11 seers, and Lahore (wheat and flour of maize) $8\frac{1}{2}$ seers per rupee.

Central Provinces.—*For week ending 13th January.*—The weather has been generally clearer and is getting warmer with high winds. Bilaspur received sixty cents of rain. The spring crops are coming into ear and are on the whole in fair condition. Some slight damage is reported to pulse from frost in Mandla, and to gram and pulse from caterpillars and insects in Seoni and Nagpur. Fodder and water are sufficient except in Hoshangabad and in parts of Seoni, Nagpur, and Sambalpur. The numbers employed on relief works from eleven districts which have sent in reports are:—Saugor 26,507, Jubbulpore 51,090, Damoh 9,328, Mandla 13,448, Seoni 6,409, Narsinghpur 11,141, Hoshangabad 19,952, Nimar 989, Wardha 275, Nagpur 2,912, Bilaspur 3,107, including 21,335 gratuitously relieved, total 145,168. There were also 19,119 employed on railway work in Saugor and Jubbulpore. A test work was opened on the 9th January in Chanda and attracted 1,054 persons. Prices of the staple food-grains on which the famine wages are based are:—Saugor $8\frac{3}{4}$, Damoh 9, Mandla $8\frac{1}{2}$, Seoni $9\frac{3}{4}$, Narsinghpur 10, Hoshangabad 10, Nimar 11, Wardha $11\frac{3}{4}$, Nagpur 15, and Bilaspur 11 seers per rupee.

Burma.—*For week ending 9th January.*—In Lower Burma reaping and threshing are progressing and in Upper Burma the cultivation of dry-weather paddy is in progress. The standing crops in Mandalay are withering from want of rain. The crops on irrigated lands in Minbu which have not failed are estimated at 14 annas. The paddy on lands irrigated by the Meiktila and Minhla lakes in the Meiktila district is almost an entire failure. The crops in the Lower Chindwin are generally poor. The price of paddy has decreased largely in Toungoo and Mandalay, considerably in Bassein, and slightly in Thongwa, Thayetmyo and Pakokku, elsewhere it is stationary. The numbers employed on relief works are:—Meiktila 16,407 and Myingyan 7,669; on gratuitous relief:—Meiktila 3,034 and Myingyan 2,663. The price of rice in Meiktila is 8 seers 13 chittacks and in Myingyan 9 seers 5 chittacks per rupee.

Assam.—*For week ending 12th January.*—The weather is seasonable. The reaping of the late rice is nearly finished, the outturn being average in the Surma Valley, good in the Upper Brahmaputra Valley and poor in the Lower Brahmaputra Valley. Prices of common rice are:—Silchar 8 seers 3 chittacks, Sylhet $10\frac{1}{2}$, Gauhati 10, and Tezpur 8 to 10 seers per rupee. Scarcity of fodder is being felt in Cachar and the Khasia hills. The water-supply is sufficient except in Cachar and parts of Nowgong.

Mysore and Coorg.—*For week ending 13th January.*—MYSORE:—Standing crops are in good condition. Prospects are good. Ragi (*Eleusine coracana*) and paddy have been harvested. Prices have fallen in Bangalore, Tumkur and Mysore; and have risen in Chitaldroog and Hassan.

COORG: Harvesting of rice is nearly completed; picking of coffee continues. Prices of food-grains stationary. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 13th January.*—BERAR:—The weather is cool. Standing crops are in poor condition. Cotton picking and cutting of *jowar* (*Sorghum vulgare*) are almost finished. Breaking up of land for the next monsoon crop has commenced in Akola and Basim. Scarcity of fodder and water prevails. High prices for food-grains continue and relief works appear likely to be necessary by the end of the current month.

HYDERABAD: No rain. More rain required in the Gulbargah division for the improvement of the standing crops; other divisions report the spring crop to be in good condition. Prices are:—wheat $7\frac{1}{8}$, coarse rice $7\frac{3}{16}$, white *jowari* $10\frac{7}{8}$, yellow *jowari* $9\frac{3}{8}$, gram $9\frac{1}{2}$, and *tur* $10\frac{7}{8}$ seers per current sicca rupee.

Central India.—*For week ending 13th January.*—No rain fell in the Central India Agency during the week. Agricultural operations have been completed in four districts of Bundelkhand and are in progress in all other Agencies. Spring crops are good in one district of Gwalior and one of Bundelkhand; fair in four districts of Gwalior and one of Bundelkhand and in Bhopal; bad in remaining districts of Bundelkhand; indifferent elsewhere. Agricultural stock and pasturage good in two districts of Gwalior; fair in Bhopal; and indifferent elsewhere. Prices are high in Bundelkhand, and Baghelkhand; steady elsewhere. Opium is in fair condition. The numbers of persons employed on famine relief works were:—Gwalior 7,753; Bundelkhand 7,270; Baghelkhand 16,583; and on gratuitous relief:—Bundelkhand 1,736; Baghelkhand 1,998. Prices of staple grains on which famine wages are based, were:—In Gwalior 10 to $10\frac{1}{2}$, and Baghelkhand $10\frac{1}{2}$ seers per rupee.

Rajputana—*For week ending 13th January.*—Rainfall: Bikanir 39 cents, no rain elsewhere. Agricultural operations are satisfactory in Kherwara, Jhallawar, Kotah, Ajmere, Jeypur and poor in Dholepur. The spring crops are fair in Bikanir; sowings completed in Meywar and Jaisulmere. Standing crops are generally good except in Dholepur. Harvest is good in Jeypur and Bhurtpur; below average in Haraoti; and average in Ajmere-Merwara. Crops have been slightly damaged by frost in Meywar. Agricultural stock generally good except in Bhurtpur. Pasturage or fodder are sufficient except in Tonk, and in some tehsils of Jeypur, Dholepur, and Bhurtpur. Prices are rising in Pertabgurh and Meywar; falling in Jhallawar, Ajmere, Ulwar, and Bikanir; high in Haraoti; and are steady elsewhere. The numbers of persons employed on relief works were:—Marwar 6,768; Kotah 964; Dholepur 5,155; Bhurtpur 11,002; Bikanir 12,093; Jaisulmere 643; and on gratuitous relief:—Marwar 1,119; Bhurtpur 315; Bikanir, 1,486; Jaisulmere 9. The prices of staple grains on which famine wages are based were:—Marwar $8\frac{1}{3}$; Kotah $14\frac{1}{2}$; Dholepur $11\frac{1}{4}$; Bhurtpur 10; Bikanir 8 seers 13 chittacks to 8 seers $4\frac{1}{2}$ chittacks; and Jaisulmere $8\frac{3}{4}$ seers per rupee.

JAMMU PROVINCE.—*For week ending 13th January.*—Light showers of rain. Prices stationary. Fodder scanty. Relief works in progress and 952 persons employed. Price of the staple food-grain is 10 seers per rupee.

Kashmir.—KASHMIR VALLEY.—*For week ending 12th January.*—Snow has fallen. Prices continue below normal. Price twenty-four seers per rupee.

Nepal.—*For week ending 9th January.*—No rain has fallen but the weather has been cold and cloudy. Prospects good. Prices 7 and 8 seers per rupee.

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

REPORTS ON AGRICULTURAL PROSPECTS IN INDIA.

The following papers are published for general information :—

1.—Letter from the Government of the North-Western Provinces and Oudh, to the Government of India, No 91, dated 9th January 1897.

2.—Telegram from the Government of India, to Her Majesty's Secretary of State for India, dated 10th January 1897.

1.—From the Government of the North-Western Provinces and Oudh, to the Government of India, Department of Revenue and Agriculture, No. 91, dated Allahabad, the 9th January 1897.

In this Government's letter No. 196, dated the 23rd November 1896, the Government of India was informed of the agricultural situation and prospects of these provinces as then ascertained, and an estimate was given of the area and population affected by the failure of the *kharif* harvest, the anticipated deficiency in the area of the forthcoming *rabi* crop, and the number of people for whom it would be necessary to provide relief. That letter had scarcely been despatched when reports of rainfall in varying amounts were received from many parts of the Province, and the Lieutenant-Governor thought it advisable to call for reports from his District Officers as to the alteration which the rain had made in the situation. The Government of India was informed of this in the end of November, and in my official letter No. 417, of the 15th December, it was stated, on the strength of provisional information received from Commissioners of divisions, that the Lieutenant-Governor had reason to hope that with fair winter rains the numbers who might be expected to come on relief would be less by about 25 per cent. than the 100,000,000 units for one day which His Honour had previously estimated. The reports of District Officers and the revised estimates of the Divisional Commissioners have now come in, and they have been supplemented by a special return of the *rabi* area sown in each district up to the 15th December, obtained by field-to-field inspections of the village *patwaris*. The Lieutenant-Governor has further informed himself, in the course of a recent tour through the Bundelkhand districts and in the west of Oudh, of the state of those portions of the Province in which the failure of the crops has been greatest and distress is most general and pronounced. The present report, though it has been delayed beyond the date which His Honour had originally fixed for its submission, has gained thereby in fullness and accuracy, and may be regarded as a final survey of the situation as determined by the present condition of the people and the prospects of the *rabi* crop now on the ground.

2. All officers are agreed that the rainfall of the last week of November was too late to materially benefit such *kharif* crops as were still on the ground, except *arhar* (a species of pulse) and sugarcane, and also too late to enable *rabi* sowings to be completed under ordinary conditions. They are equally agreed that in whatever locality the fall exceeded one-quarter of an inch the *rabi* already sown was greatly benefited, and further *rabi* sowings effected over an additional area. The peculiarity of the rainfall was its uneven and capricious distribution. In the Meerut Division, which, owing to the canals and the good *kharif* harvest, was already beyond the risks of scarcity, the fall was generally good, varying in most districts from one-quarter to four-fifths of an inch. In this division consequently the *rabi* area will be little short of the normal, varying from 69 per cent. in the Saharanpur district to 94 per cent. in Bulandshahr. In the Rohilkhand Division the average fall exceeded two-fifths of an inch, and was highly beneficial to the sandy tracts which characterize parts of the Budaun, Pilibhit, Moradabad, and Bareilly districts. In the Agra Division rain was heaviest in the tracts which already were best off and lightest in the worst tracts. But its general effect was to change the suitation in this division from one of very considerable gravity to one of distinct hope. Passing

over into Oudh, the submontane districts are found to have received the heaviest rainfalls, the district of Bahraich, in particular, having so benefited thereby as to have brought 86 per cent of the normal *rabi* area under sowings. In Southern Oudh, comprising portions of both divisions (Fyzabad and Lucknow) the rainfall was slight but the natural moisture of the soil and the humidity of the climate have done even more than was anticipated, and these advantages were supplemented by extraordinary resort on the part of the peasantry to the construction of temporary wells and to every form of irrigation. In the Gorakhpur Division fairly good rain fell in the Basti district, placing it beyond the reach of crop failure, and in the northern part of the Gorakhpur district. The southern and part of the central portion of the latter district and the district of Azamgarh were practically untouched by the rain, and this tract had all along been regarded with considerable apprehension. But here also the natural qualities of the soil and climate have helped the cultivator, and two-thirds of the normal *rabi* area have been sown. In the Benares Division serious difficulties were not apprehended even in the absence of rain in November. Most of the districts received a fair amount of rain, and in the division as a whole nearly four-fifths of the normal area have been sown. There remains the Allahabad Division, which from the first has been regarded by the Lieutenant-Governor as the weakest area in the Province. In these districts good rain fell in the greater part of Hamirpur and in part of Fatehpur, Cawnpore, and Jhansi. Elsewhere it was too slight to materially improve the *rabi* prospects. Banda and Allahabad, in particular, were practically unaffected by the very light showers which they received. The result is seen in a *rabi* which in the whole division is only 44 per cent. of the normal area, and falls to only 25 per cent. in Banda against the November estimate of about 50 per cent. It may be doubted whether in Banda more than 20 per cent. will yield a crop.

3. The prospects of the *rabi* according to the forecast given in paragraph 7 of the letter of the 23rd November and as now ascertained compare as follows:—

Division.	Normal *rabi* areas in acres.	*Rabi* area for 1896-97 according to November estimate.	Percentage on normal area.	*Rabi* area for 1896-97 as now ascertained.	Percentage on normal area.
Meerut	2,918,714	2,177,247	71	2,374,651	81·3
Rohilkhand	2,443,802	1,823,556	75	1,840,495	75·5
Gorakhpur	2,411,085	1,466,855	60	1,606,035	66·5
Benares	1,793,390	1,035,168	59	1,444,755	80·5
Allahabad	3,017,173	1,263,078	42	1,342,104	44·5
Agra	2,194,587	1,273,910	58	1,476,170	67·2
Lucknow	2,472,714	1,002,832	41	1,540,949	62·5
Fyzabad	2,804,092	1,511,848	54	2,040,784	72·7
Total	20,051,158	11,568,498	58	13,677,943	68·2

The area actually sown is thus more than two million acres greater than what was anticipated, and as sowings were still going on in some districts at the date the *patwáris* made their field inspection, the return represents somewhat less than the real facts.

4. As regards the condition of the crops, they may be said to be generally promising. They are backward as compared with ordinary years, and it is now uncertain what effect this noticeable backwardness may have on the outturn. The cultivators, however, are hopeful, and seem to expect in most districts an average crop over the irrigated area, and with favourable rain within a month, a moderate crop on unirrigated and on late sown lands. This expectation the Lieutenant-Governor himself shares. During the last week in December rain fell in most districts in good amounts, varying from one-half to one and a half inches, and wherever the fall amounted to half an inch the *rabi* is, at all events for the present month, secure. The Lieutenant-Governor believes that with ordinary good fortune, by which he means a further fall of rain within a month and immunity from severe frosts and hail-

storms, the *rabi* harvest will make such addition to the existing stocks in the Province as to carry us over to the next *kharif* harvest. High prices must be expected, and if a great drain were made on these provinces, the situation might be altered; but the general opinion of grain-dealers appears to be that unless the *rabi* falls altogether short of anticipations, prices will not rise higher than they now are. The Lieutenant-Governor believes that, with a fairly good *rabi*, prices should decline after March.

5. Passing now to the question how far the ascertained prospects of the *rabi* affect the estimate which in paragraph 10 of its letter of the 23rd November this Government made of the number of persons likely to require relief under the provisions of the Famine Code, I am to say that the Lieutenant-Governor has now ascertained beyond all doubt that the necessities of Bundelkhand, of the portion of the Allahabad district lying south of the Jumna, and of the Hardoi district in the Lucknow Division, are greater than he had hoped would be the case. In all these regions, except Hardoi, large tracts had little or no rain to speak of either in November or December. As regards the Bundelkhand districts, the situation, as it presented itself to the Lieutenant-Governor in the course of his recent tour through them, is described in this Government's Resolution No. 551, dated 30th December 1896, of which a copy has already been submitted to the Government of India. Briefly, in none of these districts do the *rabi* sowings represent 50 per cent. of the normal area. In Hamirpur the percentage is 46, in Jhansi 37, in Jalaun 27, and in Bánda only 25. On much of the land which has been sown the crops will be poor. This, following a succession of bad harvests, has quite broken the Bánda and Jalaun districts, and very seriously crippled the other two. The state of southern Allahabad is no better than the state of Bárda. The pressure on the relief works has begun at least two months earlier than last year, and there are at the present time on the relief works and in receipt of gratuitous relief as many persons (166,000) as in the middle of April last. In the Bánda district 14 per cent. of the entire population are already in receipt of relief, and the Lieutenant-Governor considers the Collector's estimate, that in the time of maximum pressure before the rains 25 or even 30 per cent. of the population will require relief, is not excessive. The total number relieved (reduced to units relieved for one day) in the relief operations in these Bundelkhand districts which closed in September last, was 18½ millions. It will not be safe to count on less than 40 millions of units (for one day) as likely to require relief in these districts during the present scarcity. The most recent information as to the southern portion of the Allahabad district which the Lieutenant-Governor has received shows that its state is as bad as that of Bánda, and large relief measures are found to be necessary. For the Allahabad Division as a whole the Commissioner, following the District Officers, estimates the numbers that will require relief at 57 millions of units for one day. Precision in such a matter is unattainable; but, having regard to the rapidity with which the numbers on relief are increasing in his division, the Lieutenant-Governor does not think that the estimate can be reduced under 50 millions.

6. In the Lucknow Division the most seriously distressed district is Hardoi. The Lieutenant-Governor has recently passed through it on tour, and is satisfied that as regards the labouring and the low caste population famine exists in all parts in an acute form; that relief works must be kept open till the rains on a large scale; and that gratuitous relief will have to be afforded to large numbers in villages who are unable to work. The Deputy Commissioner estimates that from 10 millions to 15 millions of persons (reduced to units of one day) will require to be relieved, and the Lieutenant-Governor would not place the figure at less than 10 millions of units. Of the remaining five districts of the Lucknow Division, four have been formally recognised as distressed, and relief measures under the Code are in progress. For the Lucknow Division, as a whole, the Commissioner's revised estimate is 22¾ million units, while the estimates of the District Officers reach 27 millions. The Lieutenant-Governor thinks that 25 million units for one day may be taken as the approximate limit to which relief in this division may run.

7. As regards the rest of the Provinces, the reports received from local officers give for each division the following revised estimates of the number of

persons (reduced to units for one day) expected to come on relief up to the harvesting of the *kharif* crop next September :—

Agra Division		5,000,000
Rohilkhand Division		4,000,000
Benares	,,	5 000,000
Gorakhpur	,,	10,000.000*
Fyzabad	,,	5,000,000
TOTAL		29,000,000

This gives a total of 113,000,000 units for one day for the entire Province according to the revised estimates of the local officers. And as these estimates are based on a far more precise knowledge of facts and probabilities than was obtainable last November, the Lieutenant-Governor thinks that they may be accepted. The estimate does not differ widely from the estimate of 100,000,000 units for one day, which, with the knowledge possessed in November, seemed to Sir Antony MacDonnell to be a probable measure of the difficulty to be met. If since the circumstances have been improved by the rain of November in certain of the affected divisions, they have become much worse in Bundelkhand and Allahabad, which have had no rain to speak of in November, and parts of which have fared badly in respect of the December rain. Here the low estimate of *rabi* sowings made in November has not even been verified, and the prospects have accordingly become more gloomy.

It is hardly necessary to observe that these numerical estimates are not put forward with the object of restricting relief within definite limits. The only limitation to the relief to be given will be the necessities of the people.

8. In paragraph 17 of this Government's letter No. 196 of 23rd November, mention was made of the heads under which the relief system falls. I am now to say that the arrangements in force under these heads have hitherto been generally sufficient. Plain indications, however, appearing that distress would rapidly grow, the organization of relief, both by means of public works and by village relief, has been largely expanded, and it is believed that the system is now capable of meeting the strain to which it will be subjected. There will be need in the near future for reinforcement of the provincial Public Works establishment, and, as pointed out in paragraph 25 of the letter of the 23rd November, the services of some young military officers for inspection purposes would be very useful. On these points the Government of India is being separately addressed.

9. The condition of the people in the affected tracts is, with the exception of a few districts, fair, and the same may be said in regard to the condition of labourers on relief works. In the worst districts the people now coming on works exhibit signs of privation, but, so far as has been ascertained, there is no evidence of any exceptional mortality from want of food. The system of village relief in the distressed districts is now being so extended as to take account of every individual resident in a village, and by winnowing the indigent from those who have means, to save the former from distress either by providing them, if able to work, with work, or, if unable to work, with gratuitous relief. I am to forward, for the information of the Government of India, copy of instructions recently issued in this connection. It will be an object with the relief administration later on to obtain suitable work from those gratuitously relieved at their homes.

10. The vast majority of the persons receiving relief come from the labouring classes and the poorer cultivators, mostly of low caste. But latterly people of the better cultivating classes who have sown their *rabi* are coming for employment, on relief works. There may be here and there persons who could do without Government help but they are comparatively very few. From enquiries which the Lieutenant-Governor during his present tour has made on several relief works, he is satisfied that these people, though in good condition, are in need of relief. They generally state that if the *rabi* harvest is fair, they will leave the works in March and not return again. And it may be assumed that men of their class

* The information from Gorakhpur is numerically indefinite.

would not undergo the privations and hardships incident to labour on relief works at a famine wage without being compelled by necessity. On the whole, it may be said that distress is now touching a higher stratum of the cultivating classes.

11. In addition to what has been already said in paragraph 3 above, regarding a sufficiency of food supplies, it may be added that on relief works supplies are everywhere adequate, the grain-sellers following the works with their grain stalls without any official inducements.

12. I am to attach to this letter a statement showing, under various heads of the Famine Code, the numbers on relief in each district in these provinces on the 2nd instant. The statement is divided into two parts: (1) districts declared to be distressed, and (2) districts under observation. Since the date of the statement some of the districts have been transferred from the latter to the former list.

Statement showing the rabi sowings for the year 1896-97.

District.	Rabi area for 1896-97 (in acres).			Average rabi area (in acres).			Percentage of rabi area for 1896-97 to average rabi area.

2.—Telegram, dated 10th January 1897, from the Government of India, to the Right Honourable Her Majesty's Secretary of State for India.

YOUR telegram of first—Famine. Figures for each Province given below. In Bengal, Burma, and Madras actual distress is confined at present to portions of affected districts, while in remaining provinces, parts of some affected districts are unaffected. But high prices severely trying poorer classes throughout Northern and Central India even where no failure of crops, especially in the towns.

Punjab has 28 relief works with 30,489 workers and 10,278 children, besides 353 others on gratuitous relief in five districts; area 16,800 square miles; population 4,139,000. Also has 36 test works with 4,391 workers and dependants open in ten districts; area 30,100 square miles; population 6,559,000. Numbers on test works not increasing, and 13 of above works in two districts, area 6,800 square miles, population 2,007,000, about to be closed, while test works in three other districts, area 6,800 square miles, population 1,974,000, already closed as premature.

North-Western Provinces and Oudh have 64 relief works with 279,428 workers and 77,645 dependants, and 47 poor houses open with 29,227 inmates, besides 39,544 others on gratuitous relief in 12 districts; area 26,200 square miles; population 11,273,000. They also have 92 test works with 53,165 workers and dependants, and 65 poor-houses open with 15,121 inmates, besides 2,749 others on gratuitous relief in 24 other districts; area 50,600 square miles; population 26,013,000.

Bengal has 87 relief and three test works with 86,476 workers and dependants, including 18,000 children, open in six districts; area 16,600 square miles; population 13,546,000. And five test works with 422 workers open besides three closed as premature in two other districts; area 4,200 square miles; population 2,948,000. Total area severely affected at present 6,700 square miles, population 5,281,000. Eight poor-houses open and 13,593 on gratuitous relief.

Burma has four relief works with 24,727 workers open in three districts; area 11,200 square miles; population 767,000; and 5,407 on gratuitous relief. Area severely affected at present 2,600 square miles; population 212,000.

Madras—in four Deccan districts, area 27,100 square miles, population 3,699,000—has 21 relief works with 19,543 workers and dependants and 17 poor-houses open with 1,170 inmates and 5,617 weavers employed in weaving. Total area at present affected 8,500 square miles; population 1,206,000. Test works in two northernmost districts, area 25,600 square miles, population 4,700,000, closed as premature.

Bombay has eighty relief and twenty test works with 165,833 workers and 63,931 dependants, open in seven districts; area 43,000 square miles, population 7,009,000. Eight test works with 2,679 workers and dependants, open in Belgaum; area 4,700 square miles, population 1,013,000. Total numbers on gratuitous relief 6,917. Test works in Dharwar, area 4,600 square miles, population 1,051,000, closed as premature.

Central Provinces—fourteen districts; area 60,200 square miles; population 7,824,000—have 99 relief and three test works, open with 149,062 workers and dependants, besides 29,027 employed on ordinary railway works. Two more districts, area 13,200 square miles, population 1,019,000, have two test works open with 867 workers. In twelve of above districts 61 poor-houses open with 16,027 inmates and in three of them 38 centres of village relief established.

In all provinces classes on relief are mainly low castes and labourers, with many weavers in Madras, Bombay, and Central Provinces specially employed in weaving. Few cultivators yet on relief, except in Burma, where distinction unimportant, and in districts of North-Western Provinces and Oudh, and Central Provinces, which have suffered from several bad harvests in succession, where small cultivators already on relief and even some of better classes beginning to come. General condition of people fairly good or good in affected tracts. But where weakened by several bad harvests in succession, especially in parts of North-Western Provinces and Oudh and Central Provinces, they exhibit manifest signs of privation when first coming on relief works or into poor-houses. And everywhere great suffering exists among classes reluctant to claim Government relief till last resources exhausted. Fodder is scarce in many affected tracts, and in parts people are disposing of their cattle often at nominal prices. Health and condition of relief workers everywhere satisfactory. Relief arrangements adequate in connection with the present distress. Machinery previously elaborated has worked well. Owing to suddenness of demand for relief over large area, test conditions not always strictly enforced at first, but this now remedied and organization being rapidly expanded to meet growing demands. Numbers on relief will now increase rapidly and continue to grow till reaping of spring harvest in March-April gives employment, and must remain large until autumn crops reaped in September. Landlords, often assisted by Government loans, doing much for their tenants, and private charity active, especially in larger towns. Advances are being freely given by Government generally without interest for construction and repair of wells and embankments, to extend and secure spring crops and for employment of famine-stricken in agricultural improvements. Stamp duty remitted in case of all loans, public or private, for relief of distress. Government forests thrown open to grazing and extraction of jungle products and surplus grass sent as fodder to affected tracts. Food-stocks reported ample in Burma; adequate in Madras where raiyats of affected tracts hold large stocks;

sufficient for a year in affected districts of Bombay ; generally sufficient in Punjab where dealers of one affected district said to be holding up enormous stocks though south-eastern districts importing from Sind ; sufficient for the present in North-Western Provinces and Oudh and Central Provinces where spring crops are expected to carry them on to autumn harvest ; and, except in one district, sufficient for the present in Bengal where rice can be promptly imported from Burma. Adequate arrangements have been made locally for supply of relief camps. Inland railway rates for grain have been reduced. Government has publicly proclaimed its rigid policy of non-interference with private enterprise and abstention from purchase on its own account, save possibly in definite tracts under special conditions of difficulty. At very rough estimate Government already spending well over one lakh of rupees daily in actual relief of famine-stricken.

DENZIL IBBETSON,

Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 31ST DECEMBER 1895, AND FROM 1ST JULY TO 31ST DECEMBER 1896.

N.B.—As regards the figures in column *Total Earnings from 1st July 1896*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the second-half of 1895.	Last 10 days of December 1895.			Last 12 days of December 1896.			Earnings from 1st July to 31st December 1895.	Earnings from 1st July to 31st December 1896.	Increase.	Decrease

RESOLUTION.

Calcutta, the 13th January 1897.

READ again—

Resolution in this Department, No. 2270 A., dated the 18th May 1895, prescribing revised Rules for the guidance of depositors in the Post Office Savings Bank.

RESOLUTION.—The Governor General in Council is pleased to decide that for Rule 43 of the above Rules, the following shall be substituted (the notes under the Rule remaining unaltered) :—

PURCHASE OF GOVERNMENT SECURITIES.

43. Any depositor may invest the amount of his balance, or a portion of it, in Government securities through the Post Office. If the balance to be invested is that of a Public Account (Rules 39 and 40) or of a Regimental, Police, or other Conjoint Account (Rule 41), the notice of withdrawal prescribed in certain circumstances by Rule 39 (*f*) and Rule 41 (*e*) will be required before the investment is made. Any person, whether previously a depositor or not, may also purchase, through the Post Office, Government securities of the nominal value of ₹100 or any multiple thereof not exceeding ₹1,000 in one year and ₹3,000 in all, by tendering in cash the amount necessary for the purchase. An application on the form prescribed by the Director General should be presented, together with his pass-book, by a depositor desiring to make an investment under this rule. The application will then be forwarded to the Comptroller, Post Office, who will take the necessary steps for the purchase through the Comptroller General :—

(*a*) The paper purchased will be of one of the guaranteed 3½ per cent loans, or of the 3 per cent loan of 1896-97 as stated in the application: if no loan is specified in the application, the investment will be made in one of the 3½ per cent guaranteed loans, preferably, that of 1865.

(*b*) If the investor wishes to have the paper sent to him, he should make a special request to that effect: in the absence of such request, the paper will remain in the custody of the Comptroller General. If the paper remains in the custody of the Comptroller General, he will take steps as soon as convenient

to transfer it to the 3½ per cent loan of 1865, should it belong to one of the other guaranteed 3½ per cent loans. The investor may at any time apply through the local Post Office for the delivery to him of paper thus held by the Comptroller General. If the investor applies to have the paper sent to him, it will be enfaced for payment of interest at the local Treasury and forwarded to the Post Office for delivery to the investor.

ORDER.—Ordered, that copy of the Resolution be forwarded to the Director General, Post Office, with reference to his letter No. 186 C., dated 11th November 1896, to the Comptroller and Auditor General, and to the Comptroller, Post Office.

Ordered also, that the Resolution be published in the *Gazette of India*. for general information.

READ—

Customs Circular No. I of 1897.

ORDERED, that the circular be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. I of 1897.

From—The Government of India, FINANCE AND COMMERCE DEPARTMENT,
No. 5489 S. R., dated the 31st December 1896,

To—The Secretary to the Government of Bengal, Financial Department.

I am directed to acknowledge the receipt of your letter No. 5924 S. R., dated the 11th December 1896, suggesting that machines for the cleaning of rice should be included in the exemption allowed in No. 14 (*d*) of Schedule IV to the Indian Tariff Act in respect of machinery for the milling of rice. The suggestion is made with reference to an appeal preferred * * against the levy by the Collector of Customs at Calcutta of import duty on a grain cleaning machine * *

2. I am to say that in the opinion of the Government of India the process which the machine in question is intended to perform may be regarded as included in the expression "milling of rice" as used in No. 14 (*d*), and the machine held to be exempt from duty.

I.—Muhammadan Holidays.

Id-ul-fitr.—On the 6th March, but if the moon be visible on the 4th, then on the 5th March.

Iduz-Zuha.—On the 13th May, but if the moon be not visible on the 3rd May, then on the 14th May.

Muharram.—On the 11th and 12th June, but if the moon be visible on the 1st, then on the 10th and 11th.

Fátiha-e-Duázdahum.—On the 12th August, but if the moon be visible on the 30th July, then on the 11th August.

II.—Hindu Holidays.

Durga and Lakhi Pujas.—30th September, 1st, 6th, 7th, 8th and 9th October.

III.—Other Holidays.

Two days preceding Christmas Eve.—22nd and 23rd December.

The 22nd January 1897.

No. 92.—THE following papers relating to the creation of Legislative Councils in the Punjab and Burma are published for general information :—

No. 87, dated Calcutta, the 21st January 1897.

From—J. P. HEWETT, Esq., C.I.E., Secretary to the Government of India, Home Department,

To—The Chief Secretary to the Government of the Punjab.

I AM now directed with reference to the correspondence ending with Mr. Fanshawe's letter No. 495, dated 14th April 1896, to say that the Secretary of State has, after communication with the Government of India, determined that a local legislature shall be created for the Punjab, in the initial form which the Statutes allow, and has left the Government of India to determine the date which they may deem expedient for the introduction of this measure.

2. His Lordship has decided that the Members of the Council shall in the beginning be simply nominated, as provided by the Indian Councils Act of 1861, and that the larger powers, which under the Act of 1892 may be conferred by regulation or rule, shall not be extended to the Council until further experience has been gained.

3. The Government of India are of opinion that the 1st May 1897 may suitably be fixed as the date from which the provisions of the Indian Councils Act of 1861 touching the making of laws and regulations, shall take effect in the Punjab, and they propose to ask the Secretary of State to recommend Her Majesty to sanction under section 49 of the Act the making of the necessary proclamation by the Governor General in Council with effect from that date. The Governor General in Council now desires His Honour the Lieutenant-

Governor to consider what number of Councillors should be nominated for his assistance in making laws and regulations. It is desirable that His Honour's views upon this point should be communicated with as little delay as possible in order to admit of the number of Councillors being specified in the proclamation as required by section 44 of the Act. The number of Councillors specified in the proclamation constituting the territories under the administration of the Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh to be a Province to which the provisions of the Act of 1861 touching the making of laws and regulations should apply, was nine, and it appears to the Governor General in Council, subject to the consideration of the views of His Honour the Lieutenant-Governor, that this number would also be suitable to the Punjab.

4. After the proclamation has been issued His Honour the Lieutenant-Governor will be further addressed with a view to the submission of draft rules of business under section 37 and the nomination of Councillors under section 45 of the Statute.

No 88, dated Calcutta, the 21st January 1897.

From—J. P. HEWETT, Esq., C.I.E., Secretary to the Government of India, Home Department,

To—The Chief Secretary to the Chief Commissioner of Burma.

I AM now directed, with reference to the correspondence ending with Mr. White's letter No. 450, dated 14th April 1896, to say that the Secretary of State has, after communication with the Government of India, determined that a local legislature shall be created for Burma, in the initial form which the Statutes allow, and has left the Government of India to determine the date which they may deem expedient for the introduction of this measure.

2. His Lordship has decided that the Members of the Council shall, in the beginning, be simply nominated, as provided by the Indian Councils Act of 1861, and that the larger powers, which under the Act of 1892 may be conferred by regulation or rule, shall not be extended to the Council until further experience has been gained.

3. The Government of India are of opinion that the 1st May 1897 may suitably be fixed as the date from which the provisions of the Indian Councils Act of 1861, touching the making of laws and regulations, shall take effect in Burma, and they propose to ask the Secretary of State to recommend Her Majesty to sanction, under section 49 of the Act the making of a proclamation by the Governor General in Council constituting Burma a new Province for the purpose of the Act with effect from that date. The number of Councillors will, as recommended by Sir Frederic Fryer, be nine, of whom four may be non-official members.

4. After the proclamation has been issued a further communication will be addressed to you regarding the submission of draft rules of business under section 37, and the nomination of Councillors under section 45 of the Statute.

ESTABLISHMENTS.

The 20th January, 1897.

No. 55.—The services of Mr. T. W. Holderness, of the Indian Civil Service, Secretary to the Government of the North-Western Provinces and Oudh, are placed temporarily at the disposal of the Department of Revenue and Agriculture.

The 21st January, 1897.

No. 62.—Mr. F. Baker has been permitted to resign Her Majesty's Indian Civil Service, with effect from the 5th December 1896.

MEDICAL.

The 21st January, 1897.

No. 36.—The services of the undermentioned officers of the Indian Medical service (Bengal) are placed temporarily at the disposal of the Government of the Punjab, with effect from the dates on which they may assume charge of their duties under that Government :—

Surgeon-Captain R. Heard, M.B., B. CH.
Surgeon-Lieutenant C. J. Milne, M.B., C.M.

SANITARY.

The 22nd January, 1897.

No. 80.—It is notified for general information that the Government of Bombay have, in con-

sequence of the existence of bubonic plague in the cities of Bombay and Karachi, declared that from the 1st February 1897, and until further orders, the ports of these cities shall not be places from which pilgrim ships may depart or proceed, as provided in section 7 (1) of the Pilgrims Ships Act, XIV of 1895. The Port of Calcutta remains open to pilgrim traffic.

ECCLESIASTICAL.

The 18th January, 1897.

No. 25.—The Reverend Joshua Alfred Rowland Brookes has been appointed to be a Chaplain, on probation, on the Bengal (Lahore) Ecclesiastical Establishment to fill an existing vacancy.

J. P. HEWETT,
Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATION.

GENERAL.

Calcutta, the 21st January, 1897.

No. 181—213-23.—Mr. T. W. Holderness, C.S., is appointed temporarily to be Deputy Secretary to the Government of India in the Department of Revenue and Agriculture (Famine), with effect from the forenoon of the 18th January, 1897.

DENZIL IBBETSON,
Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 19th January, 1897.

No. 115-*E. B.*—The following Order of Her Majesty in Council, which was published in the *London Gazette* of the 1st December, 1896, is republished for general information :—

AT the Court at *Windsor*, the 27th day of *November*, 1896.

PRESENT :

The QUEEN's Most Excellent Majesty.
Lord President.
Lord George Hamilton.
Lord Arthur Hill.
Sir Horace Rumbold.

Whereas by the Extradition Acts, 1870 to 1895, it was amongst other things enacted that where an arrangement has been made with any foreign State with respect to the surrender to such State of any fugitive criminals, Her Majesty may, by Order in Council, direct that the said Acts shall apply in the case of such foreign State ; and that Her Majesty may, by the same or any subsequent Order, limit the operation of the Order, and restrict the same to fugitive criminals who are in or suspected of being in the part of Her Majesty's dominions specified in the Order and render the operation thereof subject to such conditions, exceptions, and qualifications as may be deemed expedient.

And whereas a Convention was concluded on the twenty-seventh day of August, one thousand eight hundred and ninety-six, between Her Majesty and His Majesty the King of the Belgians amending certain Articles of the Extradition Treaty of the twentieth of May, one thousand eight hundred and seventy-six, for the mutual extradition of fugitive criminals, which Convention is in the terms following :—

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, and His Majesty the King of the Belgians, being desirous to render more efficacious the provisions of Articles II and IV of the Treaty between Great Britain and Belgium of the 20th May, 1876, for the mutual extradition of fugitive criminals, have named as their respective Plenipotentiaries for this purpose, that is to say :

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, the Most Honourable Robert Arthur Talbot Gascoyne Cecil, Marquess of Salisbury, Earl of Salisbury, Viscount Cranborne, Peer of the United Kingdom, Knight of the Most Noble Order of the Garter, Member of Her Majesty's Most Honourable Privi Council, Her Majesty's Principal Secretary of State for Foreign Affairs, &c., &c. ;

Sa Majesté la Reine du Royaume-Uni de la Grande-Bretagne et d'Irlande, Impératrice des Indes, et Sa Majesté le Roi des Belges, désirant rendre plus efficases les stipulations des Articles II et IV du Traité du 20 Mai, 1876, entre la Grande-Bretagne et la Belgique pour l'extradition réciproque des criminels fugitifs, ont nommé pour leurs Plénipotentiaires respectifs dans ce but, à savoir :

Sa Majesté la Reine du Royaume-Uni de la Grande-Bretagne et d'Irlande, Impératrice des Indes, le Très Honorable Robert Arthur Talbot Gascoyne Cecil, Marquis de Salisbury, Comte de Salisbury, Vicomte Cranborne, Pair due Royaume-Uni, Chevalier due Très Noble Ordre de la Jerretière, Membre du Très Honorable Conseil Privé de Sa Majesté, Principal Secrétaire d'État de Sa Majesté au Département des Affaires Étrangères, &c., &c.

And His Majesty the King of the Belgians, Baron Whettnall, Commander of the Order of Leopold, Grand Cross of the Order of St. Gregory, Commander of the Order of Charles III of Spain, Knight of the second class of the Iron Crown of Austria, Commander of the Order of Villa Vicosa of Portugal, Commander of the Oaken Crown of Luxemburg, Knight of the Netherland Lion, His Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of St James's, &c., &c. ;

Who, after having communicated to each other their respective full powers, found in good and due form, have agreed upon the following Articles:—

ARTICLE I.

The text of Article II of the Extradition Treaty of the 20th May, 1876, is amended by the substitution of the words "a Magistrate" for the words "the police Magistrate who issued the warrant, or some other police Magistrate in London," in the first sentence of the third paragraph (fourth in French text) of section I, and by the omission of the word "police" in the second sentence of the said paragraph, and in both paragraphs of section II.

ARTICLE II.

The text of Article IV of the aforesaid Treaty is amended by the substitution of the words "a Magistrate" for the words "a police Magistrate in London."

ARTICLE III.

The text of Article VII of the aforesaid Treaty is amended by the omission of the word "police."

ARTICLE IV.

The present Convention shall be ratified, and the ratifications shall be exchanged as soon as possible.

It shall come into force ten days after its publication in the manner prescribed by law in the respective countries, and shall have the same force and duration as the Treaty to which it relates.

In witness whereof the respective Plenipotentiaries have signed the present Convention and have affixed thereto their seals.

Done in duplicate at London, the 27th day of August, 1896.

Et Sa Majesté le Roi des Belges, le Baron Whettnall, Commandeur de l'Ordre de Léopold, Grand Croix de l'Ordre de Saint Grégoire Commandeur de nombre de l'Ordre de Charles III d'Espagne, Chevalier de deuxième classe de la Couronne de Fer d'Autriche, Commandeur de l'Ordre de Villa Viçosa de Portugal, Commandeur de la Couronne de Chêne de Luxembourg, Chevalier du Lion Néerlandais, Envoyé Extraordinaire et Ministre Plénipotentiaire de Sa Majesté près la Cour d'Angleterre, &c., &c. ;

Lesquels, après s'être communiqué réciproquement leurs pleins pouvoirs, trouvés en bonne et due forme, sont convenus de ce qui suit :—

ARTICLE I.

Le texte de l'Article II du Traité d Extradition du 20 Mai, 1876, est modifié par la substitution des mots "un Magistrat" aux mots "le Magistrat de police qui a lancé le mandat ou devant un autre Magistrat de police à Londres," dans la première phrase du 3e paragraphe du texte Anglais (du 4 paragraphe du texte Français) de la section I, et par la suppression des mots "de police" dans la seconde phrase du dit paragraphe, et dans les deux paragraphes de la section II.

ARTICLE II.

Le texte de l'Article IV du dit Traité est modifié par la substitution des mots "un Magistrat" aux mots "un Magistrat" de police à Londres."

ARTICLE III.

Le texte de l'Article VII du dit Traité est modifié par la suppression des mots "de police."

ARTICLE IV.

La présente Convention sera ratifiée et les ratifications en seront échangées aussitôt que possible.

Elle entrera en vigueur dix jours après sa publication dans les formes prescrites par la législation des pays respectifs et elle aura la même force et la même durée que le Traité auquel elle se rapporte.

En foi de quoi les Plénipotentiaires respectifs ont signé la présente Convention et y ont apposé leur sceau.

Fait en double à Londres, le 27 Août, 1896.

(L.S.) SALISBURY.
(L.S.) BN. WHETTNALL.

And whereas the ratifications of the said Convention were exchanged at London on the thirtieth day of September, one thousand eight hundred and ninety-six.

Now, therefore, Her Majesty, by and with the advice of Her Privy Council, and in virtue of the authority committed to her by the said recited Acts, doth order and it is hereby ordered, that from and after the eleventh day of December, one thousand eight hundred and ninety-six, the said Acts shall apply in the case of Belgium, and of the said Convention with His Majesty the King of the Belgians, and of the said Extradition Treaty as modified by the said Convention.

Provided always that the operation of the said Acts shall be and remain suspended within the Dominion of Canada so long as an Act of the Parliament of Canada passed in one thousand eight hundred and eighty-six and entitled "An Act respecting the Extradition of Fugitive Criminals," shall continue in force there, and no longer.

C. L. Peel.

No. 90-*G*.—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognise the appointment of Mr. F. Voigt as Vice-Consul at Calcutta for Sweden and Norway.

No. 93-*G*.—With reference to notification No. 640-G., dated the 26th April, 1894, Mr. Michael Halliday, Consul for the Netherlands at Akyab, has resumed charge of his office.

The 20th January, 1897.

No. 99-*G*.—With reference to notification No. 751-G., dated the 4th May, 1896, Mr. F. Müller, Consul for Sweden and Norway at Akyab, resumed charge of his office on the 25th December, 1896.

No. 102-*G*.—With reference to notification No. 732-G, dated the 1st May, 1896, Mr. F. Müller, Consul for Germany at Akyab, resumed charge of his office on the 25th December, 1896.

The 21st January, 1897.

No. 108-*G*.—Mr. Sakharam Atmaram Adhikari, Clerk of the Court of the Resident at Hyderabad, and officiating Extra Assistant Commissioner of the 5th class in the Hyderabad Assigned Districts, is appointed to be an Extra Assistant Commissioner of the 5th class, with effect from the 27th November, 1896, *vice* Mr. Shapurji Virji Kalapasi, deceased.

No. 110-*G*.—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognise the appointment of Mr. C. Bachmann as Consul for Germany at Bassein.

The 22nd January, 1897.

No. 145*E*.-*B*.—The following Resolution of Her Majesty's Secretary of State for India in Council is published for general information :—

RESOLUTION OF COUNCIL.

At a Meeting of the Council of India held on the 21st October, 1896, it was

Resolved—

That the provisions of section 1 of the Statute 33 Victoria, Chapter 3, being "An Act to make better provision for making Laws and Regulations for certain parts of India and for certain other purposes relating thereto," be and the same are hereby declared to be applicable to the Mokokchung Sub-division of the Naga Hills District of Assam from this date.

No. 119*G*.—The following appointments are made in and to the local corps in Rajputana and Central India, with effect from the dates of assuming charge :—

MEWAR BHIL CORPS.

Captain (temporary Major) R. A. Cole, Indian Staff Corps, from the Erinpura Irregular Force, to officiate as Commandant and as Political Superintendent, Hilly Tracts, Mewar, *vice* Lieutenant-Colonel E. D. F. Bignell, on leave.

Captain (temporary Major) C. H. Dawson, Indian Staff Corps, from the Bhopal Battalion, to be Wing Commander and 2nd-in Command, and Assistant Political Superintendent, Hilly Tracts, Mewar, *vice* Captain (temporary Major) Poingdestre, transferred to the Bhopal Battalion.

ERINPURA IRREGULAR FORCE.

Captain (temporary Major) G. G. J. S. Jones, Indian Staff Corps from the Deoli Irregular Force, to officiate as Squadron Commander and 2nd-in Command, *vice* Captain (temporary Major) R. A. Cole.

DEOLI IRREGULAR FORCE.

Lieutenant F. C. L. Waller, Indian Staff Corps, Wing Officer and Adjutant, to officiate as Squadron Commander and 2nd-in-Command, *vice* Captain (temporary Major) G. G. J. S. Jones.

BHOPAL BATTALION.

Captain (temporay Major) A Poingdestre, Indian Staff Corps, from the Mewar Bhil Corps, to be Wing Commander and 2nd-in-Command, *vice* Captain (temporary Major) C. H. Dawson.

No. 122*G*.— Lieutenant D. G. Peart, Indian Staff Corps, officiating Wing Officer of the Bhopal Battalion, is appointed to officiate temporarily as Wing Officer of the Mewar Bhil Corps, with effect from the date of assuming charge, and until further orders.

No. 125—*G*.—The following substantive promotions and appointments are made in and to the graded list of the Political Department :—

Consequent on the retirement of Lieutenant-Colonel E. A. Fraser, Indian Staff Corps, Political Agent of the 1st Class, and with effect from the 13th September, 1896—

Mr. G. R. Irwin, of the Indian Civil Service, Political Agent of the 2nd Class (seconded), to be a Political Agent of the 1st Class (seconded).

Lieutenant-Colonel W. Loch, Indian Staff Corps, Political Agent of the 2nd Class (seconded), to be a Political Agent of the 1st Class (seconded).

Major H. M. Temple, Indian Staff Corps, Political Agent of the 2nd Class, to be a Political Agent of the 1st Class.

Major T. C. Pears, Indian Staff Corps, Political Agent of the 3rd Class, to be a Political Agent of the 2nd Class.

Captain J. Ramsay, Indian Staff Corps, Political Assistant of the 1st Class, to be a Political Agent of the 3rd Class.

Mr. O. V. Bosanquet, of the Indian Civil Service, Political Assistant of the 2nd Class, to be a Political Assistant of the 1st Class.

Captain S. H. Godfrey Indian Staff Corps, Political Assistant of the 3rd Class, to be a Political Assistant of the 2nd Class.

Captain A. F. Bruce, Indian Staff Corps, to be a Political Assistant of the 3rd Class.

Consequent on augmentation, and with effect from the 26th October, 1896—

Major R. H. Jennings, Royal Engineers, to be a Political Agent of the 3rd Class.

Consequent on the appointment of Lieutenant-Colonel C. E. Yate, C.S.I., C.M.G., Indian Staff Corps, Political Agent of the 1st Class, to be an additional Resident of the 2nd Class and Agent to the Governor-General of India in Khorassan and Seistan, and with effect from the 15th November, 1896—

Surgeon-Major Sir G. S. Robertson, K.C.S.I., Indian Medical Service (Bengal), British Agent at Gilgit, to be a Political Agent of the 1st Class.

Consequent on augmentation, and with effect from the 15th November, 1896—

Captain A. H. McMahon, C.I.E., Indian Staff Corps, Political Agent of the 3rd Class, to be a Political Agent of the 2nd Class.

Mr. H. V. Cobb, of the Indian Civil Service, to be a Political Agent of the 3rd Class.

Captain C. H. Prichard, Indian Staff Corps, Political Assistant of the 2nd Class, to be a Political Assistant of the 1st Class.

Major C. G. F. Fagan, Indian Staff Corps, Political Assistant of the 3rd Class, to be a Political Assistant of the 2nd Class.

Captain A. McConaghey, Indian Staff Corps, to be a Political Assistant of the 3rd Class.

Lieutenant the Hon'ble A. F. Napier, Indian Staff Corps, to be a Political Assistant of the 3rd Class (seconded).

Lieutenant H. T. Pritchard, Indian Staff Corps, to be a Political Assistant of the 3rd Class.

Captain A. D'A. G. Bannerman, Indian Staff Corps, to be a Political Assistant of the 3rd Class.

These arrangements are made without prejudice to superior acting appointments held by any of the above-mentioned officers on the dates specified.

No 271-*I. A.*—In exercise of the powers conferred by section 6 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), the Governor-General in Council is pleased to appoint Mr. Archibald William Lunel Vernede to be a Justice of the Peace within the State of Travancore.

W. J. CUNINGHAM,
Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

RESOLUTION.

No. 308-*S. R.*

Calcutta, the 19th January, 1897.

Read the following Orders of Her Majesty in Council, dated, respectively, the 11th August, 1884 and the 27th November, 1896, containing regulations for preventing collisions at sea and as to signals of distress :—

At the Court at *Osborne House, Isle of Wight*, the 11th day of *August*, 1884.

PRESENT :

The Queen's Most Excellent Majesty in Council.

Whereas by Order in Council made in pursuance of the Merchant Shipping Act Amendment Act, 1862, and dated the fourteenth day of August, One thousand eight hundred and seventy-nine, Her Majesty, on the joint recommendation of the Admiralty and the Board of Trade, was pleased to direct that on and after the first day of September, one thousand eight hundred and eighty, the Regulations for preventing Collisions at Sea contained in an Order in Council dated the ninth day of January, one thousand eight hundred and sixty three and the additions by an Order in Council dated the thirteenth day of June, one thousand eight hundred and sixty-eight, made thereto, should be annulled, and that there should be substituted therefor the new Regulations contained in the first schedule to the said first-named Order in Council, and that the same should from and after the first day of September, one thousand eight hundred and eighty, apply to ships of the countries mentioned in the said second schedule thereto, whether within British jurisdiction or not.

And whereas by the Orders in Council dated respectively the twenty-fourth day of March, one thousand eight hundred and eighty, the twenty-sixth day of August, one thousand eight hundred and eighty-one, the eighteenth day of August, one thousand eight hundred and eighty-two, the twenty-third day of August, one thousand eight hundred and eighty-three, and the second day of February, one thousand eight hundred and eighty-four, Her Majesty was pleased to direct that the operation of the Article numbered 10 of the New Regulations contained in the first schedule of the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine, should be suspended from time to time.

And whereas the Admiralty and the Board of Trade have jointly recommended to Her Majesty that, so far as regards British ships and boats, the regulations hereinafter set forth shall be sub-

stituted for the regulations contained in the first schedule to the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine.

Now, therefore, Her Majesty, by virtue of the powers vested in Her by the said recited Act, and by and with the advice of Her Privy Council is pleased to direct that, on and after the first day of September, one thousand eight hundred and eighty-four, the regulations contained in the schedule, hereto shall, so far as regards British ships and boats be substituted for the regulations contained in the first schedule to the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine.

Schedule referred to in this Order.

Regulations for preventing Collisions at Sea.

Art 1. In the following rules every steam ship which is under sail and not under steam is to be considered a sailing ship ; and every steam ship which is under steam, whether under sail or not, is to be considered a ship under steam.

Rules concerning Lights.

Art 2. The lights mentioned in the following Articles numbered 3, 4, 5, 6, 7, 8, 9, 10 and 11 and no others, shall be carried in all weathers, from sunset to sunrise.

Art. 3. A seagoing steam ship when under way shall carry :—

(*a*) On or in front of the foremast, at a height above the hull of not less than 20 feet, and if the breadth of the ship exceeds 20 feet, then at a height above the hull not less than such breadth, a bright white light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the ship, *viz.*, from right ahead to two points abaft the beam on either side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.

(*b*) On the starboard side a green light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(*c*) On the port side a red light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the port side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(*d*) The said green and red side lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

Art. 4. A steam ship when towing another ship shall, in addition to her side lights, carry two bright white lights in a vertical line one over the other, not less than 3 feet apart, so as to distinguish her from other steam ships. Each of these lights shall be of the same construction and character, and shall be carried in the same position, as the white light which other steam ships are required to carry.

Art 5. (*a*) A ship, whether a steam ship or a sailing ship, which from any accident is not under command, shall at night carry, in the same position as the white light which steam ships are required to carry, and, if a steam ship, in place of that light, three red lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line one over the other, not less than three feet apart, and of such a character as to be visible on a dark night with a clear atmosphere at a distance of at least two miles ; and shall by day carry in a vertical line one over the other, not less than three feet apart, in front of but not lower than her foremast head, three black balls or shapes, each two feet in diameter.

(*b*) A ship, whether a steam ship or a sailing ship employed in laying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam ships are required to carry, and, if a steam ship, in place of that light, three lights in globular lanterns each not less than 10 inches in diameter, in a vertical line over one another, not less than 6 feet apart : the highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character that the red lights shall be visible at the same distance as the white light. By day she shall carry in a vertical line one over the other not less than six feet apart, in front of but not lower than her foremast head, three shapes not less than two feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The ships referred to in this Article, when not making any way through the water, shall not carry the side lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other ships as signals that the ship showing them is not under command, and cannot therefore get out of the way. The signals to be made by ships in distress and requiring assistance are contained in Article 27.

Art. 6. A sailing ship under way, or being towed, shall carry the same lights as are provided by Article 3 for a steam ship under way, with the exception of the white light, which she shall never carry.

ART. 7. Whenever, as in the case of small vessels during bad weather, the green and red side lights cannot be fixed, these lights shall be kept on deck, ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side.

To make the use of these portable lights more certain and easy, the screens containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

ART. 8. A ship, whether a steam ship or a sailing ship, when at anchor in [illegible] where it can best be seen but at a height not exceeding 20 feet above the hull, shall exhibit where it can be seen all round the horizon, at a distance of at least [illegible] miles, a bright white light not less than 8 inch lens or its equivalent, and also, if a steam ship, a similar light at the stern, but at a lower elevation.

ART. 9. A pilot vessel, when engaged on her station on pilotage duty, shall not exhibit the lights required for other vessels, but shall exhibit a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

A pilot vessel, when not engaged on her station on pilotage duty, shall exhibit lights similar to those of other ships.

ART. 10. Open boats and fishing vessels and vessels of less than 20 tons [illegible] when under way, when at anchor, and when not having way upon them, shall not be required to exhibit the lights hereinbefore mentioned, but shall have ready at hand a lantern with a green glass on one side and a red glass on the other side, and shall, on the approach of or to other vessels, show the proper light in sufficient time to prevent collision, so that the light may not be seen across the bow. Provided that the Local Government may, if they think fit, require any such boats or vessels [illegible] to exhibit the lights mentioned in this Part of these Rules.

The following provisions shall have effect with respect to the lights which are to be carried by the vessels of fishing fleets [illegible]:—

(a) Any [illegible] vessel [illegible] may, instead of the lights mentioned in article 4, carry two white lights in the fore part of the vessel, in such a position that the one light shall be at least 6 feet and not more than 12 feet above the other light, and in such a manner that the lights may be seen all round the horizon, and that the lower light may be seen at a distance of at least [illegible] miles.

(b) A vessel [illegible] may, instead of the lights mentioned in article 4, carry a white light at the masthead, visible all round the horizon, and shall also carry a white light, which shall be carried at a distance of not less than 4 feet vertically below the masthead light, and so constructed as to show an uninterrupted light all round the horizon, and to be of such character as to be visible at a greater distance than the masthead light.

(c) A vessel [illegible] may, instead of the lights mentioned in article 4, carry a white light, which shall be carried at a height above the hull not exceeding 20 feet, and so constructed as to show an uninterrupted light all round the horizon, at a distance of at least [illegible] miles.

(d) Every vessel [illegible] may, instead of the lights mentioned in article 4, carry a white light, which shall be carried at a height above the hull not exceeding 20 feet, and so constructed as to show an uninterrupted light all round the horizon, at a distance of at least [illegible] miles.

(e) Every vessel [illegible] may, instead of the lights mentioned in article 4, carry a white light, which shall be carried at a height above the hull not exceeding 20 feet, and so constructed as to show an uninterrupted light all round the horizon, at a distance of at least [illegible] miles.

(f) In fog, mist, or falling snow, a vessel [illegible] shall not be required to exhibit the lights mentioned in article 4, but shall have ready at hand a lantern with a green glass on one side and a red glass on the other side, and shall, on the approach of or to other vessels, show the proper light in sufficient time to prevent collision, so that the light may not be seen across the bow.

ART. 11. A ship which is being towed shall carry [illegible] mentioned in article 4, and also the [illegible] mentioned in article 10, as the circumstances of the case may require.

Sound Signals for Fog, &c.

ART. 12. A steam ship shall be provided with [illegible] whistle, a siren, and a fog horn, to be sounded by an engineer, and a steam ship shall be provided with a bell in addition to the whistle, siren, and fog horn to be sounded by the engineer. A sailing ship shall be provided with a fog horn and a bell.

In fog, mist, or falling snow, whether by day or night, the signals described in this article shall be used as follows; that is to say,—

(a) A steam ship under way shall sound [illegible] at intervals of not more than two minutes a prolonged blast.

* In all cases where the Regulations require a bell to be used, a drum may be substituted on board Turkish vessels.

(*b*) A sailing ship under way shall make with her fog horn, at intervals of not more than two minutes, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*c*) A steam ship and a sailing ship, when not under way, shall at intervals of not more than two minutes ring the bell.

Speed of Ships to be moderate in Fog, etc.

Art. 13. Every ship, whether a sailing ship or steam ship, shall, in a fog, mist, or falling snow, go at a moderate speed.

Steering and Sailing Rules.

Art. 14. When two sailing ships are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, *viz.* :—

(*a*) A ship which is running free shall keep out of the way of a ship which is close-hauled.

(*b*) A ship which is close-hauled on the port tack shall keep out of the way of a ship which is close-hauled on the starboard tack.

(*c*) When both are running free with the wind on different sides, the ship which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free with the wind on the same side, the ship which is to windward shall keep out of the way of the ship which is to leeward.

(*e*) A ship which has the wind aft shall keep out of the way of the other ship.

Art. 15. If two ships under steam are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where ships are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two ships which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are, when each of the two ships is end on, or nearly end on, to the other; in other words, to cases in which, by day, each ship sees the masts of the other in a line, or nearly in a line, with her own; and by night, to cases in which each ship is in such a position as to see both the side lights of the other.

It does not apply by day to cases in which a ship sees another ahead crossing her own course or by night to cases where the red light of one ship is opposed to the red light of the other or where the green light of one ship is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Art. 16. If two ships under steam are crossing so as to involve risk of collision, the ship which has the other on her own starboard side shall keep out of the way of the other.

Art. 17. If two ships, one of which is a sailing ship and the other a steam ship, are proceeding in such directions as to involve risk of collision, the steam ship shall keep out of the way of the sailing ship.

Art. 18. Every steam ship, when approaching another ship, so as to involve risk of collision, shall slacken her speed or stop and reverse, if necessary.

Art. 19. In taking any course authorised or required by these regulations, a steam ship under way may indicate that course to any other ship which she has in sight by the following signals on her steam whistle, *viz.* :—

One short blast to mean "I am directing my course to starboard."

Two short blasts to mean "I am directing my course to port."

Three short blasts to mean "I am going full speed astern."

The use of these signals is optional, but if they are used the course of the ship must be in accordance with the signal made.

Art. 20. Notwithstanding anything contained in any preceding Article, every ship, whether a sailing ship or a steam ship, overtaking any other, shall keep out of the way of the overtaken ship.

Art. 21. In narrow channels every steam ship shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such ship.

Art. 22. Where by the above rules one of two ships is to keep out of the way, the other shall keep her course.

Art. 23. In obeying and construing these rules due regard shall be had to all dangers of navigation, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

No Ship, under any Circumstances, to neglect proper Precautions.

Art. 24. Nothing in these rules shall exonerate any ship, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look out, or of the neglect of any precaution which may be required by the ordinary practice of seamen or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

Art. 25. Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland navigation.

Special Lights for Squadrons and Convoys.

Art. 26. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for ships sailing under convoy.

Art. 27. When a ship is in distress and requires assistance from other ships or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, that is to say :

In the daytime—

1. A gun fired at intervals of about a minute ;
2. The International Code signal of distress indicated by N C ;
3. The distant signal, consisting of a square flag, having either above or below it a ball, or anything resembling a ball.

At night—

1. A gun fired at intervals of about a minute ;
2. Flames on the ship (as from a burning tar barrel, oil barrel, etc) ;
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals.

C. L. PEEL.

AT THE COURT AT WINDSOR.

The 27th day of November, 1896.

PRESENT :

The Queen's Most Excellent Majesty in Council.

Whereas by Section 418 of the Merchant Shipping Act, 1894, Her Majesty is empowered from time to time on the joint recommendation of the Admiralty and the Board of Trade by Order in Council to make regulations for preventing collisions at sea :

And whereas by Section 434 of the said Act Her Majesty is empowered from time to time by Order in Council to make rules as to signals of distress :

And whereas by an Order in Council dated the 11th day of August, 1884 and expressed to be made in pursuance of the Merchant Shipping Act Amendment Act, 1862, and on the joint recommendation of the Admiralty and the Board of Trade, Her Majesty was pleased to direct that, on and after the first day of September, 1884, the regulations contained in the Schedule thereto (being regulations for preventing collisions at sea and as to signals of distress) should be substituted for the regulations contained in the First Schedule to an Order in Council made under the same Act and on such joint recommendations as aforesaid and dated the 14th day of August, 1879 :

And whereas the Admiralty and the Board of Trade have jointly recommended to Her Majesty that the Regulations for preventing collisions at sea contained in the Schedule to the said Order in Council dated the 11th day of August, 1884, except the Article numbered 10 in such Regulations, should, on and after the 1st day of July, 1897, be annulled, and that the Regulations for Preventing Collisions at Sea contained in Schedule I hereto annexed should, on and after the last-mentioned date be substituted therefor, with the exception aforesaid and come into operation as regards British ships and boats :

And whereas it has been made to appear to Her Majesty that it is expedient that the Regulations or Rules as to signals of distress contained in the Schedule to the said Order in Council dated the 11th day of August, 1884, should, on and after the said first day of July, 1897, be annulled, and that the rules as to signals of distress contained in Schedule II hereto annexed should, on and after the last-mentioned date, be substituted therefor and come into operation as regards British ships and boats :

And whereas the provisions of Section one of the Rules Publication Act, 1893, have been complied with :

Now, therefore, Her Majesty, by virtue of the power vested in Her by Section 418 of the Merchant Shipping Act, 1894, and on the joint recommendation of the Admiralty and the Board of Trade, and by and with the advice of Her Privy Council, is pleased to direct that, on and after the 1st day of July, 1897, the Regulations for Preventing Collisions at Sea contained in the Schedule to the said Order in Council dated the 11th day of August, 1884, except the Article numbered 10 in such Regulations, shall be annulled, and the Regulations for Preventing Collisions at Sea contained in Schedule I hereto annexed shall be substituted therefor (with the exception aforesaid) and come into operation as regards British ships and boats :

And Her Majesty is further pleased, by virtue of the power vested in Her by Section 434 of the Merchant Shipping Act, 1894, and by and with the advice of Her Privy Council, to direct

that, on and after the 1st day of July, 1897, the Regulations or Rules as to signals of distress contained in the Schedule to the said Order in Council dated the 11th day of August, 1884, shall be annulled and the rules as to signals of distress contained in Schedule II hereto annexed shall be substituted therefor and come into operation as regards British ships and boats.

C. L. PEEL.

SCHEDULE I.

Preliminary.

These Rules shall be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

In the following Rules every steam vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam vessel.

The word "steam vessel" shall include any vessel propelled by machinery.

A vessel is "under way" within the meaning of these Rules, when she is not at anchor, or made fast to the shore or aground.

Rules concerning Lights, &c.

The word "visible" in these Rules, when applied to lights, shall mean visible on a dark night with clear atmosphere.

ARTICLE 1. The Rules concerning lights shall be complied with in all weathers from sunset to sunrise and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

ART. 2. A steam vessel when under way shall carry—

(*a*) On or in front of the foremast, or if a vessel without a foremast, then in the fore part of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, *viz.*, from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(*b*) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

(*c*) On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

(*d*) The said green and red lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

(*e*) A steam vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (*a*). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

ART. 3. A steam vessel when towing another vessel shall, in addition to her side lights, carry two bright white lights in a vertical line one over the other, not less than 6 feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in Article 2 (*a*), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

ART. 4. (*a*.) A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in Article 2 (*a*), where they can best be seen, and, if a steam vessel, in lieu of that light two red lights, in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles; and shall by day carry in a vertical line one over the other not less than 6 feet apart, where they can best be seen, two black balls or shapes each 2 feet in diameter.

(*b*) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in Article 2 (*a*), and if a steam vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon, at a distance of at least 3 miles. By day she shall carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The vessels referred to in this Article when not making way through the water, shall not carry the side lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other vessels as signal that the vessel showing them is not under command and can not therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Article 31.

ART. 5. A sailing vessel under way, and any vessel being towed, shall carry the same lights as are prescribed by Article 2 for a steam vessel under way, with the exception of the white lights mentioned therein which they shall never carry.

ART. 6. Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

ART. 7. Steam vessels of less than 40, and vessels under oars or sails of less than 20, tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in Article 2 (*a*) (*b*) and (*c*), but if they do not carry them they shall be provided with the following lights:—

1. Steam vessels of less than 40 tons shall carry:
   (*a*) In the fore part of the vessel, or on or in front of the funnel where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in Article 2 (*a*), and of such a character as to be visible at a distance of at least 2 miles.
   (*b*) Green and red side-lights constructed and fixed as prescribed in Article 2 (*b*) and (*c*), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right ahead to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.
2. Small steamboats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern, mentioned in sub-division 1 (*b*).
3. Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or to other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.
4. Rowing boats, whether under oars or sail, shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.

The vessels referred to in this Article shall not be obliged to carry the lights prescribed by Article 4 (*a*) and Article 11, last paragraph.

ART. 8. Pilot vessels, when engaged on their station on pilotage duty shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed 15 minutes.

On the near approach of or to other vessels they shall have their side-lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot-vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show the white light instead of carrying it at the masthead, and may, instead of the coloured lights above mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when not engaged on their station on pilotage duty, shall carry lights similar to those of other vessels of their tonnage.

ART. 9.*

ART. 10. A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

The white light required to be shown by this Article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, *viz.*, for 6 points from right aft on each side of the vessel, so as to be visible at a distance of at least 1 mile. Such light shall be carried as nearly as practicable on the same level as the side-lights.

ART. 11. A vessel under 150 feet in length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern so constructed as to show a clear, uniform, and unbroken light visible all round the horizon at a distance of at least 1 mile.

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20, and not exceeding 40, feet above the hull, one such light and at or near the stern of the vessel, and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing in her certificate of registry.

A vessel aground in or near a fairway shall carry the above light or lights and the two red lights prescribed by Article 4 (*a*).

ART. 12. Every vessel may, if necessary in order to attract attention, in addition to the lights which she is by these Rules required to carry, show a flare-up light or use any detonating signal that cannot be mistaken for a distress signal.

ART. 13. Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or

* *This Article will deal with regulations affecting fishing boats, and will be the subject of another Order, which will be submitted to Her Majesty for approval at a later date.*

that, on and after the 1st day of July, 1897, the Regulations or Rules as to signals of distress contained in the Schedule to the said Order in Council dated the 11th day of August, 1884, shall be annulled and the rules as to signals of distress contained in Schedule II hereto annexed shall be substituted therefor and come into operation as regards British ships and boats.

C. L. PEEL.

SCHEDULE I.

Preliminary.

These Rules shall be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

In the following Rules every steam vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam vessel.

The word "steam vessel" shall include any vessel propelled by machinery.

A vessel is "under way" within the meaning of these Rules, when she is not at anchor, or made fast to the shore or aground.

Rules concerning Lights, &c.

The word "visible" in these Rules, when applied to lights, shall mean visible on a dark night with clear atmosphere.

ARTICLE 1. The Rules concerning lights shall be complied with in all weathers from sunset to sunrise and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

ART. 2. A steam vessel when under way shall carry—

(*a*) On or in front of the foremast, or if a vessel without a foremast, then in the fore part of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, *viz.*, from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(*b*) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

(*c*) On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

(*d*) The said green and red side-lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

(*e*) A steam vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (*a*). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

ART. 3. A steam vessel when towing another vessel shall, in addition to her side-lights, carry two bright white lights in a vertical line one over the other, not less than 6 feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in Article 2 (*a*), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

ART. 4. (*a*.) A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in Article 2 (*a*), where they can best be seen, and, if a steam vessel, in lieu of that light two red lights, in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles; and shall by day carry in a vertical line one over the other not less than 6 feet apart, where they can best be seen, two black balls or shapes each 2 feet in diameter.

(*b*) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in Article 2 (*a*), and if a steam vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon, at a distance of at least 2 miles. By day she shall carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The vessels referred to in this Article when not making way through the water, shall not carry the side lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other vessels as signal that the vessel showing them is not under command and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Article 31.

ART. 5. A sailing vessel under way, and any vessel being towed, shall carry the same lights as are prescribed by Article 2 for a steam vessel under way, with the exception of the white lights mentioned therein which they shall never carry.

ART. 6. Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

ART. 7. Steam vessels of less than 40, and vessels under oars or sails of less than 20, tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in Article 2 (*a*) (*b*) and (*c*), but if they do not carry them they shall be provided with the following lights:—

1. Steam vessels of less than 40 tons shall carry:

   (*a*) In the fore part of the vessel, or on or in front of the funnel where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in Article 2 (*a*), and of such a character as to be visible at a distance of at least 2 miles.

   (*b*) Green and red side-lights constructed and fixed as prescribed in Article 2 (*b*) and (*c*), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right ahead to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.

2. Small steamboats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern, mentioned in subdivision 1 (*b*).

3. Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or two other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

4. Rowing boats, whether under oars, or sail, shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.

The vessels referred to in this Article shall not be obliged to carry the lights prescribed by Article 4 (*a*) and Article 11, last paragraph.

ART. 8. Pilot vessels, when engaged on their station on pilotage duty shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed 15 minutes.

On the near approach of or to other vessels they shall have their side-lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot-vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show the white light instead of carrying it at the masthead, and may, instead of the coloured lights above mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when not engaged on their station on pilotage duty, shall carry lights similar to those of other vessels of their tonnage.

ART. 9.*

ART. 10. A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

The white light required to be shown by this Article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, *viz.*, for 6 points from right aft on each side of the vessel, so as to be visible at a distance of at least 1 mile. Such light shall be carried as nearly as practicable on the same level as the side-lights.

ART. 11. A vessel under 150 feet in length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern so constructed as to show a clear, uniform, and unbroken light visible all round the horizon at a distance of at least 1 mile.

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20, and not exceeding 40, feet above the hull, one such light and at or near the stern of the vessel, and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing in her certificate of registry.

A vessel aground in or near a fairway shall carry the above light or lights and the two red lights prescribed by Article 4 (*a*).

ART. 12. Every vessel may, if necessary in order to attract attention, in addition to the lights which she is by these Rules required to carry, show a flare-up light or use any detonating signal that cannot be mistaken for a distress signal.

ART. 13. Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or

* *This Article will deal with regulations affecting fishing boats, and will be the subject of another Order, which will be submitted to Her Majesty for approval at a later date.*

for vessels sailing under convoy, or with the exhibition of recognition signals adopted by shipowners, which have been authorized by their respective Governments and duly registered and published.

ART. 14. A steam vessel proceeding under sail only, but having her funnel up, shall carry in daytime, forward, where it can best be seen, one black ball or shape 2 feet in diameter.

Sound-Signals for Fog, etc.

ART. 15. All signals prescribed by this Article for vessels under way shall be given :

1. By "steam vessels" on the whistle or siren.

2. By "sailing vessels and vessels towed" on the fog-horn.

The words "prolonged blast" used in this Article, shall mean a blast of from 4 to 6 seconds' duration.

A steam vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog-horn, to be sounded by mechanical means, and also with an efficient bell.* A sailing vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog-horn and bell.

In fog, mist, falling snow, or heavy rain storms, whether by day or night, the signals described in this Article shall be used as follows, *viz.* :—

(*a*) A steam vessel having way upon her, shall sound, at intervals of not more than 2 minutes, a prolonged blast.

(*b*) A steam vessel under way, but stopped and having no way upon her, shall sound, at intervals of not more than 2 minutes, 2 prolonged blasts, with an interval of about 1 second between them.

(*c*) A sailing-vessel under way shall sound, at intervals of not more than 1 minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*d*) A vessel, when at anchor, shall, at intervals of not more than 1 minute, ring the bell rapidly for about 5 seconds.

(*e*) A vessel, when towing, a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these Rules shall, instead of the signals prescribed in sub-divisions (*a*) and (*c*) of this Article, at intervals of not more than 2 minutes, sound three blasts in succession, *viz.*, one prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

Sailing-vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than 1 minute.

Speed of Ships to be Moderate in Fog, etc.

ART. 16. Every vessel shall, in a fog, mist, falling snow, or heavy rain-storms, go at a moderate speed having careful regard to the existing circumstances and conditions.

A steam vessel hearing, apparently forward of her beam, the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

Steering and Sailing Rules.

Preliminary—Risk of Collision.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

ART. 17. When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, *viz.* :—

(*a*) A vessel which is running free shall keep out of the way of a vessel which is close hauled.

(*b*) A vessel which is close-hauled on the port tack shall keep out of the way of a vessel which is close-hauled on the starboard tack.

(*c*) When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free, with the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.

(*e*) A vessel which has the wind aft shall keep out of the way of the other vessel.

ART. 18. When two steam vessels are meeting end on, or nearly end on, so as to involve risk of collision each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other; in other words, to cases in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own; and, by night, to cases in which each vessel is in such a position as to see both the side-lights of the other.

* In all cases where the Rules require a bell to be used a drum may be substituted on board Turkish vessels, or a gong where such articles are used on board small sea-going vessels.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or by night, to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen any where but ahead.

ART. 19. When two steam vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

ART. 20. When a steam vessel and a sailing vessel are proceeding in such directions, as to involve risk of collision, the steam vessel shall keep out of the way of the sailing vessel.

ART. 21. Where by any of these Rules one of two vessels is to keep out of the way, the other shall keep her course and speed.

Note.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision. (See Articles 27 and 29.)

ART. 22. Every vessel which is directed by these Rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

ART. 23. Every steam vessel which is directed by these Rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

ART. 24. Notwithstanding anything contained in these Rules, every vessel, overtaking any other, shall, keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than two points abaft, her beam, *i.e.*, in such a position, with reference to the vessel which she is overtaking, that at night she would be unable to see either of that vessel's side-lights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

ART. 25. In narrow channels every steam vessel shall, when it is safe and practicable, keep to that side of the fair-way or mid channel which lies on the starboard side of such vessel.

ART. 26. Sailing vessels under way shall keep out of the way of sailing vessels or boats fishing with nets or lines, or trawls. This Rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing-vessels or boats.

ART. 27. In obeying and construing these Rules, due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above Rules necessary in order to avoid immediate danger.

Sound Signals for Vessels in Sight of one Another.

ART. 28. The words "short blast" used in this Article shall mean a blast of about one second's duration.

When vessels are in sight of one another, a steam vessel under way, in taking any course authorized or required by these Rules, shall indicate that course by the following signals on her whistle or siren, *viz.*:—

One short blast to mean, "I am directing my course to starboard."
Two short blasts to mean, "I am directing my course to port."
Three short blasts to mean, "My engines are going full speed astern."

No Vessel under any Circumstances to neglect proper Precautions.

ART. 29. Nothing in these Rules shall exonerate any vessel, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

ART. 30. Nothing in these Rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland waters.

SCHEDULE II.

Distress Signals.

ART. 31. When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately; *viz.*:—

In the daytime—
1. A gun or other explosive signal fired at intervals of about a minute;
2. The International Code signal of distress indicated by N C;
3. The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball;
4. A continuous sounding with any fog-signal apparatus.

At night—
1. A gun or other explosive signal fired at intervals of about a minute;
2. Flames on the vessel (as from a burning tar-barrel, oil-barrel, etc.);
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals;
4. A continuous sounding with any fog-signal apparatus.

Ordered that the Orders in Council be published in the *Gazette of India*.

STAMPS.

The 20th January, 1897.

No. 342-S. R.—In exercise of the powers conferred by section 8 of the Indian Stamp Act (I of 1879) the Governor General in Council is pleased to remit the whole of the duties chargeable under the said Act on instruments, executed after this date and prior to the 1st of January 1898, for securing the repayment of loans made by landlords to their tenants or persons holding under their tenants for any of the objects specified in section 4 of the Land Improvements Loans Act (XIX of 1883) or in section 4 (1) of the Agriculturists' Loans Act (XII of 1884).

Provided that the exemption conferred by this Notification—

(1) shall extend only to such distressed areas as the Local Government may by notification in the Local Official Gazette declare in this behalf, and

(2) shall apply only to instruments in which—

(*a*) the object for which the loan is made is set forth in the body of the instrument, and

(*b*) the rate of interest reserved on the loan does not exceed four *per cent per annum*.

STATISTICS AND COMMERCE.

CUSTOMS.

The 22nd January, 1897.

No. 389.-S. R.—In exercise of the power conferred by section 19 of the Sea Customs Act (VIII of 1878) and of all other powers in that behalf, the Governor General in Council is pleased to prohibit the bringing of rags and second-hand clothing by sea into any of the ports of Madras, Calcutta, and Rangoon, unless the Collector of Customs at Madras, Calcutta, or Rangoon, as the case may be, is satisfied that the said goods have not been exported from any port* with regard to which rules for quarantine against plague have been issued under section 1 of Act I of 1870.

* (NOTE.—The ports with regard to which such rules for quarantine have as yet been issued are Bombay and Karachi.)

No. 32.—The following is published for general information :—

No. 46 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 15th January, 1897.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government, therewith promulgated.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 4952, dated the 21st December 1896, forwarding letter from the Agent of the East Indian Railway Company, No. 1411 G., dated the 15th December 1896.

OBSERVATIONS.—The Agent of the East Indian Railway Company has applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Moghal Sarai-Gya extension railway.

RESOLUTION.—The Governor General in Council is pleased to sanction the application to the Moghal Sarai-Gya extension railway, from such date as the said railway may be opened for the public carriage of passengers, animals or goods, of the General Rules which may, for the time being, be in force on the East Indian railway.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance.

The 22nd January, 1897.

No. 36.—The following is published for general information :—

No. 73 R. T.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules, therewith promulgated, for all open lines of railway in British India administered by the Government.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Government of Bombay, Public Works Department, No. 92, dated the 12th January 1897, forwarding letter from the Resident Engineer and Agent, Barsi Light Railway, No. 66, dated the 8th January 1897.

OBSERVATIONS.—The Resident Engineer and Agent of the Barsi Light Railway Company has applied that the General Rules for working open lines of railway in British India, which were published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated the 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Barsi Light railway.

RESOLUTION.—The Governor General in Council is pleased to sanction, with effect from the 15th February 1897, the application of the General Rules cited in the foregoing observations to such portions of the Barsi Light railway as are situate in British territory.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3), of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Government of Bombay, Public Works Department, for information and guidance.

* TELEGRAPH.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 21st January 1897.

NOTIFICATIONS.

No. 234 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 16th January 1897:—

No. 11 of 1897.—Gustav Willibald Hansen, agriculturist, of 4, Hedwigstrasse, Halle-on-Saale, in the German Empire, for improvements in, and relating to, the manufacture of water-proof dubbing for leather and leather goods.

No. 12 of 1897.—Emile Sterné, civil engineer, of 3 bis, rue d'Athènes, Paris, for an improved process and apparatus for the manufacture of strong metal capsules or containers, capable of sustaining great internal pressure and provided with small necks having fine inlet apertures.

No. 13 of 1897.—Aerators, Limited, of Broad street avenue, London, for an apparatus for filling and closing metal capsules or containers submitted to great internal pressure and having fine necks with small inlet apertures.

No. 14 of 1897.—John Finley Wilts, merchant, of Montclair, in the county of Essex, and state of New Jersey, United States of America, for improvements in box fasteners.

No. 15 of 1897.—James Shennan Kirkpatrick, railway officer, of 2, Commercial Chambers, Manse street, Dunedin, in the colony of New Zealand, for an improved starting, interlocking block semaphore.

No. 16 of 1897.—Robert William Rutherford, manufacturer, and John Alfred Jackson, cigarette manufacturer, both of 2, Commercial Chambers, Manse street, Dunedin, in the colony of New Zealand, for improvements in means for lighting cigars and cigarettes.

No. 17 of 1897.—Henry William Tickner Doggett, draper, and James McChesney, builder, both of 54, Lambton quay, in the city of Wellington, in the colony of New Zealand, for an improved checking apparatus to prevent horses from running away.

No. 17A of 1897.—Henry Thomas Freemantle, foreman platelayer, Perak State Railway, residing at Teluk Anson, Perak, Straits Settlements, for working punkahs without manual labour.

No. 18 of 1897.—Charles Lancelot Garland, gentleman, of Sydney, in the colony of New South Wales, for an

improved chainless driving gear for cycles and like vehicles.

No. 19 of 1897.—Edward Lennon Cantwell, consulting engineer and patent agent, of No. 5, Old Post Office Street, Calcutta, for improvements in cart and other vehicle wheels.

No. 235 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No 390 of 1895.—Angus McEwan, engineer, and Daniel Miller, assistant, Tuticorin, for a door and window spring clip fastener. (Specification filed 14th August 1896.)

No. 53 of 1896.—William Phillips Hall, president of the Hall Signal Company, of No. 80, Broadway, New York city, in the county and state of New York, United States of America, for improvements in railway signalling systems. (Specification filed 8th January 1897.)

No. 184 of 1896.—George Ainsworth, Government pensioner, residing at the Hope Hall Estate, Mazagaon, Bombay, for fastening and sealing corked bottles, so that they cannot be uncorked and the contents extracted without seriously damaging the seal. (Specification filed 14th January 1897.)

No. 205 of 1896.—Messrs. Schnek and Kohnberger, of 1, Schottenring, 23, Vienna, in the Empire of Austria, for improvements in, or relating to, the manufacture of stays or corsets. (Specification filed 8th January 1897.)

No. 236 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 207 of 1889.—Robert Henry Cave, of Khawaspore factory, Gondwarrah concern, Purneah, Bengal, for improvements in, and connected with, indigo and other boilers. (From 6th February 1897 to 6th February 1898.)

No. 290 of 1889.—Alexander Stanley Elmore, electro-metallurgist, of Cockermouth in the county of Cumberland, for improvements in the electro-deposition of metals, and in apparatus used therein. (From 8th February 1897 to 8th February 1898.)

No. 82 of 1890.—Edwin Marsh, engineer, of Hull street, Green road, Leeds, for improvements in, or connected with, all kinds of fires, furnaces and steam boilers. (From 23rd January 1897 to 23rd January 1898.)

No 96 of 1890.—The Engelberg Huller Company, a corporation organized under the laws of the state of

West Virginia, United States of America, and having its principal place of business at Syracuse, in the county of Onondaga, and state of New York, United States of America, for a machine for hulling, cleaning, and polishing rice and other grain. (From 2nd March 1897 to 2nd March 1898.)

No. 158 of 1890.—Sorabji Muncherji Rutnagur, cotton spinner and weaver, of Grant road, Bombay, for an improved oil lamp or *batti*. (From 19th January 1897 to 19th January 1898.)

No. 240 of 1892.—Frederick Reilly, executive engineer, Public Works Department, North-Western Railway, Saharanpore, for rigidly connecting gates at road level crossings over railways. (From 18th November 1896 to 18th November 1897.)

No. 289 of 1892.—John William Fawcett, engineer's fitter, of Gooder lane, Rastrick, in the county of York, and Ernest Jones, wire card nailer, of Whitcliffe, Cleckheaten, in the county aforesaid, for improvements in appliances for securing card clothing to the flats of flat carding engines. (From 1st June 1897 to 1st June 1898.)

No. 237 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 252 of 1891.—William Frederick Peel's invention for improvements in attaching firearms to cavalry harness, and in manipulating and firing the same. (Specification filed 11th October 1892.)

No. 76 of 1892.—Charles Raleigh's invention for improvements in screens or sieves for use in stamp-batteries, and otherwise for the separation of ore and other substances. (Specification filed 14th October 1892.)

No. 134 of 1892.—Hamor Lockwood's invention for improvements in, or connected with, the purification of sewage, and other foul waters. (Specification filed 11th October 1892.)

No. 157 of 1892.—August Schuite im Hofe's invention for a new process of indigo manufacture. (Specification filed 10th October 1892.)

No. 158 of 1892.—Samuel Cleland Davidson's invention for improvements in the manufacture of tea leaf into black tea. (Specification filed 14th October 1892.)

No. 186 of 1892.—Walter Swain and William Philipson's invention for improvements in the construction of tyres for bicycles, tricycles, and other road vehicles. (Specification filed 11th October 1892.)

No. 237 of 1892.—James Charles Potter's invention for improvements in feeding mechanism for machinery for opening, cleaning, and preparing cotton or other fibrous material. (Specification filed 13th October 1892.)

No. 238 of 1892.—James Charles Potter's invention for improvements in feeding mechanism for machinery for opening and preparing cotton or other fibrous material. (Specification filed 13th October 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

BOARD OF REVENUE, MADRAS.

CALCUTTA POST OFFICE NOTICE.

Mails for	Date of closing at Calcutta	Route by which despatched
	1897.	
Aden, Egypt, Europe, America, Zanzibar, Seychelles, Mozambique, and in general all countries served through the United Kingdom.	27th Jan.	Per P. & O. Str. from Bombay.
Parcels for the United Kingdom and other Foreign places.	26th ,,	Ditto.
*Australasian Colonies . .	29th ,,	*Vid* Tuticorin and Colombo *
Straits Settlements, China, and Japan.	26th ,,	Per Steamer *Lightning*.
Rangoon and Moulmein . .	28th ,,	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	25th ,,	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	30th ,,	Ditto.
Ditto ditto ditto .	23rd ,,	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	27th ,,	Ditto.
Port Blair	25th ,,	*Vid* Rangoon.
Mauritius, Réunion, Mayotte, Nossi Be, Madagascar, Delagoa Bay, Natal, and Cape Colony.	29th ,,	*Vid* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the Steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *vid* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,
Presidency Postmaster, Calcutta.

CEMETERY NOTICE.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows :—

1-pound tin, R18, or, post free, R18-12.

½ „ R 9, „ R9-8.

¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮, বা ডাকমাশুল বিনা ১৮৷৹

½ আধ „ „ ৯, „ ৯৷৹

¼ সিকি „ „ ৪৷৮, „ ৫,

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের বোটানিক বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt at R62 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required :—

VOLUME I.*

Section	I.	Building Materials (1895),	R2-0.
„	II.	Masonry (1891),	R1-4.
„	III.	Carpentry (1889),	R1-4.
„	IV.	Earthwork (1892),	R1-4.
„	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings (1891),	R1-4.
„	VII.	Bridges (in the Press).	
„	VIII.	Roads (in the Press).	
„	IX.	Railways (1891),	R1-4.
„	X.	Irrigation Works (1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8.

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII. Drawing (by Lieut. R. Pulford, R.E.).† R8.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8*a*.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4*a*.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6*a*.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8*a*.; mounted on cloth and bound (in the Press). R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. R1-4.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. 4*a*.

Wooden Bridges and Designs. By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12*a*.

* Date of Edition on sale.

† Originally published at R15, reduced to R8.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 0a.

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E. R2-4.

Graphic Hydraulic Diagram for Channels in earth, etc. By R. G. Kennedy, Esq, Executive Engineer. R7-8

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time), 4a.

Cape's Logarithms, with Tables of Squares, Cubes etc. (in the Press).

Cape's Geometry. R1-4.

" Mechanics. R1.

Military Topography. 8a.

HINDUSTANI.

Elements of Hindustani Grammar (in the Press).

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II, each part 4a.

Short Account of Ganges Canal (English and Urdu). 8a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small. Each R1-4.
Surveying Field-Books (ruled). R1.
Levelling Field-Books (English Pattern). R1-8.
" " (Canal "). R1-8.

Rajputana, 4 Plans,
British Burma, 19 Plans,
Central Provinces,

each 8a.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly Nos. 1 to 5), bound R2, original price R18.
Quarterly Nos. 1, 2, 3, 4, and 5, at R1 each, original price R4 each.
Vol. II, Quarterly Nos. 6 and 7, at R1 each.
" III, " No. 13, R1.
" V, " Nos. 18, 19, 20, and 21, R1 each.
" VI, " Nos. 22, 23, 24, and 25, R1 each.
" VII, " Nos. 26, 27, 28, and 29, R1 each.
Extra No., April 1870, R1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each
Quarterly Number 41A of Vol. X, at R1 each.
Cloth covers for Volumes 1st and 2nd Series, at As. 8 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each
Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a. each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

* These include Question Papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . ₹22-8

The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE SIX MONTHS ENDING WITH THE 30th JUNE 1896.

No. 42 R. Stat., dated Calcutta, the 16th January 1897.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Government of India order No. 242 R. Stat., dated the 9th July 1896.

Read also—

The following note by the Director General of Railways, No. 17 Stat., dated the 12th January 1897, with abstract returns of accidents to trains, etc., on the open lines of railway in India for the six months ending with the 30th June 1896.

I.—Accidents to trains, rolling stock, permanent-way, etc.

Accidents to trains, rolling stock, permanent-way, etc., during the six months ending with the 30th June 1896, as shown under abstract No. 4, on pages 14 and 15 of the accompanying returns, caused the death of 20 and injury to 84 persons. The number of persons (both killed and injured) was above the figure reported during the corresponding period of the previous year, while the number of accidents also showed a heavy increase, as will be seen from the following table, which compares the total number of accidents and the casualties resulting therefrom with the corresponding period of the previous year under the heads "Standard gauge," "Metre gauge" and "Special gauges." The increase under the number of persons killed was mainly due to 11

passengers having been burnt in the accident on the East Indian railway on the 27th April ; and in the number injured to the fact that 32 passengers were injured in one accident on the Eastern Bengal (state) railway, standard gauge, on the 8th February 1896.

	Number.			Number of passengers and others.		Number of servants.		Total all classes.	
	Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890.)	Other accidents.	Total.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard gauge.									
Six months ending with the 30th June 1896	40	1,446	1,495	(a)16	(b)47	1	25	17	72
Corresponding period of 1895	46	1,334	1,380	(c) 9	(d)30	5	12	14	42
Metre gauge.									
Six months ending with the 30th June 1896	71	1,185	1,256	(e) 2	(f)8	1	3	3	11
Corresponding period of 1895	25	1,179	1,204	(e) 2	(b) 8	...	3	2	11
Special gauges.									
Six months ending with the 30th June 1896	7	28	35	...	...	...	1	...	1
Corresponding period of 1895	...	30	30	...	...	...	1	...	1
Total all gauges for the six months ending with the 30th June 1896	127	2,659	2,786	(d)18	(g)55	2	29	20	84
Corresponding period of 1895	71	2,543	2,614	(h)11	(i)38	5	16	16	54

2. It will be seen from the table below that with an increase of 3·81 per cent. in the mean mileage worked and a decrease of 3·09 per cent. in the train-mileage run during the six months ending with the 30th June 1896, the number of accidents increased by 172 or 6·58 per cent. as compared with the corresponding period of the previous year :

	Increase or decrease, as compared with the corresponding period of the previous year.					
	Accidents.		Mean mileage.		Train-mileage.	
	No.	Per cent.	Miles.	Per cent.	Miles.	Per cent.
Standard	+115	+8·33	+382	+3·47	—891,476	—3·65
Metre	+52	+4·32	+339	+4·43	—218,296	—2·03
Special	+5	+16·67	+1	+0·38	+14,049	+5·82
Total	+172	+6·58	+722	+3·81	—1,095,723	—3·09

3. From the detailed classification it appears that, compared with the increase in the total number of accidents, there were large variations in the number of accidents of different classes on the standard and metre gauge rail-

(a) Of these, five were not passengers.
(b) Of these, four were not passengers.
(c) Of these, one was not a passenger.
(d) Of these, seven were not passengers.
(e) Not passengers.
(f) Of these, two were not passengers.
(g) Of these, six were not passengers.
(h) Of these, three were not passengers.
(i) Of these, eleven were not passengers.

ways, as compared with the corresponding period of the previous year, as will be seen from the following statement:

Gauge and classification.	Increase or decrease.			Percentage of increase or decrease
	Serious.	Minor.	Total.	
Standard gauge.				
Collisions between goods trains or parts of goods trains	−3	−40	−43	−75·44
Goods trains or parts of goods trains, engines, etc., leaving the rails.	−12	−25	−37	−34·91
Trains or engines travelling in the wrong direction through points.	+1	+31	+32	+133·33
Trains running over cattle on the line	+2	+40	+42	+7·13
Trains running over obstructions on the line	−2	−22	−24	−36·36
The bursting of tubes, etc., of engines	−1	+40	+39	+62·90
The failure of machinery, springs, etc, of engines	...	+43	+43	+26·54
Fire in trains	...	+38	+38	+76·00
Under the head "Other accidents"	+5	+19	+24	+32·00
Metre gauge.				
Collisions between goods trains or parts of goods trains	−3	−19	−22	−88·00
Goods trains or parts of goods trains, engines, etc., leaving the rails.	+3	−15	−12	−18·75
Trains running over cattle on the line	+10	+50	+60	+9·33
The failure of machinery, springs, etc., of engines	+1	+32	+33	+41·25
Fire in trains	−1	−14	−15	−31·25

It will be observed from the foregoing, that the principal increases on the standard gauge lines occurred under "Trains or engines travelling in the wrong direction through points," 32 accidents or 133·33 per cent., partly due to more accurate classification; under "Trains running over cattle on the line," 42 accidents or 7·13 per cent., partly due, it is stated, to the drought and consequent scarcity of fodder, villagers having in many cases driven their cattle on to the railway line to graze; under "The bursting of tubes, etc., of engines," 39 accidents or 62·90 per cent; under "The failure of machinery, springs, etc., of engines," 43 accidents or 26·54 per cent.; under "Fire in trains," 38 accidents or 76·00 per cent.; and under the head "Other accidents," 24 accidents or 32·00 per cent.; and on the metre gauge railways under "Trains running over cattle on the line," 60 accidents or 9·33 per cent., possibly due to the cause noted above and partly also to the opening of new lines; and under "The failure of machinery, springs, etc., of engines," 33 accidents or 41·25 per cent.

4. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 218; next to that line comes the South Indian railway with 190, then the East Indian railway with 131, the North Western (state) railway with 108, the Rajputana-Malwa railway with 102, the Madras railway with 87, the Eastern Bengal (state) railway (standard gauge section) with 78, the Indian Midland railway with 46 and the Eastern Bengal (state) railway (metre gauge section) with 44.

In relation to the train-mileage run, the number was highest on the Oodeypore-Chitor railway, which gave an average of 1 accident in 5,993 train-miles run; the Bengal Dooars railway coming next with an average of 1 in 6,123; then the Dibru-Sadiya, the Assam-Bengal, the Southern Mahratta and the Jodhpore-Bickaneer railways with averages of 1 in 6,730, 1 in 6,795, 1 in 8,210 and 1 in 8,996, respectively.

The lowest number recorded relatively to the train-mileage run was on the Great Indian Peninsula railway, *viz.*, 1 in 187,604 train-miles, the Dárjeeling-Himalayan railway coming next with 1 in 97,886, then the Bombay, Baroda and Central India railway with 1 in 88,666, the Bengal-Nágpur railway with 1 in 52,496, the Gaekwar's Dabhoi railway with 1 in 51,488 and the East Indian railway with 1 in 45,961.

5. Under the head "Trains or engines travelling in the wrong direction through points," the largest number, *viz.*, 31, occurred on the Great Indian Peninsula railway; under "The bursting of tubes, etc., of engines," the largest number, *viz.*, 56, occurred on the Madras railway, next to that line comes the North Western (state) railway with 30 accidents; under "The failure of machinery, springs, etc., of engines," the largest number, *viz.*, 64, occurred on the Bombay, Baroda and Central India railway, next to that line come the Great Indian Peninsula and the East Indian railways with 53 and 41 accidents on each, respectively; under "Fire in trains," the largest number occurred on the Great Indian Peninsula railway, *viz.*, 34 accidents, next to that line comes the Madras railway with 24 accidents; and under the head "Other accidents," the largest number, *viz.*, 30, occurred on the Great Indian Peninsula railway, next to that line come the North Western (state) and the Bombay, Baroda and Central India railways with 20 accidents on each; under the head "The failure of machinery, springs, etc., of engines," although, as noticed above, the largest number of accidents occurred on the Bombay, Baroda and Central India railway, standard gauge, *viz.*, 64, the metre gauge lines also showed an increase, the largest number on these railways having been on the Southern Mahratta railway, *viz.*, 27.

In relation to the train-mileage run, the total number of accidents was highest on the Jorhát (state) railway, which gave an average of 1 accident in 1,673 train-miles; next to that line comes the Dibru-Sadiya railway, with an average of 1 accident in 2,771 train-miles; then the Bengal Dooars, the Assam-Bengal, the Oodeypore-Chitor, the Southern Mahratta and the Rohilkund and Kumaon (including the Lucknow-Bareilly section) railways with averages of 1 in 3,499, 1 in 4,181, 1 in 4,795, 1 in 5,311 and 1 in 5,403, respectively.

The lowest number recorded relatively to the train-mileage run was on the Bengal-Nágpur railway, *viz.*, 1 in 24,704 train-miles, the East Indian railway coming next with 1 in 23,247, then the Great Indian Peninsula railway with 1 in 22,158, the Oudh and Rohilkhand (state railway with 1 in 21,871, the North Western (state) railway with 1 in 16,588 and the Rajputana-Malwa railway with 1 in 13,971.

II.—Accidents from other causes not involving accidents to trains, etc.

6. In addition to those included in Division I, the casualties to passengers, servants in the employ of railways or of contractors and to others, from causes not involving accidents to trains (which are detailed in Abstract No. 2) are compared, separately, for each gauge, with the corresponding period of the previous year in the table below.

Gauges.	Six months ending with the 30th June 1896.								Corresponding period of the previous year.							
	Passengers.		Servants.		Others.		Total.		Passengers.		Servants.		Others.		Total.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard	19	70	50	99	167	29	236	198	34	58	54	135	144	40	232	233
Metre	14	21	24	43	73	22	111	86	8	27	19	42	66	19	93	88
Special	...	...	...	3	...	...	...	3	...	1	...	3	1	1	1	5
Total	33	91	74	145	240	51	347	287	42	86	73	180	211	60	326	326

It will be seen from the foregoing table that, except under "Passengers—injured" and "Others—killed," the number of persons killed and injured compares favourably with that reported during the corresponding period of the previous year.

III.—Statistical results.

7. The following table gives certain statistical results for the period under review, comparing the number of passengers killed and injured by accidents to trains and from all causes with the number carried and the number of passenger units carried one mile. Comparative results for the corresponding period of the previous year are also given:

Particulars.	Six months ending with the 30th June 1896.				Corresponding period of the previous year.			
	Standard.	Metre.	Special.	Total.	Standard.	Metre.	Special.	Total.
Mean mileage worked . . . Miles.	11,387	7,91	26,	19,652	11,005	7,050	260	18,936
Train-mileage run . . . Miles.	23,549,80	10,521,47	255,23	34,326,581	24,441,343	10,733,773	241,180	35,422,304

Proportion of above to number carried . . . . . No.	1 in 1,127,779	1 in 4,913,075	...	1 in 1,605,655	1 in 1,915,213	1 in 6,947,330		1 in 2,678,057
Number of passengers killed from all causes . . . . . No.	30	14	...	44	42	8	...	50
Proportion of above to number carried . . . . . No.	1 in 1,616,483	1 in 2,118,461	..	1 in 1,788,113	1 in 1,048,807	1 in 3,173,665	...	1 in 1,449,151
Number of passengers injured from all causes . . . . . No.	113	27	...	140	81	31	1	113
Proportion of above to number carried . . . . . No.	1 in 429,155	1 in 1,098,461	...	1 in 561,979	1 in 543,826	1 in 896,420	1 in 468,311	1 in 639,890
Number of passengers killed and injured from all causes . . No.	143	41	...	184	123	39	1	163
Proportion of above to number carried . . . . . No.	1 in 339,122	1 in 723,377	...	1 in 427,503	1 in 365,430	1 in 712,547	1 in 468,311	1 in 443,604
Proportion of passengers killed and injured from all causes to number of passenger units carried one mile . . . . . No.	1 in 16,024,097	1 in 27,702,582	...	1 in 18,714,927	1 in 16,879,140	1 in 27,832,496	1 in 12,521,194	1 in 19,474,969

It will be seen that the comparison is generally unfavourable, for the reasons explained in paragraph 1 (1) *ante*.

IV.—Number of persons killed and injured by accidents to trains, rolling stock, etc., during the second quarter of 1896.

8. The following table gives the number of accidents, as classified in abstract No. 4 of the returns, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred :

Railway.	Number of accidents reported during the 2nd quarter of 1896.	Passengers and others		Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard gauge.							
East Indian	3	11	4	...	2	11	6
North Western (state)	4		1	...	3	..	4
Oudh and Rohilkhand (state)	1	1	1	..	...	1	1
East Coast (state)	1	1	...	...	...	1	...
Great Indian Peninsula	4	2	1	1	2	3	3
Bombay, Baroda and Central India	2	...	2	...	2	...	4
Metre gauge.							
Bengal and North-Western	1	..	1	...	..	...	1
Eastern Bengal (state)	2	...	5	1	1	1	6
Total	18	15	15	2	10	17	25
Corresponding quarter of 1895	19	8	31	...	10	8	40

The increase in the total number of persons killed during the second quarter of 1896, as compared with the corresponding quarter of the previous year, is due to the occurrence of a fire in a passenger train on the 27th April 1896, on the East Indian railway, and the decrease in the number of persons injured to the occurrence of serious collisions on the 29th May 1895 on the North Western (state) and on the 14th April 1895 on the Oudh and Rohilkhand (state) railways.

9. A brief description of accidents which resulted in loss of, or injury to, life and limb, is given below :

East Indian railway.—On the 25th April 1895, a door of a compartment of a carriage attached to a down passenger train having remained open, collided with the open door of a wagon standing in a siding at Memári station. A cooly engaged in loading the wagon was injured.

On the 27th April 1896, while the up passenger train was running between Sikandarabad and Dádri stations, some fireworks, which were being surreptitiously carried by a third class passenger in his personal luggage for use at a marriage party, suddenly exploded. One third class and one composite third class and postal van and the mails in the latter were completely destroyed by the fire, and 15 passengers injured. Eleven of these passengers subsequently died.

On the 30th May 1896, a collision took place at Ásansol station between an up goods train and a pilot engine, owing to the latter having started without orders. A railway servant was injured.

North Western (state) railway.—On the 2nd April 1896, a travelling crane was derailed in the Piprí station yard, owing to its being out of order and not being manned by trained men. A cooly was injured.

On the 19th May 1896, an up mail train ran over a camel at the level-crossing at mile $\frac{595}{8}$ near Chak flag station. The accident was due to the absence of the gateman. The owner of the camel was injured.

On the 12th June 1896, at mile 1059 between Sarsáwa and Saháranpur stations, the door of a brake-van attached to a down goods train came in contact with the Jumna bridge. A railway servant was injured.

On the 14th June 1896, a sub-platelayer's trolly was run into by a down goods train at mile $\frac{1082}{13}$ between Bhuchchu and Rámpura-Phúl stations, owing to the trollymen not being able to take the trolly off the line in time. A trolly-man was injured.

Oudh and Rohilkhand (state) railway.—On the 14th June 1896, an up mail train ran into a bullock cart at the level-crossing at mile 508. A boy was killed and a man injured.

East Coast (state) railway.—On the 24th May 1896, a bullock cart was run into by an up goods train at the level-crossing at mile 45—11 between Ellore and Bhímadól stations. The cartman was killed.

Great Indian Peninsula railway.—On the 15th April 1896, an up tranship train ran into a bullock cart at a level-crossing gate near Kalyán station, owing to the driver of the cart having probably opened the gate and got on to the line. The cartman was killed.

On the 21st April 1896, an up goods train ran over a cow at mile $\frac{93}{16}$ near Ghoti station, and a woman, in endeavouring to drive the animal off the line, was run over and killed.

On the 29th May 1896, at Igatpuri station, the door of a third class carriage having been opened by a passenger to answer a call of nature came in contact with the pillars of the station. The passenger was injured.

On the 23rd June 1896, a landslip occurred at the south wing No. 2 abutment of the Sukkur viaduct at mile 536½ near Gádarváda station. Three men were buried and seriously injured, one of whom subsequently died.

Bombay, Baroda and Central India railway.—On the 30th April 1896, the engine of an up mail train failed between the home and distant semaphore signals at Navsári station, and the engine of a goods train which had arrived from the opposite direction was sent to assist in backing the mail train on to the platform line. The brakes of the vehicles on the goods train not having been properly pinned down the rake ran forward, there being a decline of 1 in 500, and collided with the two engines. A railway servant was injured.

On the 13th May 1896, the engine of an up train which started from the platform siding at Bándra station without authoritative signals ran past two starting signals at danger, was derailed at points leading into the main line owing to their being set for the dock siding and collided with the empty rake of a down train which was being backed into the dock siding from the main line. Two passengers and a railway servant were injured.

Bengal and North-Western railway.—On the 3rd April 1896, an up mixed train ran into an *ekka* at a level-crossing between Sewan and Mairwa stations. The driver of the *ekka* was slightly injured.

Eastern Bengal (state) railway (metre gauge).—On the 6th May 1896, the engine of an up mixed train failed at mile 48 on the Dacca section, owing to a tube, the brazing of which was defective, blowing out of the boiler through the fire-box door on to the tender. The driver was injured and the fireman died subsequently from the effect of injuries received.

On the 9th May 1896, some empty wagons while being shunted on to the main line at Náráyanganj station were admitted into the station line and collided with an up mixed train, through the carelessness of the traffic staff. Four passengers were slightly injured.

ORDER.—Ordered, that the above note, with the abstract returns and appendices thereto, be communicated for information to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam and Coorg.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

Ordered, also, that copies be forwarded for the information of Her Majesty's Government.

Ordered, further, that the above note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

G. A. ANDERSON,
Under Secretary.

Documents accompanying.

Abstract returns of accidents for the six months ending with the 30th June 1896.

Enclosure to Government of India Order No. 42R. Stat., dated the 16th January 1897.

ABSTRACT No. 1.

GENERAL TOTAL.

JMBER of PERSONS reported, during the SIX months ending with the 30th June 1896, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

FINANCE AND COMMERCE DEPARTMENT
5 *January 21, 1897.*

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 9th, 1897.

The disturbances of the week under review were very feeble and ill-defined, and the weather was hence much less unsettled than is frequently the case at this time of year.

During the first two days of the week the atmosphere over India was in a feebly unsettled state, as indicated by the occurrence of light snow on the hills and local thundershowers in the plains. Pressure gave way briskly to rapidly on the North-West frontier on the 5th, and a cold-weather disturbance crossed into India from the Persian-Afghan region. It drifted eastwards along the Himalayas from the 6th to the 8th, and disappeared in Assam on the 9th. The disturbance was throughout its existence very faintly marked, but it gave light snow and rain in Kashmir, the Punjab Himalayas and the submontane districts of the Punjab on the 5th and 6th and in Baluchistan on the 6th and 7th. Fine weather prevailed generally in India during the remainder of the week. Weather was, on the other hand, slightly unsettled in Baluchistan during this period, due to the influence of a cold-weather storm advancing from Persia.

The variations of the mean temperature from the normal were generally small and unimportant, except in Burma, Bombay and Madras, where the air was from 3° to 4° warmer than usual.

Daily Summary.—*Sunday, 3rd January.*—Pressure had increased briskly to rapidly in North-Western India and slightly in the Peninsula and the central parts of the country. Over the remainder of India and in Burma, on the other hand, there had occurred a slight fall of the barometer. Pressure was in general excess of the normal. The excess was small in amount except in North-Western and Central India, where it was considerable to large. The distribution of pressure was of the usual cold-weather type, pressure being highest in the Punjab and lowest in Malabar and Ceylon. Winds were more easterly than usual in the Central Provinces, light and variable in Burma, North-Eastern India and the Madras coast districts and from the usual cold-weather directions in other districts. Skies were more or less clouded over the greater part of India. Light snow had fallen in the Punjab and Kashmir Himalayas and a few scattered showers of rain of no importance on the plains of India.

The mean temperature of the previous 24 hours was in very large defect of the normal in the North-West Himalayas, in moderate to considerable defect in North-Western and Central India, and in moderate to considerable excess in the remainder of India and in Burma.

Monday, 4th January.—The changes of pressure were generally small in amount, except in Kashmir, the Punjab and the adjacent districts of the North-Western Provinces, where pressure had given way briskly to rapidly. The area of highest pressure had been displaced southwards to Rajputana, but in other respects the distribution of pressure was similar to that of the 3rd. Pressure continued above the average, but the amount of excess was not so large as on the previous day. Winds were but little changed. There had been practically no rain beyond a few light local showers in the Central Provinces.

The low temperature conditions had extended eastwards to Bengal and Assam, where temperature had fallen rapidly. Temperature was below the average to the north of a line joining Bhuj and Barisal and in excess of the normal to the south of it.

Tuesday, 5th January.—Pressure had changed generally by small amounts, except in the Indus Valley and West Rajputana, where it had fallen briskly to rapidly, due to the approach of a wave of low pressure from the west. These changes had caused a further displacement of the area of maximum pressure which hence stretched from East Rajputana to Chota Nagpur. Pres-

sure was in slight local defect in Baluchistan, Upper Sind and the South-West Punjab and normal or slightly above it in the remainder of India. Winds had shifted to east and south-east in the Punjab and West Rajputana, but were practically unchanged in most other places. The force was generally light to moderate, but a gale prevailed at Murree. Light snow had occurred on the higher ranges in Kashmir. On the plains of India the only rainfall was a few drops at Rawalpindi, Dera Ismail Khan and Vizagapatam. The distribution of temperature was unaltered.

Wednesday, 6th January.—The feeble wave of low pressure had apparently advanced eastwards to the north-western districts of the North-Western Provinces, where pressure had given way slightly. Pressure had, on the other hand, risen briskly to rapidly in the rear of the wave in Baluchistan and the Upper Indus Valley, thus re-establishing normal high pressure conditions in the Punjab. In other parts of the country the barometric changes had been slight, and did not affect the distribution of pressure to any extent. The air movement was approximately normal both in direction and intensity. Skies were almost free from cloud in Burma, Bengal, Central India, the Central Provinces and Gujarat, and more or less clouded in other districts. Slight snow had again fallen in Kashmir and the Murree Hills and light rain in Baluchistan and at a few stations at the foot of the Punjab Himalayas. The mean temperature of the previous 24 hours was in moderate defect in Bengal and Assam, normal in the North-Western Provinces, the Punjab, and Central India, and more or less in excess of the normal in other divisions. The excess was more than 5° in amount in the area, including the Deccan, Khandesh and the neighbouring districts of the Central Provinces, and was absolutely greatest in Baluchistan, where it averaged as much as 10° at Quetta.

Thursday, 7th January.—The changes of pressure were generally small and unimportant, with the exception of Upper Burma and of the submontane districts from Bareilly to Sibsagar, where pressure had decreased briskly. Pressure was in slight to moderate excess in Upper India and equally in defect in Burma, Upper Assam, North Bengal, North Bihar and the submontane districts of the North-Western Provinces. Over the remainder of India the departures from the normal pressure conditions were insignificant. The wave of low pressure was passing eastwards through the Gorakhpur district. Important changes were in progress over the Persian-Baluchistan region, where pressure had fallen briskly to rapidly, and the weather was disturbed with much cloud and light showers of rain. Winds had shifted to south and east over Baluchistan, but were unchanged in India generally.

No rain had fallen in India during the previous 24 hours, while 2·85 inches had been received at Trincomalle in Ceylon. Temperature had fallen rapidly in Baluchistan, and was now only about 4° above the average at Quetta. It had, on the other hand, increased rapidly in the North-Western Provinces and the Central Provinces, and was in moderate to considerable excess in these districts.

Friday, 8th January.—Pressure had given way over the whole Indian area—briskly to rapidly in Baluchistan, Upper India and the Gangetic plain, and slightly elsewhere. The low-pressure wave had reached North Bihar, where pressure was about a tenth of an inch in defect of the normal. Pressure had been reduced below the average over the whole country, but the amount of deficiency was generally very slight, except in Northern India and Burma, where it ranged between ·05″ and ·11″. There had again been no rain or snow in any part of India. Temperature was normal in Bengal and above it in the remaining districts.

Saturday, 9th January.—The pressure changes were generally unimportant, and did not affect or modify the general distribution of pressure. The wave of low pressure was marching through North Bengal, where pressure was about a tenth of an inch below the normal. Normal winds obtained generally. Beyond a light fall of snow at Minimarg and a few drops of rain at Chaman no rain was reported to have fallen anywhere. Temperature had increased rapidly in Baluchistan, Sind and Rajputana, but was practically stationary in all other districts. The mean temperature of the previous 24 hours exceeded the average in all divisions.

Temperature.—Weather was fine and settled throughout India during the greater part of the week, and there were hence no large or rapid changes of temperature such as usually occur during the cold-weather period. Temperature was excessive throughout the week in the Peninsula, but by steadily decreasing amounts. In Northern and Central India, on the other hand, the variations of temperature were determined by the passage of two waves of opposite character across that area, and were hence very irregular. On the whole temperature was more or less in defect over the greater part of that area during the first four days of the week and in excess during the last three days. The mean temperature of the week was in considerable excess in Bombay, Madras, and Burma, in slight excess in the Central Provinces, and practically normal in the remaining districts.

The following table gives data in illustration :—

Rain.—There were no important cold-weather storms during the week, and the rainfall of the period was hence very scanty, more especially when compared with the fall of the preceding two weeks. There were only two brief periods of slightly unsettled weather, *viz.*, the 3rd and 4th and the 5th and 6th. During the first period a general disturbance of the atmosphere gave light local showers of rain in the Assam Valley, Central Bengal, Chota Nagpur, the central and eastern districts of the Central Provinces and the Madras coast districts, and slight snow in the Punjab and Kashmir Himalayas. During the second period the precipitation was confined to Baluchistan, the North Punjab and the Kashmir and Punjab Himalayas, and was due to the passage eastwards through North-Western India of a feeble cold-weather disturbance from the highlands of Iran and Baluchistan. Weather was showery in Baluchistan also on the 8th and 9th, but the disturbance which occasioned these showers did not extend to India until the beginning of the next week.

The concluding rainfall statement shows that rain fell in 22 of the rainfall divisions. Of these, only seven obtained an actual average fall exceeding a tenth of an inch in amount. These divisions which received effective rain were the North-Western Provinces Hills, the Punjab Hills, the North Punjab, the central and Eastern districts of the Central Provinces and the central and southern coast districts of Madras. In four out of these seven districts the total fall of the week was in excess of the normal, but the amount of excess was insignificant, except in the eastern districts of the Central Provinces, where it averaged half an inch.

With the present week is commenced the period of the winter rains.

HEM RAJ,
Offg. Asstt. Meteorological Reporter to the Government of India.

SIMLA, *the 14th January 1897.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

ly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th January.*—No rain. The water-supply continues ample in the Carnatic, the Central and Southern districts and under largest works in the Deccan and Circars, but otherwise in the latter districts it is very scanty. Cultivation and sowings are proceeding in the southern half of the Presidency, where also the standing crop is generally in a good condition. In the Deccan and the Circars, except under wells and large irrigation works, there is but little cultivation proceeding, and the standing crop is generally in a bad condition, and the sowings made with the November rainfall are failing rapidly. Harvests in the south and on the west coast are yielding fair to average outturn, but elsewhere they are poor or bad. Pasturage is generally scarce and fodder dear, but except in parts of the Deccan the cattle are not yet suffering. Prices generally show little change, but are slightly dearer in Ganjam and in parts of the Deccan; elsewhere they are stationary or easier. *Cholam* (*Sorghum vulgare*) in Kurnool 16, in Bellary 14, in Anantapur 15, and in Cuddapah 14½ seers per rupee. The numbers relieved were:—Relief workers 20,833; kitchen inmates, chiefly dependants, 1,749 and weavers 6,259; all in the Deccan districts. The increase this week is in Bellary and is due to deepening of distress.

Bombay.—*For week ending 20th January.*—Slight rain fell in four non-affected districts. Rain is urgently wanted for crops lately sown in affected districts. The standing crops have been damaged by insects in one taluka of Karachi, by frost in four of Hyderabad and one of Thar and Parkar. They are thriving in Sind, Gujarat and Kolaba and are indifferent elsewhere. The crops recently sown are withering for want of rain in Poona, Sholapur, Bijapur, Belgaum and Dharwar. The sowing of the late crops has been completed everywhere. The autumn harvesting is finished except in Khandesh and Dharwar. Fodder is sufficient, except in the Deccan, Karnatak and Shikarpur. The grain supply is generally sufficient in the affected districts. Cotton picking is completed in Khandesh, and continues in Ahmedabad, Broach, Surat, Kathiawar, Wadhwan and Baroda. The condition of the agricultural stock is deteriorating in Poona, Ahmednagar, Sholapur, Bijapur and Dharwar, but is healthy elsewhere except in parts of Shikarpur, Hyderabad, Upper Sindh frontier, Thar and Parkar, Kaira, Khandesh, Nasik, Thana and Ratnagiri. Prices are rising in Belgaum and in parts of Surat, Ratnagiri, Poona, Sholapur and Bijapur; falling in parts of Broach, Surat, Ratnagiri, Poona and Bijapur; stationary in Hyderabad, Thar and Parkar, Admedabad, Panch Mahals, Kolaba, Kathiawar, and parts of Broach, Surat and Poona. The prices in the affected districts are:—Dharwar 13; Belgaum 12; Bijapur 10¾; Sholapur and Ahmednagar 10½; Poona 10; Nasik 9¾, Khandesh and Satara ½; Kolaba 8¾ seers per rupee. The average daily number employed on relief works were; Bijapur 50,291, Sholapur 43,118, Ahmednagar 25,947, Poona 13,088, Nasik 18,325, Satara 16,729, Khandesh 8,980, Belgaum 2,107. The number of non-working children were:—Bijapur 17,427, Sholapur 21,786, Ahmednagar 14,049, Poona 6,758, Nasik 9,686, Satara 4,072, Khandesh 3,995 and Belgaum 542. The returns for Ahmednagar are incomplete. The numbers on gratuitous relief were:—Bijapur 3,428, Sholapur 2,543, Ahmednagar 29, Poona 1,743, Satara and Nasik 2, Belgaum 249.

Bengal.—*For week ending 18th January.*—Except for light showers in the districts of Darjeeling, Champaran, and Durbhanga, there was no rain during the week. The harvesting of winter rice is being completed. In Behar the spring and poppy crops are generally reported to be doing well. Elsewhere the spring crops are said to be very poor save in portions of the Rajshahi and

Dacca Divisions, where they are expected to yield a fair outturn. Oilseeds and pulses are being gathered. Sugarcane pressing is going on in some districts. Spring rice is being transplanted, but wants rain in parts. The price of common rice shows a tendency to fall in some districts and to rise in others. In the distressed districts the prices of food grains on which the relief wages are based are:—Nadia (common rice) 10 seers, Khulna (common rice) 10 seers, Patna (common rice) 10½ seers, Shahabad (common rice) 10 seers, Saran (Indian corn) 10 seers 3 chittacks, Champaran (Indian corn) 10 seers, Muzaffarpur (Indian corn) 10 seers, Darbhanga (Indian corn) 9 seers 12 chittacks per rupee The numbers on relief works and in receipt of gratuitous relief on Saturday, the 16th January, were:—Relief works: Nadia 4,176 (men 2,300, women 388, children 1,488), Khulna 221 (men 94, women 24, children 103), Patna 609 (men 306, women 194, children 109), Shahabad 1,440 (men 559, women 613, children 268), Saran 16,522 (men 4,411, women 6,347, children 5,764), Champaran 107,786 (men 43,360, women 37,566, children 26,854), Muzaffarpur 4,975 (men 2,449, women 1,251, children 1,275), Darbhanga 98,117 (men 49,422, women 35,391, children 13,304). Total for the whole Province 233,846 against 136,979 in the previous week. Gratuitous relief: Nadia 12 (women), Khulna 100 (men 10, women 48, children 42), Saran 4,710 (men 901, women 3,015, children 794), Champaran 4,144 (men 1,044, women 2,001, children 1,099), Muzaffarpur 914 (men 505, women 244, children 165), Darbhanga 34,543 (men 7,603, women 18,139, children 8,801). Total for the whole Province 44,423 against 24,668 in the previous week. Numbers on private relief:—Relief works: Saran (Hatwa Raj) 3,086 (men 1,105, women 1,251, children 730), Darbhanga (Darbhanga Raj) 1,438 (men 1,103 women 167, children 168).

North-Western Provinces and Oudh.—*For week ending 20th January.*—There were light showers of rain in most districts during the week. In parts of Almora and Dehra Dun over one inch and three inches were respectively recorded. The spring crops are doing well; those on unirrigated tracts require rain. Cane pressing continues and irrigation is still in progress in some districts. A flight of locusts passed over a portion of the Almora district and caused slight injury to the crops. The numbers on receipt of relief on Saturday, 16th January, in 16 districts officially recognised as distressed, were as follows:—Agra 10,043, Etawah 4,086, Banda 121,378, Cawnpore 71,639, Hamirpur 43,619, Allahabad 134,345, Jhansi 27,524, Jalaun 48,375, Jaunpur 25,322, Gorakhpur 24,848, Lucknow 44,257, Unao 21,632, Rae Bareli 40,802, Sitapur 33,849, Hardoi 55,994, Bara Banki 18,418, total 726,131. This total is distributed as follows among the various methods of relief prescribed by the famine code which are in operation:—Employed on relief works 480,422, relieved as dependants 123,052, relieved in poor houses 36,706, relieved under other provisions of the famine code 85,951. The numbers relieved in twenty-one districts which are under observation, but not yet officially recognised as distressed, were on the same date as follows:— Relieved on test works 42,494, relieved in poor houses 13,911, relieved under other provisions of the famine code 13,155, total 69,560. The grand total in receipt of relief on the last day of the week was therefore 795,091. Supplies are generally sufficient. Fodder is getting scarce in the Central Doab and in Bundelkhand. Prices remain high, but show a tendency to fall in a few districts. The prices of staple food grains on which the famine wages are based are as follows:—In the districts officially recognised as distressed, Cawnpore, Hamirpur, Jaunpur, Lucknow, and Unao, ten seers; Etawah, Jhansi, Jalaun and Rai Bareli nine and three quarters seers; Sitapur and Allahabad nine and half seers; Hardoi nine and quarter seers; Banda ten and half seers per rupee.

Punjab.—*For week ending 20th January.*—Rain has fallen nearly all over the province. The fall has been general and abundant except in the Delhi Division. Nearly all the trans-Sutlej and Cis-Indus districts have received from 1 to 3 inches, and most have already received more than the average for December and January. The harvesting of the autumn crops is over; sugarcane-pressing is going on. Sowings of spring crops are nearly completed. Owing to recent showers the barley, *cheena* (*Panicum frumenta-*

ceum) and *toria* (*Brassica campestris*) sowings have been commenced in parts of Amritsar, but the rain came too late to allow any fresh sowings on a large scale. Ploughings for the extra spring crops have also commenced in Gujranwala. The condition and prospects of the standing crops have been greatly benefited by the recent rains in nearly all districts. The crops on dry land are still suffering for want of sufficient rainfall in the Delhi Division. More rain is still wanted there and in Mooltan. The outturn of sugarcane has been reduced by frost in Sialkot. The stock of food-grain is insufficient in Hissar and in parts of Jullundur, and with the cultivators of Amritsar and Gujranwala. Grain is being imported from Sindh into Hissar. The poorer classes are living partly on turnips in Shahpur, where cattle thriving is also said to be increasing owing to famine. Hail fell in one tahsil of Dera Ismail Khan, but did no damage. The cattle are generally in a poor condition owing to overwork and scarcity of fodder. The recent rains by relaxing the strain of work on the wells will give them considerable relief. Their condition is reported to be fair in Delhi and good in Umballa, and is also improving in Gujranwala. Pasturage and fodder are scarce in all districts except Umballa where it is said to be sufficient. It is reported to be unprocurable in parts of Gujranwala, but the fodder prospects generally have become much brighter since the recent general and well-distributed rainfall. The average number of persons employed on famine relief work is:—20,174 in Hissar, 3,035 in Ferozepore, 1,532 in Rohtak, 1,887 in Karnal and 38,161 in Gujrat; including 3,856; 276; 166; 65 and 11,606 persons respectively, gratuitously relieved. The average number employed on test works is 982 in Umballa, 208 in Sialkot, 107 in Mooltan, 265 in Gujranwala, 123 in Ludhiana, 759 in Jhelum, 1,830 in Delhi, and 177 in Gurgaon; including 375 in Delhi and 26 in Gurgaon gratuitously relieved. 1,108 men are also employed on ordinary works (tank clearing) in Gurgaon. No persons attended the Rawalpindi test works, and the number has decreased in Gurgaon, Karnal and Sialkot. The total number on relief and test works including those gratuitously relieved is about 70,000 against 60,000 last week. Prices have fallen generally from half to one seer per rupee owing to the recent rains, but have risen slightly in Rawalpindi and Gurgaon. They are still high everywhere, but the fall, though gradual, has been very steady for the last five weeks, and prices are now 15 to 20 per cent. lower than they were two months ago. Wheat is selling from 8 to 10½ seers, gram 9 to 11½ great millet 9¾ to 11¼, bulrush millet 9½ to 10, and maize 10 to 11½ seers per rupee. The effect of the recent rains on prices would have been more appreciable but for the dearth in other parts of India. The prices of the staple food-grain on which the famine wage is reckoned are:—Delhi (bulrush millet) 9½ seers, Umballa (maize) 10 seers, Ferozepore (great millet and maize) 11 seers, Sialkot (maize) 9 seers, Rohtak (gram and great millet) 10 seers, Karnal (gram and maize) 9½ to 11 seers, Gujranwala (wheat flour) 8 seers, Ludhiana (maize) 11 seers, and Mooltan and Jhelum (wheat) 9 and 8 seers, respectively, per rupee.

Central Provinces.—*For week ending 20th January.*—The weather has been somewhat cloudy and warm. The spring crops are generally in a fair condition except in Hoshangabad, and in one tahsil of Nimar. Slight damage is reported by insects induced by cloudy weather, in parts of Seoni, Nagpur, Bhandara, Balaghat and Raipur. The following estimates of outturn are given: Mandla twelve, Nimar four to twelve, Betul and Bhandara eight. Nagpur and Chanda eight to twelve annas. Fodder is generally sufficient except in Hoshangabad, and in parts of Nagpur. The food stocks are very small in Mandla. The numbers on relief works were:—Saugor 38,255, Damoh 24,301, Mandla 14,765, Seoni 4,345, Narsinghpur 14,303, Nimar 948, Betul 6,666, Chhindwara 3,613, Nagpur 3,323, Balaghat 6,079, Jubbulpore 64, 90, Chanda 1,349, Bhandara 8,340, Bilaspur 20,431; total 211,708, including 30,286 on gratuitous relief, and 20,000 on railway works in Saugor and Damoh. There were also 8,098 on ordinary works in Jubbulpore. No report received from Hoshangabad and Raipur. Relief works and poor houses have been closed during the week in Wardha, and none have been found necessary in Sambalpur. Prices of the staple food-grains on which the famine wage is based are:—Saugor, Damoh and Balaghat 9; Mandla 8½; Seoni, Narsingpur, Betul and Bhandara 10; Hoshangabad 11; Nimar 10½; Chhindwara 12; Nagpur 13¾; Chanda 13, Jubbulpore 10; Bilaspur 10⅔ and Raipur 10½ seers per rupee.

Burma.—*For week ending 16th January.*—In Lower Burma the reaping and threshing is progressing. Reaping has been completed in four districts of Upper Burma. Reaping of main paddy has been completed in most districts, and ploughing and transplanting of dry-weather paddy is progressing in Mandalay. Nearly two-thirds of wet-weather paddy in the Amarapura sub-division has failed from want of rain. The island crops are estimated at 12 annas in Minbu, and are good in Magwe. The jowar (*Sorghum vulgare*) crop varies from four to ten annas in Pakokku, and has failed on high lands in Meiktila. In the Pyinmana sub-division a full *jowar* (*Sorghum vulgare*) crop has been reaped. Peas promise an eight anna crop in Pakokku, but are very poor in parts of Meiktila and Myingyan. The price of paddy has risen slightly in Rangoon, Thongwa and Thayetmyo, and has fallen largely in Upper Chindwin; considerably in Myaungmya, Toungoo, Thaton, Pakokku, and slightly in Tharrawaddy, Amherst, and Mandalay; elsewhere prices are stationary. The numbers on relief works were:—Meiktila 16,596, Myingyan 7,683. On gratuitous relief:—Meiktila 2,995, Yamethin 325 and Myingyan 2,627. The price of rice in Meiktila is 8 seers 15 chittacks and in Myingyan 9 seers 5 chittacks per rupee.

Assam.—*For week ending 19th January.*—The weather is seasonable. Slight rain fell in Cachar, but rain is badly wanted for all standing crops in Sylhet and for pulses in Goalpara. The reaping of the late rice is finished, mustard is being gathered, and the pressing of sugarcane and pruning of tea has commenced. The outturn of late rice is average in the Surma Valley, good in Upper and poor in the Lower Brahmaputra Valley. Prices of common rice are:—Silchar 8 seers 14 chittacks, Sylhet, Gauhati, and Tezpur 10, and Sibsagar 11 seers per rupee. Fodder is insufficient in Cachar and the Khasi Hills. Water is sufficient except in Cachar and parts of Nowgong.

Mysore and Coorg.—*For week ending 20th January.*—MYSORE: Prices have slightly risen in Tumkur and fallen in Chitaldroog, Bangalore, Kadur, and Shimoga. Paddy and *ragi* (*Eleusine coracana*) are being harvested in Bangalore, Mysore, and parts of Chitaldroog and Kolar.

COORG: The reaping of rice has been completed in parts and the picking of coffee continues. Prices of food-grains are normal. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 20th January.*—BERAR The weather is cool. Of the winter crops wheat, gram, and linseed are in poor condition owing to insufficient moisture. The preparation of land for the monsoon crops is in progress in three districts. Fodder and water are inadequate. Prices almost stationary.

HYDERABAD No rain during week ended 16th January. Agricultural prospects are fair in all divisions except Gulburgha, where apprehensions of the standing spring crops drying up exist if rains fail. Fodder and pasture are scarce. The water-supply is decreasing. Prices are:—wheat 7, coarse rice $7\frac{1}{4}$, white *jowari* $11\frac{1}{2}$, yellow *jowari* $13\frac{2}{3}$, gram $9\frac{1}{1}$, and tur $11\frac{1}{4}$ seers per current sicca rupee.

Central India.—*For week ending 20th January.*—No rain fell in the Central India Agency during the week. Agricultural operations have been completed in eight districts of Bundelkhand and are in progress in all other Agencies. Winter crops are in good condition in Malwa and in two districts of Gwalior; indifferent in Baghelkhand; fair in Bhopal and in parts of Bundelkhand, and bad in other parts of Gwalior and Bundelkhand. Agricultural stock is in fairly good condition in Bhopal, Malwa, Bundelkhand, and in parts of Gwalior; indifferent in Baghelkhand and in parts of Gwalior. Pasturage is indifferent in Baghelkhand, Bundelkhand, and in parts of Gwalior; fairly good elsewhere. Prices are above normal and are rising in Bhopal, Bundelkhand, Baghelkhand, and Malwa; and steady in Gwalior. The opium crops are in good condition in Gwalior and Malwa, fair in Bhopal. The number of persons employed on famine relief works were:—Gwalior 8,656, Bundelkhand 11,827; and Baghelkhand 18,759; and on gratuitous relief:—Bundelkhand 1,932; Baghelkhand 2,020; not reported from Gwalior. Prices of staple grains on which the famine wage is based, were:—in Gwalior 10 and in Baghelkhand $9\frac{3}{4}$ seers per rupee.

Rajputana.—*For week ending 20th January.*—Slight rain fell in Abu, Marwar, and Jaisulmere. Agricultural operations are satisfactory in Jhallawar, Kotah, Jeypore and in Ajmere-Merwara; fairly satisfactory in Kherwara; and poor in Dholepore. The standing crops are in good condition except in Dholepore; they have been damaged by frost in places in Meywar. The prospects of the harvests are favourable in Jeypore; fair in Bhurtpore; below average in Haraoti and average in Ajmere-Merwara. Cattle are generally in good condition except in Bhurtpore. Pasturage and fodder are failing in Bhurtpore and Dholepore; are scarce in some tehsils of Jeypore; and sufficient elsewhere. Prices are fluctuating in Serohi, Kotah and Bikanir; rising in Pertabgurh, Ajmere, Bhurtpore, and Jaisulmere, high in Haraoti; falling in Meywar; steady elsewhere. The number of persons employed on relief works were:—Marwar 6,322; Kotah 1,000; Dholepore 5,221; Bhurtpore 348; Bikanir 12,016; Jaisulmere 713; and on gratuitous relief:—Marwar 958; Bhurtpore 437; Bikanir 1,473; Jaisulmere 12. The price of food grains on which the famine wages are based, were:—Marwar 8 seers 8 chittacks; Kotah 14½; Dholepore 11¼; Bhurtpore 9 seers 5 chittacks; Bikanir 8 seers 7½ chittacks to 8 seers 13 chittacks; Jaisulmere 8¼ seers per rupee.

Kashmir.—Report not received.

Nepal.—*For week ending 16th January.*—Slight rain has fallen. Weather changeable. Prospects good. Price 8 seers per rupee.

DENZIL IBBETSON,
Secretary to the Government of India.
